''They think it has to be a flex hose that broke or burst or something because the whole system's been leak checked,'' said an engineer who requested anonymity. ''How does a system that's been leak checked suddenly fail so massively? We've never had anything like that.''

To find out if the seal was at fault, engineers planned to pressurize Columbia's external tank with helium overnight, starting at a level of 2 pounds per square inch and increasing to 9.7 psi. As the pressure rises, engineers planned to use special instruments to monitor the seal for leaks.

''If they see a massive amount of (helium) coming out, then there you go '' the engineer said. ''But they don't think that'll happen. Hopefully, something will stare them in the face'' that can be easily fixed.

Columbia's disappointed seven-member crew, meanwhile, flew back to the Johnson Space Center in Houston to await developments.

But engineers were not expected to begin tracing the leak until overnight Wednesday and no decisions on a course of action were expected before Thursday.

Columbia's astronauts were in the process of preparing for launch when multiple internal and external alarms went off during fuel loading Tuesday indicating high levels of hydrogen gas in and around the ship's engine compartment.

In a normal fueling, engineers would expect hydrogen levels of about 500 parts per million. In Columbia's case, the hydrogen concentration was at

2,875 parts per million and climbing when fueling was stopped with the tank about 5 percent full. The ''danger'' level is considered to be 40,000 parts per million.

The shuttle's engine compartment is pressurized with inert nitrogen gas during launch and there was never any danger of a fire or explosion on board the orbiter.

But sensors outside the shuttle, near where the main hydrogen line enters the orbiter, detected levels of 41,000 parts per million. NASA officials, however, said the shuttle ''was never in an unsafe condition at any time.''

Analysis revealed two unrelated hydrogen leaks: a small leak in a ground fuel supply pipe called a ''high-point bleed line'' on the shuttle's mobile launch platform and the other, more serious leak in the area of the 17-inch hydrogen fuel line system.

Engineers were hopeful they could make repairs at the launch pad because a roll back to the Vehicle Assembly Building would delay launch three weeks or so and virtually wreck NASA's already-tight launch schedule.

Compounding NASA's problems, both VAB shuttle stalls are occupied by boosters and tanks scheduled for use by the shuttle Atlantis in July and Columbia in September.

To make room for Columbia, engineers would have to either move Atlantis's completed booster and tank set out to launch pad 39B - minus Atlantis - or disassemble the partially built boosters scheduled for use by Columbia in September.

Columbia skipper Vance Brand, 59, co-pilot Guy Gardner, 42, Robert Parker, 53, and civilian astronomy Ronald Parise, 39, left for Houston early Wednesday. Their crewmates - John ''Mike'' Lounge, 43, Jeffrey Hoffman, 45 and astronomer Samuel Durrance, 46 - followed suit shortly before noon.

The goal of the flight is to operate a battery of four telescopes to study X-ray and ultraviolet light from energetic stars and galaxies, radiation that is blocked by Earth's atmosphere.

The ''Astro-1'' observatory aboard Columbia originally was scheduled for launch May 17, but the flight was delayed two weeks because of work to replace a faulty cooling system valve.

Whenever it gets off the ground, Columbia's mission is expected to revolutionize knowledge about high-energy astronomy, giving scientists their first detailed look at the heavens in X-ray and ultraviolet light, which is blocked by Earth's atmosphere.

WASHINGTON (MAY 30) UPI - The Commerce Department said Wednesday it will represent the United States in discussions with the European Community and Japan about the feasibility of an international ''intelligent manufacturing'' system research program on ''intelligent manufacturing'' systems.

These systems integrate people, machines and computers in the manufacturing process to improve efficiency and create greater flexibility.

Japan's Ministry of International Trade and Industry suggested a $1 billion program to European and U.S. industry groups. The program would focus on computer software, artificial intelligence and systems integration.

At a meeting in Brussels earlier this month, government officials from the United States, EC and Japan agreed that any collaboration on a research project would be a joint project.

''Our aim is that everyone's interests be served in a balanced manner. We look forward to working with our private sector to outline goals an international program might pursue,'' Commerce Secretary Robert Mosbacher said.

Commerce officials and EC representatives will present their proposals for the research project to Japanese officials in September.

PHILADELPHIA (MAY 30) UPI - The University of Pennsylvania's Museum of Archaeology and Anthropology has received a $1.6 million pledge from an alumnus to endow the museum's directorship, the university said Wednesday.

The pledge was made by archaeologist Charles Williams II and his family who have contributed $2.9 million for various museum endeavors since 1987, the university said. In addition, Williams and his family have endowed a chair in Roman Architecture in the university's art history department.

Williams, who is a member of the museum's board of overseers, has contributed a total of $4 million to Penn's $1 billion capital campaign, the university said.

"You always want your money to go to the place where it will be best used," Williams said. "As far as I'm concerned, that place is with Penn and the museum's programs."

Williams received his doctorate degree in classical architecture from Penn in 1978. He is field director of the Corinth Excavations at the American School of Classical Studies in Athens, Greece, where he has worked since 1968.

Founded in 1887, the University Museum of Archaeology and Anthropology has carried out more than 300 expeditions in 33 countries. Its collection includes materials from China, the Near East, Greece, Africa, Egypt, the Pacific Islands, and the Americas.

#90150u1375 05/30/1990 ~United Press International

MANILA, PHILIPPINES (MAY 30) UPI - The salvage ship USS Beaufort rescued 101 Vietnamese refugees aboard two crippled boats drifting in the South China Sea, one with little food and no drinking water and the other whose occupants were suffering from a variety of illnesses, a U.S. Navy spokesman said Wednesday.

The Beaufort offloaded the refugees on arrival Wednesday morning at the U.S. Subic Bay Naval Base, 50 miles north of Manila, said Senior Chief Petty Officer James Jones.

The first boatload of 24 refugees - 13 men, 2 women and 9 children - was picked up about 120 nautical miles from Vietnam last Thursday, he said.

Crewmen aboard the Beaufort spotted a smoke signal and white flag and came to the 23-foot boat's rescue, Jones said.

''The ship's commanding officer decided to take the refugees aboard after studying (it) and confirming that it had only one kilo of rice and no drinking water on board,'' the spokesman said.

On Saturday, the Beaufort encountered a second boat 40 feet long and carrying 77 Vietnamese - 31 men, 27 women and 19 children - about 300 nautical miles from the Philippines, Jones said.

''They were suffering from dehydration, seasickness and malnutrition after 10 days at sea,'' he said.

An unidentified Vietnamese girl interviewed on the U.S. military television Far East Network (FEN) said the boat was in danger of sinking when it ran into the Beaufort.

Jones said Navy authorities were awaiting permission to take the Vietnamese to Philippine refugee camps.

The rescue operation came nearly two weeks after a workshop sponsored by the United Nations High Commissioner for Refugees in Manila failed to resolve a demand by first asylum countries in Southeast Asia for the mandatory repatriation of boatpeople.

Hong Kong and the Association of Southeast Asian Nations (ASEAN) introduced a resolution during the meeting warning they would take unilateral measures for the forcible return of the refugees to Vietnam unless the issue was resolved soon.

The resolution said the presence of the refugees in first asylum countries had become a strain on their economies. ASEAN is composed of the Philippines, Indonesia, Malaysia, Singapore, Thailand and Brunei.

Hong Kong hosts more than half of the estimated 100,000 boatpeople in squalid refugee camps in nine Asian countries.

The United States and Vietnam are opposing the forced repatriation of the boat people on humanitarian grounds. Hong Kong has been returning ''volunteers'' aboard chartered flights to Hanoi.

#90150u1391 05/30/1990 ~United Press International

(MAY 30) UPI - An extensive earthquake rocked the southwest Soviet Union and other parts of Eastern Europe today. The quake shook buildings in Moscow, although there is NO apparent damage. The U-S Embassy was evacuated and closed as a precaution. There are reports of damage in Romania and Bulgaria. And there are reports that the quake was felt in Yugoslavia and Turkey as well. The quake was centered in the Carpathian mountains. Estimates of the strength of the quake range from six to seven-point-five on the Richter scale.

The government barometer of future economic activity is down two-tenths of one percent. The Commerce Department says the Index of Leading Economic Indicators plunged in April because of the third straight monthly decline in new building permits. The department also reported this morning the index increased by a revised one percent in March after declining one percent in February. Of the 11 indicators that contribute to the government barometer, six were negative.

Soviet President Gorbachev is beginning a day of meetings in Canada's capital. The Soviet leader has indicated he wants to better his nation's ties with Canada. After his arrival in Ottawa yesterday, Gorbachev said he wanted to be partners with Canada and other nations on what he termed ''the project of a modern European home.'' He recalled that the Soviet Union and Canada were allies during World War Two.

The Soviet Parliament plans to debate bills creating a multi-party system and expanding the rights to freedom of conscience and religious belief. The Tass news agency said debate would begin today in separate sessions of the two chambers. The measure legalizing political organizations would codify the Communist Party's February decision to end its nearly 70-year monopoly on power.

A second death has occurred from a gas well explosion in Heidelberg, Mississippi... and two other people are hospitalized in critical condition. The natural gas well exploded in flames yesterday afternoon. The Jasper County Civil Defense Director, Joe Stringer, says crews will try to cap the well today. Most of the people evacuated from the area have returned home.

#90150u1407 05/30/1990 ~United Press International

NIZZANIM, ISRAEL (MAY 30) UPI - The Israeli armed forces Wednesday thwarted a sea attack by heavily armed guerrillas in two speedboats who had planned to strike holiday resort beaches, the army said.

Maj. Gen. Amnon Shahak, chief of army intelligence, said the Palestine Liberation Front faction led by Mohammed Zaidan Abbas planned the attack, which he said was organized in Libya.

Abbas, who is known as Abul Abbas, is suspected of planning the 1985 hijacking of the Italian cruise ship Achille Lauro.

Four Arabs were killed Wednesday when the Israeli military intercepted one of the two speedboats in Nizzanim near the port city of Tel Aviv, spokesmen said. They said there were no Israeli casualties and that the other speedboat was intercepted without injury or death.

Military sources said the speedboats were launched several miles off the coast by a larger ship that apparently had set sail from the Libyan port of Benghazi. They said the mother ship then probably headed toward Port Said, Egypt.

They said Egyptian authorities were notified of the developments.

''From what we know up until now, all the preparations were carried out in Libya,'' Shahak said. ''The forces' objectives were to strike at the area of the hotels in Tel Aviv.''

Foreign Minister Moshe Arens said the planned attack was a manifestation of the ''aggressive policy against Israel'' announced this week at the Arab Summit in Baghdad, Iraq.

''It is no surprise that while the Arab countries declare war on the Jews' right to immigrate to Israel, PLO terrorists try to assassinate Jews on Israeli soil,'' he said.

Abbas's Front is a faction within Yassir Arafat's Palestine Liberation Organization, which denounced terrorism in 1988 and is attempting to set up negotiations with Israel. Abbas remains on the executive board of the PLO.

In Washington, State Department spokeswoman Margaret Tutwiler said, ''the United States is horried by this terrorist attack'' and that U.S. officials will review the evidence with Israeli officials.

''If, indeed, it was done by the Palestine Liberation Organization, we'd view it as a serious matter,'' she said.

Patrol boats, airplanes, helicopters, infantry and police joined the massive operation to stop the would-be infiltrators.

The army spokesman said the mother ship lowered four rubber speedboats but two were inoperable and turned back.

The gunmen in the two boats that continued toward the Israeli shore carried a large store of weapons, including machine guns, grenades and anti-aircraft missiles, army officials said.

The first speedboat was detected 20 miles offshore at about 7 a.m. by radar in Tel Aviv, Rear Adm. Micha Ram, commander of the navy, told a news conference in Tel Aviv.

Navy gunboats intercepted the speedboat off Ga'ash, 10 miles north of Tel Aviv, and the five gunmen aboard were captured, he said.

The second boat landed near Nizzanim, about 20 miles south of Tel Aviv. Soldiers, police and army helicopters pursued the gunmen, killing four and capturing several others, the spokesman said.

An eyewitness, Shlomo Mano, was on the Nizzanim beach when he spotted one of the speedboats approaching.

''I said to my brother-in-law, 'You know what I think. They are terrorists.' I had not even finished joking when we heard an (Israeli) gunboat approaching the area,'' he told Army Radio.

He said the Israeli gunboat opened fire on the speedboat.

''There was a war there,'' he said. ''There was such firepower that I do not believe there is a chance of anyone coming out of there alive.''

#90150u1409 05/30/1990 ~United Press International

ATHENS, GREECE (MAY 30) UPI - The United States and Greece initialed an eight-year agreement allowing two key U.S. military bases in the Mediterannean to continue functioning on Greek soil, officials said Wednesday.

The pact came four days before Prime Minister Constantine Mitsotakis was to leave for the United States on an official visit including a meeting with President Bush.

State Department spokeswoman Margaret Tutwiler said that the agreement was initialed Wednesday, and will probably be formally signed in July. Since it is in the form of an executive agreement, U.S. congressional approval will not be required but the Greek Parliament will have to agree to the terms.

Greek government spokesman Byron Polydoras said the final agreement may be signed during Defense Secretary Dick Cheney's visit to Athens, scheduled for July.

The agreement came just two days after officials of the two sides entered their final round of discussions in Athens on the future of the bases. The negotiations, which began in November 1988, were resumed early this month after a one-year break.

U.S. negotiator Alan Flanigan and Greek Foreign Ministry official Christos Zacharakis initialed the text of a new Defense and Economic Cooperation Agreement, under which the U.S. bases will operate in Greece.

Mitsotakis said Monday that the new agreement on the bases would run for eight years.

The previous agreement, a five-year deal, expired in December 1988. The United States had originally until this month to dismantle the bases unless a new agreement was signed, but Greece extended the period until November.

The text of the new agreement was not immediately released. Polydoras said it was still classified, but would be made public in 15 days after being submitted to appropriate services in the U.S. Departments of Defense and State.

The new agreement will allow two major U.S. military facilities, a naval and an air base on the Mediterranean island of Crete, to continue operating on Greek soil. Tutwiler said there would be a substantial

reduction in the number of U.S. military personnel based in Greece.

Four major U.S. bases and some 20 minor facilities operated in Greece under the previous deal, but Washington unilaterally decided in January to dismantle a naval communications base at Nea Makri near Athens and an air base at Hellenikon just outside the capital.

The Nea Makri base was in the process of being dismantled when the new agreement was initialed.

Immediately after the final signing, the new pact will be submitted to the Greek Parliament for ratification by a simple majority.

Polydoras said the U.S. decision to close the Nea Makri and Hellenikon bases facilitated the negotiations on the new agreement. The two bases are being closed as part of U.S. cuts in defense spending.

#90150u1410 05/30/1990 ~United Press International

WASHINGTON (MAY 30) UPI - The widely used carbon-14 method of determining the age of fossils, rocks and ancient human artifacts may be off by as much as 3,500 years, scientists said Wednesday.

Geologists from Columbia University in New York said the carbon-14 dating method appears to have significantly underestimated the age of many prehistoric objects.

The findings will likely lead to revisions of many important archeological and geological dates, such as the first cave paintings and other hallmarks of human culture, times of early human migrations and the dates of recent glacial advances. For example, the peak of the last Ice Age would shift from 18,000 to 21,000 years before present.

Carbon-14, a radioactive form of carbon, steadily decays into nitrogen. For decades, scientists have determined the age of objects dating back from 10,000 years to 40,000 years ago by looking at the ratio of carbon-14 to nitrogen.

The Columbia team used a new, highly accurate technique based on the decay of uranium into thorium to date fossilized coral found near Barbados, and then compared those dates to results of carbon-14 dating.

''Before 9,000 years before present, the carbon-14 ages are systematically younger than the uranium-thorium ages, with a maximum difference of about 3,500 years at about 20,000 years before present,'' Edouard Bard and his colleagues wrote in a study published in the journal Nature.

The difference between the carbon-14 and uranium-thorium dates first showed up in coral specimens older than 8,000 years old and the gap increased with the age of the samples.

Although researchers do not know the reason for the differences, Richard Fairbanks, one of the authors, said it may be from shifting amounts of carbon-14 in the atmosphere, which ''would make the carbon-14 'clock' run faster.''

Possible factors boosting the carbon-14 level might have been greater emissions of the radioactive element from the sun or a weaker magnetic field allowing more of the material to enter Earth's atmosphere, researchers said.

The Columbia team has developed a conversion chart, which it calls the ''Barbados sea-level curve,'' that can be used to correct carbon-14 dates up to 40,000 years ago.

In the period affected by the dating revision, called the upper Paleolithic, the race of humans living in Europe was called Cro-Magnon man. They are thought to have produced the first known examples of art - statuettes and cave paintings in France and Spain.

The new study marks the second time the accuracy of carbon-14 dating has undergone a major adjustment. Other researchers have refined carbon-14 dating for objects younger than 8,000 years by comparing carbon-14 dates with the annual growth rings of fossilized trees.

#90150u1423 05/30/1990 ~United Press International

WASHINGTON (MAY 30) UPI - The agreement to be signed this week by President Bush and Soviet President Mikhail Gorbachev to slash chemical weapons stockpiles still poses one problem: a Soviet inability to actually destroy the poison gas.

As a result, the Army is offering to share U.S. technology with the Soviets, whose only chemical destruction site at Chapayevsk south of Moscow was shut down after a public outcry over potential environmental and safety problems.

Building a new chemicals destruction plant in the Soviet Union could take several years, U.S. officials said.

Army Col. Walter Busbee, who is in charge of the U.S. chemical destruction program, is going to Moscow next week to discuss the American technology. And a U.S. delegation will visit Chapayevsk in August to see if it ''can offer any assistance,'' Army spokesman Maj. Joe Padilla said Wednesday.

In addition, Soviet military representatives in the fall will visit the new $305 million U.S. chemical weapons destruction facility on Johnston Atoll in the Pacific - the first of eight or nine plants that are projected to be built.

''There's a lot of cooperation now between us,'' Padilla said.

The Johnston Atoll facility is expected to become operational soon, after the issuance of an environmental impact statement in late June or early July and completion of the first ''verification'' test burn.

The U.S.-Soviet pact to be signed Friday calls for an end to the production of poison gas and the reduction of each side's stockpiles to about 5,000 tons, with the remaining gas to be destroyed if there is a world ban.

The Soviet Union has publicly announced the size of its chemical stockpile as approximately 50,000 tons, while the United States - refusing to disclose its stockpile size - is believed to have about 25,000 tons.

The Soviet Union said it stopped production in 1987, while the United States resumed production of chemical weapons in December 1987 following a nearly two-decade moratorium.

The new U.S. chemical weapon in production is called a ''binary,'' because it carries two non-lethal chemicals that are separated until the weapon is fired. Then, the two ingredients mix automatically and become a deadly nerve gas.

These are to replace the aging U.S. stockpile of ''unitary'' chemical weapons that do not have this safety feature.

Even before the U.S.-Soviet chemical arms accord was agreed to, Congress had ordered the Army to destroy 90 percent of the existing stockpile of unitary weapons by 1997.

Under current plans, the Army will begin in late summer or early fall to remove 400 tons of nerve gas from West Germany in a withdrawal that by the end of the year will leave the United States without chemical weapons in Europe.

The weapons will be destroyed on Johnston Atoll, Padilla said.

At the same time, the United States was forced this past January to virtually halt new production of ''binary'' weapons because the two U.S. manufacturers of the necessary chemical, thionyl chloride, refused to supply it to the Army on moral grounds. The Army has not yet found another

supplier.

Despite the forced halt in production and the congressional order, U.S. officials call this arms agreement a ''significant step'' toward achieving a multilateral global ban at chemical weapons talks in Geneva, Switzerland.

CIA Director William Webster has said that ''as many as 20 countries may be developing chemical weapons,'' and the director of naval intelligence, Thomas Brooks, listed these 13 Third World countries as developing or having achieved a chemical warfare capability:

Iraq, Iran, China, North Korea, Taiwan, Burma, India, Pakistan, Syria, Israel, Egypt, Ethiopia and Libya.

#90150u1438 05/30/1990 ~United Press International

ROYAL, IA (MAY 30) UPI - Two Air National Guard fighter planes collided Wednesday over western Iowa but all three people aboard bailed out safely, officials said.

Two of four planes on routine training from the 114th Tactical Fighter Group in Sioux Falls, S.D., collided about 10:30 a.m., said Maj. Robert King, public information officer for the Iowa Adjujant General's Office.

''During the maneuvers, two of the planes touched and obviously crashed,'' King said. ''But three persons are on the ground after parachuting safely.''

Radio station KICD in Spencer said the planes carried two pilots and a reporter from the Sioux Falls Argus Leader.

Authorities have not released the names.

Spencer Hospital administrator Jim Striepe said three people were being evaluated for injuries from the accident but no condition report was available.

The other two aircraft returned safely to Sioux Falls Field, King said.

King and the Pentagon in Washington said the planes were A-7 Corsair attack jets of the Vietnam War era. One was a two-seat A-7K fighter trainer while the other was a single-seat A-7D fighter.

The crash created a huge ball of flame that KICD said could be seen 40 miles away.

Dozens of residents on the ground were watching the jets go through their

maneuvers and witnessed the crash.

''I was watching the jets do maneuvers with my binoculars and I watched the two jets collide, they came to the ground in a ball of fire,'' said Robert Larsen, an Iowa State University student from Spencer. ''I saw three parachutes coming down. The pilots appeared in good shape; one had cuts and bruises.''

Witnesses said the plane wreckage was strewn over four square miles. The main fuselage of one of the planes was buried in a farm field.

#90150u1452 05/30/1990 ~United Press International

FRANKFORT, KY (MAY 30) UPI - First lady Martha Wilkinson ended weeks of speculation about trying to succeed her husband as governor and filed papers forming a campaign committee Wednesday.

Documents for the ''Martha S. Wilkinson for Governor Committee'' were signed and filed with the Kentucky Registry for Election Finance.

Mrs. Wilkinson had said she would consider entering the 1991 governor's race if her husband, Gov. Wallace Wilkinson, failed to get the General Assembly to pass a constitutional amendment allowing him to succeed himself.

Kentucky governors cannot serve consecutive four-year terms, but Wilkinson could run for lieutenant governor, a move he said he would consider if his wife asked him.

The state Legislature refused to address such an amendment.

Mrs. Wilkinson, who was in Manchester Wednesday to present a check to officals for a prison project, could not be reached for comment.

Wilkinson said last week that his wife would probably announce her decision after the primary election held Tuesday.

Various state officials have confirmed that a fund-raiser for Mrs. Wilkinson is scheduled for next month. The event will reportedly carry a $1,000 ticket cost.

Lt. Gov. Brereton Jones, Lexington Mayor Scotty Baesler and Dr. Floyd G. Poore, who has served as an aide in the past two administrations, have also announced their candidacy for the 1991 governor's race.

Other probable candidates are Lexington attorney Gatewood Galbraith, who favors the legalization of marijuana, and Republican state Rep. John Harper.

Rep. Larry Hopkins, R-Ky, has also said he is thinking about entering the race and the names of Rep. Jim Bunning, R-Ky., and state auditor Bob Babbage have also been mentioned.

#90150u1466 05/30/1990 ~United Press International

RANGOON, BURMA (MAY 30) UPI - Burma's opposition party added to its massive election mandate amid jubilant cheers of its followers Wednesday and began making plans for assuming power from the military.

With a huge crowd outside its headquarters cheering each new report of

victory from the general elections held Sunday, the opposition National League for Democracy (NLD) picked up 388 seats in the 485-seat National Assembly.

By contrast, the well-financed pro-military National Unity Party (NUP) had won only nine seats, according to the unofficial returns.

Maj. Gen. Khin Nyunt, the powerful secretary of the State Law and Order Restoration Council (SLORC) - the ruling military junta - said the elections in this Southeast Asian socialist republic had been ''the fairest, freest and cleanest'' ever held in Burma.

But he complained ''some persons from abroad were still unable to understand our true attitude.''

(Burma expelled a British journalist Wednesday, accusing him of posing as a businessman to cover the elections for the British Broadcasting Corporation (BBC), official Rangoon radio said.

(The journalist's name was indistinct in the broadcast, but BBC identified him as Lindsey Shanson, a Singapore-based free-lance journalist who works for Jane's Defense Weekly in Britain and newspapers in Israel).

Many Western diplomats in Rangoon agreed with the assessment that voting had been fair, even though they had predicted a rigged election after a tightly-controlled campaign that had included the arrest of hundreds of political activists.

The victorious party has begun internal planning for its future.

An NLD spokesman said the party central executive committee will meet Friday to decide on the steps to be taken now that the party is certain to be the first to form a democratically elected government in 30 years.

The junta has said it will give up power once a new constitution is drafted and a government installed.

But it was not clear how long that will take.

The fate of NLD leaders Aung San Suu Kyi and Tin U, who have been under arrest since July last year, is also unclear.

Aung San Suu Kyi, the 44-year-old daughter of Burma's national independence leader Gen. Aung San, has been under house arrest without charge. Reporters who visited her home Tuesday said it is still surrounded by military personnel who prevented outsiders from approaching it.

Tin U has been sentenced to three years imprisonment for attempting to

divide the military.

Burmese political sources said the NLD will probably move cautiously on any major changes.

''People remember the last time the military held free and fair elections in 1960,'' said a Burmese dissident contacted by telephone from Bangkok.

''The military-backed party lost those elections and gave up power, but within two years the army had seized power again.''

U Kyi Maung, an opposition leader who won a legislative seat, said he was confident that the party would get an overwhelming majority and be able to form a strong government.

Burma, which the military has insisted on calling by its Burmese-language name Myanmar, was one of the most prosperous countries in Southeast Asia when it won independence from Britain in 1947. It was the world's leading exporter of rice and also exported teak, crude oil, jade, rubies and sapphires.

#90150u1474 05/30/1990 ~United Press International

BAALBECK, LEBANON (MAY 30) UPI - A pro-Iranian fundamentalist leader said Wednesday that Western hostages held in Lebanon may be killed in retaliation for U.S. statements perceived by Arab states to be negative.

The comments by Seyyed Hussein Musawi contributed to a general increase in tensions in the Middle East Wednesday after Israeli armed forces thwarted an attempt by terrorists to launch an attack on Israeli beaches from two speedboats.

''Hostages may be killed in retaliation for mounting pressures and negative stands by the United States,'' Seyyed Hussein Musawi told United Press International in an interview at his heavily guarded residence in the ancient town of Baalbeck, 50 miles east of Beirut.

''It happened in the past,'' Musawi said, alluding to the reported killing of U.S. Colonel William Higgins last July in retaliation for Israel's snatching of pro-Iranian clergyman Abdel Karim Obeid from southern Lebanon.

Musawi is leader of the Islamic Amal Movement, a group that is reported to be closely linked to the pro-Iranian Hezbollah, or Party of God. Hezbollah is believed to be behind the kidnappings of six Americans and nine other Westerners.

The fundamentalist, who has links with both Iran and Syria, said a recent

U.S. statement that branded both countries among states backing terrorism ''has complicated the hostage issue.''

The State Department's annual report on global terrorism issued April 30 listed Iran and Syria among those countries that supported international terrorism, and Congress recently recongnized Jerusalem as the capital of Israel, despite protests from Palestinian groups that claim the city is illegally occupied.

''All these developments reflected negatively on the hostage issue,'' Musawi said.

Captors released U.S. hostages Frank Reed and Robert Polhill in recent weeks but six Americans and the other Westerners are still held, including former hostage-negotiator Terry Waite.

Musawi said he believed Waite was alive.

''I gathered clues through security means proving that Waite is alive,'' he said.

There have been conflicting reports concerning the condition of Waite, who was taken hostage Jan. 20, 1987 while seeking to negotiate the release of U.S. hostages in terror-plagued West Beirut.

#90150u1490 05/30/1990 ~United Press International

WASHINGTON (MAY 30) UPI - Raisa Gorbachev, who made a splash on her 1987 trip to Washington, will share the limelight with Soviet leader Mikhail Gorbachev when he visits the United States, but she has her own schedule.

The highlight of Mrs. Gorbachev's visit will be her joint address with first lady Barbara Bush to graduates at Boston's Wellesley College on Friday.

The Soviets gave no advance word on the subject of Mrs. Gorbachev's speech. On previous occasions she has reflected strong ideological views, but considering the changes in the Soviet Union, she may steer away from that approach this time.

Mrs. Gorbachev, a former professor of philosophy, will take part in the traditional welcoming ceremonies in honor of her husband on the south lawn of the White House Thursday morning. She will then join Mrs. Bush in the family quarters for tea with some of the diplomatic wives.

Afterward she will return to the Soviet Embassy, where the Gorbachevs will hold a noon luncheon in honor of some 70 so-called American intellectuals.

In the afternoon, Mrs. Gorbachev will open a special exhibition of rare historic manuscripts at the Library of Congress of Russian works and mingle with some government dignitaries and Washington elite at a reception.

The reception's host is Armand Hammer, chairman of Occidental Petroleum Corp., and a longtime friend of the Soviet Union.

She also will tour the Capital Children's Museum, where she will meet with Anton Kumankov, author of a Soviet children's book, ''No Children in the World Are Strangers.'' At the museum, she will see a state of the art television station for children and an animation laboratory.

In the evening, Mrs. Gorbachev will accompany her husband to the White House for a state dinner in their honor.

Mrs. Gorbachev and Mrs. Bush have been invited to join their husbands during the signing of several treaties and agreements in the East Room on Friday evening.

The Gorbachevs will hold a banquet at the Soviet Embassy Friday in honor of the Bushes.

Both couples will fly to Camp David by helicopter with the Gorbachevs returning to Washington after an early supper.

An aide to the first lady said that it will be ''down time, a time for relaxation'' in rustic surroundings for Mrs. Gorbachev, but there is ''plenty to do if she desires.''

Mrs. Bush swims regularly when she is at the mountaintop retreat in Western Maryland. She also bowls on occasion.

#90150u1505 05/30/1990 ~United Press International
KATMANDU, NEPAL (MAY 30) UPI - Nepal's King Birendra named a new committee to draft a multi-party constitution Wednesday, increasing the number of Communists on the commission after the Nepalese government rejected the first panel.

The controversy over the commission - the first panel was named May 11 - was an embarassment to the king. But the annoucement Wednesday of the new group suggests the flap was more a political struggle between the Congress Party and the Communists than one between the king and , political observers say.

The new commission will consist of three communists, an increase of two, three members of the Nepali Congress Party, as well as a Supreme Court justice, a former attorney general and a longtime civil servant.

The commission is to submit its report to the king within three months.

Nepal now has an interim government made up of representatives of the Congress Party and seven communist parties that led a seven-week series of strikes and protests this spring.

The interim government Wednesday announced that it will return personal property seized from opposition activitists during the kingdom's 29-year reign of single-party rule.

One person was killed and another was injured Wednesday when police fired on demonstrators outside a police station in the community of Dang in west Nepal, residents of the town said. The demonstrators had surrounded the police headquarters in an effort to force the police to arrest four alleged thieves rounded up by a vigilante group.

Considerable vigilante activity has sprung up across the country among citizens who suspect police of helping hardliners of the previous regime to uncut the nation's move toward democracy.

#90150u1509 05/30/1990 ~United Press International
BY GERALD NADLER - UPI

MOSCOW (MAY 30) UPI - Boris Yeltsin's election as the Russian republic's president may be the blade of the bulldozer that will topple the political and economic structures of the Soviet Union.

No sooner had Yeltsin been elected by the Russian parliament Tuesday than the communist renegade began touting sovereignty for Mother Russia, the largest of the Soviet Union's 15 republics.

Though Yeltsin paid lip service to Russia remaining within the Soviet Union, he left little doubt about what sovereignty entails.

''Sovereignty means independent domestic and foreign policy - the right to conclude all sorts of treaties, including international accords,'' Yeltsin said in a post-election speech broadcast on nationwide television.

In what must have caused heartburn for summit-bound Soviet President Mikhail Gorbachev, Yeltsin said he would conclude pacts with the three Baltic republics that verbally are battling for independence from the Soviet Union.

Yeltsin's weeklong election struggle coincided with furious debate in the Soviet Parliament over a government plan to raise prices as part of the cost of moving the giant country toward a modified market economy.

Even before he was elected, Yeltsin vowed to reject Moscow's economic program and said the Russian republic would work out its own strategy and prices.

''Now we are talking of Russia,'' said Anatoli Stepovoy, a correspondent for the official Soviet government newspaper Izvestia. ''This is not the tiny Baltics.''

In the Ukraine, the nation's industrial heartland and agricultural breadbasket, republican leaders said they would not implement the central government's market plan and ruled out any price hikes.

Ukrainian Communist Party leader Vladimir Ivashko even threatened that the mighty Ukraine, nearly as big as France, could look after its own needs.

Deputies in the national parliament confided during breaks in the economic debate that they feel irrelevant, with the Baltics ignoring Moscow, the Transcaucasian republics embroiled in conflict and now the Ukraine and Russia threatening insubordination.

''If the Ukraine and the Russian republic go their own way, what is left of the Soviet Union?'' asked Stepovoy.

Russian nationalists, who long have felt that the Russian people's well-being has been sacrificed at the altar of keeping the Soviet Union a superpower, now are led by a politician second in renown only to Gorbachev.

Unlike Gorbachev, Yeltsin is the people's choice, revered as the former

Communist Party boss of Moscow who took buses, rode the subway and strolled without fanfare into common markets and work places.

As a populist, Yeltsin surely will empathize with the Russians' desire for a better life.

When asked on his arrival in Canada about Yeltsin's victory, Gorbachev indicated he is fully aware of his rival's ability to exploit these new regional trends.

''If he is playing political games, then we may be in for difficult times '' Gorbachev replied.

GENEVA (MAY 30) UPI - The U.N. High Commissioner for Refugees announced an 18 percent cut in his agency's 1990 budget Wednesday because of a shortfall in contributions from governments.

Thorvald Stoltenberg said the budget was cut to $672 million of which $82 million still remains to be pledged.

The staff of 2,045 at Geneva headquarters and around the world will be reduced by 15 percent by the end of this year, Stoltenberg told a news conference.

Of 329 persons losing their jobs, he said, 85 to 90 would be employees at Geneva headquarters.

He said the cuts were ''unanimously approved'' by the executive committee of the agency, which currently aids some 15 million refugees worldwide.

Stoltenberg said he hopes for a ''slight easing'' of the refugee problem in general but remains ''very concerned'' about the 50,000 or so Vietnamese boatpeople currently in Hong Kong camps.

The overwhelming majority of those people, he said, are considered to be ''economic refugees'' and are fearful of being forcibly sent back to Vietnam.

WASHINGTON (MAY 30) UPI - The Securities and Exchange Commission Wednesday announced the appointment of a 25-member advisory committee to help foreign governments establish their own stock markets.

Although the committee will work with countries throughout the world, its initial focus will be on emerging exchanges in Eastern Europe, according to a an SEC press release issued Wednesday.

The SEC has been meeting since Monday in Washington with representatives from the Polish Ministry of Finance, which wants to establish a Polish capital market.

SEC Chairman Richard Breeden, in announcing the new advisory committee, said, ''The Commission is pleased to be able to support President Bush's call for private sector assistance to promote economic development in Eastern Europe.''

The new committee members, Breeden added, were chosen for their ''extensive experience in the operation of securities, options and futures trading systems in the United States.''

Appointments to the committee included: Shaun F. O'Malley, chairman of the Big Eight accounting firm Price Waterhouse; William A. Schreyer, chairman of Merrill Lynch & Co. Inc.; and John R. Opel, chairman of the executive committee for International Business Machines Corp.

They were joined on the committee by John J. Phelan Jr., president of the New York Stock Exchange, and David Kelly, president of the National Securities Clearing Corporation.

These and other committee members will help other countries develop regulatory agenices and exchange markets to handle securities sales. The SEC has already received many requests to provide regulatory training to foreigners, according to the announcement made Wednesday.

Foreign countries have also asked for assistance with issues such as developing reporting and disclosure systems, licensing professionals, and establishing methods for clearance and settlement.

The committee is scheduled to hold its first meeting in June, when it will discuss specific requests for foreign assistance and review proposals to create training programs.

(MAY 30) UPI - SPORTS DIGEST

BASEBALL

Baltimore Manager Frank Robinson was suspended for three games for bumping umpire Drew Coble in Monday's game against Minnesota, using abusive

language and criticizing the umpire after the game. Because Robinson will appeal the suspension, it will not take effect until the results of a Thursday hearing in the AL offices.

... Led by unanimous pick Glenn Donelin, Army placed three players on the first-team Eastern Intercollegiate Baseball League All-Star team. Donelin, an outfielder and repeat first-team selection, joined pitcher-first baseman Shannon Smith and second baseman Rich Banez from Army on the team. Smith was selected at both positions. The other first team picks were Penn's Craig Connolly, the EIBL Pitcher of the Year, pitcher Rob Montes of Brown, catcher Ben Breier of Penn, Princeton shortstop Sean Sullivan, third baseman Ken Cavazzoni of Columbia, outfielders Cam McKennitt of Dartmouth and Chris Bade of Yale, Brown DH Brad Sidwell and Princeton utility man Matt Noone.

BASKETBALL

Dave Gavitt, commissioner of the Big East Conference since its inception in 1979, was named senior executive vice president of basketball operations for the Boston Celtics. Gavitt will have complete authority over all phases of the Celtics operation.

BOXING

Luisito Espinosa of the Philippines retained his WBA bantamweight title in Bangkok, Thailand when American challenger Hurley Snead failed to answer the bell for the ninth round. Espinosa, 23, improved to 19-0 with 10 knockouts.

COLLEGE

The NCAA Committee on Infractions placed the Florida A&M women's tennis program on two years' probation for major NCAA violations, including improper benefits to student-athletes and improper recruiting contacts. ... Robert Morris President Edward Nicholson said the school will not appeal the NCAA punishment of two years probation and the return of $88,000 in tournament revenue stemming from rules violations by the men's basketball team.

CYCLING

Mario Cipollini of Italy won the 13th stage of the Tour of Italy race, 139 miles from Baselga Pine to Udine. Gianni Bugno of Italy retained the lead in the overall standings.

FOOTBALL

The Eagles signed free agent Dante Williams, a 6-foot-2, 266-pound

defensive lineman from Oklahoma.

HOCKEY

Howard Baldwin, heading a group that has been approved to buy the North Stars, could name Bob Clarke general manager of Minnesota by the end of the week. Clarke was the former GM with Philadelphia.

SOCCER

Portuguese star Rui Barros signed a two-year contract with two option years with AS Monaco in the French First Division.

TENNIS

Defending champion Michael Chang, Andre Agassi, Steffi Graf and Gabriela Sabatini were among the top seeds to advance to the third round of the French Open in Paris.

WASHINGTON (MAY 30) UPI - Car rental companies take Washington consumers for a ride by selling them collision damage waivers under ''coercive circumstances and at excessive prices,'' a consumer advocacy coalition said Wednesday.

Consumers in the Washington, D.C. area may find the cost of their rental car increased as much as 48 percent more than the price quoted over the phone, said ''Taking Consumers For A Ride: A Report on Collision Damage Waivers,'' released by the U.S. Public Interest Group.

''That price increase is a result of the exorbitant cost of collision damage waivers, an option sold by car rental companies to consumers as

supposed protection against liability for damage done to the rental car,'' Lucinda Sikes, staff attorney with U.S. PIRG, said in a release.

She claimed that ''CDWs are inherently deceptive because they often provide little real coverage and can add up to $13 a day to the cost of the rental car.''

Collision Damage Waivers, also known as Loss Damage Waivers or Physical Damage Waivers, are sold by car rental companies in order to limit a renter's liability in the event of a collision or loss due to theft of the vehicle.

Car rental companies, the study noted, make customers assume responsibility for any damage or loss to a car whether or not the consumer is at fault.

U.S. Public Interest Group voiced its support for federal legislation introduced by Reps. Lynn Martin, R-Ill., and Dennis Eckart, D-Ohio, to ban the sale of CDWs.

While officials for some car rental companies were not immediately available for comment, Brenda Rigby, a spokeswoman for The Hertz Corp. in Ridge Park, N.J., said the company concurs with the study findings and supports banning the sale of CDWs. She also noted that New York and Illinois ban CDWs.

Rigby said Hertz does quote the price of Loss Damage Waivers with the basic price of its car rentals and can not eliminate them because it would have to assume liability for damages when other companies are not, becoming less competitive.

She said that liabilities for damages and theft should be taken by car rental companies, as it was the practice during the 1970s.

The report said that the sale of CDWs has led to widespread consumer abuse as the waiver is often sold under ''coercive circumstances, at excessive prices and with deceptive statements about coverage.''

Posing as customers, U.S. PIRG researchers surveyed agents from 10 major rental car companies in the Washington area - Agency, Alamo, Avis, Budget, Dollar, Hertz, Major, National, Sears, and Thrifty - and found that:

-None of the rental agents mentioned the CDW without prompting, and none of included the cost of the CDW in quoting the base price of the car.

-None of the agents offered to explain the extent of consumer liability under the CDW, and none of the agents offered to explain the sitution when the CDW would be voided.

-Half of the agents failed to mention the possibility of duplicating existing coverage, even after prompting, and 70 percent of the telephone agents failed to mention the possibility of existing coverage, even after prompting.

-One-fifth of the agents engaged in hard-sell tactics in encouraging purchase of the CDW.

#90150u1584 05/30/1990 ~United Press International

BUDAPEST, HUNGARY (MAY 30) UPI - An Alaskan firm will handle the massive cleanup job as Soviet troops leave Hungary with the project completely underwritten by American taxpayers, Parliament was told Wednesday.

Hungary's new environment minister, Sandor Keresztes, said he signed a letter of intent with the Alaskan firm of Martoch Co. to provide equipment to clean up more than 60 military bases to be vacated by the Soviets.

''We are very proud of what the Hungarian people have done and we are pleased to be part of this historic process and to bring our equipment here,'' Martoch Co. Chairman Ben Tisdale said during the letter-signing ceremony.

Keresztes said the development brings to mind the campaign slogan of the ruling Democratic Forum, which promised to carry out a ''spring cleaning'' of the former communist government.

All 49,700 Soviet troops are to be withdrawn from Hungary by June 30, 1991.

Cleanup costs per site could run from $500,000 to $2 million. The entire operation is estimated to cost $120 million, but the final figures will not be known until after a survey is carried out by Martoch in Hungary.

The additional attraction of the project is that it will cost Hungarians nothing.

The U.S. Congress allocated a $900 million aid package to Hungary and Poland last fall. The cleanup operation will be funded from that aid package with some money left for other purposes, Tisdale said.

Martoch is a multinational corporation specializing in decontamination techniques. It took the lion's share of cleanup operations after the Exxon Valdez tanker oil spill in Alaska two years ago.

#90150u1596 05/30/1990 ~United Press International

ANNAPOLIS, MD (MAY 30) UPI - Vice President Dan Quayle warned U.S. Naval Academy graduates Wednesday that the ''world is still a dangerous place'' and they should not be lulled into complacency by world changes.

He praised the midshipmen for their decision to spend four years working toward the defense of the United States.

''Each of you might have chosen a different, less difficult path,'' Quayle told the 890 Navy ensigns and 90 Marines being commissioned.

''You could have attended a less selective university. You could have opted for a more financially rewarding career. Or you could have coasted by, and demanded much less of yourselves,'' he said.

He also issued a word of caution to the graduates: ''We have been surprised this past century by the rise of communism, the rise of nazism and the rise of radical Islamic fundamentalists,'' he said. ''I am sure we'll be surprised in the future as well. Though we may be surprised, let us always be prepared.''

He said despite democratic reforms in Eastern Europe, many of the world's nations continue to arm themselves.

''But despite these remarkable changes, the world is still a dangerous place,'' Quayle said.

(MAY 30) UPI - The Index of Leading Economic Indicators dropped another two-tenths of a percent in April... the third straight monthly decline. Private economists expected the dip in the government barometer of future economic activity. The three-month decrease in building permits and contracts and factory orders confirms the on-going slump in construction throughout much of the nation.

A powerful earthquake shook Eastern Europe and the southwestern Soviet Union, knocking out windows in the Romanian capital and forcing evacuations at the U-S Embassy in Moscow. There was NO immediate word on casualties. Earthquake agencies and news reports say the quake... centered in the Black Sea... was felt in Romania, Yugoslavia, Bulgaria, Turkey,

Greece and the Soviet Union. The official Soviet news agency Tass reports that preliminary data shows the tremor hit six on the Richter scale. The U-S Geological survey says the quake measured six-point-five.

Soviet President Gorbachev strolled the boulevards of downtown Ottawa to the delight of adoring Canadians. Gorbachev stopped in Canada on his way to the super-power summit with President Bush in Washington, D-C. The Soviet leader's schedule today in Ottawa included laying a wreath at the National War Memorial and making a speech at the National Art Gallery, before flying to Washington this evening.

Pilots at Eastern Airlines may break away from the Air Line Pilots Association. The Eastern Pilots Associations wants the National Mediation Board in Washington to hold an election to determine whether it or the rival pilots union should represent pilots in collective bargaining with the struggling airline. The Eastern pilot group's chairman says the other union has ''lost touch'' with Eastern's working pilots.

#90150u1635 05/30/1990 ~United Press International

CHICAGO (MAY 30) UPI - Grain and soybeans closed mostly lower Wednesday on the Chicago Board of Trade, amid reports that drier weather will allow planting to get back under way.

Soybeans rebounded after experiencing sharp declines Tuesday. Soybeans were higher at midday, but traders said they were brought down during the afternoon because of a weakness in corn.

Traders began the day unsure of where soybeans would go because forecasters indicated drier weather was on the way, but the USDA said planting was far behind schedule.

Corn closed lower. Traders attributed the lower close to the reports of drier weather on the way to the Midwest. Corn futures closed near the day's lows in light trading.

Wheat closed lower but was ahead of the day's lows. Trading was reported as quiet with light commission house and fund selling.

Traders said a lack of new export possibilities and a successful harvest of soft red winter wheat in the southeast and delta states also kept prices down.

At the close, corn was off 4 to 4 3/4, soybeans off 1 3/4 to up 1/2, wheat off 4 to 1 and oats off 3 3/4 to 3.

#90150u1645 05/30/1990 ~United Press International
LOS ANGELES (MAY 30) UPI - ''Cheers'' star Kelsey Grammer, already serving a 30-day jail sentence in a drunken driving case, was ordered Wednesday to stand trial for allegedly possessing a quarter-gram of cocaine.

Following a brief preliminary hearing, Municipal Court Judge Aviva Bobb ordered Grammer, 35, of Van Nuys, held for trial on a single felony count of possessing the drug.

Grammer, who plays the brainy psychiatrist on NBC's ''Cheers,'' was ordered to appear in Superior Court for arraignment June 13.

Prosecutors said Grammer was arrested for possessing a quarter-gram of cocaine after being pulled over by police in North Hollywood in April 1988 for expired license plate tags.

If convicted, Grammer could be sentenced to three years in state prison.

Last week, Grammer began serving a 30-day County Jail term for violating probation by failing to attend an alcohol-abuse program for a 1987 drunken driving arrest in Van Nuys.

#90150u1658 05/30/1990 ~United Press International
DENVER (MAY 30) UPI - A new treatment for the most common form of leukemia among young children appears to significantly increase the chances of survival, doctors said Wednesday.

The treatment produced successful results in 79 percent of 1,600 patients with acute lymphoblastic leukemia involved in a six-year nationwide study, researchers said.

Conventional treatments have produced a success rate of 59 percent, said Dr. David Tubergen, medical director at The Children's Hospital of Denver at a news conference.

The new approach differs from conventional therapy by eliminating the use of radiation treatments, which can produce significant adverse side effects, he said. Instead, doctors administer a cancer chemotherapy drug known as methotrexate, said Tubergen.

In addition, doctors wait several months until after the treatment appears to have produced a remission and then administer an intensive round of conventional chemotherapy, he said.

The study was aimed at children under the age of 10, said Tubergen.

''Age is the principle factor in considering this delay of intensive treatment,'' said Tubergen, who led the study and presented the results at a recent meeting of the American Society of Clinical Oncologists.

''Our study indicates delayed intensive therapy alone is not adequate for children older than 10 years of age.''

Researchers are uncertain why the treatment is most effective for children under the age of 10 but for some reason older children respond better to early intensive chemotherapy, he said.

''We don't know what the magic is about the age 10. It's (the age cutoff) an observed fact, but the biological explanation has eluded us,'' he said.

The delayed intensive chemotherapy might have an impact on treatment of other forms of cancer, but it is too early to tell, he said.

''Delayed therapy opens the door to a form of treatment which has not been previously tested and shown effective,'' Turbergen said.

''There will be further trials during the next 10 years to study whether this approach can be modified, extended to other leukemia patients - or even other cancers.''

#90150u1685 05/30/1990 ~United Press International

MOSCOW (MAY 30) UPI - The Supreme Soviet considered two bills Wednesday that would create a legal multi-party system and expand religious freedoms the official Tass news agency said.

Dozens of political parties have sprung up in the Soviet Union since the Communist Party decided in February to end its nearly 70-year monopoly on power, but they are still technically illegal.

The bills considered by the Parliament Wednesday would give the parties a legal basis, along with religious organizations and churches.

''Under the bill, new countrywide organizations will be registered by the Soviet Justice Ministry,'' Tass said. ''Republican parties will be registered in accordance with republican laws. Any refusal (by authorities) to register a new party can be protested in court.''

The draft measure bans political parties from receiving money from foreign organizations or citizens, Tass said.

The bill on freedom of conscience would formally end the communist country's official ban on religious practice.

Hundreds of churches of all faiths have been reopened under Soviet President Mikhail Gorbachev's reforms and many Russian Orthodox, Roman Catholics, Jews and other believers are now worshipping freely. The legal prohibition, however, is still in place.

Iliya Zaslavsky, a Soviet deputy from Moscow, told the Komsomolskaya newspaper that the multi-party law is essential to give other organizations a basis for competing against Communists.

''Is it democracy when there are different platforms, but proponents of the only platform that follows the line of the only (Communist) party have so many chances for propoganda during an election campaign?'' Zaslavsky asked.

The Parliament earlier dropped consideration of a no-confidence vote and deferred action on President Mikhail Gorbachev's market economy plan until the Soviet leader returns from his Washington summit.

The government's announcement of planned price increases last week sparked panic buying across the country and led Moscow authorities to impose a passport system limiting purchases to residents of the Soviet capital for two weeks.

The 525-seat Supreme Soviet Tuesday overwhelmingly rejected a bid by radical deputies to hold an unprecedented no-confidence vote in the government of Prime Minister Nikolai Ryzhkov. The vote was 312-44 with 19 abstentions.

#90150u1699 05/30/1990 ~United Press International

PHILADELPHIA (MAY 30) UPI - An electrical fire in a circuit breaker on the main switchboard caused the M.V. Regent Star to lose power and run aground during the Memorial Day weekend, stranding 890 passengers in the Delaware Bay, the Coast Guard said Wednesday.

The cause of the fire remained under investigation by the Coast Guard and the National Transportation Safety Board, said Coast Guard Lt. James Weakley.

''As a result of that fire, the ship lost electrical power and main propulsion and ran aground,'' Weakley said.

Weakley said the ship will remain docked in Philadelphia until the inspection is complete and repairs made.

''The Coast Guard will not allow the ship to load passengers or get under way until we feel it is safe to do so,'' Weakley said.

The ship was scheduled to leave Friday on a so-called ''cruise to nowhere'' but Coast Guard spokesman Peter Hoffman said the trip may be canceled. The ''cruise to nowhere'' would leave from Philadelphia and circle out in the Atlantic Ocean before returning.

Hoffman said the Regent Star is scheduled for numerous cruises of that type throughout the summer. A spokesman for the Regency Shipping Co., owner of the ship, did not return repeated phone calls.

The Regent Star was heading for Philadelphia at the end of a cruise from Nassau in the Bahamas when it lost power at 1 a.m. Sunday and ran aground on a sand bar 5 miles off Fortescue, a fishing village in southern New Jersey.

After several attempts to refloat the 642-foot ship, the 890 passengers were evacuated Monday to another boat and taken ashore.

#90150u1716 05/30/1990 ~United Press International

BUCHAREST, ROMANIA (MAY 30) UPI - A powerful earthquake centered in northeastern Romania shook the Balkans and the southwestern Soviet Union Wednesday, killing at least eight people, injuring more than 260 others and causing widespread damage, authorities said.

The temblor, measuring between 6.0 and 7.5 on the Richter scale, tore chunks from buildings in the Romanian capital of Bucharest and sent guests fleeing in terror from a downtown luxury hotel. resort of Sochi to Moscow and Leningrad in the north. It rattled buildings and caused minor damage in Turkey, Greece, Yugoslavia, Bulgaria and Poland.

Police spokesman Maj. Marin Anton said at least eight people were killed throughout Romania, including two in Bucharest, and at least 260 others were injured, 45 seriously.

One person was killed in Bucharest by a falling chimney and another died when a ceiling collapsed in the basement of a food store, he said. A third Bucharest resident was in critical condition after her throat was slashed by flying glass.

Hospital officials in the capital said at least 90 people were hurt in Bucharest alone, and more casualties were streaming in. They said panic was to blame for many of the injuries, citing numerous cases where people jumped from windows and balconies in fright.

''We're very experienced. We've been through wars and earthquakes before '' said Boris Aherghecegitei, director of the Bucharest City Casualty Unit. ''We're ready for anything here.''

The Romanian news agency Rompres said the epicenter was in the Vrancea region in the Carpathian Mountains in northeastern Romania. The same area was severely damaged by a March 1977 quake that measured 7.3 on the Richter scale and reportedly left at least 1,300 dead.

Rompres said Wednesday's quake lasted several minutes and was followed by aftershocks.

Apparently because of damage to communication lines, there were no immediate details of damage in the area around the town closest to the epicenter, Buzau, about 110 miles northeast of the capital, Bucharest Radio said.

In Kishinev, in Soviet Moldavia near the Romanian border, residents reached by telephone reported feeling two separate shocks within minutes of each other.

Kishinev resident Mikhail Fusu said he had seen windows shattered in buildings and roof tiles were shaken loose from some homes. Some trolley buses stopped because the overhead wires that provide their power were torn loose.

''There was no panic,'' Fusu said. ''Everything finished in a minute.''

Fusu said he had heard no reports of serious damage or injuries in the capital of the Soviet republic.

A report by the Soviet news agency Tass said the quake's epicenter was located at a depth of more than 60 miles.

In Moscow, some 700 miles to the northeast, the quake forced evacuation of the U.S. Embassy.

Across the world, a separate earthquake measuring 5.8 on the open-ended Richter scale struck northern Peru late Tuesday. The death toll was approaching 100 in Peru, and disaster relief officials said they expected it to rise.

Oil prices initially surged following news of the Romanian earthquake, but then slipped back when there was no reports of damage to refineries.

''It was the psychological impact of the earthquake, the fact that Romanian production of gasoline might have been hurt,'' said Peter Beutel of Elders Futures Inc. in New York.

The official Tass news agency said the quake was felt across a wide swath of the Soviet Union from the Black Sea resort of Sochi in the south to the Russian city of Leningrad in the north.

Parliament member Ilmar Biser told colleagues there were ''human casualties' in the Soviet republic of Moldavia near the Romanian border, Tass said. The report gave no details of damage, or of the number killed or injured. It said the Parliament observed a minute of silence.

#90150u1731 05/30/1990 ~United Press International

WASHINGTON (MAY 30) UPI - A moderately large earthquake will strike a segment of the San Andreas fault between San Francisco and Los Angeles in the next two years, scientists predicted Wednedsay.

A quake of about 5.7 magnitude on the Richter scale should occur along the fault near Parkfield, Calif., in March 1991, give or take a year, the researchers said. That stretch of the fault has a long history of such quakes, experiencing one quake of such magnitude about every 22 years since 1850.

Max Wyss of the University of Colorado in Boulder, head of the team making the prediction, said the forecast should be no cause for alarm.

''That area is very sparsely populated, and the people who live there are accustomed to this happening every 20 years or so. It happened in 1966 and pretty much the same people still live there. They know what to expect,'' said Wyss, noting that no one was killed in the '66 quake.

The type of damage expected from a quake of 5.7 magnitude occuring in the Parkfield area should be ''very minor,'' he said, consisting of damaged swimming pools, cracked windows and broken china.

In a study published in the journal Nature, Wyss and his colleagues go out on a scientific limb to emphasize their belief that earthquakes in many regions of the world could be forecast by studying the frequency of small quakes and the amount of deformation of Earth's crust.

''One or two years in advance is not so great from the point of view of using it for warning people, but from a scientific point of view it is progress to make that kind of prediction,'' said Wyss, who so far has a 50-50 success rate in his two predictions for moderate earthquakes along the San Andreas fault.

Using seismic measurements taken by U.S. Geological Survey monitors, the Colorado team found the number of small earthquakes along a 24-mile stretch of fault near Parkfield has fallen sharply since January 1986, with only four occuring instead of the expected 20. Based on past experience, the researchers concluded the lull in small shocks indicates

stress on the fault is building up and will likely be released soon in a larger quake.

In a companion study, Wyss and his colleagues also found the rate of crust deformation near Parkfield has also decreased about 20 percent starting in August 1986 - a phenomenon they also interpret as a precursor to a moderately large earthquake.

Knowledge of earthquake patterns along the San Andreas fault near the densely populated cities of San Francisco and Los Angeles currently does not lend itself to predictions in the one- to two-year range, Wyss said.

But if such forecasts should become possible, Wyss said public safety officials could take steps like condemning poorly constructed buildings and improving fire and police department readiness in the months prior to a significant quake.

Currently, the Colorado team is testing its prediction method in Hawaii and in the Aleutian Islands off Alaska. Japan is another area that may lend itself to such forecasts, Wyss said.

''Predicting earthquakes is a lot more difficult than forecasting the weather in the sense we don't have very frequent examples that we can study. The weather changes practically every day, and every day we can study what signs predict those changes,'' Wyss said in a telephone interview.

In an editorial accompanying the Colorado studies, William D. Stuart of the U.S. Geological Survey in Pasadena, Calif., agreed that a moderately severe earthquake is probably imminent along the Parkfield fault segment. However, he said historical patterns indicate the temblor might be more severe, perhaps 7.0 in magnitude, than the 5.7 magnitude shock predicted by the Colorado team.

Despite the uncertainties and limited focus of the latest work, Stuart said he considers it a step toward developing an accurate forecasting model that may someday ''be adapted to forecast earthquakes just as atmospheric models are used to forecast the weather.''

#90150u1746 05/30/1990 ~United Press International

LONDON (MAY 30) UPI - Liberian rebel leader Charles Taylor said Wednesday his fighters were poised to capture the capital's airport, and vowed he would personally shoot Samuel Doe if the beleagured president resists guerrillas advancing on Monrovia.

Taylor, in a telephone interview with United Press International, also said the abduction and probable massacre of about 40 refugees from a U.N. compound by Liberian government forces early Wednesday merely showed the brutality of Doe's government.

''They did it in Monrovia (the capital) on U.N. property,'' said Taylor, speaking from the recently captured port city of Buchanan. ''You can't compare that with what Doe has done in the bush. ... There are bodies littered throughout this country.''

Taylor predicted he would capture Monrovia within three weeks, and expected government opposition to dissolve before his National Patriotic Front - which he said has 10,000 men under arms - reaches the city.

''I don't think there will be fighting in Monrovia, but if there is going to be a battle in Monrovia, it will not be far away, because I am going there,'' said Taylor, who studied economics in the United States, where he lived for 10 years. ''We are so close we cannot tell you.''

He said his troops were awaiting his command to launch an attack on Robertsfield airport, the nation's only international gateway, about 25 miles south of Monrovia.

A Western diplomat stationed in the capital of the West African nation also predicted the demise of Doe, a former sergeant who seized power in a bloody coup in March 1980.

''There is an assumption among the general populace that the end is nigh '' the diplomat told UPI. He estimated Taylor has 5,000 men under arms.

Taylor said he would protect the Krahne tribe, from which Doe is a descendant, when he overthrows Doe.

Tribal animosity was linked to the assumed killing of the refugees in Monrovia, where a U.N. official said government soldiers tried to enter the compound of the United Nations Development Program at about 3 a.m. The official, Michael Heyn, said Doe's troops believed rebels were among some 500 refugees sheltering in the facility.

Heyn said the refugees were largely from the Ghio and Mano tribes, which give Taylor most of his support.

In New York, Secretary-General Javier Perez de Cuellar strongly protested a the attack on the U.N. compound, a U.N. spokesman said Wednesday.

''They (the soldiers) bayonetted a guard and shot two others, killing one and wounding another,'' Francois Guiliani said.

He said the soldiers indiscriminately beat the refugees and forced 20 to 40 of them into army vehicles and drove off. All of them are presumed to be massacred, U.N. officials said.

The Western diplomat in Monrovia said eight men were put on one truck, of whom two escaped and reported they soon heard gunfire, which they believed was the sound of the captives being killed.

Giuliani said Perez de Cuellar has ordered an evacuation of all foreign nationals working for various U.N. relief agencies, and 11 people, the remaining of the foreign staff, were waiting for a plane to go to Dakar, Senegal.

Diplomatic sources said earlier this month that Doe had lost control over his army and part of the northern territory to the insurgents.

The U.N. Disaster Relief Organization said between 160,000 and 200,000 Liberians had fled to Guinea and another 67,000 to Cote d'Ivoire after abandoning their villages because of increased fighting. The agency said there are at least 300,000 displaced persons inside Liberia.

Taylor suggested it would take about three hours for his troops to seize the airport. Ghana Airways has suspended its flights into Monrovia, but most other international carriers are still landing.

Taylor, a civil servant before starting the rebellion six months ago, chuckled when asked what he would do if personally confronted by Doe.

''If he is not armed, I would arrest him and I would put him on trial,'' Taylor said. ''But if he is armed, I am going to shoot the son of a bitch myself. I am not going to miss that opportunity.''

The guerrilla leader advised Doe to ''pack his bag and run while he can.''

#90150u1761 05/30/1990 ~United Press International

WASHINGTON (MAY 30) UPI - Sales of stock, bond, and income mutual funds totaled $14.1 billion in April, up from $13.8 billion in March, the Investment Company Institute reported Wednesday. According to the association of the mutual fund industry, April sales one year ago were $9.1 billion.

Assets of all mutual funds were $1.001 trillion in April, down from $1.013 trillion in March. Assets of stock and bond funds decreased to $542.2 billion from $549.6 billion, and assets of money market, including both taxable and tax-free funds, decreased to $459.2 billion from $463.6

billion.

"Falling stock and bond prices in April, which reversed dramatically in May, produced portfolio value losses that overwhelmed the effect of substantial net inflows of long-term funds," said Jacob Dreyer, vice president and chief economist at the institute.

"On the other hand," Dreyer said, "short-term funds suffered a substantial net outflow of assets, as individuals paid their income taxes and purchased large amounts of newly offered Treasury bills and notes by drawing on their money market fund balances."

The sales of stock mutual funds totaled $7.3 billion in April, the same as in March. Growth-and-income funds led all categories with sales of $2.6 billion.

Sales of bond and income mutual funds totaled $6.7 billion, up from $6.5 billion in March. Long-term municipal bond funds recorded sales of $2.4 billion, the same as in March.

Total redemptions were $8.8 billion in April compared to $8.4 billion in March and $8 billion in April 1989. In addition to the sales of open-end mutual funds, new offerings of closed-end funds in April amounted to $190.8 million, the institute said.

NORTH RIVERSIDE, IL (MAY 30) UPI - A man rammed his car into his estranged wife's apartment and shot her to death before killing himself, police said.

David Eugene Lawson, 38, Bloomington, shot his estranged wife four times with a .45-caliber revolver before turning the gun on himself, police Chief Richard Gossling said.

Gossling identified the woman as Leslie Prince, 30, the manager of the First National Bank of Cicero.

Gossling said the couple had been married for four years and separated since January.

WASHINGTON (MAY 30) UPI - The government abandoned projections of a slump in U.S. agricultural exports Wednesday and forecast sales of $40 billion in the current fiscal year, which would be the the fifth year in a row of higher sales to foreign customers.

In a quarterly report on the outlook for exports, the Agriculture Department raised its estimate for farm exports by $1.5 billion from a February figure of $38.5 billion. Sales during fiscal 1989 totaled $39.6 billion. Half of the increase was attributed to revisions in the reporting system for sales to Canada to correct for consistent underreporting in past years.

"The outlook for U.S. agricultural exports has been bolstered by other positive developments since February," the department's Economic Research Service said. "These include improved export volume prospects for corn, soybeans and cotton as well as strengthening world prices for these and other commodities."

As a result, U.S. export tonnage was pegged at 150 million tons this year, a gain of 1.5 million tons from the February forecast. Volume last year was 146.9 million tons.

The outlook for exports was aided by an early May buying spree by the Soviet Union, the No. 1 customer for U.S. grain. In a two-week period, the Soviets bought 2.65 million tons of corn and 549,100 tons of wheat. Moscow has purchased 19.7 million tons of U.S. corn and wheat this year, the second highest total on record.

When it issued its first forecast for fiscal 1990 sales, the department expected lower grain prices would lead to the first decline in dollar value of U.S. exports since fiscal 1986.

Farm exports have been a bright spot in the U.S. trade picture for years because they have been a consistent money-maker. About one-fifth of cash farm receipts can be traced to exports.

Agricultural imports this fiscal year were projected to total a record $22 billion, which would mean a trade surplus of $18 billion, about the same as last year. The forecast for imports was raised $500 million due to increased fruit and vegetables shipped from Latin America to make up for crops lost in last December's cold snap in the South.

In the new forecast, the government projected commodities sales as follows: corn, $6.9 billion, up $800 million from last year; wheat, $5.1 billion, down $1.1 billion; soybeans, $3.6 billion, down $400 million; and cotton, $2.9 billion, up $1 billion. Horticultural sales were forecast at $5 billion, a $1 billion increase.

The corn, soybean and cotton sales forecasts all were increased slightly from February's projections.

(MAY 30) UPI - Authorities in Romania say at least seven people were killed and at least 100 were injured in a powerful earthquake that shook Eastern Europe today. The quake tore chunks from buildings in Bucharest. It was felt as far away as Moscow and rattled buildings in Turkey, Greece, Yugoslavia, Bulgaria and Poland.

An Israeli army spokesman says Israeli troops killed four gunmen and captured several others who landed in a speedboat today on a beach south of Tel Aviv. Military sources say the boat had been lowered from a mother ship that reportedly sailed from Libya. Army helicopters tracked the gunmen ashore.

About 15-hundred Canadians of Baltic heritage plan to demonstrate against Soviet President Gorbachev's independence-breaking policy toward Estonia, Latvia and Lithuania. Gorbachev arrived in Canada yesterday. He speaks

today at the National Art Gallery and visits the National War Memorial... before flying to the United States to meet President Bush.

A Japanese report says South Korean President Roh-Tae-Woo may fly to the United States this weekend for a post-summit meeting with Soviet President Gorbachev. Sources say they may meet in San Francisco, Gorbachev's last U-S stop. Seoul and Moscow have NO formal diplomatic ties.

Most of the residents evacuated yesterday following the explosion of a natural gas well near Heidelberg, Mississippi, are back home today. Authorities gave the O-K to return after determining that the well was NO longer spewing hydrogen sulfide. Two people were killed in the blast.

LOS ANGELES (MAY 30) UPI - The Federal Home Loan Mortgage Corp. and the nationwide nonprofit group Local Initiatives Support Corp. Wednesday unveiled a campaign involving private industry to build housing for California's very-low-income residents.

The campaign is the first in the United States to try to persuade private companies to commit major funding to low-income housing investments over several years.

Officials from the quasi-private federal organization, known as Freddie Mac, joined Paul Grogan, president of the nonprofit group, Los Angeles Mayor Tom Bradley and representatives of several leading California corporations to announce that $39 million has already been committed to the project which aims to raise $125 million to build 4,000 dwellings in California over the next five years.

''Today, we are launching the most ambitious corporate effort ever undertaken to address our nation's shortage of affordable housing,'' said Grogan, adding that many lenders and mortgage experts hope the model will become the foundation of a new national housing policy.

Under the plan, corporate investors become limited partners in each project but have no involvement in management or construction. They receive special federal and state tax credits for backing such projects, and can expect an annual return of about 10 percent to 15 percent from the credits, officials said.

A centerpiece of the investment plan includes a pledge of $10 million for 1990 by Freddie Mac, which has issued a ''challenge match,'' offering to provide a dollar to the fund for every two dollars raised from a California corporation.

Great Western and Security Pacific banks have each invested $10 million for the five-year period. City National Bank has committed $5 million for five years and several other companies have each invested up to $1 million for use in 1990.

The commitment of Freddie Mac, a highly respected firm charged by the federal goverment with increasing the availability of mortgage financing, is seen as a ''major coup,'' Grogan said.

The Local Initiatives Support Corp. will coordinate the effort through its California Equity Fund.

The announcement was made at a news conference in an economically distressed neighborhood at 27th Street and Central Avenue in South Central Los Angeles, where officials plan to build a 44-unit apartment building with money raised under the plan.

Although the funds will be earmarked for housing throughout the state, Bradley said about 75 percent of the money will be directed to the Los Angeles area, where the affordable housing crisis is at its worst.

''In Los Angeles, a recent study showed that there are anywhere from 100,000 to 160,000 homeless individuals in any given year,'' Bradley said. ''To reverse this downward spiral, we must close the gap between the cost of housing and the cash on hand for families trying to make ends meet.''

#90150u1864 05/30/1990 ~United Press International

NEW YORK (MAY 30) UPI - Vincent ''The Chin'' Gigante, reputed head of the Genovese crime family who police say runs his mob in a bathrobe, was arrested Wednesday along with members of three other Mafia families on charges of operating a multimillion-dollar replacement window racket.

Authorities said it was the biggest mob case since the 1986 ''commission trial'' of underworld leaders.

Gigante, 62, the only major mob leader to elude arrest earlier, was charged along with reputed Lucchese family underboss Anthony ''Gas Pipe'' Casso, 69, Peter Gotti, older brother of reputed Gambino crime family boss John Gotti, and 12 other mob figures including members of the Colombo family and labor union members with alleged mob connections.

Of the 15 men charged, three were still at large, and one was being transported from a federal prison. Some of them were to be arraigned later Wednesday.

According to Mafia watchers, Gigante is second only to John Gotti in terms of mob influence. Authorities refused to say if they were after Gotti in the case.

When he was arrested Wednesday, Gigante, unshaven and haggard-looking, was wearing a purple bathrobe over striped pajamas. He sat in U.S. District Court in Brooklyn, his jaw sagging, but his eyes alert.

Also indicted in the case was Vittorio ''Vic Amuso, 56, reputed boss of the Lucchese crime family, and Venero ''Benny Eggs'' Mangano, reputed captain of Genovese family.

New York's last big mob trial ended in November 1986, when eight men described as members of ''the Commission,'' a Mafia board of directors that operated the rackets in New York City and controlled the American underworld, were convicted of racketeering.

The 15 men charged Wednesday were hit with series of counts involving racketeering, extortion, bid rigging, conspiracy and labor payoffs following an investigation dubbed ''Window 1'' joined by the U.S. Justice Department, the FBI and New York City police.

''Today's arrests escalate once again our efforts to throttle the insidious influence of organized crime operations in New York ,'' said Attorney General Richard Thornburgh at a press conference announcing the arrests.

Authorities said the continuing investigation had a second phase - ''Window 2'' - which could result in up to 50 more indictments of union

members and other crime family figures for similar extortion and bid rigging in window replacement in private industry.

According to the indictments, 75 percent of $191 million in window replacement contracts awarded by the New York City Housing Authority since 1978 have gone to mob-influenced companies.

The indictments claim that Local 580 of the Architectural and Ornamental Ironworkers Union, which has jurisdiction over metal frame windows, is controlled by the Lucchese family.

U.S. Attorney Andrew Maloney said officials of certain companies were threatened with labor unrest or ''violence and physical injury'' if they bid for contracts.

Companies who wanted to bid for the contracts were forced to pay the union and its mob handlers up to $2 a window, he said.

Gigante, once notorious as the hitman who allegedly shot and wounded mob boss Frank Costello in 1957, has recently taken to walking the streets near his home on Sullivan Street in Greenwich Village wearing a bathrobe, and sometimes pajamas.

His family claims he is mentally unbalanced and until recently had been trying to have him legally declared incompetent.

Authorities say it is all an elaborate act, with Gigante still running the family which has an estimated 300 members and 1,000 ''associates'' and is reported heavily involved in construction, the waste carting industry and the New Jersey waterfront.

ESCHEN, LIECHTENSTEIN (MAY 30) UPI - Second-half goals by Marcelo Balboa, Eric Wynalda and Chris Henderson lifted the U.S. soccer team to a 4-1 rout of Liechtenstein Wednesday night in a World Cup tuneup for the Americans.

After Peter Vermes of the United States and Liechtenstein's Klaus Marxer traded first-half goals, Balboa gave the Americans a 2-1 lead. Wynalda and Henderson added goals to turn the game into a blowout.

U.S. Coach Bob Gansler sat out five regulars, including Paul Caliguri.

The Liechtensteiners, supported by 2,400 onlookers, played the United States even for a almost an hour with a team selected mostly from third and fourth division players from the Swiss League.

Team USA has been practicing at nearby Bad Ragaz since Tuesday and will face the Swiss team in St. Gall Saturday.

WASHINGTON (MAY 30) UPI - Richard G. Austin Wednesday became the 14th administrator of the U.S. General Services Administration.

President Bush's nomination of Austin for the GSA post was confirmed unanimously earlier this month by the Senate Governmental Affairs Committee and the full Senate.

As GSA administrator, Austin manages a nationwide work force of 20,000 employees and oversees an annual budget of $8.8 billion.

The government's central management agency sets policy in the areas of supply and service procurement, property management, telecommunications, and automated data processing. The agency also manages government operations in building construction, leasing and management, motor vehicle and travel management, and property disposal.

#90150u1946 05/30/1990 ~United Press International

(MAY 30) UPI - As Soviet President Gorbachev holds talks in North America officials in Eastern Europe and the southwestern Soviet Union are assessing the damage and casualties in a powerful earthquake. Police in Romania say at least seven people were killed, including two people in Bucharest. Romanian officials say more than 100 people were hurt in a quake centered in Romania's northeastern mountains. The tremor was felt as far away as Moscow, Turkey, Greece, Yugoslavia, Bulgaria and Poland.

Soviet President Gorbachev charmed Canadians today by setting off on foot to the Parliament Building in Ottawa, accompanied by Prime Minister Mulroney. Thousands of people... a few of them sitting in trees... chanted ''Gorby'' in a loud greeting to the Soviet leader. Gorbachev and Mulroney walked about three blocks from a wreath-laying ceremony at the National War Memorial to the main gates of Parliament Building, where he is holding private talks with Mulroney.

Deputies in the Soviet Parliament today opened debate on bills that would create a multi-party system and expand the freedom of religion. The measure legalizing other parties would codify the momentous decision by the Communist Party in February to end its nearly 70-year monopoly on power. The other bill would formally end the communist country's official ban on religious practice.

The Soviet Parliament dropped a NO-confidence challenge and deferred action on Mikhail Gorbachev's plan for a market economy until the Soviet president gets back from Washington. The Supreme Soviet yesterday overwhelming rejected a bid by radical deputies to hold an unprecedented NO-confidence vote in the government of Prime Minister Nikolai Ryzhkov.

#90150u1953 05/30/1990 ~United Press International

LIMA, Peru (MAY 30) UPI - A powerful earthquake rocked an Amazon area of northern Peru, killing at least 83 people, leaving hundreds homeless and causing the roof of a cathedral to cave in, disaster relief officials said Wednesday.

The 48-second quake measuring 5.8 on the Richter scale struck at 9:34 p.m. Tuesday and was centered 15 miles southeast of the city of Moyobamba, approximately 400 miles northeast of Lima, Peru's Geophysical Institute said.

Gen. Jorge Ferreyros, the nation's civil defense chief, said 83 people died in the earthquake including 27 persons in the city of Moyobamba, 25 in Rioja, 19 in Nuevo Cajamarca, and 12 in Soritor.

Another 494 persons were injured, mostly children, and 40 persons were missing, Ferreyros said. He said the quake left 800 people homeless.

A civil defense official, Ciro Ugarte, said the number of deaths could ''rise considerably'' after more reports are received from remote communities in the Amazon basin on the eastern slope of the Andean range.

More than 20 aftershocks from the quake were felt in the stricken area, the most serious registering 4.8 on the Richter scale, Ferreyros said. Almost all the homes in Rioja and Moyabamba were destroyed and the roof of the Moyabamba cathedral caved in.

Shocks from the quake were felt as far away as 300 miles from the epicenter, shaking buildings in the coastal cities of Trujillo, Chepen, Pacasmayo, Chiclayo and Piura.

An early estimate by the Geophysical Institute had placed the epicenter in the Pacific Ocean and had given the magnitude as greater than 6.0, but was later revised.

Ferreyros said rescue organizers were appealing to Health Ministry doctors on strike for for nearly a month, to aid the disaster victims.

Antonio Mestanza, prefect of the department of Amazonas, said in a radio interview that ''the quake damaged 90 percent of the homes'' in Rodriguez de Mendoza, which has a population of 4,000 inhabitants.

He said he has received ''reports that the town of Achabamba has totally disappeared, as well as Limabamba, Chirimoto, and others.''

Ferreyros said 15,000 people across the country suffered property losses from the earthquake.

Health Minister Paul Caro said that Air Force planes are sending food, medicine, tents and clothing to help the homeless. Ferreyros said doctors ended a one-month strike at the Health Ministry to aid the relief effort.

Mateo Casaverde, chief of the Geophysics Institute, said the temblor was similar to one that shook the same zone on June 19, 1968 with an intensity of 6.4 of the Richter scale.

He said the quake was ''a reflection of seismic activity of this zone that has become active again.''

Casaverde said he did not believe the quake was related to those affecting other parts of the world almost simultaneously, such as the Soviet Union and the Balkans.

An earthquake of 5.0 on the Richter scale can cause considerable damage and a 6.0 quake can cause severe damage. Each increase of 1.0 on the Richter scale means the ground motion is 10 times greater.

On May 31, 1970, a strong earthquake hit northeastern Peru, killing about 50,000 people.

(MAY 30) UPI - Housing prices are going through the roof. A government report says sales of new single-family homes dropped one-point-six percent in April... the fifth straight monthly decline. But April housing prices shattered all previous records. The average cost of a new home zoomed to more than 160-thousand dollars, up 15-thousand dollars from March. The report doesn't say why.

Heavy rains and flooding in the Ohio Valley are being blamed for three deaths. Police are still looking for the bodies of two teen-age girls who drowned yesterday while wading in a rain-swollen creek in Ohio. In the state's south, rising waters have chased hundreds from their homes.

The Coast Guard says a fire in a circuit breaker on the main switchboard caused a cruise ship to lose power and run aground in the Delaware Bay on Sunday. They are still investigating the cause of the blaze aboard the Regent Star, which was en route from the Bahamas to Philadelphia when it hit bottom. All 890 passengers were evacuated before the ship was towed yesterday.

#90150u1977 05/30/1990 ~United Press International
NEW YORK (MAY 30) UPI - The dollar firmed against all the major currencies in thin New York trading Wednesday, driven by rising perceptions of German monetary union as a financial and political Pandora's box.

Currency traders said negative sentiment about the West German mark was the only theme in a lackadaisical market. They brushed off news of a 0.2 percent drop in the U.S. index of leading economic indicators.

"German (monetary) unification is now fraught with a great deal of uncertainty," said David Wilson, a foreign exchange vice president with the Girozentrale Vienna. "It is not at all a done deal."

Bonn's Christian Democrat government and its Social Democrat opposition

were still haggling over the terms of the monetary union of East and West Germany, whose July 2 launch was jeopardized by the furor.

In late New York trading, the dollar was changing hands at 1.6830 West German marks, up from 1.6740 late Tuesday. The U.S. unit was quoted at 151.32 yen, up slightly from 151.22 yen late the previous day.

Analyst Earl Johnson of the Harris Trust & Savings Bank in Chicago likewise cited "continued nervousness" over Germany's monetary merger. Market thinness magnified the effect on dollar-deutsche mark rates.

Most players adopted prudent positions ahead of Friday's release of key U.S. jobs data for May. "People are going to be real standoffish until we get past the employment number," commented Girozentrale's Wilson.

No dollar trend was apparent, but Wilson suggested the unit may be embarking on a "summer rally" as it has done in recent years.

Other dollar rates: 1.4220 Swiss francs, up from 1.4105; 5.6750 French francs, ahead from 5.6360; and 1,238 Italian lire, up from 1,229. The British pound eased to $1.6950 against $1.6955.

In Europe, the dollar rose against the main currencies. Anticipation that the British pound might soon enter the European Monetary System's exchange rate mechanism set up brisk trading among non-dollar units.

Sterling opened high on hopes British Chancellor of the Exchequer John Major, at the Organization for Economic Cooperation and Development in Paris, might hint at the timing for full British EMS membership.

Analysts said Britain's adherence to the exchange rate mechanism would lower interest rates, ease pressure on the pound and enhance its value. But Major said domestic inflation was still too high to make the move.

In London, the pound declined to $1.6940 from $1.6950 Tuesday after reaching a session high of $1.7075 before Major spoke.

In Frankfurt, the dollar climbed to 1.6820 deutsche marks against 1.6750, and also rose in Zurich, to 1.4125 Swiss francs from 1.4065.

Wrangling within the West German central bank over forthcoming monetary union of the two Germanys is unsettling world markets, economists said.

The dollar rose in Paris, Brussels and Milan to 5.6380 French francs against 5.6335, 34.52 Belgian francs compared with 34.39, and 1,229.80 Italian lire against 1,229.75 at the previous day's close.

Earlier in Tokyo, the dollar inched up against the yen. The dollar closed

at 150.75 yen, up just 0.05 yen from 150.70 Tuesday.

Republic National Bank in New York closed cash gold at $364.25 an ounce, off from $367. The New York Commodity Exchange settled June spot contract gold at $364.10 an ounce, off from $367.40.

In Zurich, gold slipped to $366.50 an ounce from $368 Tuesday. Gold fell in London to $366.50 an ounce from $367.50.

Republic closed cash silver at $5.055 an ounce, off from $5.16. Comex June spot silver ended at $5.047 an ounce, down from $5.138.

Zurich silver eased to $5.15 an ounce from $5.25. London silver fell to $5.16 an ounce from $5.17.

#90150u1984 05/30/1990 ~United Press International

AMRITSAR, INDIA (MAY 30) UPI - Sihk extremist wearing police uniforms and traveling in a jeep opened fire on a crowded market in Talwandi Bhai village Wednesday, killing 10 people and wounding 14 others in the second such attack in less than a week, police said.

The incident came amid a new cycle of violence in Punjab, where more than 50 people have been killed during the past week in separatist attacks and clashes between extremists and security forces.

Authorities said the Khalistan Commando Force, led by self-styled Lt. Gen. Yadwinder Singh Yadu, claimed responsibility for the killings. It was the second time in a week the group had staged such an attack.

On Monday, the Khalistan Commando Force attacked a farm, dragging a group of migrant workers into a field and forcing them to stand in a row and chant separatist slogans before opening fire. Thirteen of the migrant workers were killed, including 11 Hindus.

The attack Wednesday came about 7:30 p.m. when a group of gunmen wearing police uniforms pulled their jeep into a central market in Talwandi Bhai town, located in the Firozpur district along the frontier with Pakistan about 55 miles south of Amritsar.

Police said the gunmen began firing indiscriminately into the crowd with AK-47 rifles, killing eight people instantly and wounding 16 others. Two of the wounded died later at a hospital.

More than 7,000 people have been killed in separatist violence since 1983, when Sikh extremists launched a bid for an independent state of Khalistan, or Land of the Pure, in Punjab.

Militants claim a separate nation for India's 16 million Sikhs is necessary to allow the minority community to escape alleged discrimination by the Hindu-dominated central government in New Delhi.

NEW YORK (MAY 30) UPI - Average yields for money market mutual funds were unchanged in the latest reporting week, while rates at competing savings and loan institutions were mixed, institutions that track these yields and rates said Wednesday.

The Donoghue Organization, of Holliston, Mass., said average seven-day simple yields were unchanged at 7.68 percent, and 30-day simple yields also were unchanged at 7.68 percent. The average maturity of fund portfolios was 43 days, down from 44 days.

The Bank Rate Monitor, of North Palm Beach, Fla., gave average rates as follows: money market deposit accounts, 6.03 percent, down from 6.04; Super-Now accounts, 4.99 percent, unchanged; six-month certificates of deposit, 7.75 percent, unchanged; one-year CDs, 7.90 percent, down from 7.91; 2 1/2-year CDs, 7.91 percent, down from 7.92; and five-year CDs, 7.98 percent, up from 7.94.

The average rate for a one-year, adjustable-rate mortgage was 8.54 percent down from 8.57.

The average rate on a 15-year, fixed-rate mortgage fell in the latest week

to 9.95 percent from 10.01, while the average rate for a 30-year, fixed-rate mortgage was 10.13, down from 10.22 percent.

The average rate for a four-year automobile loan was unchanged at 12.29 percent.

NORFOLK, Va. (MAY 30) UPI - The Navy has grounded its worldwide fleet of CH-46 Sea Knight helicopters for the second time this month, due to a problem involving the rotor of the aircraft, officials said Wednesday.

The latest problem was discovered May 25 during the routine inspection of a helicopter at the Naval Aviation Depot in Cherry Point, N.C., Navy spokesman Lt. Dave Wray said in Washington.

Two weeks ago, the same fleet of 340 Navy and Marine Corps helicopters was temporarily grounded due to a transmission problem in the aft rotor.

The new problem involves equipment vital to the rotor of the Sea Knight, which is used to transport Marines and Navy supplies. The Marine Corps oversees 259 of the helicopters and the Navy the other 81, Wray said.

''Last Friday, during routine inspections they discovered fractures on the connecting link of the rotor hub,'' said Wray.

The connecting link retains the rotor blades to the rotor hub, helping to hold the blades in place. The cracked link appeared to have suffered metal fatigue, Wray said.

The links are made up of vertical and horizontal pins that hold the rotors to the hub and allow them to flex up and down, Wray said. Each aircraft has six links, three in the forward rotor and three in the aft.

The damaged assemblies are to be replaced and helicopter components will receive more frequent inspection, said Lt. Russ Greer, a spokesman for the Atlantic Fleet Naval Air Force in Norfolk. About 130 of the aircraft are assigned to the Atlantic Fleet.

The problem is not related to the one discovered after the May 4 crash of a helicopter at Twenty-Nine Palms, Calif., Wray said. That crash led to 17 injuries but no fatalities.

Investigators learned during the investigation of the California incident that a shaft inside the aft transmission of the twin-rotor helicopter was experiencing excessive wear that could lead to loss of power.

The CH-46 has a solid safety record, according to the Navy. The first was flown in 1962 and the aircraft went out of production in 1971.

Some of the helicopters may have already been inspected and back in the air this week, the Navy said. All of the aircraft are expected to return to flying status later this summer.

#90150u2071 05/30/1990 ~United Press International

NEW YORK (MAY 30) UPI - Stocks closed modestly higher Wednesday in heavy trading after prices were able to weather waves of profit taking and send the Dow industrials and a major broad market index to record high closes.

The Dow Jones industrial average, which surged 49.57 Tuesday to the previous high of 2870.49, rose 8.07 to close at 2878.56.

Among broader market gauges, the New York Stock Exchange composite index rose 0.18 to 196.75 and Standard & Poor's 500-stock index rose 0.21 to 360.86, another new high. The price of an average share rose three cents.

Advances led declines 803-700 among the 2,012 issues crossing the NYSE tape. Big Board volume totaled 199,540,000 shares, versus 137,410,000 shares traded Tuesday.

Sellers tried practically throughout the day to take profits and push the market lower. But prices stood firm despite bout after bout of selling and the buyers finally won out, sending the key blue-chip index to its second straight record high close.

"It was amazing, the inability of the profit takers to take the market down," said Don Hays, director of investment strategy at Wheat, First Securities Inc. in Richmond, Va.

"There was a lot of pressure to try to put the market down. They were in there all day long, with wave after wave of selling, but the market was able to rebound every time," he said.

While the market never fell significantly into the minus column, sellers were successful in taking the Dow industrials well off their highs. The index was up more than 20 points at midafternoon and briefly dipped below unchanged.

Hays said that did not worry him, however. "The market is very overbought but it could stay in this condition for months and go substantially higher " he said. "That's what I think it's going to do here. I think it's very significant that prices did not fall today after the rally yesterday and in the next day or two the gain could feed on itself on the upside."

On the trading floor, Texas Utilities was the most active issue, up 1/8 at 36 3/8. First Bank System followed, up 3/4 to 15 1/2. Armstrong World Industries was third, down 1 1/2 to 35 3/4. A Canadian investor group, the Belzberg family, which had attempted to win control of Armstrong, sold its stake in the company. The Belzbergs' efforts were crippled by a recent anti-takeover law passed by Pennsylvania.

IBM was fourth, extending its rally, up 1 1/8 to 120 7/8. Wendy's was also active, up 5/8 to 6 1/4 after reports saying the company thinks analysts' second quarter operating earnings estimates of eight to ten cents a share are low and that it will do much better in all of 1990 than it did last year.

Among the other blue chips, AT&T rose 1/4 to 42 3/4, Coca-Cola lost 1/2 to 45, Woolworth added 1 1/8 to 66 1/2, Procter & Gamble jumped two to 82 and Philip Morris fell 1 1/8 to 42 3/8.

In other trading, Tyco Labs rallied for its second straight day, up 3 1/8 to 53 3/4 after agreeing Tuesday to buy Wormald International Ltd., an Australian maker of fire protection equipment, for stock and $350 million in cash.

Disney surged six to 125 3/4 after an analyst was said to have repeated his "buy" rating on the stock, but Circus Circus Enterprises sank 2 5/8 to 62 5/8 after an analyst reportedly downgraded his rating on the issue.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 248,222,940 shares, compared with 167,136,000 shares traded in the previous session.

Prices closed mixed in active trading on the American Stock Exchange. The Amex Market Value index rose 0.35 to close at 362.91. The price of an average share was up one cent. Declines led advances 300-282 among the 839 issues traded. Composite volume totaled 18,886,100 shares, compared with 13,401,050 traded Tuesday. Amdahl led the Amex issues, off 3/8 to 16 1/8.

The National Association of Securities Dealers composite index closed up 1.26 to 458.77.

#90150u2137 05/30/1990 ~United Press International

(MAY 30) UPI - British authorities say the magnitude of an earthquake that shook the Balkans and the southwestern Soviet Union was enough to cause major damage. The quake... centered in the northeastern mountains of Romania... measured between six and seven-point-five on the Richter scale. Officials in Romania say at least seven people were killed and 100 people

injured across the country. The Romanian news agency says the quake lasted several minutes and was followed by after-shocks.

Aides to Mikhail Gorbachev say the Soviet president made NO immediate plans to return to Moscow after a powerful quake hit the southwestern Soviet Union today. Gorbachev is spending two days in Canada before flying to the United States this evening. He was greeted by boisterous cheers from an adoring crowd in Ottawa, where he held private talks today with Canadian Prime Minister Brian Mulroney.

White House news secretary Marlin Fitzwater says President Bush is ''upbeat and confident'' about meeting with Soviet President Gorbachev . Bush is expected to steer clear of the thorny question of a NATO-aligned Germany this time around, however. Fitzwater says the president will re-assure Gorbachev that the issue can be worked out in later talks limiting conventional forces in Europe.

An Israeli army spokesman says Israeli soldiers killed four guerrillas and captured several others who landed a speedboat on a beach near Tel Aviv. Officials say NO Israelis were wounded in the morning attack. The spokesman reports that a second speedboat was stopped before it reached the coast. Military sources say the speedboats were lowered from a ship that sailed from a Libyan port.

THE DALLES, OR (MAY 30) UPI - A smoky fire at the John Day Dam on the Columbia River halted power production, shut down the region's key shipping channel and hospitalized three workers with smoke inhalation, officials said Wednesday.

The Army Corps of Engineers, which operates the dam, reported Tuesday night's blaze caused minor flooding in galleries beneath the powerhouse floor and also flooded all of the turbine pits. However, officials said they found no threat to the structural integrity of the dam, located 25 miles east of The Dalles.

The fire broke out around 5:20 p.m. in a station service system that supplies operating power to all of the plant's equipment and lighting. The dam was evacuated when smoke was noticed in the generator bay and the 1,900 square-foot powerhouse quickly filled with dense smoke.

The generators immediately were shut down and crews used equipment at the powerhouse to douse the flames, requiring no outside help, corps officials said. Crews worked through the night to clear the powerhouse of smoke and begin efforts to learn the cause of the fire.

One of three corps employees who suffered smoke inhalation was released from an area hospital Tuesday night and the others were released Wednesday said corps spokeswoman Dawn Edwards.

Project manager Terry Armentrout said the dam's navigation lock could be out of operation for several days. He had no initial estimate on the time or amount of work needed to return the lock and powerhouse generators to operation but said crews will work around the clock to do so.

Commercial river traffic was being held above John Day Dam and below Bonneville Dam until the lock was back in service.

The lock shutdown also stopped fish barges contracted to carry millions of salmon and steelhead smolts downriver. Officials said the barges trapped above the dam wound up having to release their cargo.

(MAY 30) UPI - The State Department says North Korea's return on Monday of the remains of five Americans listing as missing in action during the Korean War is a step in the right direction for warmer relations. But Washington insists that North Korea must first fulfill other conditions, which include allowing U-S inspections of suspected nuclear fuel facilities. The two countries have NO formal ties.

Chicago police say a fire that killed five children and an adult from the same family was a murder-suicide. Investigaors say a gasoline can was found in the dining room of the apartment, and there was evidence that gasoline was poured in the dining room and living room. The father of the

children is suspected of starting the fire, which also killed him.

South African Archbishop Desmond Tutu's scheduled commencement speech this Sunday at Wesleyan University is prompting complaints from Jewish students and faculty. Protesters at the Connecticut school object to statements attributed to Tutu in December, while he was visiting a Jerusalem Holocaust memorial. He told Jews that they should forgive those responsible for the Nazi genocide.

#90150u2219 05/30/1990 ~United Press International

ATHENS, GREECE (MAY 30) UPI - Ancient Roman reservoirs have been discovered underneath Athens and could be used to water gardens and wash streets in the water-strapped city, agricultural authorities said Wednesday.

The city's modern day water sources has all but dried up because of less rain than normal this winter and officials fear the city only has a five-months supply of water left.

Quoting Agriculture Minister Michalis Papakonstantinou, the semi-official Athens News Agency said the newly discovered reservoirs probably date from the Roman Emperor Hadrian, between 117 and 138 A.D., who ordered aqueducts to be built from nearby Pendeli mountain to supply water to Athens.

The aqueducts have long since disappeared, but the water reservoirs still remain under what has become central Athens.

He said they have been creating problems for buildings erected over them, apparently without the builders being aware of their existence.

Papakonstantinou said the reservoirs could be tapped at three points to provide water for city gardens and streets, relieving pressure on the city's dwindling water supply.

Athens' present day water suppy - most of which comes from a lake near the ancient city of Marathon - has dropped by more than half in recent months because of the poor winter rains.

In a bid to cut consumption, the government of Prime Minister Constantine Mitsotakis boosted water rates early this month.

The authorities did not say how large the ancient Roman reservoirs were or how they were discovered.

#90150u2231 05/30/1990 ~United Press International

NEW YORK (MAY 30) UPI - U.S. gasoline inventories rose last week for the first time in 11 weeks and the percentage of refineries actually producing gas jumped sharply, the American Petroleum Institute reported Wednesday.

The increases should place downward pressure on gasoline prices, which have been supporting the oil market over the last two months in face of a continuing world glut of crude oil.

In the API's survey for the week ended May 25, gasoline supplies increased to 214.2 million barrels from 213.2 million barrels in the prior week but remained below year-ago levels of 221.7 million barrels.

This was the first rise since the week of March 2, when the nation's gasoline stocks stood at 246.4 million barrels.

U.S. refineries operated at 88.4 percent of capacity last week, compared with 85.0 percent a week earlier and 88.6 percent a year ago.

The whopping 3.4 percent jump from the prior week strongly indicates thatrefineries have finally emerged from their annual maintenance ''turnarounds'' from heating oil to gasoline production and that more supplies will soon be reaching the market.

Stocks of unleaded gasoline, which accounts for 90 percent of the domestic market, also increased last week, to 164.3 million barrels from 163.8 million barrels a week earlier, and remained higher than year-ago levels of 155.6 million barrels.

Daily gasoline production moved up to 6.9 million barrels in the latest week from 6.6 million barrels in the previous week but was less than year-ago output of 7.1 million barrels.

In the most recent week, gasoline imports on a daily basis increased substantially to 559,000 barrels from 423,000 barrels in the previous week and were above year-ago imports of 525,000 barrels.

Crude oil inventories rose to 381.8 million barrels from a revised 379.7 million barrels in the prior week and remained above year-ago levels of 341.3 million barrels.

Crude oil imports climbed to 6.9 million barrels a day from 6.0 million barrels in the previous week and were substantially higher than daily year-ago imports of 6.3 million barrels.

Imports of refined products increased to 2.5 million barrels daily from 1.7 million barrels in the preceding week and were equal to year-ago imports of 2.5 million barrels a day.

Inventories of distillate - used for home-heating oil and diesel fuel - rose to 100 million barrels from 99.2 million barrels a week earlier and were larger than year-ago levels of 95.3 million barrels.

Distillate production edged up to 2.8 million barrels daily from 2.7 million barrels daily in the preceding week and was higher than year-ago output of 2.7 million barrels daily.

Distillate imports fell to 127,000 barrels a day from 166,000 barrels a day in the previous week and were much less than year-ago imports of 258,000 barrels a day.

#90150u2239 05/30/1990 ~United Press International

WARSAW, POLAND (MAY 30) UPI - Solidarity-backed candidates overwhelmed communists in elections to some 50,000 local offices, taking 41.5 percent of the posts to the communists' 0.3 percent, preliminary and unofficial government results showed Wednesday.

About 42 percent of eligible voters went to the polls Sunday in the country's first truly free local elections since 1922. Western observers considered the election satisfactory, given that the elections were the first to offer a choice in decades, officials said.

The turnout was lower than Polish officials expected.

''The turnout is a surprise to me,'' Chief Election Commissioner Jerzy Stepien said at a news conference. ''I predicted it would be over 60 percent. ... But having lawful (local) authorities elected is of great importance.''

Preliminary results show Solidarity candidates won 41.5 percent of the posts, Stepien said. Independent candidates won 38 percent, the Peasant Party won 6.5 percent and the Social Democracy Party, the successor to the Polish Communist Party, won 0.3 percent of the offices, he said.

The statistics were gathered from 16 regions representing about 32.5 percent of the country.

Local Solidarity-backed Citizen's Committees were established after the trade union movement's overwhelming victory in last June's parliamentary elections, which put Solidarity in charge of the federal government.

The Citizens' Committees fielded candidates for a majority of the 52,037 local government posts that were up for election on Sunday.

Stepien said there were some electoral quirks and protests. In one constituency, the race for a post was invalidated when one vote too many was found in the ballot box. Results appeared to give one candidate a one-vote edge over his opponent. Another election will be held.

But he cautioned that the elections should not be compared to the parliamentary balloting in 1989.

''Comparing this turnout to the turnout in last year's elections would be misleading because they included a wider number of voters,'' including soldiers, Poles traveling abroad, people in hospitals and students.

At a separate news conference, Social Democracy Party Chairman Aleksander Kwasniewski said the results show no single political force can claim the right to represent the whole nation.

He said 3,200 members of his party and supporters won office, including 15 council members in Warsaw.

-30- 2644

#90150u2297 05/30/1990 ~United Press International

LOS ANGELES (MAY 30) UPI - Mayor Tom Bradley signed an ordinance Wednesday banning the sale of ammunition for a week before both July 4 and New Year's in a move to end random gunplay by holiday revelers.

''Participating in a barrage of random gunfire is akin to playing Russian roulette with the lives of loved ones and the people of your community,'' Bradley said. ''This is a game I am not willing to play when it concerns the safety of Los Angeles residents.''

The prohibition, which was approved unanimously by the council Tuesday, is thought to be the first such ordinance in the nation. It carries an urgency clause so it will take effect before the upcoming July 4th holiday.

Bradley joined Councilmen Joel Wachs and Richard Alatorre last January to propose the new law following another violent New Year's Eve when the gunfire injured eight people in the city.

''This is a reasonable balance between the legitimate rights of gun owners to obtain ammunition for legitimate reasons such as self-protection and hunting and the need to help our police stop the 'rain' of terror that has just besieged our streets at these times of year,'' Wachs said.

Although an intense public education campaign helped contribute to a 50 percent drop in gunfire reports during the holiday, there were still 75 arrests and 134 guns seized.

At least one person has been killed by random gunfire over the years, Assistant Police Chief Jesse Brewer said.

Gunshop owners and opponents of gun control have complained the ban would be ineffective in curbing the random gunfire and also would impinge on their right to buy and sell ammunition for hunting and other sporting purposes.

But Bradley, joined by the two councilmen, Brewer and City Attorney James Hahn at a new conference, said it would halt sales to the ''unthinking people'' who dash out just before the holiday to buy ammunition and ''somehow fail to understand that bullets shot into the air are going to come down.''

Alatorre pointed out that even with laws prohibiting the gunplay and an intense community outreach program aimed at bringing an end to the practice, it was like a ''war'' in inner-city communities last New Year's Eve.

#90150u2299 05/30/1990 ~United Press International

CAPE CANAVERAL, FL (MAY 30) UPI - An Atlas-Centaur rocket was damaged on the launch pad Wednesday when a high-pressure helium line failed during a routine fueling test, indefinitely delaying launch of a NASA-Air Force science satellite.

A spokesman for rocket-builder General Dynamics Corp. of San Diego said the planned June 23 launch of the Combined Release and Radiation Effects satellite - CRRES - would be delayed until engineers determine what it will take to fix the damage.

The accident involved the first of 60 new Atlas-Centaur rockets being built by General Dynamics as a commercial venture in a major move to capture a share of the private-sector launch market.

A brief statement said only that the interstage adaptor, a barrel-shaped segment connecting the Atlas first stage with the Centaur second stage suffered ''minor damage during a routine tanking test'' at launch complex 36B at the Cape Canaveral Air Force Station.

''Early indications are that a high-pressure helium line failed during the pressurization of the helium system,'' NASA said in a statement. ''It appears the line failure caused two small holes in the interstage adapator.''

Jack Isabel, a spokesman for General Dynamics, said by telephone from San Diego that the larger hole measured 2 inches by 1 inch while the second

was even smaller.

But he did not know how the line failure might have affected other systems in the interstage area or whether the Centaur upper stage would have to be removed from the Atlas to make repairs.

''General Dynamics is forming an investigation team to determine the cause of the incident, assess damage to the launch vehicle and determine if there is an impact on the scheduled ... launch,'' the statement said.

-30- 1954

#90150u2304 05/30/1990 ~United Press International

(MAY 30) UPI - Romanian officials say seven people were killed and about 100 others injured in a powerful earthquake that shook Eastern Europe today. The tremor was centered in the Carpathian Mountains, but rattled buildings as far away as Moscow, where it forced evacuation of the U-S Embassy.

Soviet President Gorbachev is expected to discuss German re-unification in talks this afternoon with Canada's Prime Minister Brian Mulroney. Earlier, Gorbachev drew one of the most enthusiastic greetings ever given a foreign leader in Ottawa, when thousands chanted ''Gorby, Gorby'' as the Soviet leader strolled to Parliament.

Officials say two Air National Guard fighter planes collided today while flying over western Iowa... but all three people aboard bailed out safely. A Spencer Radio station says the crash created a huge ball of flames that could be seen 40 miles away. The two planes carried two pilots and a newspaper reporter.

A Colombian newspaper says police on Sunday impounded more than a ton of dynamite and arrested six men who were plotting to kill Colombian President-elect Cesar Gaviria during the nation's elections. Gaviria, who takes a hard-line against drugs, is said to be number-one on the druglords' hit list.

The family of the president of the Gabon's National Assembly says he was kidnapped while taking a walk last night in his Libreville neighborhood. An unspecified number of armed men reportedly took the assembly president prisoner last night in the capital of the west African nation.

#90150u2323 05/30/1990 ~United Press International

NEW YORK (MAY 30) UPI - America West Airlines Inc., which is interested in expanding its presence in the Northeast, is considering a possible acquisition of either the Pan Am Shuttle or the Trump Shuttle, a

spokeswoman confirmed Wednesday.

''We would like to strengthen our East Coast presence, and it's difficult to get gate space and slots in the East Coast,'' said Daphne Dicino, speaking on behalf of the Phoenix-based carrier.

Both the Pan Am and Trump shuttles offer ''a strong way'' to acquire space at northeastern airports, and ''we're looking at that,'' she said.

The shuttles serve the Northeast corridor by flying between Boston, New York and Washington.

America West has held talks with the Trump Organization and also has asked for financial books on the Pan Am shuttle, America West company chairman Edward Beauvais said in an interview published Wednesday in the New York Daily News.

''We are interested in looking at several opportunities that are out there '' Dicino said. ''We have talked to all the entities out there that have these opportunities available. We're certainly looking at how they might fit America West.''

The carrier, which has hubs in Phoenix and Las Vegas, flies coast-to-coast andserves the Midwest, western Canada, the West Coast, the Southwest, the Pacific Northwest and Hawaii.

The carrier recently filed for permission to fly to Taipei and Hong Kong, and a Department of Transportaiton hearing is pending on the carrier's efforts to serve Tokyo, Dicino said.

In the past seven years, the non-union carrier has grown from serving five cities with three planes to 60 cities and more than 90 aircraft, she said.

America West also recently obtained more gate space at Kennedy International Airport in New York, she said.

Pan Am recently retained Kidder, Peabody & Co. as investment banker to handle a possible sale of the airline. A Pan Am spokeswoman said the carrier will not comment on the status of any negotiations.

American Airlines also is reportedly considering an acquisition of the Pan Am shuttle.

Last year, America West tried but failed to obtain financing in time to purchase the shuttle service then run by Eastern Airlines. Donald Trump bought the service for $365 million.

Trump recently has said he would consider selling the shuttle service.

#90150u2332 05/30/1990 ~United Press International
WASHINGTON (MAY 30) UPI - What was thought to be only a ''bed-and-breakfast'' rest stop in Canada on his way to the Washington summit turned out to be a dress rehearsal for Soviet President Mikhail Gorbachev's diplomatic road show.

It was an impresive performance.

What was intended by the Canadian government to be an uneventful farewell news conference turned into a fiery tour de force by the Soviet leader, pumping his arms, raising his voice, and warning President Bush not to tread on him just because the Soviet economy is in a shambles.

His message was that there are central issues - chiefly the future of Germany and the future of nationalistic struggles, represented by Lithuania - that the Soviet Union cannot and will not compromise on.

Running 25 minutes behind schedule, Gorbachev nevertheless launched into a long news conference lecture that will probably be a preview of the talks he will be holding with Bush at the White House and Camp David.

His arguments apparently swayed Canadian Prime Minister Brian Mulroney, who said he was aware that the NATO countries were sometimes insensitive to the enormous sacrifices made by the Soviet people during World War II and should understand the reservations that the Soviet government has about an unrestrained Germany.

#90150u2376 05/30/1990 ~United Press International

WASHINGTON (MAY 30) UPI - The majority of senators received and kept fees for speeches and articles last year, with Republican leader Robert Dole of Kansas raking in the most honoraria, according to records released Wednesday.

The financial disclosure forms were issued for 93 senators - listing everything from honoraria to gifts of football tickets and fortunes in the millions.

Filing extensions were given to Sens. John Glenn, D-Ohio, William Roth, R-Del., Strom Thurmond, R-S.C., Steve Symms, R-Idaho, Mark Hatfield, R-Ore., and Malcolm Wallop, R-Wyo. No information was released for Sen. Spark Matsunaga, D-Hawaii, who died in April.

Senate pay for 1989 was $89,500. In addition, senators are allowed to earn up to 40 percent of their salary additionally in honoraria, or $35,800 for those who do not hold leadership posts.

A 1989 law that will raise salaries for House members also will bar them from receiving honoraria starting in 1991. The Senate plans to phase out honoraria, but about a third of the current senators have pledged to stop collecting such fees in 1991.

The records released Wednesday showed at least 23 senators - 17 Democrats and six Republicans - either received no honoraria or had given it all to charity in 1989. They included some of the richest senators, such as multimillionaires John Heinz, R-Pa., and Herbert Kohl, D-Wis.

Twelve senators, eight Republicans and four Democrats got $50,000 or more in honoraria, but all gave enough to charity to stay under the 40 percent limit.

Dole led all senators, collecting $108,900 in honoraria, of which he gave $73,150 to charity. Dole reported assets of $339,277 to $804,277, with his wife Labor Secretary Elizabeth Dole having even greater total wealth.

Senate Democratic leader George Mitchell of Maine took in $50,000 in honoraria and gave $11,000 to charity. He reported assets of $332,004 to $360,000, $320,000 of which comes from his house in Washington.

Senators are not required to list the value of their personal home or their Senate salary on the disclosure forms. Assets are listed in ranges, making it impossible to give an exact figure for a senator's net worth.

Other senators collecting $50,000 or more in honoraria were: Orrin Hatch, R-Utah, $92,499; Alan Simpson, R-Wyo., $90,600; Ernest Hollings, $73,450; John Chafee, R-R.I., $66,000; Dave Durenberger, R-Minn., $62,185; Richard Lugar, R-Ind., $55,600; Bob Packwood, R-Ore., $54,400; John Breaux, D-La., $53,000; Alan Dixon, D-Ill., $51,400; and Pete Domenici, R-N.M., $50,500.

Those collecting no honoraria also included: Lloyd Bentsen, D-Texas, Jeff Bingaman, D-N.M., Bill Bradley, D-N.J., Alan Cranston, D-Calif., Tom Daschle, D-S.D., Dennis DeConcini, D-Ariz., Bob Graham, D-Fla., Edward Kennedy, D-Mass., Bob Kerrey, D-Neb., Frank Lautenberg, D-N.J., Carl Levin D-Mich., Joe Lieberman, D-Conn., Howard Metzenbaum, D-Ohio, Jay Rockefeller, D-W.Va., Charles Robb, D-Va., Terry Sanford, D-N.C., William Armstrong, R-Colo., Gordon Humphrey, R-N.H., Nancy Kassebaum, R-Kan., John McCain, R-Ariz., and John Warner, R-Va.

Gifts received by senators last year included four box seats for Washington Redskins games given to Warner, and season's passes for both the American and National Leagues that wound up in the hands of Sen. Arlen Specter, R-Pa.

Sen. Christopher Dodd listed a Christmas gift of six bottles of scotch costing $180, and Sen. Claiborne Pell was given a $175 gift from Giorgio of Beverly Hills, Calif., described as ''one ounce Red Fragrance Collection.

(MAY 30) UPI - Officials at Seabrook, New Hamsphire, say the controversial nuclear power plant produced its first nuclear-generated electricity last night. A plant spokesman says the plant fed 75 megawats of electricity into the New England power grid, producing enough electricity to supply about 65-thousand homes.

A civil rights lobbying group says it will mount a nation-wide campaign to counter conservative and religous attacks on the National Endowment for the Arts. The ads for People for the American Way will include former president Ronald Reagan and celebrities such as Kathleen Turner and Garrison Keillor.

The 1992 Democratic National Convention will either be held in New York or New Orleans. A national Democratic committee today eliminated Cleveland and Houston from the bidding, leaving the Big Apple and the Big Easy still in the running. A party spokesman says both cities were cited for their facilities.

#90150u2419 05/30/1990 ~United Press International

NEW YORK (MAY 31) UPI - First City Capital Corp. said Wednesday it sold its 11.7 percent stake in Armstrong World Industries Inc., explaining it has found it ''cannot play an active role in enhancing value for Armstrong shareholders.''

First City - controlled by the Belzberg family of Canada - sold its 4.8 million Armstrong shares at $35.75 each, much lower than the price it paid for them, a First City spokeswoman confirmed.

Armstrong said in a statement it repurchased ''a significant block'' of its common stock Wednesday, and that those shares represented part of the block shed by First City.

Armstrong, the third most active issue on the New York Stock Exchange, closed at $35.75, down $1.50.

''We invested in Armstrong World Industries Inc. because we saw a significant opportunity to create value for ourselves and for other shareholders,'' First City said in a statement.

''We have done everything in our power - through personal meetings, through a proxy contest and through the courts - to persuade management to work together with us toward that goal.

''It is now clear to us that we cannot play an active role in enhancing value for Armstrong shareholders,'' the company said. ''Accordingly, we have decided to sell our Armstrong shares and look for investment opportunities elsewhere.''

First City lost three of the four Armstrong board seats it contested earlier this month at the annual meeting of the Lancaster, Pa.-based manufacturing giant.

Its efforts also were hampered by Pennsylvania's tough new anti-takeover law that limits shareholder efforts to challenge company management.

First City is the U.S. investment arm of First City Financial Corp., a holding group based in Vancouver, Canada.

Armstrong made its repurchases through Goldman Sachs & Co. as part of a 4 million share repurchase authorization. Armstrong did not specify how many shares it repurchased Wednesday, but said about 2.4 million shares had remained to be bought back under its repurchase program adopted in June 1989.

#90150u2464 05/30/1990 ~United Press International

(MAY 30) UPI - Fierce thunderstorms pounded the southern Plains Wednesday dumping golfball-size hail in Texas that shattered windows, following floods that claimed three lives in Ohio and Pennsylvania.

The National Weather Service said thunderstorms blew across northern Texas overnight from Decatur to Denton and Dallas.

Showers and thunderstorms developing ahead of a warm front in the central United States extended from Arkansas to Nebraska Wednesday afternoon.

Thunderstorms produced severe weather in Oklahoma, eastern New Mexico and the northern half of Texas, spawning nine tornadoes.

Thunderstorms produced baseball-size hail in northwestern Irion County, Texas, and spawned winds gusting to 90 mph at Hobart, Okla., damaging a radio tower and the roof of a medical building. No injuries were reported.

Ohio Gov. Richard Celeste declared a state of emergency in four southeast counties Wednesday and was preparing to ask Washington for a federal disaster declaration because of extensive flooding.

Celeste's declaration covered Perry, Hocking, Athens and Lawrence counties where flooding has sent more than 1,000 people from their homes.

Two teenage Ohio girls drowned Tuesday after they dismounted from their mopeds and began wading in rain-swollen Paint Creek creek near Chillicothe. One of the bodies was recovered Wednesday afternoon, but the other remained missing.

Toledo in northwestern Ohio dropped to a record low of 35 degrees overnight, breaking a mark set in 1889.

Elsewhere around the Midwest and Upper Great Lakes, skies were clear in the north through Illinois and Wisconsin, while clouds covered Missouri. Temperatures ranged from 67 degrees at Kansas City to 41 at Madison, Wis.

Record rainfall was reported in eastern Pennsylvania on Tuesday, with nearly 2 1/2 falling in Harrisburg and 2 1/4 inches in Philadelphia.

A 6-year-old boy drowned late Tuesday after falling into a rain-swollen tributary of the Wissahickon Creek about 15 miles north of Philadelphia. A neighbor found Adam Drumm's body Tuesday night, five hours after Adam and his 9-year-old brother tried to cross the water on a tree limb. The limb broke and the older brother could not keep Adam from being swept downstream, police said.

Urban and small stream flood watches for much of eastern Pennsylvania,

southern New Jersey and Delaware were posted overnight but the rain generally had ended by dawn Wednesday.

On the West Coast, a storm front moved in Wednesday, bringing more rain after the holiday deluge, but it was not expected to lessen California's drought conditions. The rain in California wiped out about half the cherry crop in the San Joaquin Valley; apricots in Yolo County were heavily damaged.

#90150u2491 05/30/1990 ~United Press International

LOS ANGELES (MAY 31) UPI - Coldwell Banker Commercial Services, the nation's largest commercial real estate firm, said Wednesday that it has laid off 90 employees as part of a reorganization in its property management unit.

Coldwell said the layoffs, which represented about 1.8 percent of its 5,000 employees, were based on performance, rather than seniority.

The reorganization, announced earlier this month, involves the elimination of smaller, non-institutional properties from Coldwell's management services unit. Coldwell said it made the move so that the unit could concentrate on managing larger properties.

The Coldwell unit, the nation's fourth-largest property management business,, has a portfolio of properties with a total of about 80 million square feet.

Coldwell spokesman William Hinckley could not indicate the size of cuts in the portfolio, but he stressed that the unit plans to increase the size of its portfolio over the long term.

The portfolio in the Los Angeles area will be reduced from about 13 million square feet to 10 million square feet, Hinckley said.

Coldwell Banker Commercial Services, based in Los Angeles, was bought last year from Sears Roebuck & Co. by institutional investors. The deal did not involve the Coldwell Banker residential business.

#90150u2495 05/30/1990 ~United Press International

MIAMI (MAY 31) UPI - A group of pilots that is challenging the Air Line Pilots Association for the right to represent cockpit crews at Eastern Airlines has won the support of a majority of those pilots, a spokesman said Wednesday.

Such support is necessary before the National Mediation Board will authorize a representational election, a board spokesman in Washington said.

Thomas Cooper, chairman of the Eastern Pilots Association's steering committee, said his group submitted 1,651 authorization cards Tuesday to the board, along with its petition requesting an election.

The cards were signed by pilots who would be eligible to vote if the board decided to call an election, Cooper said.

''They (the cards) are already distributed and have come back, and we have a clear majority,'' Cooper said.

A spokesman for the board in Washington said Cooper's group must show majority support for such a vote.

''In this particular case, since there is a union, that showing of interest, in the form of authorization cards, that showing has to equal 50 percent of the eligible voters,'' the spokesman said.

The spokesman said board personnel will investigate the rival group's request and determine how many pilots are eligible to vote.

''I cannot tell you how long the investigation will take, because each investigation is different and there is no time limit,'' he said.

''The board makes the decision whether or not the petition is adequate for establishing a representation election. At this point, the only thing certain you can say is that there will be an investigation.''

Cooper said his group is receiving 10 to 15 authorization cards a day. He estimated that the group would ultimately receive 1,700 such cards.

Eastern now employs 1,775 pilots, and another 1,200 to 1,400 pilots are waiting to return to work, according to the Air Line Pilots Association.

Those pilots would be eligible to vote, as long as they are not flying for another airline, Cooper said.

Although Eastern recognizes ALPA as the legitimate representative of its pilots, 915 of its pilots now on the job were recruited as replacements for Eastern pilots who went on strike in March 1989.

The other 860 pilots defied ALPA by crossing the union's picket lines.

None of the union pilots who honored ALPA's picket line until the union called off its strike in November has been called back to work.

Negotiators for Eastern and ALPA are holding labor talks in Washington under the supervision of an examiner appointed by a U.S. bankruptcy court judge.

Eastern filed for Chapter 11 bankruptcy in March 1989, five days after unions representing its pilots, flight attendants and ground workers began a crippling strike.

A spokesman for ALPA said the union will oppose the rival pilots' request.

BOSTON (MAY 31) UPI - Kenneth H. Olsen, the 64-year-old president and founder of Digital Equipment Corp., said Wednesday he has no heir apparent at the company and brushed off questions about possible retirment.

Olsen said the recently promoted John F. Smith is not in line to succeed him. ''Blessing people early is the kiss of death,'' Olsen said.

Smith, recently named vice president of operations, took over many of the duties previously held by John J. Shields.

Shields, once widely regarded as the likeliest successor to Olsen, left the company last fall. His departure and Smith's assumption of many of Shields' duties has fueled speculation that Smith might now be in line to take over the company when Olsen retires.

However, Olsen, who will be 65 in February, said he has not given a thought to quitting. ''I'm still too young for that,'' he said.

Asked when he thought an appropriate time to consider retiring might arise he said: ''Whenever you feel like it; whenever you get bored. I haven't the slightest idea what I'd do if I retired.''

Securities analysts have expressed concern about continuity at the nation's No. 2 computer maker should Olsen retire or become incapacitated.

Meanwhile, Olsen acknowledged Digital is behind in the current quarter in shipping the company's important new VAX 9000 line of main frame computers targeted at a market dominated by International Business Machines Corp.

However, he said, the company had not expected to ship significant numbers of the new line until next quarter. In any case, a slight delay in one quarter is not significant in the product's life cycle, he said.

Olsen talked to reporters during a meeting held to introduce software and

services designed to allow the electronic flow of documents from computer to computer within a company and from one business to another.

In remarking that no new hardware was being introduced, Olsen said Digital is becoming ''more and more a software company and less and less a hardware company.''

Henry Ancona, Digital's vice president for information systems and applications, said the electronic data interchange and document management market that Digital is targeting with the new products is growing at the rate of about 50 percent a year. ''In the next couple of years, it will be about a $2 billion market,'' he said.

For example, Olsen said, General Motors Corp. ''made an edict that all its suppliers use EDI,'' or electronic data interchange.

#90150u2540 05/30/1990 ~United Press International

WASHINGTON (MAY 30) UPI - Soviet President Mikhail Gorbachev warned the West Wednesday against trying to exploit turmoil in his country and took a tough stand on German unification and the restive Baltics - two key issues on the summit agenda.

The Kremlin leader was welcomed at Andrews Air Force Base in the early evening by Secretary of States James Baker. The full measure of protocol was to be served up Thursday morning at the White House, when Gorbachev begins three-plus days of talks with President Bush.

With his wife, Raisa, and about 250 aides and attendants in tow, Gorbachev arrived in Washington from Ottawa, where he met with Canadian Prime Minister Brian Mulroney and delivered a stern - sometimes caustic - lecture about his determination to resolve the problems within the Soviet Union without meddling from the West.

Besieged at home by a populace disappointed by the slow progress of economic reforms, Gorbachev emphasized in his arrival statement at Andrews the summit's potential to take ''the first major steps to reduce strategic nuclear arms'' - the goal Bush and Gorbachev set for this meeting when they met at Malta last December.

Although a firm agreement has eluded negotiators, the leaders are expected to agree on initial cuts on arsenals and provide more specific directions for the technical experts working on a treaty to slash nuclear stockpiles.

But Baker cut directly to the most sensitive areas of potential conflict, telling Gorbachev, ''The eyes of the world are on you and on President Bush. Together our nations have the responsibility to leave behind not

only the Cold War, but also the conflicts that preceded it.''

''To do that, we must see a Germany unified and a Europe reconciled,'' Baker said, as well as progress on weapons control and a continued growth of freedom in the Soviet Union.

Baker, who worked out the final details of the summit in Moscow meetings two weeks ago with Gorbachev and Soviet Foreign Minister Eduard Shevardnadze, accompanied the Kremlin leader in his Soviet-built Zil limousine for the trip to downtown Washington and a brief tea at the Soviet Embassy.

Gorbachev was staying at the embassy, an ornate Beaux Arts mansion just three blocks north of the White House, where the formal talks will be held.

At his news conference in Ottawa, Gorbachev insisted that he will not be bullied by the West over his handling of independence-minded Lithuania - a conflict that has stalled a major U.S.-Soviet economic agreement.

He also said his domestic difficulties will not distract him from his opposition to the new Germany take a role in the NATO military alliance.

Despite that talk, Gorbachev said the superpowers have made considerable progress in nuclear and chemical arms control issues and he expected ''important work'' to be done during his talks with Bush.

Although Bush has repeatedly said he does not want to complicate Gorbachev's life over the rebellious Baltic states, the Soviet leader reiterated his position in plain language: ''We will do it our way, so it will be in the spirit and style of perestroika'' - his program of economic and political reform.

Pointing to the complicated relationship - both economic and historic - that binds Estonia, Latvia and Lithuania to the rest of the Soviet Union, Gorbachev scoffed, ''Of course, the Americans, they would have solved it in 24 hours.''

Going into the summit, Gorbachev and Bush are far apart on the matter of Germany. Bush says a unified Germany should be a part of NATO, while Gorbachev, worried that would upset the balance of power in Europe, has insisted on German neutrality.

Responding to a question on the issue, Gorbachev warned against believing that his government is so preoccupied with internal affairs - near panic over food supplies and ethnic unrest - that it cannot protect its interests.

''If you have some hopes - I will disappoint you - that the Soviet Union

is so busy with perestroika you can fish in muddy waters, no. This will not pass. This is a very superficial analysis,'' he warned.

#90150u2588 05/30/1990 ~United Press International

(MAY 30) UPI - Earthquakes kill at least 40 people... Gorbachev arrives in the United States tonight... another delay for the space shuttle... and a chemical reaction forces evacuations in Texas. Those stories and more, next from U-P-I.

Authorities in Romania say at least seven people were killed and at least 100 were injured during a powerful earthquake that caused widespread damage throughout the country.

The tremor... centered in the quake-prone Carpathian Mountains of Romania... measured higher that six-point-zero on the Richter scale and shook much of Eastern Europe.

It rattled buildings in Turkey, Greece, Yugoslavia, Bulgaria and Poland and was felt as far away as Moscow, 700 miles to the northeast.

U-S officials say they ordered personnel to evacuate embassies in Bucharest and Moscow.

The only reports of casualites so far have come from Romania.

A less powerful, but deadly earthquake struck Peru late yesterday.

The quake measured five-point-eight on the Richter scale and killed at least 33 in several mountain communities.

The quake topped buildings and caused the roof of a cathedral to cave in.

-30- 1305

#90150u2591 05/30/1990 ~United Press International

FREEPORT, TX (MAY 30) UPI - Toxic gas formed by an accidental mixing of two chemicals in a ship at a Dow Chemical plant forced the evacuation of about 2,000 people and the closure of a stretch of waterway Wednesday.

Several hundred residents in Freeport were asked to leave their homes, more than 1,850 grade school students were moved from schools and workers were evacuated from part of the Dow Chemical U.S.A. Texas Operations after the gas seeped from the vessel Marine Chemist.

No injuries were reported in the Gulf Coast community 60 miles south of Houston.

The incident began at about 8:50 p.m. Tuesday when two chemical substances - a soil fumigant and an ingredient in shampoo - accidentally mixed as the ship was being loaded. The temperature of the reaction began increasing at 10:30 a.m. Wednesday and a gas release was reported at 11:15 a.m.

The two substances together produced a toxic cloud containing ammonia and hydrogen chloride, authorities said.

''When you get this reaction, what you have is some rising temperatures, rising pressures, and one of the problems with that is it can result in a gas release, and that's what happened,'' said Dow spokeswoman Cindy Suggs.

Dow fire crews pouring water on the chemicals managed to reduce the temperature and gas releases by late afternoon, said Dow spokeswoman Barbara Mayben.

''The emergency response team remains on the scene monitoring this whole situation. The venting of the gas has decreased. No ill effects are expected from these low concentrations that did get into the community.''

The students and their teachers were moved from three schools to two parks in nearby Lake Jackson before noon Wednesday. After spending about two hours in the parks, the students again were moved to neighboring schools, where they remained until their parents could pick them up.

''They were hot, they had not had lunch, they had not been to the bathroom since 11 o'clock,'' said Brannen Elementary Principal Johnnie McWilliams. ''They needed help.''

The Coast Guard also closed the Freeport Channel and about three miles of the Intracoastal Waterway to vessel traffic, said Lt. Cmdr. Frank Whipple. But he said the reaction posed no apparent contamination threat or danger to marine life.

The chemicals mixed as the Marine Chemist was being loaded with amino ethyl ethanolamine, a substance used to make shampoos and cleansers. Another product, the soil fumigant telone, accidentally was mixed with the first substance, causing the reaction.

#90150u2599 05/30/1990 ~United Press International

LOS ANGELES (MAY 31) UPI - The $7.50 ticket may be coming soon to a theater near you.

Cineplex Odeon Corp., with a record summer movie season about to start, has boosted ticket prices at its Los Angeles theaters to $7.50 from $7 for

adults, a spokeswoman said Wednesday.

The move brings the 50 Cineplex screens in Los Angeles in line with those the company operates in New York City. Cineplex boosted its New York prices last year from $7 to $7.50.

''We periodically review our prices and costs in all our markets,'' said spokeswoman Jo Mira Clodman. ''In view of our increased costs of operations and expenses, we raised the prices in Los Angeles.''

Entertainment industry analyst Alex Ben Block said the move is likely to be followed by other major theater chains, many of which charge $7 a ticket in major cities.

''Cineplex traditionally has been a leader in raising ticket prices,'' said Block, editor of the trade publication Show Biz News. ''I think most of the other chains will eventually follow.''

Cineplex, which is based in Toronto and operates about 1,300 screens in the U.S., has been financially troubled in recent years because of taking on too much debt, Block noted.

''So they need the money from ticket sales desperately,'' he said.

But Block said the price increase is unlikely to deter moviegoers: ''It's horrid to see the price go up, but when you compare it with other forms of entertainment, the price of going to the movies is still a big bargain.''

Greg Rutkowski, vice president of Western operations for the 1,700-screen AMC chain, said AMC has no plans to boost its top ticket price. AMC prices range between $5 and $7, with the top price being charged only in Los Angeles and San Francisco theaters, he said.

''I'm surprised at Cineplex, since we seem to be on the verge of a real movie-going boom,'' Rutkowski said. ''I think we should be doing everything we can to encourage that resurgence, which means not raising ticket prices.''

-30- 2189

#90150u2600 05/30/1990 ~United Press International

(MAY 30) UPI - Soviet President Gorbachev held talks with Canada's prime minister today, following a warm welcome from Canadian citizens.

Thousands of people lined the streets of downtown Ottawa to get a glimpse of the Soviet leader as he ignored a waiting limousine and walked to Parliament.

Gorbachev says he and Prime Minister Brian Mulroney spoke about German re-unification during their two-hour talk. Gorbachev stuck to his position that a unified Germany should be neutral.

Gorbachev says the West is NOT offering any alternatives to a united Germany's participation in a military alliance. He describes it as ''like an old record'' playing the same song over and over.

While Gorbachev received one of the most enthusiastic greetings ever given to a foreign leader in Canada, Baltic Canadians feel differently.

About one-thousand Canadians of Baltic heritage protested as Gorbachev spoke. They shouted their oposition to economic sanctions imposed on Baltic republics seeking independence.

Gorbachev is leaving Canada later in the day and is expected to arrive at Andrews Air Force Base outside Washington, D-C, this evening

-30- 1310

#90150u2614 05/30/1990 ~United Press International

NEW YORK (MAY 30) UPI - After weeks of issuing quiet warnings to the attorney defending Imelda Marcos, the judge in the former Philippine first lady's racketeering trial erupted Wednesday in a 20-minute tirade over the lawyer's courtroom tactics.

U.S. District Court Judge John Keenan directed his fury at Gerry Spence, of Jackson Hole, Wyo., after the attorney once again drawled out, ''I haven't seen ...'' as the prosecution produced another exhibit.

''Look,'' said a ruddy Keenan, his face become redder as he jumped from his chair, slammed a bundle of papers down on the bench and boomed, ''stop that!''

''You've been provided with the documents,'' Keenan lectured Spence, who belatedly joined the defense team in March.

The judge reminded the attorney that when Spence says ''I haven't seen (certain documents)'' that have been provided under federal regulations for the conduct of criminal trials, he misleads the jury.

Keenan has cautioned Spence outside the hearing of the jury about making such claims before the panel.

''If you do it again,'' warned Keenan, ''I will take appropriate action,'' a clear reference to a contempt citation.

''Don't make misleading statements in front of the jury,'' the judge said

in front of the jury. ''You are acting in a way that could conceivably harm your client, which you shouldn't do.''

Marcos is being tried on charges that she and her late husband, former Philippine President Ferdinand Marcos, conspired to buy New York real estate, art and jewelry with $222 million stolen from their homeland.

Spence said he meant to say that he had not had time to study the exhibit that set off Keenan's temper, a diary, belonging to Robert Shaheen, a 25-year associate of Adnan Khashoggi, a co-defendant of Marcos.

Spence looked through two diaries introduced as evidence and then asked for a sidebar conference, after which Keenan excused jurors.

''You have the audacity to move for a mistrial?'' asked Keenan after the jury left the courtroom.

Spence began giving his reasons, and complained of disrespect from the judge.

''I've given you more courtesy than you've given the court,'' Keenan snapped.

''I have repeatedly said 'I have not seen,' that's true,'' said an obviously hurt Spence, almost apologetically. ''What I meant is I haven't had time to study them. I care about my client.''

''I care about the administration of justice,'' blurted the judge.

In an almost sing-song voice, the judge advised Spence that if he did not have time to do his homework, and could not conduct himself more appropriately in the courtroom, maybe ''you never should have gotten involved in this trial.''

''I've conducted myself in this courtroom with the utmost respect for your honor,'' said Spence.

''I question that,'' interjected Keenan sarcastically.

''You raise your hand and scream,'' complained Spence, softly, ''You make her believe she is represented by a charlatan, that I've misrepresented her.''

Wearily, Keenan replied, ''Your conduct this afternoon mandated I do something to stop you from running this courtroom the way you want.''

''I don't want to bring your wrath down on me,'' said Spence, who then apologized and said he would not move for a mistrial. He did, however, ask

that the jurors be given special instructions.

When jurors returned, Keenan reminded them of the defendants' presumption of innocence, adding that attorneys ''in the heat of battle sometimes say things better left unsaid.''

Such statements sometimes require admonitions from the judge, but to hold such exchanges against the attorney's clients ''would be unfair and un-American.''

#90150u2621 05/30/1990 ~United Press International

(MAY 30) UPI - A chemical reaction aboard a ship docked in Freeport, Texas, is forcing evacuations today.

Three schools were ordered evacuated, and residents were advised to seal their homes due to a noxious gas produced by an accidental chemical reaction in a ship at the Dow Chemical U-S-A plant.

So far, there are NO injuries reported.

About 18-hundred-50 Brazosport Independent School District students and teachers were taken in school buses from Freeport to parks in the nearby town of Lake Jackson.

Police are calling for a voluntary evacuation of residents living in eastern Freeport.

Dow officials said water streams are being directed on the ship because the temperature of the chemical reaction had increased. The reaction started this morning when two chemical substances accidentally became mixed as the ship was being loaded.

The ship's temperature started increasing, and a gas release was reported.

A Dow spokeswoman said the gas being released is NONtoxic, but can cause minor throat problems.

The shuttle Columbia would be in orbit now if things had gone as planned.

Sources at Cape Canaveral say today's delayed launch will be postponed at least one week to fix a leak in the ship's hydrogen fuel line system.

NASA put the flight on hold last night after a massive leak of hydrogen gas was detected in the shuttle's engine room.

Technicians suspect that the leak is in a seal where a 17-inch fuel line

enters the shuttle's belly. If that proves to be the case, the space agency would have to haul the ship back to the Vehicle Assembly Building at the Kennedy Space Center, delaying the flight three weeks or more.

But engineers will test Columbia overnight in the hopes that some way can be found to quickly fix the problem.

Columbia's seven-member crew flew back to the Johnson Space Center in Houston to await developments. NO decision is expected until tomorrow.

-30- 2107

#90150u2634 05/30/1990 ~United Press International

NEW YORK (MAY 30) UPI - A telephone book belonging to Saudi Arabian arms merchant Adnan Khashoggi introduced Wednesday as evidence at his racketeering trial included listings for former presidents and celebrities as well as business contacts.

The green looseleaf book, with a yellow floral design on the cover, started off with listings for ''Al Khobar'' of ''Saudia'' and ''Associated Messengers'' under ''A'' and ran to ''Zabars,'' the famed Upper West Side supermarket.

''Ali, Mohammed,'' of Los Angeles was listed, but it was not clear if it was the former heavy-weight champ, who spells his name ''Muhammad.'' Fashion designer Yves St. Laurent was listed as ''Yves St. Laurant.''

In between were listings for singer/songwriter Paul Anka, former president Jimmy Carter, actress Farah Fawcett, Mrs. (Leona) Helmsley, the Immigration and Naturalization Service, Lee Iacocca and Dr. Henry Kissinger.

They were followed by listings for Liza Minnelli, former president Richard Nixon's office and home, several apparently Saudi names listed under ''His Royal Highness,'' Brooke Shields, Sotheby's auctioneers, translators and Frank Sinatra at the Sands Hotel in Las Vegas.

As for media contacts, there was an old number for United Press International's foreign desk, as well as listings for The New York Times and the Washington Post.

The White House press office also was listed.

#90150u2683 05/30/1990 ~United Press International

PORT CHESTER, NY (MAY 30) UPI - The bodies of four children between the ages 3 and 11 were found Wednesday with slash wounds to their necks in an

apartment where their mother was found critically injured, police said.

The discovery was made about 2:50 p.m. after local police received an anonymous phone call, Port Chester police Chief Paul Verrastro said.

The mother, Maria Amaya, who has a history of mental illness, was found with blood around her neck and initially appeared to be dead, Verrastro said.

Her children were identified as Edward, 3 1/2, Christopher, 6, Jessica, 8, and Halley, 11, he said.

''The first police officer responding to the scene entered and observed four children lying in different locations in the apartment. The children appeared to have been murdered, with knife wounds to the neck,'' Verrastro said.

The exact cause of the deaths would be determined by the medical examiner, he said.

''When first observed, the mother appeared to be unconscious with blood in the area of her neck, but she was alive and taken to United Hospital's emergency room where she was listed as critical but stable condition,'' he said.

The woman had been receiving psychological care ''for a period of time,'' the chief said.

Verrastro said the investigation was continuing, and that an arrest was expected Wednesday night.

The grim discovery was made after an anonymous caller reported that several children had been murdered at that location, he said.

#90150u2710 05/30/1990 ~United Press International

(MAY 30) UPI - The United States and Greece today struck a deal to renew the leases of two key U-S military bases in the Mediterranean.

State Department spokewoman Margaret Tutwiler says the lease allows a naval base and an air base on the Mediterranean island of Crete to continue operating.

But, she says, Washington has agreed to substantially reduce the number of U-S troops at those bases and will stick with an earlier decision to dismantle two other U-S bases near Athens.

The pact comes four days before Greek Prime Minister Constantine Mitsotakis leaves for the United States on an official visit that includes a meeting with President Bush.

The previous agreement, a five-year-deal, expired in December 1988. Washington was poised to dismantle the bases this month unless a new agreement was signed.

The text of the new pact, which expires in 1999, has NOT yet been released.

Nelson Mandela is recovering from minor surgery... but that isn't stopping the South African black nationalist leader from making travel plans.

The African National Congress says the 71-year-old Mandela will travel to Europe, Canada, the United States and five African nations.

The 45-day trip that begins next week will include an audience with the pope and meetings with dozens of presidents and prime ministers.

The journey will be the sixth and longest trip Mandela has made since he was freed from 27 years in prison in February.

Yesterday, South African President Frederik de Klerk said he had canceled a June 18th trip to Washington. Anti-apartheid activists had objected to de Klerk meeting President Bush before Mandela did.

Hospital sources in Johannesburg say Mandela is in good condition following surgery, the nature of which has NOT been publicly disclosed. He is expected to remain in the clinic until the weekend.

#90150u2717 05/30/1990 ~United Press International

(MAY 30) UPI - Heavy thunderstorms and flooding are being blamed for causing three deaths in the Ohio Valley.

Police are still looking for the bodies of two teen-age girls who drowned yesterday while wading in a rain-swollen creek about 50 miles south of Colombus.

A third victim, a six-year-old boy, drowned yesterday when he fell into a raging tributary near Philadelphia.

In southern Ohio, rising waters have chased hundreds from their homes and the Scioto River is reported to be seven feet above flood stage and rising.

Powerful thunderstorms also pounded the southern Plains today, dumping golf-ball-sized hail that shattered windows in Texas.

The National Weather Service has posted tornado watches in nine Texas counties.

#90150u2932 05/30/1990 ~United Press International

(MAY 30) UPI - Federal authorities today announced the biggest single cocaine bust in South Carolina history. Officials say they seized 17-hundred-80 pounds of cocaine and made three arrests in Charleston.

Firefighters are capping a natural gas and oil well blowout that killed two workers and injured three others yesterday in rural Mississippi. Emergency officials say that if all goes well, the job should be completed by nightfall.

Economists say a government report today shows the U-S economy is- in the

words of one analyst- ''pretty weak.'' The Index of Leading Economic Indicators fell two-tenths of one percent in April.

About 150 young contestants have survived the first two rounds of today's 63rd annual National Spelling Bee in Washington, D-C. 41 were eliminated early after they tripped up on words such as ''irreducible'' and thoracic.''

-30- 1020

#90150u3054 05/30/1990 ~United Press International

(MAY 30) UPI - Hospitals in the Romanian capital of Bucharest are jammed following a powerful earthquake that shook Eastern Europe today. The quake centered in the Balkan mountains, killed eight people and injured at least 260 more throughout the country. The tremor measured six-point-zero on the Richter scale and rattled buildings as far away as Moscow, where the U-S Embassy was ordered evacuated and closed.

A powerful earthquake rocked an Amazon area of northern Peru last night, killing at least 83 people. The quake left hundreds homeless and caused the roof of a cathedral to cave in. The 48-second quake measured five-point-eight on the Richter scale and was centered about 400 miles northeast of Lima.

Soviet President Gorbachev says he won't cave in to Western demands that a united Germany join NATO. The Soviet leader today compared the Western stance on a German alliance to a ''broken record'' and says he longs to hear a ''new melody.'' Gorbachev made the comment after meeting Canadian Prime Minister Mulroney in Ottawa. The issue ranks high on the Washington summit agenda.

The State Department says South Korea's president plans to fly to California next week to meet with Soviet President Gorbachev . A department spokeswoman says Roh Tae Woo's travel plans are still being worked out, but adds that the U-S government would ''welcome'' the meeting.

Israel's military says it headed off a sea attack by guerrillas in two speed boats, killing four Arabs. The chief of Israel's army intelligence says a faction of the Palestine Liberation Front planned the attack, which he claims originated in Libya. One witness to the today's sea clash says the Israeli gunboat opened ''with such fire'' that there was little chance of ''anyone coming out of there alive.''

Actor Kelsey Grammer may NOT be feeling too cheerful these days. The star of the television show ''Cheers'' will have to stand trial in Los Angeles for allegedly possessing a quarter-gram of cocaine. Grammer is already serving a 30-day jail sentence in a drunken driving case. If convicted, the actor could face a three-year prison sentence.

-30- 2318
#90150u3453 05/30/1990 ~United Press International
(MAY 30) UPI - Severed communication links are hampering authorities in Peru and the Balkan states who are trying to assess damage from powerful earthquakes in the two regions. Officials in Peru say at least 83 people died and hundreds were left homeless by last night's quake, which measured five-point-eight on the Richter scale. In northeast Romania, an earthquake measuring between six and seven-point-five on the Richter scale struck today, killing at least nine people.

Soviet President Gorbachev says he is tired of Western nations singing the same old tune when it comes to military alliances and a re-unified Germany. He says he'd like to help ''find a new melody.'' The issue is one that is sure to be discussed when President Bush and Gorbachev begin a summit tomorrow in Washington. The Soviet Union opposes the U-S stance that a re-unified Germany must be a member of NATO. Gorbachev is to arrive in Washington from Canada shortly .

Federal and New York authorities have concluded the first phase of an anti-mob operation they've tabbed ''Window 1.'' It resulted in the arrest of 12 alleged Mafia figures, and labor leaders purported to have mob connections. Among those hauled into Brooklyn U-S District Court was Vincent ''The Chin'' Gigante, reported to be the head of the Genovese crime family. The suspects are accused of running a crooked replacement window racket.

Dow Chemical says two chemicals were mistakenly mixed today, releasing gas that forced the evacuation of about two-thousand people in and around Freeport, Texas. Dow officials warned other residents to remain indoors and close their windows following the chemical reaction inside a ship about 60 miles south of Houston. The Coast Guard closed the Freeport Channel and about three miles of the Intra-coastal Waterway as a precaution.

-30- 2000
#90150u3657 05/30/1990 ~United Press International
(MAY 30) UPI - An earthquake centered in northeastern Romania shook the Balkans and the southwestern Soviet Union today, killing at least nine people. Authorities say nearly 300 other people were injured in the quake that caused widespread damage. Hospital officials in Romania's capital of Bucharest say casualties continue to stream in. Authorities blame panic for many of the injuries, with many people jumping from windows in fright.

Another earthquake has left another country trying to pick up the pieces. Disaster relief officials say at least 83 people were killed when a quake

measuring five-point-eight on the Richter scale hit northern Peru last night. 494 people- mostly children- were injured in the quake that also left 40 people missing and another 800 people homeless.

The Baghdad-based Palestine Liberation Front informs U-P-I that its forces attempted to stage a beach raid near the port city of Tel Aviv, Israel, today. The Front, the armed wing of the P-L-O, said the attack was in retaliation for the massacre of seven Arab laborers last week by a deranged Israeli. Israeli accounts say four guerrillas were killed in the failed sea attack, which used high speed boats.

The next launch of the shuttle Columbia now may be delayed three or more weeks because of a leak in a hydrogen fuel line system. The leak the size of a pinhole delayed this morning's scheduled blastoff. Launch director Robert Sieck told reporters at Cape Canaveral this afternoon that the earliest a launch could take place would be the middle of next week... but only if the giant craft does NOT need to be hauled back to its hangar for the repairs.

-30- 1816

#90150u3671 05/30/1990 ~United Press International

(MAY 30) UPI - Los Angeles Mayor Tom Bradley signed an ordinance today that bans the sale of ammunition for one week before the Fourth of July and before the New Year's holiday. The legislation was brought before Bradley after the city council had unanimously approved it earlier in the day. Bradley dismissed the complaints of gun shop owners and people opposed to gun control... saying he favored any measure that might stem random gunfire that erupts on both holidays.

A pair of New York physicians advise backpackers to use discretion when carrying their packs., Doctors Patrick Rosario and Sylvia Fernandes warn that hikers who haul poorly adjusted backpacks place pressure on nerves that extend through the neck, shoulders and arms. The result can be a mild paralysis of the affected areas... known as ''Erb's palsy.'' The affliction clears with rest.

Some of the nation's finest young wordsmiths are sitting for a spell tonight. That is, until the 63rd annual National Spelling Bee competition starts up again tomorrow in Washington, D-C. Tomorrow's competition has been pared to 155 would-be spelling champs from the preliminary round's record 226. The first victim today was 12-year-old Aimee Baumann, who was tripped up by ''irreducible''- which ironically means caN'T be reduced.

-30- 1459

#90150u3876 05/30/1990 ~United Press International

(MAY 30) UPI - Mikhail Gorbachev arrives in Washington for the superpower

summit... powerful earthquakes strike in Romania and Peru... and New York authorities make a major mob arrest. Those and other top stories, next, from U-P-I.

Soviet President Gorbachev is in Washington tonight, after arriving at Andrews Air Force Base.

He was greeted by Secretary of State Baker, who said the United States and the Soviet Union have the responsibility to put the Cold War behind them, as well as the conflicts that preceded it.

The Kremlin leader then headed to the Soviet Embassy in downtown Washington in advance of tomorrow's summit with President Bush.

Gorbachev arrived in the United States on the offensive, warning the West against trying to take advantage of the turmoil in his nation.

Gorbachev emphasized that the Soviet Union is NOT so involved with its internal affairs that it will fail to protect its interests.

The Soviet leader also talked about what is sure to be a summit issue- the drive for independence in the Baltic republics. He said the Baltic states have the right to secede, but- as he put it- ''we will do it our way.''

On a more concilatory note, Gorbachev said he believes the United States and the Soviet Union have made progress on arms control issues. He said he expects ''important work'' to be done during his four days of talks with Bush.

Gorbachev arrived on U-S soil from Ottawa, where he earlier held talks with Canada's Prime MinisterMulroney.

-30- 1669

#90150u3887 05/30/1990 ~United Press International

(MAY 30) UPI - An earthquake struck today in northeastern Romania, causing death and destruction in the capital of Bucharest. The quake was also felt in the Soviet Union, Turkey, Greece, Yugoslavia, Bulgaria and Poland.

At least eight people were killed in Romania. Police say at least 260 others were injured, and hospitals said more casualties were coming in.

Authorities say panic caused many injuries, with many people jumping out of windows and off balconies in fright.

The quake, which measured between six and seven-point-five on the Richter scale, tore chunks from buildings in Bucharest.... and rattled buildings

and caused minor damage in adjoining nations.

The Bulgarian News Agency says a woman had a heart attack during the quake in a Bulgarian town near the Romanian border. 38 other Bulgarians were injured.

The full extent of the damage was NOT immediately known, with communication lines down in the area around the town closest to the quake's epicenter.

Halfway around the globe in Peru, a separate earthquake measuring five-point-eight on the Richter struck late yesterday in the north. At least 83 people were killed and hundreds were left homeless.

-30- 1353

#90150u3914 05/30/1990 ~United Press International

(MAY 30) UPI - It appears the demobilization of the Nicaraguan Contra rebels is back on track.

Contra leaders met all night with President Violeta Chamorro , and today the rebel leaders said they'll proceed with their disarmament. At least 500 rebels are to give up their weapons each day.

But U-N officials and Contra leaders agree that the sheer number of rebels still bearing arms is probably too great for the June 10th disarmament deadline to be met.

U-N officials monitoring the situation say between 13-thousand and 15-thousand guerrillas still retain their weapons. With less than two weeks before the deadline, more than one-thousand Contras would have to be demobilized daily to disarm the anti-Sandinista force.

There are NO specifics on how many rebels disarmed today. An official with the Organization of American States says many guerrillas participated in today's demilitarization process.

-30- 1074

#90150u3932 05/30/1990 ~United Press International

(MAY 30) UPI - Federal and New York authorities are searching for three alleged mob figures charged today in a wide-ranging probe called ''Window 1.''

The investigation netted the arrests today of one-dozen purported Mafia figures and labor leaders reported to have syndicate ties. They were charged with operating a multi-Million-dollar replacement window racket.

Among those nabbed was Vincent ''The Chin'' Gigante- the reputed head of the powerful Genovese crime family. Also charged were Lucchese family underboss Anthony ''Gas Pipe'' Casso and Peter Gotti, the older brother of alleged Gambino crime family kingpin John Gotti.

U-S Justice Department, F-B-I and New York authorities say Local 580 of the Architectural and Ornamental Ironworkers Union exerted undue pressure to win Millions of dollars in window replacement contracts.

Among the tactics alleged is the threat of violence or labor unrest against companies that bid against Local 580, which is controlled by the Lucchese family.

-30- 1169

#90150u3950 05/30/1990 ~United Press International

(MAY 30) UPI - Witnesses say two military jets that collided today over western Iowa fell to the ground in a ball of fire. But both pilots and the solitary passenger aboard the two craft escaped serious injury by ejecting from the plummeting planes.

The crash involved an AK two-seat fighter trainer and an AD single-seat fighter. The jets were involved in a four-plane routine training mission from the 114th Tactical Fighter Group based in Sioux Falls, South Dakota.

The fireball caused by the crash was visible up to 40 miles away .

The pilots of the planes were treated for minor cuts and bruises and released. The civilian passenger was transferred to the McKennan Hospital in Sioux Falls in stable condition.

The Soviet parliament today took preliminary steps toward enacting some of the most dramatic reforms of President Gorbachev's perestroika drive.

In separate votes, the Supreme Soviet O-K'd landmark bills that call for a multi-party system and expand religious freedoms. The bills were approved by the two houses of the Legislature in separate sessions, and still must be passed by the full Legislature in joint session.

Official passage of the measures would end the Soviet Communist Party's seven-decade monopoly on power and would also overturn the government's official policy of atheism.

Western nations, including the United States, have pushed for Moscow to pass the religious freedom measure to show commitment to human rights.

-30- 1637

#90150u4007 05/30/1990 ~United Press International
(MAY 30) UPI - In a statement upon his arrival in the United States tonight, Soviet President Gorbachev emphasized the summit's potential to take- quote- ''the first major steps to reduce strategic nuclear arms.'' That's the goal President Bush and Gorbachev set when they met at Malta last December.

Secretary of State Baker was on hand at Andrews Air Force Base outside Washington, D-C, to greet Gorbachev. Baker accompanied the Kremlin leader to the Soviet Embassy... just three blocks north of the White House, where the formal talks will take place. The summit opens tomorrow.

At least nine deaths are reported following today's powerful earthquake that rocked the Balkans and the southwestern Soviet Union. The quake... measuring as high as seven-point-five on the Richter scale... was centered in northeastern Romania. It was felt as far north as Moscow, 700 miles away.

Halfway around the globe, a separate earthquake measuring five-point-eight on the open-ended Richter scale struck northern Peru last night. The death toll was at least 83, and disaster relief officials say they expect it to rise.

NASA launch director Robert Sieck says it'll be at least a week before another attempt is made to launch the shuttle Columbia. And he says if engineers have to haul the orbiter back to its hangar to repair a leak in a critical hydrogen fuel line, it could be three weeks or more.

Also at Cape Canaveral... an Atlas-Centaur rocket was damaged on the launch pad when a high-pressure helium line failed during a routine fueling test. The mis-hap indefinitely delays the June 23rd launch of a NASA-Air Force science satellite.

A spokesman for the All-Armenia National Movement says more than 100-thousand people attended today's mass funeral for 23 of 25 Armenians killed in weekend clashes with Soviet soldiers. The spokesman says the funeral and demonstration in the capital city of the Soviet republic were peaceful.

-30- 2124

#90150u4017 05/30/1990 ~United Press International
(MAY 30) UPI - Fire crews at a Dow Chemical plant in Freeport, Texas, have managed to reduce the release of gases from an accidental chemical reaction inside a ship. The gas prompted evacuations of about two-thousand people and the closing of a stretch of waterway today.

Firefighters have begun capping a natural gas and oil well blowout near

Heidelberg, Mississippi. Yesterday's blast killed two workers, injured three others and forced the evacuation of nearby residents of the rural area.

Chicago authorities say an early-morning arson fire in an apartment on the city's southwest side was a murder-suicide. Police believe the father used gasoline to set the blaze that killed himself and his five children.

Police in the Chicago suburb of North Riverside, Illinois, say a man rammed his car into his estranged wife's apartment today and shot her to death. They say the man then killed himself.

Kentucky first lady Martha Wilkinson apparently will run for governor in 1991 in a bid to succeed her husband... who by state law canNOT serve consecutive four-year terms. Today, Wilkinson filed papers forming a campaign committee.

-30- 1307

#90150u4167 05/30/1990 ~United Press International

(MAY 30) UPI - Soviet President Gorbachev arrived in the United States this evening for three days of talks with President Bush that begin tomorrow. Before his arrival at Andrews Air Force Base outside Washington, Gorbachev made it clear that internal political difficulties confronting him at home will NOT make him a lame-duck negotiator. White House aides say the challenge of this week's talks will be for the two leaders to guide the changing world order.

Romania's capital suffered widespread damage today following an earthquake that touched surrounding nations as well... killing at least nine people. Nearly 300 others also were injured in the temblor that measured between six and seven-point-five on the Richter scale. Parts of the Soviet Union, Turkey, Greece, Yugoslavia, Bulgaria and Poland also felt the quake.

The Arab League says it will ask the U-N Security Council to send a three-member team to the Israel-occupied territories. The league's representative says the request is designed to draw up measures to protect Palestinians living under Israeli occupation. The United States has said it would consider the idea of sending a U-N envoy to the territories, but NOT a Security Council team.

Police in Tyler, Texas, stormed a medical clinic and rescued a woman from a blood-spattered, knife-waving man who'd held her hostage for more than three hours this afternoon. The woman was UNharmed. The suspect- who had slit his own throat and was shot in the leg by police during the arrest- was hospitalized in stable condition. He's charged with kidnapping and assault. More charges are likely, after police found the body of his elderly father in his car. Authorities DON'T have a motive for the

incident.

#90151b0022 05/31/1990 ~Business Wire

LOUISVILLE, CO (MAY 31) BUSINESS WIRE - As the final step in retiring its existing debt with the proceeds of recent equity and convertible debt offerings, the Storage Technology Corp. board of directors Thursday approved a plan to redeem the remaining principal amount of its 13.5 percent Senior Debentures due in 1996.

June 11 has been established as the record date for holders of the 13.5 percent bonds to be redeemed. As of that date, the 13.5 percent bonds thereafter will be non-transferrable on the books of the indenture trustee First Fidelity, N.A., New Jersey, 765 Broad Street, Newark, N.J.

The redemption price to be paid on July 11 will be $104.48, which price includes principal, a redemption premium of 2 percent and payment of all accrued and unpaid deferred interest to the redemption date. The redemption premium will result in an extraordinary charge of approximately $4.6 million in the company's second quarter ending June 29.

The company raised a total of $275 million as a result of a common stock offering completed in March and a convertible debt offering completed Thursday. The company estimates it will save approximately $25 million annually as a result of lower interest costs.

Storage Technology Corp. manufactures, markets and services, worldwide, information storage and retrieval subsystems for high-performance computers.

LAS VEGAS (MAY 31) BUSINESS WIRE - Electronic Data Technologies (NASDAQ:EDT)(''EDT''), a designer and manufacturer of computerized systems for the gaming industry announced Thursday an agreement with the Golden Nugget Laughlin for the installation of the EDT Slot Tracking System.

Stage I of the contract provides for the current installation of the EDT System on approximately 800 units. Stage II, which consists of 600 units,

is expected to begin installation, pending financing of the expansion, in the fall of 1990.

With the successful installation of the EDT Slot Tracking System at the Mirage, Golden Nugget management continues to show confidence in the EDT product by choosing to install this system in their Laughlin property.

''The EDT Slot Tracking System will provide the Golden Nugget Laughlin with many accounting and security benefits while providing many accounting and security benefits while providing many marketing opportunities, giving them the ability to personally acknowledge their valued players.'' said Mike Farnham, vice president of EDT's Systems Division.

EDT is a world leader in computerized gaming management systems with over 32,000 units attached to slot machines in over 40 casinos worldwide.

The Las Vegas-based company employs more than 300 people, including approximately 70 hardware and software engineers and 70 customer service personnel dedicated to the support and development of quality computerized gaming systems and route operations. The company maintains sales and service offices in Reno and Laughlin, Nevada.

SEATTLE (MAY 31) BUSINESS WIRE - Seafirst Bank Thursday introduced a business and travel credit card designed to challenge the American Express card, announced Seafirst President Luke Helms.

According to Helms, Seafirst expects its new credit card program to gain a major share of the West Coast's corporate travel market, which has long been dominated by American Express.

The card -- called the Seafirst CorporateCard -- allows holders to accrue frequent flyer miles in the Alaska Airlines Mileage Plan. Cardholders will earn frequent flyer miles for air travel, and they will also earn one mile for every dollar charged for airline tickets, hotels, motels and rental cars. But unlike other cards, mileage earned for these core travel charges can be pooled and held in a separate company account which the company can allocate at its own discretion.

''We have something that's different and significantly better than any other product available to business,'' says Helms. ''It should have a definite impact on the business credit card market in the Northwest.''

According to research conducted by MasterCard and Seafirst, companies want three things from a business travel credit card: convenience, acceptance and utility. Helms says their card has all three. ''American Express has a third of the merchants MasterCard has,'' says Helms. ''That means there are three times more places you can use a MasterCard than an American Express card.''

Research has also shown companies want a better way to control expenses and more flexibility regarding payment, and they want travel benefits.

SCOTTS VALLEY, CA (MAY 31) BUSINESS WIRE - Seagate (NASDAQ/NMS:SGAT) has announced its second generation of cost-effective solutions for entry level laptop and low profile desktop applications.

The ST351 3.5-inch disc drive stands 1.0 inches high, consumes less than 2 watts of power, and provides 42 formatted megabytes of data on a single disc with an average access time of 28 milliseconds. The ST351 offers Seagate's closed loop, rotary actuator, jumper-selectable AT and XT industry standard interfaces, and a rugged non-operating shock specification of 75 G's.

Built upon the very successful ST325 product technology, the ST351 utilizes the company's patented ''Zone Bit Recording'' (ZBR), allowing for significant capacity and performance enhancements upon Seagate's first generation ST325 products.

''Power consumption, ruggedness, and cost are the three key factors in supplying drives for laptop applications,'' said Joel Stead, product line manager. ''Seagate's line of storage solutions for laptop and desktop applications addresses emerging product requirements as well as provides users the reliable design, quality performance, and long-term support for which Seagate is recognized.

''The use of leading-edge technology, such as ZBR, allows Seagate to increase product capacities and data transfer rates, and provide greater reliability at a lower cost per megabyte. With this kind of quality and technology throughout the Seagate product line our customers are now able to reduce their cost of doing business.''

The ST351 disc drive features host programmable power management and auto park.

Evaluation units will be available in the third calendar quarter of 1990, with production volumes available in the fourth calendar quarter of 1990.

Seagate Technology is the world's leading supplier of disc storage products to original equipment manufacturers and remarketers.

NEWBURY PARK, CA (MAY 31) BUSINESS WIRE - HOH Water Technology Corp. (NASDAQ:HOHI, HOHIU, HOHIW) will begin marketing of a unique, non-electrodeionization water-treatment system in June, according to an announcement by HOH Chairman and Director of Research Harry M. O'Hare.

''American consumers have a new awareness of the need to conserve water resources as well as the need to improve the quality of the water coming from their tap. Our new system meets both those concerns and more,'' O'Hare stated.

The HOH under-the-sink system features three disposable cartridges designed to house several combinations of proven water-treatment methods. The cartridges are easily and economically replaced by the consumer.

O'Hare added that, ''Through a combination of new technologies and improved manufacturing methods, our systems will give the residential user a unit that saves water, space and money while producing a water supply of consistently high quality.'' Distinctive internal design features reduce the number of water connections by half, making the units safer, easier to service and more economical to install.

Product descriptions, pricing and delivery schedules are expected to be announced shortly.

In another development, the bench testing of the company's patented Electropure water-desalting units is being completed. The electropure system utilizes electrodionization (EDI) technology to produce water of the highest purity. In June HOH will be placing field test units throughout Southern California and Arizona.

The test units will be linked to HOH's central computer by modem links permitting monitoring and minor adjustments of all field units from a central location. First phase of field testing is intended to be completed by early fall, with planned production of the high-purity EDI units starting during the last quarter of 1990.

HOH Water Technology is engaged in the development and supply of a breakthrough line of water filtration and treatment systems for residential, commercial and industrial water users.

VENTURA, CA (MAY 31) BUSINESS WIRE - Benton Oil and Gas Co. (OTC:BNTN) Thursday announced the completion of the Steidlmayer 6-2A well which tested 4.9 million cubic feet of gas per day with no water.

The well was tested on a 16/64-inch choke with flowing tubing pressure of 3,083 pounds per square inch (psi). Calculated absolute flow was determined to be 9.6 million cubic feet per day through perforations between 7,588 - 7,624 feet. Located in Colusa County, Calif., the well was directionally drilled to a total depth of 7,750 feet.

Log analyses indicate that a second gas zone was also encountered above this tested zone. The second zone appears to have up to 80 feet of gross pay, which indicates potentially significant additional natural gas reserves recoverable from this well.

Benton Oil and Gas Co., based in Ventura, Calif., is an independent oil and gas exploration and production company with operations in California, Colorado, Oklahoma, Texas and Louisiana. Its common stock (symbol BNTN) is traded OTC.

SALT LAKE CITY (MAY 31) BUSINESS WIRE - Plexus Resources Corp. Thursday announced the first sale of gold and silver from its participation in the Denton-Rawhide Project in Nevada.

Although the Denton-Rawhide Project is still in its start-up phase, annual production is expected to average 80,000 ounces of gold and 399,000 ounces of silver during the first five years of operation. Plexus has both a 24.01 percent net proceeds participation and a 2.45 percent net smelter royalty in the project.

Plexus is currently selling its share of gold and silver production at prevailing spot market prices. However, Plexus has a hedging program that will result in a minimum realization from gold transactions during 1990 of approximately $390 per ounce.

In addition, Plexus had previously arranged a forward sale/gold loan transaction to convert $8 million of its $18 million in project-related debt to a gold-denominated obligation priced at $420.24 per ounce, effective May 29, 1990.

Michael D. Fowler, vice president and chief financial officer of Plexus stated, "With gold prices in the $365-$375 range, Plexus is very well positioned with its hedging program during the start-up phase of the Denton-Rawhide Project."

Plexus Resources Corp. is an expanding diversified U.S. natural resources organization with extensive base metal and precious metal interests as well as oil and gas production. The company's shares are listed on the Toronto Stock Exchange (PXS) and trade in the United States on NASDAQ (PLUSF).

SAN FRANCISCO (MAY 31) BUSINESS WIRE - The Good Guys! (NASDAQ:GGUY), a leading specialty retailer of high-quality, brand name audio, video and personal electronics products with 22 stores in Northern California and

Nevada, will open its first Southern California store on July 1, announced The Good Guys! founder and chairman, Ronald A. Unkefer.

The store, located at 100 N. La Cienega in the Beverly Connection, adjacent to the Beverly Center in Los Angeles, will be the first of many in the region for the expanding San Francisco-based chain. The Good Guys! also announced their next two Southern California locations will be in the Orange County cities of Tustin and Huntington Beach, and will open in September 1990.

Unkefer also announced that, starting July 13, The Good Guys! Beverly Connection store will also be the country's first major consumer electronics store to open 24 hours a day, seven days a week. ''Los Angeles is one of those exciting cities that never sleeps,'' Unkefer explained. ''We're looking forward to seeing how consumers respond to this innovative concept.''

''Though this is our most challenging move to date, we are extremely excited about expanding into Southern California and are confident we can provide a higher level of service and quality than is currently available in the market,'' said Unkefer, after unveiling specific plans for the 16,800-square-foot store.

''In Northern California, we have withstood many worthy competitors by continually expanding our reach in each market and creating a faithful customer base. These customers now expect the product selection, quality and service philosophy that we deliver. We look forward to bringing these same services to the Southland.''

The four-county Los Angeles consumer electronics market is the largest in the country with more than $2.9 billion spent on audio-video equipment in 1989. Industry analysts believe that the region's sales will continue to expand well into the decade and that local consumers are continually seeking quality retailers.

Founded in 1973, The Good Guys! has emerged as the leader in the Northern California consumer electronics market. The Good Guys! went public in 1986 and today boasts 22 stores in the San Francisco Bay Area, Sacramento, Calif., and Reno, Nev., metropolitan areas. The Good Guys! will also be opening their 23rd store in Fresno, Calif., on Friday, June 1.

The Good Guys! is a leading specialty retailer of high-quality, brand name audio, video and personal electronics products with headquarters in San Francisco. The Good Guys! operates 22 stores in California and Nevada and plans to open 10 to 12 new stores in Southern California in the next 18 months.

SACRAMENTO, CA (MAY 31) BUSINESS WIRE - American Recreation Centers Inc. (NASDAQ:AMRC) announced Thursday that Robert A. Crist has been elected chief executive officer of American Recreation Centers Inc. succeeding Robert Feuchter who retired at the end of the company's 1990 fiscal year on May 30, 1990. Crist had already been named president of the firm in November 1989.

Feuchter, 64, had been CEO of American Recreation Centers Inc. since 1965 when he was elected president. Feuchter will remain chairman of the board and will also consult for the company in fiscal 1991 to assist in the areas of mergers and acquisitions as well as shareholder relations.

American Recreation Centers Inc. is the largest publicly held corporation in the country devoted primarily to the operation of bowling centers.

The company operates 27 bowling centers, 22 in California, and five in Texas with an aggregate 1,126 lanes.

American Recreation Centers Inc.'s wholly owned subsidiary, The Right Start Catalog Inc., is a nationwide direct marketer of high-quality products for infants and children. The company is also active in the development and management of commercial real estate.

Real estate activities include conversion of bowling centers to more profitable uses as well as development of other properties.

SUNNYVALE, CA (MAY 31) BUSINESS WIRE - DAVID Systems Thursday announced the renewal of their distribution agreement with Ameritech Information Systems, the sales and distribution arm of American Information Technologies (Ameritech).

The agreement extends for another two years a relationship in place since 1985 and covers the DAVID Information Manager and associated digital telephone sets, data adapters and Ethernet LAN adapters.

Under the agreement Ameritech distributes the Information Manager and provides installation and after-the-sale service throughout its region

(Illinois, Wisconsin, Ohio, Michigan and Indiana). Value of the current installed base of the Information Manager within the Ameritech serving area is in excess of $50 million.

''We are pleased to continue our relationship with Ameritech and its distribution arm, Ameritech Information Systems, through this agreement,'' said Henry Nothhaft, president and chief executive officer of DAVID Systems. ''The ongoing acceptance of the DAVID Information Manager for Centrex enhancement by the Ameritech customer base has been gratifying.''

Ameritech Information Systems considers the DAVID Information Manager to be a key element of their product line in satisfying customers' need for advanced voice, data and LAN features.

The DAVID Information Manager, with 70,000 ports installed, is a fully digital system providing enhanced voice, data and Ethernet LAN to Centrex and operates over ordinary unshielded twisted-pair telephone wiring.

DAVID Systems also distributes the Information Manager in California through a joint marketing arrangement with Pacific Bell and in other parts of the United States through a number of authorized regional Centrex sales agents.

Formed to enhance the role of integrated digital communication, DAVID Systems supplied its first Ethernet LAN products in 1985. As a technical leader in its field, DAVID holds six communications patents and is an active participant in the IEEE 802.3 10 BASE-T Consortium at the University of New Hampshire.

DAVID Systems products emphasize integrated solutions for LANs, voice and data which are easy to expand and adapt to changing customer needs.

#90151b0152 05/31/1990 ~Business Wire

LOS ANGELES (MAY 31) BUSINESS WIRE - A delegation of 16 senior Soviet high-technology officials will visit the computer labs of a local software testing company, Friday, June 15, as a part of a major new drive to export products and services manufactured in the Soviet Union.

The group's visit -- its only planned business meeting in Southern California -- will follow the Bush-Gorbachev summit, currently taking place in Washington, D.C.

The Soviet high-tech delegation is also visiting several electronics manufacturing firms in Northern California's Silicon Valley to discuss

purchase of American-made products, joint-venture partnerships and sale of Soviet design and development services.

The Soviet high-tech experts will visit XXCAL Testlabs, a major testing company based in West Los Angeles, to sign a final agreement under which the Los Angeles-based firm will evaluate and certify computer software produced in the Soviet Union for use on systems manufactured or sold in the United States. The group will also tour the facility.

''The Soviets now have more than 40 mainframe computer software products ready to be evaluated and tested for use in the U.S.,'' said Bill Schoneman, vice president, XXCAL Testing and Systems Division. ''We have been working out details with U.S.S.R. representatives for some months now and we're very excited about helping the Soviets get their products certified to run on U.S. hardware.''

In addition to evaluating products, XXCAL will help write English-language documentation and examine Soviet software user interfaces, with an eye toward making them easily understandable to Americans.

Founded in 1976, XXCAL is the world's largest independent computer product testing firm. On the client roster are IBM, Hewlett Packard, Compaq, Microsoft, Ashton-Tate, Unisys and AST Research as well as a number of European and Pacific Rim firms: NEC, Samsung Electronics, Hitachi, Siemens and Nixdorf, for example. The $20 million firm also operates a technical personnel contracting and employment service.

Among the Russian delegaion: Victor Karpov, representing the Soviet Ministry of Computers and Communication; Vsevolod Avduyevsky, responsible for the conversion of Soviet space technology for commercial purposes; and Yuri Diakov, general director of the Soviet Union's primary semiconductor research and development center.

DENVER (MAY 31) BUSINESS WIRE - USMX Inc. Thursday announced that it has executed definitive agreements with Kennecott Corp. and NERCO Metals Inc., and completed the acquisition of each company's respective 50 percent interest in the Alligator Ridge Mine and in approximately 33,000 acres in the Alligator Ridge trend.

This land package is located in White Pine County, Nev., and will utilize USMX's Ely-based mining operation.

Under the terms of the agreements, Kennecott has received the $1.5 million purchase price, plus $300,000 in working capital considerations. NERCO will receive an 11 percent net smelter return royalty on 1990 production. Thereafter, NERCO will receive a net smelter return royalty on future production, such that the total royalty paid on any operating property will not exceed 4 percent.

The inherited Alligator Ridge Mine production plan for Calendar 1990 will be pursued by USMX which forecasts the production of 16,000 ounces at a cash operating cost of $225 per ounce. This production is anticipated to increase USMX's total 1990 production by 25 percent over 1989 production to 40,000 ounces, at an average cash operating cost of $250 per ounce.

Keith R. Hulley, president, said: ''The Alligator Ridge properties present USMX an exciting exploration potential and an opportunity to economically produce more gold from the existing in process and in-place resources. Previous exploration has also identified significant mineralization which immediately presents drill targets. This land package is ready for a fresh exploration approach with different criteria matching USMX's abilities.''

USMX Inc. is involved in the exploration, development, and production of gold properties in the United States. The company's stock is listed on the NASDAQ National Market System under the symbol USMX.

#90151b0159 05/31/1990 ~Business Wire

OAKLAND, CA (MAY 31) BUSINESS WIRE - Sprouse-Reitz Stores Inc. of Portland, Ore., (NASDAQ:STRS) is misleading its shareholders by not fulling disclosing to them the terms and conditions of his $17 per share cash offer said Robert H. Bisno, chairman of TransAction Financial Corp.

''Sprouse-Reitz has been less than forthright in their press releases that assert financing is not in place to consummate our $17 per share cash offer. I believe this is a deliberate attempt to mislead shareholders in order to further entrench the Sprouse family in control of the company,'' Bisno stated.

Bisno disclosed that his April 23 proposal to the board of directors of Sprouse-Reitz indicated that $8 million in equity, or approximately one-third of the $24 million purchase price, was already committed for by TransAction and its affiliates and that the remainder should be readily available when the Sprouse family approves his $17 per share cash offer.

''Lenders understand the veto power the Sprouse family has through their

two-tier stock structure and Stand-Together Agreement. Why should lenders devote significant time and effort as long as they know the company is being held hostage by the Sprouse family,'' Bisno stated.

The following excerpt from TransAction's April 23, 1990, letter to the board of directors of Sprouse-Reitz Stores Inc. outlines the proposed financing of the acquisition:

''You will note that we have not included a financing contingency with respec to this offer. We have received equity commitments totaling $8 million from TransAction affiliates and other investors. We believe that, with the commitment of the Company's Board and management to the foregoing terms and conditions, SRP (SR Partners) should be readily able to obtain the balance of financing required.''

The offer to acquire Sprouse-Reitz is being made on behalf of TransAction Financial Corp., First San Francisco Holding's Ltd., and certain other investors. TransAction Financial Corp. owns in excess of $500 million in commercial, office and residential developments in urban, West Coast communities.

EL SEGUNDO, CA (MAY 31) BUSINESS WIRE -James L. Churchill, president of Rockwell International Corp.'s Avionics Group in Cedar Rapids, Iowa, will retire at the end of the year, the corporation announced Thursday.

Churchill, who has served for 21 years in key executive roles in the avionics business, has been president of the Rockwell unit since 1981.

Concurrent with the announcement, the Avionics Group functions have been realigned. John R. Girotto has been appointed president, Collins Commercial Avionics with responsibility for the Collins Air Transport and Collins General Aviation Divisions. He reports to Kent M. Black, Rockwell executive vice president and chief operating officer.

Collins Government Avionics Division will now report to John A. McLuckey, president, Defense Electronics. Robert P. Marovich will continue to head Collins Government Avionics Division as vice president and general manager.

Reporting to Girotto in the new Collins Commercial Avionics organization will be Robert J. Hirvela, vice president and general manager, Collins General Aviation Division and Robert J. Tibor, who will replace Girotto as

vice president and general manager of the Collins Air Transport Division.

Churchill began his career with the company in 1969 as director, commercial Aviation Sales for the former Collins Radio Co. and was shortly thereafter named vice president, marketing, Collins Avionics. In 1975, he was appointed vice president, Collins Air Transport Division, and later made executive vice president, Avionics and Missiles Group. He received his bachelor's degree from the University of Missouri in 1951.

Girotto joined Collins Radio Co. in 1960 and served in several senior management positions before being appointed vice president and general manager, Collins Air Transport Division. He holds a bachelor's degree in electrical engineering from the University of Kansas and a master's degree from the University of Iowa.

Rockwell International is a $12 billion multi-industry company applying advanced technology to a wide range of products in its aerospace, electronics, automotive and graphics businesses.

SEATTLE (MAY 31) BUSINESS WIRE - Windstar Sail Cruises has hired Elgin Syferd Public Relations to serve as public relations counsel for the

company's new marketing efforts.

June 1 marks the beginning of Elgin Syferd Public Relations' full-time relationship with Windstar Sail Cruises. Elgin Syferd will be responsible for working with Windstar Sail Cruises to better identify and promote the company's unique line of product, its many attractions and amenities, and its points of difference that distinguishes Windstar from conventional cruise packages.

''Given the quality of work we've received from Elgin Syferd advertising, we saw value in adding their public relations expertise to our marketing team,'' said David Giersdorf, vice president of marketing and sales for Windstar. ''By combining our marketing efforts under one roof we can deliver a cohesive, focused message to our key audiences.''

Elgin Syferd also handles Windstar's parent company, Holland America Line-Westours.

Windstar Sail Cruises is a subsidiary of Seattle-based Holland America Line-Westours Inc. Both companies were acquired in January 1989 by Carnival Cruise Lines Inc. of Miami. Windstar recently relocated its headquarters from Miami to Seattle.

For more information on Windstar Sail Cruises, see your travel agent or contact Windstar Sail Cruises, 300 Elliott Avenue West, Seattle, Wash., 98119.

OVERLAND PARK, KS (MAY 31) BUSINESS WIRE - Sprint Gateways and Pre-Paid Legal Thursday announced that JUSTICE 900, an innovative new legal service is now available to the general public nationwide through Sprint Gateways' 900 network.

Sprint Gateways is a unit of US Sprint.

Legal services ranging from drafting wills to defense of traffic tickets are now available from the privacy of a person's home or office through JUSTICE 900. Additional benefits of the program include a free legal ''check up,'' half-hour consultations, specific legal services at reduced rates and a 25 percent discount on all other legal services.

Callers dialing 1-900-230-JUSTICE are connected to a consultant who will give them a toll-free number and an access code for an attorney in their

state. A $9 charge is made to the caller's telephone bill for the first minute and 50 cents for each additional minute. Employees of large corporations and members of trade associations can receive additional discounts on legal fees through membership in JUSTICE 900.

Pre-Paid Legal Services Inc., based in Ada, Okla., has provided legal services for the past 18 years. An American Stock Exchange company, Pre-Paid Legal Services Inc., is the oldest legal-expense company in North America. Their network of attorneys work through independent law firms under contract with the company to provide specific types of legal services to Pre-Paid's subscribers.

Sprint Gateways, a unit of US Sprint, entered the 900 (audiotext) market early in 1989 and now carries hundreds of interactive and passive audiotext programs and a range of voice information services through the all digital, fiber-optic network of US Sprint.

US Sprint is a unit of United Telecommunications, Inc., a diversified international telecommunications company based in Kansas City, Mo.

PORTLAND, OR (MAY 31) BUSINESS WIRE - ComputerLand of Oregon and U.S. Bancorp, one of the largest financial institutions in the Pacific Northwest, announced Thursday an agreement under which ComputerLand will be the exclusive supplier of more than 130 IBM PS/2 personal computers the

bank plans to purchase.

Valued at close to $1 million, the equipment order is part of a conversion effort planned for the bank's applications development department. The objective of this venture is to increase programmer and analyst productivity and decrease dependence on the mainframe.

The bank plans to move COBOL application development and maintenance activities from the mainframe to a networked PS/2 platform.

''In selecting ComputerLand, our decision was based primarily on its ability to meet our expectations in terms of service and product quality, while providing very competitive prices,'' said Jim Hobuss, senior project manager for U.S. Bank of Oregon, a wholly owned subsidiary of U.S. Bancorp.

''With its backing from ComputerLand's corporate headquarters, we believe the Portland franchise has the level of resources and support necessary to handle this project.''

U.S. Bancorp is a regional, multi-bank holding company organized in 1968. It provides financial services to five states in the Far West and Rocky Mountain states. U.S. Bank of Oregon, headquartered in Portland, is a subsidiary of U.S. Bancorp and the largest full service commercial and consumer bank in Oregon.

With ComputerLand of Oregon's annual sales estimated at $40 million, the Portland franchise has increasingly focused its efforts on serving the large corporate market, according to Gary Dent, chief executive officer of the franchise group.

''This contract is an example of the type of commitment we are making to develop long term relationships with major companies in the area,'' said Dent. ''To this end, we have recently entered into agreements with other large local firms, and have expanded our corporate center in Portland to better serve customers' needs.''

ComputerLand Corp. is the world's largest multi-vendor reseller of personal computers, with 760 stores in 36 countries.

PHOENIX (MAY 31) BUSINESS WIRE - America West Airlines (NASDAQ:AWAL/ PSE:AWA) has appointed John Mumaugh to the position of senior director of international sales and service.

Mumaugh's responsibilities will include directing the carrier's international efforts and coordinating America West's entry into the Pacific Rim. Mumaugh will report directly to the office of the chairman and also serve as co-chairman of America West's Pacific Rim Task Force.

America West Airlines recently applied with the U.S. Department of Transportation for operating rights to provide service to Taipei, Taiwan in the Republic of China and Hong Kong from Honolulu with three weekly roundtrips utilizing the Boeing 747 aircraft. In addition, the carrier filed for route authority to serve Nagoya, Japan from Honolulu and expects a decision from DOT in late 1990. If awarded the route, America West would begin daily non-stop service beginning March 1991.

''In order to prepare for a successful and timely start of international service to Taipei and Hong Kong, several organizational changes were necessary,'' said Edward R. Beauvais, chairman and chief executive officer of America West.

''Mumaugh was instrumental in the initiation of our Honolulu service and his experience and expertise in the marketing of America West's products will be essential in our transition to a Pacific Rim carrier.''

The announcement of Mumaugh's appointment coincides with America West's participation in its fifth ''Pow Wow'' international trade show, held June 2 - 6 in Orlando, Fla.

''America West's efforts to tap international markets began in 1987 with the creation of our international sales department and the Visit United States of America (VUSA) program,'' said Mumaugh. ''The travel Industry Association 'Pow Wow' is a major event for America West as we are positioned to become an international carrier in the Pacific Rim.''

America West provides service to several international gateways including New York, Los Angeles, San Francisco/Oakland, Seattle, Boston, Baltimore, Washington D.C., Chicago, Houston and Honolulu.

''International passengers may visit many of the great leisure destinations in the U.S. by traveling America West,'' said Mumaugh. ''These include Honolulu, Las Vegas -- the gaming capital of the world, Los Angeles, Arizona's Grand Canyon, the Colorado Rockies, the Pacific Northwest and the major cities of the Eastern Seaboard.

America West was recently designated as a major carrier by the Department of Transportation and holds the best on-time performance record for 1989, 1988 and since reporting began in 1987. The carrier serves nearly 60 destinations from coast-to-coast, utilizing an all-Boeing fleet of 92 aircraft including 747s, 757s, 737s and de Havilland Dash 8s. America West recently began operations at San Francisco and will initiate new

service to Dallas/Fort Worth and Boeing 747 service to New York/JFK in July.

SAUSALITO, CA (MAY 31) BUSINESS WIRE - Autodesk (NASDAQ/NMS:ACAD) announced Thursday that it has joined with NC Microproducts, under Autodesk's new Strategic Developer Program, to deliver an integrated, AutoCAD-based numerical control (NC) programming solution to the CAD/CAM market (computer-aided design and manufacturing, respectively).

The Strategic Developer Program is designed to forge closer links with third-party developers in order to deliver integrated solutions to key vertical markets. The new program expands on Autodesk's Registered Developer Program -- which has fostered over 70 AutoCAD add-on applications -- to provide extensive technical and marketing assistance to developers with solutions important to Autodesk's key markets.

NC Microproducts develops and markets NC Polaris, a full-featured numerical control programming system that operates as a integrated module within AutoCAD. NC Polaris employs a knowledge-based method for converting an AutoCAD drawing into NC code -- meaning that the system contains known machining methods that are used to create part programs that produce quality parts on a NC or CNC machine tool.

The AutoCAD/NC Polaris solution will be available through selected Authorize AutoCAD Resellers.

NC Microproducts, headquartered in Richardson, Texas, develops, markets and supports a family of computer-aided manufacturing software products that operate in conjunction with the world's most widely accepted CAD system, AutoCAD.

Autodesk develops, markets and supports a family of computer-aided design, engineering and animation software products for desktop computers and workstations. For more information, please call 415/331-0356 or GO ADESK on CompuServe.

SEATTLE (MAY 31) BUSINESS WIRE - Burlington Resources Inc. announced

Thursday that its gas and oil producing subsidiary, Meridian Oil Inc., has completed tests of a wildcat discovery well in the Austin Chalk Trend in south and central Texas.

Meridian's No. 1H E.E. Smith well flowed at an average rate of 12,254 barrels of oil per day, 4.9 million cubic feet of gas per day and 3,032 barrels of water per day through two 2-1/16 inch chokes at a flowing tubing pressure of 300 pounds per square inch during a four-hour test period. The water produced was declining during the test period and was analyzed to be drilling and completion fluids. The tests were observed by representatives of the Texas Railroad Commission and the results will be filed with that state agency in order that an appropriate allowable can be determined for the well. The well was drilled as a medium radius, extended reach horizontal drainhole to a total measured depth of 11,368 feet. At total depth, the well extended a distance of approximately 2,900 feet from the vertical portion of the well.

Although initial test results are favorable, the Austin Chalk Trend has historically experienced significant production decline rates in some areas of the Trend. In view of this fact, Meridian will continue to evaluate the potential of this well. Meridian has a 100% working interest in this well which is located in Gonzales County, Texas. Meridian has approximately 20,000 net acres under lease in the immediate vicinity of the well and has a total in excess of 100,000 net acres under lease in the Wilson, Karnes and Gonzales County area. Meridian also has a significant leasehold position in other parts of the Austin Chalk Trend.

SANTA BARBARA, CA (JUNE 1) BUSINESS WIRE - Digital Sound Corp. (NASDAQ:DGSD) announced Thursday that Robert F. Kelly has resigned as senior vice president of sales, effective immediately.

During his five and one-half years with the company, Digital Sound became one of the leading suppliers of voice processing systems to telephone companies and commercial users. Kelly will become an independent consultant to Digital Sound under a one-year agreement, while pursuing other opportunities in new industry technologies.

The company also announced that Robert Heisser has joined Digital Sound in a newly created position as vice president of Telephone Company Sales. Heisser reports directly to Bryan Grummon, Digital Sound's president and chief executive officer. Prior to coming to Digital Sound, Heisser was regional manager of communications west region for Unisys Corp. He has

18 years experience in computer related industries. Heisser has a bachelor degree in business from the Northern Arizona University.

In his new position, Heisser is responsible for sales and service to Digital Sound's growing roster of telco customers. This position complemented by that of vice president of Commercial Sales, a position held by Dale Bastian, who was appointed in January. Bastian is responsible for all sales and service related to Digital Sound's commercial user base. He also reports to Grummon.

Digital Sound Corp. manufactures and markets the VoiceServer family, a multipurpose voice application platform designed to meet the current and future telecommunications needs of businesses worldwide.

SEATTLE (MAY 31) BUSINESS WIRE - IBM and the University of Washington Thursday announced their intention to design and build a state-of-the-art, prototype medical imaging system and supporting software that promise to improve patient diagnosis and treatment dramatically.

The medical imaging system will give physicians instant access to enhanced X-rays and other diagnostic images, allowing them to plan surgery, joint replacements, radiation therapy and other medical treatment simply by viewing and interacting with the computer screen.

IBM and University representatives announced the collaboration during an on-campus briefing today.

As a part of this collaboration, IBM will commit to the University of Washington some $4.5 million, to include hardware, software, faculty grants, student fellowships, and a fulltime IBM coordinator to work with university faculty on the project.

The project will be the first conducted under the auspices of the university's new Center for Imaging Systems Optimization, directed by Dr. Alan Nelson, a bioengineering professor in the College of Engineering.

The imaging center aims to explore and develop ways to obtain, analyze, store and display computer images. The resulting imaging technology will have applications in several industries and disciplines. The university's partnership with IBM focuses on radiological imaging.

The prototype medical imaging system will link IBM computers into a hospital-based, medical imaging network. In a three-year joint project, university professors, and physicians, led by Dr. Alan Rowberg, from the university's medical center, will work with IBM scientists to build enhancements to existing IBM hardware and design new communications and applications software to meet emerging medical imaging needs.

Physicians at the University of Washington Medical Center will use and evaluate the prototype medical imaging system. Based on feedback from the physicians, its developers will fine-tune the system.

The prototype system will include three different types of medical imaging stations, linkied together by a computer network, all three will draw images from a hospital-wide data base. The computer system will hold digitized versions of standard hospital X-ray films and ultrasound images, as well as computer-aided tomography (CAT) scans and magnetic resonance imaging (MRI) scans.

IBM's joint project with the University of Washington is one of several that IBM's applications solutions line of business is sponsoring with colleges and universities across the country. The projects explore new ways to use computers for teaching, research and industry applications.

SALT LAKE CITY (MAY 31) BUSINESS WIRE - DTI Medical Corp. (NASDAQ:DTIM) Thursday announced that it has manufactured its first Soluble Ophthalmic Drug Insert (SODI) wafers on its pilot manufacturing line in Brussels, Belgium.

SODI technology, which was developed in the Soviet Union, is a slow release system for the ophthalmic and transmucosal delivery of drugs. Transmucosal delivery allows medications to be delivered directly into the blood stream, thereby decreasing the dosage compared to the oral route, and can eliminate parenteral route (by injection) administration in many cases.

Eye diseases affect a large segment of the world's population and represent a large percentage of the drugs prescribed by physicians worldwide. SODI can be impregnated with a variety of drugs, including anesthetics, antibiotics, antivirals, steriods, sulphonamides, antiseptics hypotensive agents, vitamins, generic and over-the-counter medications. The company believes that there is a tremendous market for SODI throughout

the world.

In addition to its SODI technology, DTI Medical Corp. holds the right of first refusal to develop, manufacture, license and market several other Soviet medical technologies in the western world for use in a broad range of medical applications.

SAN JOSE, CA (MAY 31) BUSINESS WIRE - Laserscope (NASDAQ:LSCP) Thursday announced that it has received expanded clearance from the U.S. Food and Drug Administration to market its KTP/532 Surgical Laser Systems for all laparoscopic general surgical procedures including cholecystectomy.

According to President and Chief Executive Officer Herbert G. Taus, Laserscope was cleared by the FDA in 1988 to market its lasers for all endoscopic and open surgical procedures in general surgery. This expanded clearance now provides Laserscope with a specific clearance for all laparoscopic applications in general surgery in addition to the previously cleared endoscopic and open surgical procedures.

This new clearance covers a very broad range of procedures, including cholecystectomy (gallbladder removal), appendectomy, hernia, liver biopsy and enterolysis. Laserscope now has FDA clearance for all open, endoscopic and laparoscopic applications in general surgery for its KTP/532 Surgical Laser Systems.

Based in San Jose, Laserscope designs, manufactures and markets the KTP/532 and KTP/YAG Surgical Laser Systems, accessories and disposables. Its systems employ proprietary laser technology based on KTP crystalline material that enables the surgeon to cut, coagulate and vaporize tissue in a wide variety of applications and procedures.

ORANGE, CA (MAY 31) BUSINESS WIRE - Effective immediately MDB Systems' board of directors announced the appointment of Richard G. MacDonald as chief executive officer/president.

Most recently, MacDonald held the position of president/chief operating officer, at Edgcore Technology Inc., a manufacturer of super-minicomputers. MacDonald's past experience also includes Benchmark Technology Inc., where he held the position of president/ chief executive officer, and Adaptive Data Systems Inc., where he also held the position of president/chief executive officer.

Overseas experience includes MacDonald serving as chief executive of Amdahl Corp., Amdahl Ireland Ltd.

MacDonald's vast experience also includes a nine-year tenure with NCR, both in the United Kingdom and the United States; along with Rockwell International; Sperry; and Fairchild Semiconductor.

''With over 30 years' experience in the semiconductor and electronics industry, MacDonald brings a blend of technical and managerial expertise that will heighten MDB's endeavors in the 1990s,'' stated a spokesperson for MDB's board of directors.

MacDonald holds a bachelor of arts degree in commerce and a bachelor of science degree in chemical engineering from Sir George Williams University Montreal, as well as a master's degree in business administration in production management from Syracuse University, New York.

MDB Systems, founded in 1970, is the leader in shock-isolated, high-density, removable storage products. Other products include MDB's DR11-W family of high-speed parallel DMA interfaces, which provide increased data transfer speed for various computer systems.

SPARTA, NJ (MAY 31) BUSINESS WIRE - Laser Recording Systems, Inc. (''LRS'') (NASDAQ:LRSI (common stock), LRSIW (warrants) LRSIU (units); Boston Stock Exchange:LRSU) Thursday announced that it has signed a contract to provide computer hardware and software to a major pharmaceutical firm.

This contract should begin to contribute to revenues during the second quarter of fiscal 1991 which ends July 31, 1990.

Carver Washburn, President of Laser Recording Systems commented, ''We are pleased to expand our relationship with this major pharmaceutical company which intends to use our system to submit new drug applications to the U.S. Food and Drug Administration.

''We are entering the second quarter of fiscal 1991 with a backlog exceeding $500,000. Further, there are now five major drug companies using LRS' system to submit new drug applications with a number of approvals pending at the U.S. Food and Drug Administration, the Department of Health in the U.K., and the Health Protection Branch of Canada,'' concluded Mr. Washburn.

Laser Recording Systems, Inc. offers integrated optical disk-based systems solution to the pharmaceutical industry and other market niches through the application of proprietary software, data base management, local area networking and optical disk technologies.

CARLSBAD, CA (MAY 31) BUSINESS WIRE - Charter Golf Inc. (NASDAQ:CGOL), the fast-growing maker of golf apparel, Thursday announced record sales and earnings for its second quarter and six-month period ended April 30, 1990.

The company reported net income of $133,820, or 3 cents per share, on sales that advanced 304 percent to $1,810,801 for the quarter compared to net income of $3,909, or less than 1 cent per share, on sales of $447,685 in the comparable quarter a year ago.

For the six-month period, Charter Golf reported net income $166,181, or 4 cents per share, on sales that increased 338 percent to $2,783,223 compared to a net loss of $66,831, or 2 cents per share, on sales of $635,018 in the same period last year.

Gerald W. Montiel, president and chief executive of Charter Golf, attributed the record results to the growing popularity of the company's

distinctive line of ''Ashworth'' golf apparel, which is sold exclusively in more than 2,700 pro shops nationwide, and to an expanded marketing program launched earlier this year.

Secondary Offering Completed

The company recently completed a secondary offering, selling 1,035,000 units to the public at $1.80 per unit. The units consist of two common shares and one common stock purchase warrant exercisable for one year at $1.80 per warrant. The total number of units sold included 135,000 units sold by the underwriter, Cohig & Associates of Denver, under the overallotment option. Net proceeds of $1,525,000 will be used for inventory, equipment and retirement of debt.

NASDAQ Listing

Upon closing of the secondary offering, Charter Golf's units, common stock and warrants were listed on the NASDAQ system under the symbols CGOLU, CGOL, and CGOLW, respectively.

California Blue Sky Completed

Subsequent to the public offering, Charter Golf blue skied its securities for trading in its home state of California.

NAUGATUCK, CT (MAY 31) BUSINESS WIRE - The Eastern Co. (AMEX:EML) announced that it intends to phase out production of malleable iron castings at its Alloy Foundries division.

Arrangements have been made with Belcher Corp., a wholly owned subsidiary of Advanced Cast Products Inc. to assure continuity of production for its customers.

S.G. Sweet, president and chief executive officer of The Eastern Co. stated, ''Our specialized stainless steel and high alloy casting business here at Alloy Fuondries will remain intact, and we anticipate expanding our production in this area in the foreseeable future.''

A one-time charge for asset write-downs and phase out costs will result in a loss for the second quarter. Earnings from continuing operations, however, are expected to reflect improvement on a year-to-year comparison.

The Eastern Co., a 132 year old corporation, is a diversified manufacturer of proprietary locks and other security hardware as well as metal castings and construction materials.

SAN JOSE, CA (MAY 31) BUSINESS WIRE - CHIPS and Technologies Inc. and Elite Microelectronics Inc. have announced the settlement of a Santa Clara Superior Court Trade secrets lawsuit.

CHIPS filed the suit on Jan. 10, 1990, against Elite and several of Elite's officers and employees who formerly were employed by CHIPS.

The settlement does not involve any monetary payment by either party. It does provide that the parties will jointly appoint an independent inspector whose task it will be to visit Elite's facilities periodically to review the development of Elite's products.

The procedure agreed to by the parties is designed to both protect the trade secrets of CHIPS and to assure interested parties, including employees, investors and customers of Elite and CHIPS that Elite has not used any of CHIPS' trade secrets in developing Elite's products.

LOS ANGELES (MAY 31) BUSINESS WIRE - Management Company Entertainment Group Inc. (M.C.E.G.; NASDAQ:MCEG, MCEGW, MCEGL) appointed Kathryn E. Nielsen to the newly created position of vice president, corporate controller and chief accounting officer, it was announced Thursday by Jonathan D. Krane, chairman and chief executive officer.

She joins M.C.E.G. from her previous positions at The Walt Disney Co. and Arthur Young & Co.

Reporting to Mark Q. Huggins, executive vice president and chief financial officer, Nielsen will supervise the Los Angeles-based accounting operation and liaison with M.C.E.G. subsidiary Virgin Vision Ltd.'s London staff.

Nielsen's responsibilities include overseeing all financial accounting, public reporting and tax functions for M.C.E.G. worldwide. She will also be responsible for setting overall corporate accounting policies, internal controls, liaison with outside auditors and overseeing information systems.

Nielsen joined M.C.E.G. from The Walt Disney Co. which she joined in 1983 and where she served most recently as director, corporate finance. Previously, Nielsen was an audit manager at Arthur Young & Co. from 1976 to 1983.

A certified public accountant in California, Nielsen received her professional training at Loyola University, graduating cum laude in 1976 with a bachelor's degree in accounting.

Management Company Entertainment Group is a diversified entertainment company with a talent base, primarily engaged in entertainment talent management; entertainment production, distribution and marketing; and entertainment financing.

#90151b0640 05/31/1990 ~Business Wire

STANTON, CA (MAY 31) BUSINESS WIRE - For nearly 35 years, VSI Fasteners Inc. of Stanton has been a supplier of virtually every type of fastener found at hardware stores and home-improvement centers across the United States.

Unfortunately, due to a case of mistaken identity, VSI Fasteners has recently become confused with VSI Corp. and its subsidiary company, Voi-Shan Industries of Culver City. Two of Voi-Shan's managers were recently charged in U.S. District Court in Seattle with conspiracy to defraud the government by falsifying and omitting test results for fasteners used in commercial and military aircraft.

Arnold J. Scribner, president of VSI Fasteners, said his company has been receiving calls from angry customers and suppliers regarding the situation.

''For example, one of our regular customers refused to talk to our sales representative because he thought we were 'ripping off' the government. We called the individual and explained the situation and he fortunately understood. These types of scenarios are very harmful to our business,'' declared Scribner.

He continued: ''We want to assure our customers and the general public

that VSI Fasteners Inc. is not owned by and has no association or link of any kind with VSI Corporation and Voi-Shan Industries. Our sole business is the distribution of over 6,500 fastener-line items sold in hardware stores and home-improvement centers
across the country.''

Scribner explained that the similarity in names exists only because VSI Fasteners Inc. was originally part of the hardware products division of Fairchild Industries Inc., with headquarters in Chantilly, Va., which also owned VSI Corp. and Voi-Shan.

He said: ''Fairchild sold VSI Fasteners over five years ago and on July 18, 1985, VSI Fasteners Inc. became chartered as a California corporation and has been privately held and operated since then.

''We are very proud of our company and our employees and are anxious to protect our good name. Our management is meeting with employees and contacting customers and suppliers to explain the situation and alleviate any needless concern.''

For further information, please contact Derwyn Cugley, VSI Fasteners vice president of marketing, at 714/891-8400, ext. 225.

CHESTNUT HILL, MA (MAY 31) BUSINESS WIRE - Designs Inc. (NASDAQ:DESI), operator of specialty retail stores that sell exclusively Levi Strauss & Co. clothing and accessories, announced Thursday that sales for the four weeks ending May 26, 1990 increased to $7.2 million in the current year from $4.7 million for the same period in the prior year, representing an increase of 52 percent.

These figures include the 24 stores opened since the end of May last year. For the 17 week period ending May 26, 1990 sales of $26.8 million have increased 58 percent over last year's sales of $16.9 million.

Comparable store sales increased 15 percent during May 1990 compared with May of last year, and have increased 10 percent over last year for the 17 week period. Comparable stores are retail locations that were open a full fiscal year. Of the 94 stores that Designs Inc. operates, 59 are comparable stores.

In making the announcement, Geoffrey M. Holczer, vice president and treasurer said, ''We continue to be encouraged by the strong comparable

store sale increases. We are experiencing increases in all our merchandising divisions. These increases, the continued success of our outlet stores and the early results of our new stores have generated this upward trend.''

Designs Inc.'s 68 traditional stores and 26 outlet stores sell exclusively Levi Strauss & Co. clothing and accessories under the ''Designs exclusively Levi Strauss & Co.'' and ''Specials exclusively Levi Strauss & Co.'' names. The stores are located in enclosed regional shopping malls and outlet parks in 26 states throughout the eastern half of the country.

#90151b0653 05/31/1990 ~Business Wire

NEW YORK (MAY 31) BUSINESS WIRE - S.E. Nichols announced Thursday that it has determined to avail itself of the 30 day grace period for the payment of interest on its outstanding 14-7/8 percent first senior subordinated debentures and will not, therefore, pay interest due on such debentures on June 1.

Management of Nichols stated the the company intends to use this 30 day grace period to actively pursue various financing alternatives which may be available to Nichols, including a potential restructuring of its outstanding two series of debentures or a reorganization under the Federal Bankruptcy laws.

It was noted, however, that the company cannot now determine what final action it will take with respect to the payment of the interest due June 1 on its outstanding 14-7/8 percent of debentures or whether the alternatives being examined by management will assist the company in ultimately resolving its long-term debt obligations generally.

Management of Nichols further announced that its program for the reorientation of its existing stores to the deep discount retail merchandising of pharmaceuticals and certain hardgoods items is proceeding on schedule with encouraging results to date.

Kenneth A. Davis, president and chief executive officer of Nichols, noted that the company is currently operating six of these deep discount stores under the Pharmhouse name; and that management plans to have an estimated total of 19 Pharmhouse stores in operation by July 31.

Davis further stated that the company has sublet available retail space adjacent to three of its operating Pharmhouse stores to Master's Inc., a discount retail apparel chain, which has already opened and is operating

stores in three such locations. He also stated that management was engaged in active negotiations to sublease additional space adjacent to its existing and planned Pharmhouse stores.

Davis explained that consummating such leasing arrangements for such additional retail space will constitute a significant positive development for reducing Nichols' rental and other occupancy costs of carrying such additional retail space in future fiscal periods and for attracting additional customer traffic to its Pharmhouse stores.

S.E. Nichols Inc. (AMEX:NCL) has operated discount department stores in nine Mid-Atlantic states, but has been engaged since early 1990 in a restructuring of its retail operations to phase out its discount department store operations and to devote its efforts to the operation of Pharmhouse stores featuring the deep discount merchandising concept described above.

#90151b0661 05/31/1990 ~Business Wire

CARLSBAD, CA (MAY 31) BUSINESS WIRE - With wagering and airline ticketing business prospects totaling well over $50 million, James T. Walters, president and chief executive officer, International Totalizator Systems Inc. (NASDAQ: ITSI), has set his sights high for the company for 1990 and beyond. Walters spoke about the company's prospects and long-term outlook at the company's tenth annual meeting of shareholders.

"We have broken the ice on the domestic market in a big way," Walters noted. "First, we signed Dallas-based QDAT to a $2.3 million lease of airline ticketing printers. Then, this past week, we entered into an agreement to acquire McKinnie & Associates, a computer services company whose primary market is the domestic racing industry."

"This acquisition will make ITS the only U.S. equipment supplier to offer a toal automation package, including both bet-handling and racetrack management systems. The management system includes everything from admissions, racing secretary, and the printing of daily programs to membership management, stable management, concessions, and payroll."

"The software modules have numerous applications beyond racing: sports arenas, concessions and box offices are all potential users of this comprehensive software package."

"McKinnie's 23 customers rank among the most prestigious racing organizations in the world: Churchill Downs, Arlington International, Saratoga, The Royal Hong Kong Jockey Club, to name a few. McKinnie itself has no known competitors. This acquisition serves as a bridge for ITS products and services to existing McKinnie customers, as well as potential new customers in the U.S. market. ITS has established a separate North American sales division to further strengthen our efforts in North America."

"As importantly, McKinnie's profitability means this acquisition will enhance, not dilute, our bottom-line per-share earnings. We expect revenues from McKinnie's TRACK MANAGER products to increase at a 50 percent per annum clip over the next several years. Profit margin expansion should be even more dramatic, since 34 of the software modules are fully developed and several new modules are already under development."

"This anticipated revenue growth will result from increased market share...at present, McKinnie has only tapped about 17 percent of the total domestic racing market. And, because they have sold to only two foreign racetracks, the foreign market potential is even greater."

"As far as our airline ticketing printer business goes, we see tremendous opportunities in store for the company. QDAT, our most recent customer, has expansion plans that could require up to 1,000 more ATB printers over the next two years."

MIAMI (MAY 31) BUSINESS WIRE - Royal Caribbean Cruise Line Thursday announced that its two new ''Sovereign-size'' ships now under construction will be christened Monarch of the Seas and Majesty of the Seas.

The names were chosen to carry on the legacy and style of their sister ship, Sovereign of the Seas.

Both vessals, being built at the Chantiers de L'Atlantique shipyard in St. Nazaire, France, will be slightly larger than the original 2,282-passesnger Sovereign of the Seas, currently the largest cruise ship ever built.

The new ships will have 1,177 cabins for a double occupancy capacity of 2,354 passengers, plus additional third and fourth berths for a total occupancy of 2,766 passengers each.

The two ships will increase Royal Caribbean's capacity by nearly 75 percent and, together with Sovereign of the Seas, will place the world's three largest cruise ships on itineraries in the Caribbean.

Monarch of the Seas will be the first of the two new ships to enter the cruise market. Both new ships will have a slightly different look from their predecessor.

All 62 suites will feature private balconies, the forward cafe will be glass-enclosed and overlook the sea at the ship's bow. The rear of the cafe will become an alfresco buffet, blending into the forward areas of the massive pool deck.

In keeping with the Sovereign of the Seas tradition, there will be more than three acres of deck space for lounging in the sun, a ''ShipShape'' fitness center and gymnasium, plus twin pools, hot spas and a sauna.

The ''Centrum,'' a multi-deck atrium entryway and focal point of the ship, will feature a continental park surrounded by boutiques, creating an appealing environment for shopping.

Glass elevators and sweeping staircases facilitate movement between decks and public rooms, meeting rooms and lounges to the Centrum. Public rooms include twin dining rooms, midship and aft lounges, and a main lounge with bi-level seating to ensure perfect sightlines for passengers.

A state-of-the-art disco and stylish casino offer nighttime activities, while the champagne bar suggests a more intimate evening. The Viking Crown Lounge will complete the Royal Caribbean experience, extending a breathtaking view of sea or port - much like its sister ship, Sovereign of the Seas.

Additional facilities include a complete library, a ''Kid/Teen'' center, a cinema (which can be used for special presentations) and conference rooms.

Each ship's designs will follow the very successful general concept developed for the original Sovereign of the Seas, which placed passenger cabins forward and entertainment area aft of a central atrium, creating an exceptionally quiet cabin zone and providing quick passenger orientation to the location of the ships' public rooms.

The expected delivery date of Monarch of the Seas is March, 1991, with Majesty of the Seas due nine months later. Both ships will be sailing in the Caribbean, with Monarch of the Seas based in San Juan for seven-night cruises to ports of call in the southern Caribbean.

ATLANTA (MAY 31) BUSINESS WIRE - Fisher Business Systems Inc.

(NASDAQ:FBUS), dba Fisher Restaurant Systems, was recently acknowledged as one of the top high-tech businesses in the Atlanta metro area.

Each year Atlanta's 50 largest high-tech companies are honored through the Fast Tech 50 awards sponsored by Arthur Andersen & Co., the Advanced Technology Development Center and Atlanta Business Chronicle. The list is based on revenues for 1989 and to be eligible a company must have its headquarters in metro Atlanta and it cannot be a subsidiary of a company based outside of the metro area.

In addition, 50 percent of the company's revenues must come from the development, manufacture or distribution of a proprietary high-technology product. Fisher Restaurant Systems was included based on annual revenues of $5.7 million.

Fisher Restaurant Systems provides a complete point of sale and restaurant management system that is totally integrated to a complete financial and accounting package. The Fisher System operates from a single IBM Personal System/2 and uses IBM terminals as server work-stations.

Applications include server entry, remote order printing, guest check settlement, server checkout, food costing, inventory control and detailed sales reporting. The financial package is totally integrated and includes payroll, accounts receivable, accounts payable and general ledger.

On-line credit card authorization and interfaces for hotel and country club management are important features. The whole system is protected by a comprehensive security system.

UPPER SADDLE RIVER, NJ (MAY 31) BUSINESS WIRE - Western Union Corporation announced Thursday that it has interconnected its electronic mail system with Switzerland via international X.400 standards.

The new interconnection has been made between Western Union 400 (sm) service and Arcom 400, the Swiss PTT's X.400 service, allowing Western Union's E-mail subscribers to exchange messages with customers using Switzerland's electronic messaging system.

Western Union 400 service is fully integrated with the company's Easylink (r) public messaging service, which gives users worldwide delivery capability via fax, telex and electronic mail, as well as access to more than 900 online databases.

''Western Union's link with Switzerland continues the company's policy of achieving interconnections with major public electronic messaging systems throughout the world,'' said Donald Casey, product manager for Western Union 400 service.

''The agreement extends the reach of the company's subscribers who do business in Switzerland and will facilitate international communications for Swiss firms with offices in the United States,'' he added.

Western Union previously announced X.400 interconnections with AT&T Mail, General Electric Information Services, the IBM Information Network, Sprintmail and MCI Mail.

Western Union Corporation provides a broad range of messaging, financial and other services, both domestically and internationally, to meet specific needs of business customers and individual consumers. The company is the leading provider of public electronic mail services, which enable its business customers to reach more than seven million electronic mail, fax and telex users worldwide.

ROCKVILLE, MD (MAY 31) BUSINESS WIRE - GE Information Services (GEIS) announced it has interconnected its global electronic messaging services to MCI Mail, enabling customers on both services to exchange electronic messages for the first time.

GEIS' QUIK-COMM System and its EDI-EXPRESS System have been interconnected to MCI Mail's XChange 400 service using the international X.400 standard for connecting dissimilar messaging systems.

X.400 is a set of guidelines for the format, delivery and receipt of electronic messages recommended by the international standards organization, the International Telephone and Telegraph Consultative Committee (CCITT).

This X.400 interconnection is the third that GEIS has made with other public electronic messaging services in the U.S. GEIS previously announced X.400 interconnections between its QUIK-COMM System and Western Union's EasyLink service and AT&T Mail. With these X.400 interconnections large public and private communities of E-Mail users on the various services can now communicate with each other.

MCI Mail was introduced in September 1983 and provides a complete range of messaging options, including electronic mail, fax, telex, hardcopy postal and courier delivery worldwide.

Five other QUIK-COMM System X.400 interconnections to public mail services are currently in operation under pilot conditions with a view to future commercialization. GEIS also is actively involved in the industry forum to develop an electronic directory service based on the CCITT X.500 recommendations.

In addition to the QUIK-COMM X.400 Access Service, GEIS offers a range of interconnections to various private mail systems, including: IBM PROFS, IBM DISOSS, DEC ALL-In-1, VMSMail, Wang OFFICE, IBM AS/400, System/3X, 3COM 3+Mail LAN Mail, and Novell CC:Mail Lan Mail. For further information on QUIK-COMM X.400 Access Service, please call GE Information Services at 1-800-433-3683 or contact your local GEIS sales office.

GE Information Services, a division of General Electric Company, USA, is headquartered in Rockville, Md. GEIS is a leading provider of private electronic messaging, EDI (electronic data interchange), and business communications and processing systems via its worldwide teleprocessing network.

STOCKHOLM, SWEDEN (MAY 31) BUSINESS WIRE - Ericsson has decided to set up a research and development center at Aachen in North Rhine-Westphalia in the south of Germany.

When in full operation in 1994, the center will employ about 500 people. The center, acting as an integrated part of Ericsson's total development organization, will work on general system development based on AXE technology.

The first task of the new development center will be to act as a European competence and development center for the digital, mobile communication system (GSM), and personal communication (PCN) products based on the AXE system.

Another important task of the future ''European laboratory'' will be to coordinate Ericsson's commitments in EC research projects.

Aachen's geographical position is very favorable in relation to the surrounding countries, in the border district of Germany, Belgium and the Netherlands.

The central location in Europe also offers good means of communuication, by land as well as by air.

The new European laboratory will be manned with engineers from Ericsson companies in Europe including Sweden, as well as personnel recruited locally.

Ericsson is an international leader in telecommunications, its wholly owned North American subsidiary is based in Richardson, Texas.

#90151b0702 05/31/1990 ~Business Wire

MIAMI (MAY 31) BUSINESS WIRE - Noven Pharmaceuticals Inc. (NASDAQ:NOVN) announced Thursday that it is in the advanced stage of development of a transdermal progestogen drug delivery system and contemplates filing an IND (Investigational New Drug Application) in the near future which would allow the company to commence human studies.

The company intends to market the product to postmenopausal women receiving estrogen replacement therapy. The progestogen will be incorporated into Noven's interpolymeric drug delivery platform, and will resemble a small transparent bandage. The patch will be worn on the lower abdomen. The company did not disclose which progestogen will be

utilizied.

Medical experts agree that it is most important for women on estrogen replacement therapy to use a progestogen as part of their monthly treatment. The use of a progestogen during estrogen replacement therapy prevents the uterine lining from generating an excess amount of cells which causes a condition called hyperplasia.

Moreover, while estrogen replacement therapy may retard the development of and prevent osteoporosis, recent studies indicate that adding a progestogen may restore bone which has been lost by promoting new bone formation. The delivery of a progestogen transdermally will result in significantly smaller doses compared with oral delivery.

Noven, which plans on filing a New Drug Application (NDA) in the United States for the progestogen product, upon completion of its development, has had discussions with several pharmaceutical companies regarding the joint development of the progestogen delivery system.

There are in excess of 30 million postmenopausal women in the United States and they represent one of the fastest growing demographic groups in the country. Noven feels the commercialization of their transdermal estrogen and progestogen transdermal drug delivery systems will propel Noven to the forefront in the hormonal replacement market.

Noven Pharmaceuticals is engaged in the development and manufacturing of transdermal drug delivery systems. Transdermal systems move drugs or other substances through the skin and into the bloodstream. The many benefits of transdermal drug delivery include controlled delivery for a finite period, improved patient compliance, and the avoidance of problems associated with oral drug delivery.

Noven Pharmaceuticals' transdermal drug delivery systems represent a significant advance in among other things, surface area, adhesive characteristics, and compatibility with numerous drugs.

NEW YORK (MAY 31) BUSINESS WIRE - Maurice R. Greenberg, chairman of the board of American International Group Inc. (AIG), is pleased to announce that he and Howard B. Sosin have renewed their joint venture agreement relating to AIG Financial Products Corp. (AIG-FP).

Sosin will continue in his current positions as president and chief executive officer of AIG-FP.

The renewed arrangements between AIG and Sosin provide a longer-term commitment of AIG and Sosin to the joint venture, and will foster the development of AIG-FP as a long-term participant in the financial services market and an integral part of AIG's financial services business.

AIG-FP will engage principally in the long-dated structured finance business, focusing primarily on interest rate and currency swaps and swap options, municipal investment agreements, debt service reserve lines of credit, and transactions relating to foreign exchange, petroleum and petroleum related products and equity derivative securities.

AIG is a leading international insurance organization and the largest underwriter of commercial and industrial insurance in the United States. Its member companies write property, casualty, marine, life and financial services insurance in more than 130 countries and jurisdictions, and are increasingly engaged in a range of other financial services.

American International Group Inc.'s common stock is listed on the New York Stock Exchange, as well as the stock exchanges in London and Tokyo.

#90151b0737 05/31/1990 ~Business Wire
NEW YORK (MAY 31) BUSINESS WIRE - An action was commenced yesterday by the estate of Keith Haring against Playboy Enterprises and certain affiliated corporations.

Haring considered one of the foremost American artists of the 1980's, died last February.

Commenced in Federal court, the action seeks equitable relief and damages growing out of the unauthorized sale and distribution by Playboy of a series of purportedly limited edition reproductions of works by Haring.

The reproductions in question are all apparently based upon drawings Haring made in 1986.

Playboy and its affiliates are actively marketing the items as limited edition silkscreens named the ''Playboy Series''.

It appears that Playboy is marketing up to ten different images in editions of 1,000 apiece.

Julia Gruen, co-executrix of the Haring Estate and executive director of The Keith Haring Foundation Inc., the principal beneficiary of the estate, issued the following statement:

''The Estate of Keith Haring has unfortunately been forced to commence a lawsuit against Playboy Enterprises to protect both the Estate and the public from an extensive number of unauthorized reproductions of certain drawings by Keith Haring.

''Neither Keith Haring nor his Estate has ever authorized Playboy to manufacture, distribute or sell reproductions of Haring drawings.

Playboy is apparently attempting to sell the reproductions to the public as some kind of fine art, limited edition. The reproductions are being sold with numbering.

''The Estate will not allow the fine art legacy of Keith Haring to be debased and cheapened.''

Gruen also stated, ''Regrettably, Playboy has apparently decided to capitalize on the market activity which has resulted from Mr. Haring's illness and untimely death.''

SUNRISE, FL (MAY 31) BUSINESS WIRE - Rob Wagner, president of VideOmatic of Florida announced the grand opening, Friday, June 1, of the first

VideOmatic 24 hour video rental franchise located at the corner of Sunrise Blvd. and Nob Hill in Sunrise, Fla.

Wagner stated the Sunrise location is the first of nearly 50 franchises scheduled to open over the next three months in the South Florida market with two locations opening in West Fort Lauderdale during the month of June.

VideOmatic, already a proven success in California offers a dynamic new approach to video fanaticism currently sweeping the country. VideOmatic's 100 percent automated computer system enables customer access 24 hours a day - 365 days a year to top hits with the ease of an ATM machine.

Through the use of these robotics VideOmatic feels it can capture a significant share of the growing 6.5 billion dollar video-rental market in the United States.

Plans are currently underway for future franchise expansion throughout the State of Florida and the southeastern United States.

Wagner concluded the VideOmatic franchise offers a unique opportunity for off premise management, simplified inventory control and low overhead entry into the rapidly expanding video entertainment market.

WORCESTER, MA (MAY 31) BUSINESS WIRE - The board of directors of Peoples Bancorp of Worcester Inc. (NASDAQ:PEBW) Thursday voted to increase its quarterly dividend on the company's common stock from 29 cents to 30 cents per share. The dividend is payable on or about July 20, 1990, to shareholders of record on July 3, 1990.

This is the 14th consecutive dividend increase since the bank's initial dividend payment of 10 cents per share in Jaunary 1987.

''The decision to increase our dividend reflects the board's confidence in the financial strength and core performance of the company,'' said Woodbury C. Titcomb, president and chief executive officer.

Through its principal subsidiary, Peoples Savings Bank, the company provides a wide range of retail and commercial banking services to a broad customer base throughout central and northwestern Massachusetts.

NEW YORK (MAY 31) BUSINESS WIRE - At a board meeting before Thursday's annual general meeting, B.A.T. Industries declared a first interim dividend of 10 pence (1989 9.30 pence) payable in late August, three months earlier than in 1989.

The payment date of the second interim dividend has also been brought forward to early January 1991, with the final dividend being payable in June.

During the same board meeting, Patrick Sheehy formally accepted the board's invitation to remain chairman until September 1993. In his speech to the annual general meeting, Sheehy said, ''There is, in every sense, a world of opportunities before us. By focusing the group on our two great businesses of financial services and tobacco, the foundations have been laid for a new period of sustained growth in our company's fortunes.

''I face the challenges of the new decade with considerable optimism and am determined to ensure that we make the most of the international opportunities that lie before us, in both our businesses.''

At an extraordinary general meeting following the AGM, B.A.T. Industries' proposal to demerge Wiggins Teape Appleton on the basis of one WTA share for every three BAT shares owned was overwhelmingly endorsed by shareholders. Dealings in Wiggins Teape Appleton as an independent public company will begin on June 1.

The program to reshape B.A.T. Industries continues to make further progress with the announcement that Eurotec is to be sold to Kloeckner Werke AG for a total consideration, including debt repayment, of approximately 155 million pounds.

The sale of the Breuners retail business for 56 million pounds, announced March 27, 1990, has been completed on schedule.

SHANNON, IRELAND (MAY 31) BUSINESS WIRE - GPA Technologies, the division of GPA Group plc, which provides technical services to the aviation industry, announced Thursday that it has acquired a 90 percent interest in Pacific Aviation Group Inc., of Seattle.

Pacific Aviation Group which has 49 employees and revenues in excess of $10 million was founded in 1983 to supply aircraft parts and equipment to commerical airlines.

GPA Technologies has purchased its shares from the company's founding shareholders, Sheryl Lanman, chief executive officer, and Pierre Pinsonnault, president and chief operating officer. Lanman and Pinsonnault, who retain 10 percent of the shareholding, will continue to manage the company in these positions.

Robin Wilson, chief executive of GPA Technologies, will become chairman of Pacific Aviation Group Inc.

The management of GPA Technologies and Pacific Aviation Group Inc. plan a major expansion of the company's activites. This will include the setting up of a major aircraft spares distribution center in the Shannon Free zone.

The centre will be known as GPA Pacific Areo Support Ltd. and will handle Pacific Aviation Group's considerable business in Europe, Africa and the Middle East.

Pacific Aviation Group has developed a substantial business with many of the world's a major passenger and cargo airlines and maintenance centres. Its Seattle facility is an authorized repair center for all major aircraft manufacturers in the United States.

It also represents original equipment manufacturers for Airbus activities in the United States and holds a FAA Repair Station certificate.

GPA Technologies investments in aviation technical services currently comprise Shannon Aerospace, a joint venture with Lufthansa and Swissair in aircraft overhaul and maintenance; GPA Expressair, the aircraft painting and refurbishing company with facilities in Shannon and Maastricht, Holland; and Shannon Engine Support, a joint venture with CFMI which provides engine support to B737 operators.

FT. MYERS, FL (MAY 31) BUSINESS WIRE - Construction of Saturn's dealer facility in Ft. Myers began today as Saturn Dealer William O. Branch and Saturn officials broke ground here for the future home of "Saturn of Ft. Myers."

Joining Branch in turning the first spade of ground were Jerry Lewis, UAW coordinator for Saturn Sales, Service and Marketing; Russ Clark, Saturn South area manager; and George Doss, Saturn field executive.

"Bill Branch typifies our Saturn dealer partners," Clark said. "They are highly successful retail automotive experts with organizations committed to providing superior customer satisfaction and an exceptional sales and service experience."

The stand-alone, uniform Saturn dealer facilities will feature new concepts in merchandising and servicing cars including side-by-side sales and service entrances to enhance customer convenience and satisfaction.

"We're focusing on providing an exceptional experience for each customer who walks through the front door of this dealership," Branch said. "This key element of Saturn's philosophy will distinguish us in the market place."

Saturn currently has signed franchise agreements with 97 dealers for 105 marketing areas across the United States. These dealers plan to build 121 facilities. The automaker will introduce its cars first on the West Coast and the Southeast, including Florida, this fall, followed by a rollout across the rest of the United States.

Paying tribute to Saturn's Spring Hill, Tenn., home and the environment, an area at the dealership site has been designated for a Tulip Poplar tree to be planted following construction.

"The Tulip Poplar symbolizes Spring Hill, the team spirit, and the hard work that will go into every car we will build," said Lewis. "Our dealers are planting this tree at their dealerships across the county as a symbol of our roots."

While construction of Saturn's dealer facilities is under way in several states, the automaker is in the process of building 110 validation vehicles at its new manufacturing and assembly complex in Spring Hill to test its equipment and processes.

Saturn Corp., an independent subsidiary of General Motors, is based in

Spring Hill and Troy, Mich. The company's mission is to develop, manufacture and market a family of high- quality, affordable cars to compete in the subcompact and compact segments of the market.

TELCA/TROIS-RIVIERES (MAY 31) BUSINESS WIRE - Laurent Verreault, Glandv's chairman of the board and chief executive officer, announces that the board of directors approved on May 30, the consolidated results for the fiscal year ending March 31.

The company's sales volume has considerably increased from 77.1 to $134.6 million.

The net profit increased from $2.089 million for the current financial year, or 46 cents per share, compared to $1.978 million the preceding year or 45 cents per share.

The cash flow from operations, resulted in $1.10 per share in 1990 compared to $1.06 per share in 1989.

Maintaining present level of activities in the pulp and paper industry, although the present recession known in that sector, Glandv's management has successfully approached other growing markets such as in the aluminium and hydroelectricity sectors, involving either manufacturing or installation activities. with a backlog of more than $215 million, Glandv's assures its position on the market of the 1990's mega-projects.

HARTFORD, CT (MAY 31) BUSINESS WIRE - The board of directors of The Advest Group Inc. announced Thursday that Allen Weintraub has been elected chief executive officer effective Oct. 1, 1990.

He will succeed Anthony A. LaCroix who had previously announced that he plans to retire at that time. LaCroix will remain as chairman of the board.

Weintraub will also become chief executive officer of Advest Inc., the broker/dealer subsidiary. He is currently president of The Advest Group and Advest Inc. He has been with Advest or a predecessor company throughout his career.

It was also announced that Arnold E. Amstutz will become president of The Advest Group Inc. He has been with Advest since 1984 and is now senior executive vice president responsible for operations and information services, investment management, as well as the legal corporate communications functions.

Grant W. Kurtz will become president of Advest Inc., an action announced by Advest Inc.'s board. He joined Advest in 1985 and currently is senior executive vice president and national sales manager.

''This alignment enables the company to draw on the specific technical and management skills of each of these individuals while maintaining management continuity,'' said LaCroix in making the announcement. ''We believe that this organization strongly positions Advest for future growth.''

In addition, the board of directors announced that it has regretfully accepted the resignation from the board of Eli Broad, chairman and chief executive officer of Broad Inc. He cited his extensive commitments as the reason for his decision.

Jay S. Wintrob was elected to fill the vacancy. Wintrob is senior vice president of Broad Inc. He received his law degree and his undergraduate degree from the University of California at Berkley. He is a member of the American Bar Association, the Los Angeles County Bar Association, and the Association for Corporate Growth.

The Advest Group Inc. is a diversified financial services company headquartered in Hartford, Conn. It is traded on the New York stock exchange.

WATERBURY, CT (MAY 31) BUSINESS WIRE - MacDermid Inc. of Waterbury, Conn. announced record fourth quarter earnings.

At $0.58/share, the quarter's earnings were $2,050,000, up 68 percent from last year's comparable period.

Full fiscal year (ended March 31, 1990) earnings were $1.49/share, down 19 percent from 1989.

Cost reduction and margin improvement measures taken earlier this fiscal

year account for the upward quarterly trend.

Record total sales as well as record proprietary chemical sales were reported for the fiscal year ended March 31, 1990. Total sales were $148,599,000, an increase of 3.6 percent over the previous year. Proprietary chemical sales were $118,480,000, up 2.6 percent from fiscal 1989.

The exchange of MacDermid's semiconductor business for Dynachem's (a unit of Morton International) electroless copper and screen resist business, plus cash, was completed in May 1990 after the close of fiscal 1990.

The onetime profit on the transaction will be reported in the first quarter of fiscal 1991.

At the last meeting of the board of directors, Arthur J. LoVetere discussed his long-standing plan to transition into a second career on Sept. 30, 1995 as a Permanent Deacon in the Roman Catholic Church.

The directors agreed to the plan where LoVetere will stand for appointment as vice chairman of the corporation at the annual appointment of officers on August 1.

LoVetere plans to recommend and expects the board to accept the appointment of Daniel H. Leever as the fourth president and chief executive officer of the corporation on the same date.

LoVetere said, ''I am pleased to be making the first step in my transition plan concurrent with my 30th year with the company.''

PROVIDENCE, RI (MAY 31) BUSINESS WIRE - Old Stone Corp. Thursday announced it has completed the sale of its Washington state retail division, Old Stone Bank of Washington, to Washington Mutual, a federal savings bank, a subsidiary of Seattle-based Washington Mutual Savings Bank for a pre-tax gain of approximately $10 million.

Old Stone and Washington Mutual reached a definitive purchase agreement on Jan. 25, 1990 and received regulatory approval for the sale from the Office of Thrift Supervision on April 6, 1990.

Under the terms of the transaction, Washington Mutual has assumed approximately $300 million in deposits and other liabilities and has

purchased certain assets, including mortgage and consumer loans, from Old Stone Bank of Washington. In addition, Washington Mutual has acquired all seven Seattle/Tacoma area branch offices of Old Stone Bank of Washington. Prior to completion of the transaction, Washington Mutual Savings Bank and Washington Mutual, a federal savings bank had 63 branches and $6.7 billion in assets.

Old Stone Bank of Washington was a division of Old Stone Bank, a federal savings bank, the principal subsidiary of Old Stone Corp., a $4.0 billion asset, financial services company headquartered in Providence. Originally named Citizens Federal Savings and Loan Association, Old Stone Bank of Washington was acquired with federal assistance by Old Stone Corp. at the end of 1985. The company, which prior to being acquired by Old Stone had been a troubled institution, has been profitable since its first year under Old Stone management.

Theodore W. Barnes, president and chief executive officer of Old Stone Corp., explained that the sale of Old Stone Bank of Washington is part of a strategic plan that calls for a significant downsizing of the corporation. ''Since we announced our restructuring plan on Sept. 26, 1989, we now have sold three operating units, including a California-based residential real estate lending unit and a tuition budgeting company, Academic Management Services Inc. Including the sale of our Washington state retail division, we have reduced our balance sheet by more than $500 million in assets and realized over $32 million of pre-tax gains which help to strengthen our capital ratios.''

#90151b0793 05/31/1990 ~Business Wire

ACTON, MA (MAY 31) BUSINESS WIRE - The Co-operative Bank of Concord (NASDAQ:COBK) reported a fourth quarter loss of $5,292,000, or $1.56 per share, compared to earnings of $885,000, or 26 cents per share in the same quarter last year.

Results for the fiscal year ended April 30, 1990 were a loss of $3,017,000 or 89 cents per share, versus earnings of $1,789,000, or 53 cents per share for the prior year.

Chairman David E. Bradbury stated, ''During the fourth quarter we sold a portion of our equity portfolio, resulting in a pre-tax loss of $3,015,000. As noted in our prior announcement covering this transaction we made the sales to recapture prior years' capital gains taxes that

would have expired on April 30th. The net after tax effect increased stockholders' equity.

''As a result of the continued weakness in the regional real estate markets, we also added $3,060,000 to our general loan loss reserves and provided for market value declines of $966,000 on other real estate owned and $490,000 on real estate held for development. Actual losses charged to the loan loss reserve during the quarter totalled $1,051,000. At year end all real estate owned or held for development was written down to its estimated fair market value or net realizable value. The general loan loss reserve at April 30, 1990 was $4,239,000.''

The additional reserves and write-downs were taken after a complete review of our construction, residential, land development, and commercial real estate loan portfolio. As part of the review, new valuations were performed for the individual properties, current credit reports and updated financial statements were obtained for individual borrowers, operating cash flows were determined for income property loans, and updated independent appraisals were conducted.

During the quarter, the bank's certified public accountants, KPMG Peat Marwick, began their year-end audit and the Office of the Massachusetts Commissioner of Banks initiated its periodic examination. The bank's independent auditors have completed their review and the bank examiners are in the final stages of their examination. ''We believe that the actions taken in the fourth quarter will satisfy the requirements of both the audit and examination,'' stated Chairman Bradbury.

Loans on non-accrual were $14,094,000 and other real estate owned, including in-substance foreclosures, was $12,564,000. Total non-performing assets represent 3.94 percent of assets and 4.76 percent of total loans receivable and other real estate owned. The non-performing assets do not include certain assets of the former Randolph Co-operative Bank on which the Co-operative Central Bank Share Insurance Fund provides yield maintenance and protection against losses for a three year period.

The Co-operative Bank of Concord, with assets in excess of $675 million, is a state chartered, FDIC insured co-operative bank with headquarters in Acton, Mass., and 14 retail banking offices in Middlesex, Norfolk, and Plymouth counties.

#90151b0795 05/31/1990 ~Business Wire

CINCINNATI (MAY 31) BUSINESS WIRE - The LensCrafters division of The

United States Shoe Corp. has acquired Hourglasses Inc., a five-unit chain based in Louisville, Ky.

The sale, which closed May 31, will move the company toward its goal of adding 100 stores to its operation in 1990.

The two companies signed a purchase agreement May 22 for units located in five markets: Rockford, Ill.; Madison, Wis.; Detroit; Roanoke, Va.; and Charlotte, N.C. LensCrafters assumed ownership on May 31, said CEO Dave Browne.

Hourglasses, incorporated in October 1988, opened its first store in Hickory, N.C. in January 1989. When the company decided to sell the chain in early 1990, it looked to LensCrafters, said President Tony Passafiume.

''It was the logical choice. Our stores fit into LensCrafters' overall concept,'' he said.

Purchase of the Roanoke store marks LensCrafters entry into that market. The other locations will increase the company's presence in the Rockford, Madison, Detroit and Charlotte markets, Browne said.

The Hourglasses stores, he added, will fit nicely into operations because they have full-service labs and resemble LensCrafters in size and appearance.

''The locations fill pockets in our markets. They'll bring LensCrafters closer to customers who would otherwise have to drive to another market to find one of our stores,'' he said.

The acquisition marks the company's second largest, following the August 1989 purchase of the 12-unit Lenox Optical chain with stores in Georgia, South Carolina and North Carolina. Its largest purchase prior to Lenox was three Eye Co. stores in Las Vegas in 1988.

Once the sale is final, the five stores will close for several days to train associates and stock inventory. The stores are expected to re-open as LensCrafters in early June, he said.

WHITE PLAINS, NY (MAY 31) BUSINESS WIRE - IBM Thursday announced that OfficeVision Release 1.1 is now available to customers.

Today's announcement continues the evolution of OfficeVision, IBM's office-automation software, by providing customers with improved performance and expanded function for greater business productivity.

Release 1.1 enables people to use OfficeVision with hundreds of popular Operating System/2 (a) (OS/2 (a)) applications. Users can add these applications to OfficeVision as pictures - or icons - to the OfficeVision desktop on a computer screen. The icons on the screen represent the many business functions used in a typical day at the office.

Someone could, for example, integrate OS/2-based spreadsheet software - such as Lotus (b) Development Corporation's 1-2-3/G or Microsoft (c) Corporation's Excel for OS/2 - with OfficeVision and use that software simply by pointing a mouse device at the spreadsheet icon in the OfficeVision desktop.

The addition of OS/2 applications to the OfficeVision desktop can increase user productivity by providing access to key business and office software from a single computer screen.

Release 1.1, for IBM's OfficeVision/2 LAN Series, runs on OS/2 Extended Edition 1.2 (as well as OS/2 Extended Edition 1.1) and supports the OS/2 LAN Server Program 1.2. It provides users with the many benefits of this advanced operating system, including increased ease of use, enhanced communications functions, Ethernet support and improved ease of installation.

Current OfficeVision/2 LAN Series Release 1 licensees will automatically receive a copy of Release 1.1 at no additional charge. The price for Release 1.1 for new customers is a one-time charge of $750.

(a) Represents trademark of International Business Machines Corporation.
(b) Lotus and 1-2-3 are trademarks of Lotus Development Corporation.
(c) Microsoft is a registered trademark of Microsoft Corporation.

LITTLE ROCK, AR (MAY 31) BUSINESS WIRE - William H. Bowen, chairman and chief executive officer of First Commercial Corp. (NASDAQ/NMS:FCLR), and Cecil W. Cupp Jr., chairman of the board of ABT Bancshares Corp. in Hot Springs, Ark., jointly announced Thursday that the two organizations have now completed their affiliation, which was first announced in April, 1989.

The final step necessary for consummation of the affiliation was accomplished with ratification by ABT shareholders at a special meeting today, which was followed by the exchange of 1,010,083 FCC common shares for all of the outstanding shares of ABT.

At a closing price of $18.75 per share for FCC common stock on May 30, the transaction involved a total consideration of $18.9 million, and will be accounted for as a pooling of interests by FCC.

ABT Bancshares Corp. is the parent of Arkansas Bank & Trust Co., Arkansas' eighth largest bank, second largest state bank, and the largest bank in Hot Springs and Garland County. Affiliation with ABT brings FCC's total assets to approximately $1.85 billion, which is expected to qualify FCC as Arkansas' largest bank holding company.

The affiliation also brings the number of FCC Arkansas affiliates to eight. ABT is the largest FCC affiliate bank after First Commercial Bank, N.A. of Little Rock, the state's largest bank. ABT as of March 31, 1990, had total assets of $302 million, total deposits of $273 million, and total loans of $192 million. It has six branches in Hot Springs and one branch in Hot Springs Village.

With the addition of a presence in Garland County, FCC is represented in Arkansas counties which include 29 percent of the state's population. Every county in which FCC is represented, with only one exception, is estimated to have experienced percentage population growth in excess of the statewide increase from 1980 to 1990. Also with only one exception, each FCC Arkansas affiliate is the largest bank in its respective market.

FCC's Arkansas affiliates, in addition to ABT of Hot Springs and First Commercial Bank, N.A. of Little Rock are: First National Bank of Conway; Benton State Bank; First Commercial Bank of Lonoke County; First National Bank of Russellville; Morrilton Security Bank, N.A.; and Security Bank of Harrison.

FCC is also a 50 percent joint venture partner with Arvest Bank Group of Bentonville in ownership of Security National Bank & Trust Co. of Norman, Okla.

#90151b0813 05/31/1990 ~Business Wire

CHESTNUT HILL, MA (MAY 31) BUSINESS WIRE - The Neiman Marcus Group Inc. (NYSE:NMG) Thursday reported operating results for the third quarter of

its 1990 fiscal year.

For the 13 weeks ended May 5, 1990, the company had revenues of $370.8 million, up 8.2 percent from $342.6 million in the 13 week period a year ago. Operating earnings were $19.2 million, compared to $19.3 million the previous year.

Net earnings were $4 million in the current year's quarter, down from $4.7 million a year ago. After preferred dividends, The Neiman Marcus Group had a loss applicable to common shareholders of 6 cents per share in the current year period compared to a loss of 4 cents per share in last year's quarter.

For the 40 weeks ended May 5, 1990, the company reported revenues of $1,310.9 million, up 16.7 percent from $1.123 million in the 39 week period a year earlier. Operating earnings were $97.1 million, a 22.8 percent increase from $79.1 million the previous year. Net earnings were $34.4 million in the first 40 weeks of fiscal 1990, up 20.9 percent from net earnings of $28.5 million last year.

After preferred dividends, earnings per share applicable to common shareholders were 49 cents for the first 40 weeks of fiscal 1990, up from 31 cents in the 39 week period last year.

Fiscal 1990 is a 53-week year with the additional week included in the second quarter of the year.

Richard A. Smith, chairman and chief executive officer, said, ''The revenue gain in the current year's quarter reflects a 5.5 percent increase in comparable sales, and the inclusion of results from one new Neiman Marcus store and nine new Contempo Casuals stores.''

The company reported that its Neiman Marcus division, which accounts for nearly 75 percent of total revenues, had higher revenues and slightly higher operating earnings in the current year quarter. ''The division's performance reflected improved gross margins and increased operating earnings from Neiman Marcus stores,'' Smith said, ''and a very strong performance by the Neiman Marcus mail order business.

''These gains were offset to a large degree by a disappointing performance from Horchow Mail Order, which incurred a much greater loss in this year's quarter compared to year ago,'' Smith added.

''Bergdorf Goodman had slightly higher revenues but lower operating earnings in the quarter. Bergdorf Goodman's performance was impacted by a softening retail environment in New York City and by remodeling activity in its existing store in anticipation of the relocation of its men's business this fall to a new store in New York.

''Bergdorf Goodman also incurred pre-opening expenses for that new store in the quarter,'' Smith reported.

Contempo Casuals had substantially higher revenues and operating earnings in the quarter. ''Contempo will make a very significant contribution to operating earnings this year,'' Smith said.

The company reported that merchandise inventories at the end of the quarter were $285.2 million, compared to $265.6 million a year earlier. The effect of the LIFO method of accounting for inventories compared to the FIFO method was to decrease pre-tax earnings by $2 million in the third quarter of both 1989 and 1990.

Smith indicated that the company expected to report a net loss in its fourth quarter in excess of the $3.2 million net loss it incurred in the fourth quarter of fiscal 1989.

''Last year, we recorded a credit for LIFO of $4.8 million in the fourth quarter. In the current year, we anticipate a LIFO charge in the fourth quarter. In addition, interest expense in the fourth quarter this year will be significantly higher than a year ago because of higher borrowings to support new store building programs and store remodeling efforts.''

The Neiman Marcus Group is a leading specialty retailer which is 60 percent owned by General Cinema Corp. Its three operating units are Neiman Marcus, Bergdorf Goodman and Contempo Casuals.

ALBANY, NY (MAY 31) BUSINESS WIRE - George O. Pfaff, chairman and chief executive officer of National Savings Bank of Albany (NASDAQ: NSBA), said Thursday that, in light of the termination of the bank's merger agreement with Home & City Savings Bank, National's board will reassess the bank's future course at the board's next regular meeting, scheduled for June 12.

The agreement with Home & City was terminated following a meeting today at which Home & City's shareholders failed to approve the merger. The merger had been approved by National's shareholders.

Pfaff stated that the board would considers altenative available to the bank. This may include the sale of the bank to, or a merger of the bank with, another financial institution, if such a transaction could be arranged on terms that are fair and that adequately protect the interest

of National shareholders.

Pfaff noted that a sale or merger that would reflect a fair value for the bank may not be possible at the present time because of the current uncertainty with respect to economic conditions in the Northeast as well as current conditions in the financial services industry.

In such a case, it may be in the best interests of the shareholders for the bank to remain independent until such time as a fair value could be obtained.

NEW YORK (MAY 31) BUSINESS WIRE - In response to inquiries from the American Stock Exchange with respect to the earlier announcement Thursday by S.E. Nichols of the postponement of the payment of interest on its outstanding 14-7/8 percent debentures, the company stated that, at this date, it cannot determine whether the interest on its outstanding 15 percent Senior Subordinated Sinking Fund Debentures will be paid on its due date of Sept. 1.

It was noted that, by reason of the ranking of its two outstanding series of debentures, Nichols would not be in a position to pay interest on its outstanding 15 percent debentures without providing for payment of interest on its 14-7/8 percent debentures.

As noted in its previous release bearing today's date, management of S.E. Nichols cannot now determine what final action will be taken on payment of interest on the 14-7/8 percent debentures.

NEW YORK (MAY 31) BUSINESS WIRE - Harold J. Krebs, the executive vice president of KB Communications Inc., a public Nevada corporation (the ''company''), announced Thursday that the company has terminated merger talks with Little Prince Productions Inc., (NASDAQ: LTLP).

Krebs stated that the company was unable to agree to certain essential merger terms with the management of Little Prince, and that the company's best interests would not be served by pursuing the negotiations any further.

Krebs announced instead that the company has entered into an agreement with Richardson & Associates of New York City to arrange a private placement of $1,050,000 of the company's securities. The company may also seek additional financing at a later date.

At the same time as the company entered into the private placement agreement, the company also contracted with Global Media Corp., a private Delaware corporation (''Global'') to reacquire from Global the company's rights to certain contracts relative to the manufacture and distribution of pre-recorded western popular music in the Peoples' Republic of China and other musical production, management and publishing arrangements.

KB Communications Inc., is a full service marketing and production company in the entertainment industry. Its primary business is the manufacturing and distribution of western popular music in the Peoples' Republic of China.

WASHINGTON (MAY 31) COMTEX - The 8-K report filed at the SEC shows on May 18, 1990, Merchantsbank of Boston, the principal subsidiary of Merchants Capital Corp., was declared insolvent by the Massachusetts Division of Banks. The Massachusetts Division of Banks thereupon seized possession of the bank and appointed the FDIC as the bank's liquidating agent. FDIC sold all insured deposits and branches of the bank to First National Bank of Boston.

-30- 613

#90151c0059 05/31/1990 ~Comtex

WASHINGTON (MAY 31) COMTEX - The 8-K report filed at the SEC shows on May 4, 1990, Discovery Systems brought suit against Terry M. Fredeking, the former president of the company's Antibody Associates Inc. subsidiary, and two former employees for alleged diversion of corporate assets and violation of a non-compete covenant. The suit seeks damages and injuctive relief.

On April 24, 1990, Mr. Fredeking was terminated from his position as president of Antibody Assciates. Discovery claims and Mr. Fredeking denies that the dismissal was made for cause.

Mr. Fredeking was joined by those two former employees in a new business. The companies who had done business with Discovery are instead now doing business with the new business established by Mr. Fredeking.

Mr. Frdeking advised Discovery that he demands recission of the acquisition of Antibody Associates by Discovery, and demands compensation for wrongful termination.

Discovery has not filed a Form 10-K for its fiscal year ended Dec. 31, 1990 for reasons related to the dispute.

Other executive changes took place within Discovery, including the

resignation of Allen F. Champbell as president and director. Following this, Mr. Fredeking resigned as vice president and director without giving reasons. Thereafter, at the request of Mr. Mark Maged, Mr. Campbell rejoined the board of Discovery, and Mr. Thomas Redengton was elected to the board. A few days later, because of the illness of his wife, Mr. Maged resigned from the board.

The executive office of Discovery Systems Ltd. is located at 405 Airport Freeway, Suite 3H, Bedford, Texas 76201, and its telephone number is (817) 282-8700.

-30- 1836

#90151c0060 05/31/1990 ~Comtex

WASHINGTON (MAY 31) COMTEX - The 8-K report filed at the SEC shows on May 7, 1990, the State of New York Tax Compliance Division seized under warrant all goods and chattels present in Zorba's Palace Inc.'s sole restaurant, located in Buffalo, New York. That seizure was enacted in order to make public auction of the goods and thereby raise state taxes owed by Zorba's. Outstanding state sales and use taxes and penalties for the company at that time amounted to $45,000.

The conducted bulk-sale auction generated revenues of $24,000 from those seized assets. After auction costs of approximately $4,000, $20,000 was credited to the company's tax accounting, leaving an outstanding balance of taxes owed of $25,000.

As a result of these actions, Zorba's Palace's restaurant operations ceased, and, as of the May 30, 1990 date of the 8-K Filing, the company was no longer engaged in any business operations.

#90151c0061 05/31/1990 ~Comtex

WASHINGTON (MAY 31) COMTEX - The 8-K report filed at the SEC shows on May 15, 1990, for a compensation of $7 million in cash plus 10,000 company shares, MSR Exploration Acquired working interest in the Winters (Capps) Field from Omni Petroleum Corp. The field, in Runnels County, Texas, possesses 46 wells. The effective date of the acquisition was Feb. 1, 1990.

According to Citidal Engineering Ltd., MSR's independent petroleum engineers, the acquisition includes approximately 1.6 million barrels of proven oil and 2.5 billion feet of proven natural gas.

Of those cash funds, $6.3 million was garnered from a revolving credit agreement and term loan facility established between the company and Manufacturers Hanover Trust Co. of New York. The remaining $700,000 was taken from operations.

In other news, the MSR began reporting its consolidated financial statements in U.S. dollars as of Jan. 1, 1990.

The executive office of MSR Explorations Ltd. is located at Box 250, Cut Bank, Montana 59427-0250, and its telephone number is (406) 873-2235.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 1

WILFRED J CORRIGAN OWNS 2,541,800 SHARES (4.80%) OF DAVIN COMPUTER CORP OF IRVINE, CA.

ANNOUNCEMENT:

On March 26, 1990, options for 500,000 shares which Corrigan owned expired.

On that date, Corrigan ceased to be the beneficial owner of more than 5 percent of Davin Computer's stock resulting from the expiration of Corrigan's warrants and the exercise of warrants by others.

PURPOSE:

Investment and expiration of warrants.

-30- 643

#90151c0267 05/31/1990 ~Comtex
SCHEDULE 13D

SEC - AMENDMENT NUMBER: 13

ANNOUNCEMENT:

On May 29, 1990, Pic'N'Save (TICKER: PICN) filed a complaint for injunctive and declaratory relief against Girard Partners which alleged violations of the Securities Exchange Act of 1934.

Named as defendants are Girard, its partners, certain of Girard's previously-announced nominees to Pic'n'Save's board, and certain other persons.

Also on that date, Girard requested that Pic'N'Save fix a record date for determining Pic'N'Save stockholders entitled to consent to corporate action in writing without a meeting.

Girard stated that it intends to seek to have stockholders take action by written consent to remove at least a majority of the board, elect 5 or more of its nominees, and adopt any bylaw amendments or stockholder resolutions deemed necessary in connection with the foregoing.

Although Girard delivered a letter on that date in accordance with a certain section of the bylaws, informing Pic'N'Save of its intentions, Girard does not concede that the section is valid.

SEC - AMENDMENT NUMBER: 1

AMERICAN INTL GROUP INC OF NEW YORK, NY OWNS 2,188,585 SHARES (55.90%) OF FISCHBACH CORP (TICKER: FIS) OF NEW YORK, NY.

ANNOUNCEMENT:

On May 30, 1990, American International Group and APL Corp., APL Operating Co. and Reed Laboratories Corp. revised an option agreement to provide that the price which AIG would pay to exercise an option granted by the others would be $11.00 per share.

AIG plans to acquire Fischbach Corp, either through a merger or another transaction in which Fischbach stockholders would receive $11.00 per share.

Also, AIG is currently negotiating an agreement with Peter Kiewit Sons' Inc. to provide management services to the company.

Upon completion of the merger, AIG intends to reconstitute the board, withdraw Fischbach's stock from listing on the NYSE, and to terminate the registration of Fischbach's stock.

PURPOSE:

Revision of option agreement.

BRUSSELS (MAY 31) - The European Commission on Thursday told France to lift immediately a ban it had imposed against British beef imports Wednesday on the grounds that French consumers were worried about "mad cow" disease.

"The Commission... regrets the action of the French authorities, taken without full consultation, to ban beef and cattle from the United Kingdom " the European Economic Community's executive said in a statement.

"In the absence of convincing arguments for this action, the Commission calls upon France to revoke the ban immediately."

The Commission added it was "satisfied" that the measures it had already taken with regard to British beef sales "provide the fullest guarantees" for public health.

French Agriculture Minister Henri Nallet announced the ban on Wednesday "to reassure" French shoppers that the meat was free from the disease, known as bovine spongiform encephalopathy (BSE).

The disease is believed to have spread in Britain through cross-transmission from infected sheep carcasses that were ground up and included in cattle meal. The practice was stopped in 1988.

British Agriculture Secretary John Gummer reacted angrily to the French action, calling it "unwarranted, unjustified and contrary to European Community law."

France is Britain's biggest single market for its beef. Its sales to the French market last year totalled 71,300 tonnes, with a value of 265 million dollars - roughly half of all British beef exports.

The EEC had already taken action to prevent export of live British cattle over six months old. West Germany took further action in January by insisting it would only import boneless British beef.

MANILA (MAY 31) - The Asian Development Bank (ADB) has launched a 150-million Swiss franc (107 million U.S. dollar) public bond issue in Switzerland, the ADB said Thursday.

The issue, launched by an underwriting syndicate of the Union Bank of Switzerland, Swiss Bank Corp. and Credit Suisse, has a 10-year maturity, bears a coupon of 7.25 percent per annum payable annually and carries a two per cent premium.

The issue, launched on Wednesday, will be listed in the Zurich, Basle and Geneva stock exchanges, the ADB said in a statement.

Proceeds will go to the bank's ordinary capital resources for use in variable-rate lending operations.

It was the bank's 25th public bond issue in Switzerland, raising total ADB borrowings in that market to 2.52 billion Swiss francs (1.7 billion

dollars).

KUALA LUMPUR (MAY 31) - Malaysia Thursday called on Brazil and China, two large new tin producers, to take the lead in tin consumption research and development to ensure the industry continues to prosper.

"It is the responsibility of all tin producers, especially the major ones, to finance research and development as they stand to benefit the most from the results," Minister of Primary Industries Lim Keng Yaik said.

Dr. Lim said that Malaysia and a few countries, which had been the traditional supporters and financiers of research and development, could not continue to bear the burden, especially as there were new large tin producers.

"It is now up to these newcomers not only to bear this problem equitably but also to take the lead as their stakes are bigger," he told the Malaysian Chamber of Mines at its annual luncheon.

Brazil, with newly-discovered and rich deposits, dislodged Malaysia from the top rank of tin-producing countries in 1988, while China is now considered to be the second largest producer.

Neither country is a member of the Association of Tin Producing Countries (ATPC) although both support its efforts to reduce overhanging stocks resulting from the market collapse in October 1985 by cutting back exports.

The ATPC managed to reduce the stocks to 35,000 tons at the end of 1988 but the overhang rose to 45,000 tons at the end of last year as improving prices triggered uncontrolled production and smuggling in Brazil.

Dr. Lim said that Brazil and China were not committed, "at least not meaningfully, to its (ATPC) aspirations of achieving an equitable tin market, compatible with the interests of producers and consumers alike."

TOKYO (MAY 31) - Japanese exports of color television sets dropped 4.5 percent to 237,000 units in April, while those of videotape recorders (VTR's) sagged 0.4 percent to 1.749 million units, an industry group said Thursday.

Domestic sales of color television sets during the month rose 3.5 percent from a year earlier to 859,000 units but those of VTR's dropped 5.5

percent to 484,000 units, the Electronic Industries Association of Japan said.

-30- 617

#90151d0690 05/31/1990 ~French/German News Agency

TOKYO (MAY 31) - Japan's steel exports nose-dived 22.5 percent from a year earlier to 1.367 million metric tons in April, led by a sharp drop in shipments to China, an industry group said Thursday.

Exports to China plunged 76.4 percent to 68,000 tons, while those to the United States fell one per cent to 287,000 tons, the Japan Iron and Steel Federation said.

Japan exported 124,000 tons of steel to Taiwan in April, down 40.4 percent, 122,000 tons to South Korea, off 22.5 percent, and 60,000 tons to the Soviet Union, down 26.9 percent, it said.

The federation also announced that Japan's steel imports in April jumped 31.5 percent from a year ago to 709,000 tons.

CARACAS (MAY 31) - Venezuela is putting together four billion dollars to buy back between eight and 10 billion dollars of its foreign debt over the next year, Planning Minister Miguel Rodriguez said.

The Venezuelan Government reached a debt reduction agreement in March with a committee of its 400 creditor banks on 20.6 billion dollars of its foreign debt.

According to official estimates, Venezuela owes more than 30 billion dollars, of which the public debt accounts for 26 billion dollars.

Under the agreement in principle reached with the banks, the creditors will have a menu of five options to convert their old debt into new instruments that would provide Caracas with relief in its debt service.

The options are: direct repurchase at secondary market prices; an exchange of old debt for bonds with a 30 percent reduction in the principal; an exchange of debt for bonds with fixed interest at reduced rates; temporary, staggered reduction of interest rates over five years; and the injection of fresh money.

When the agreement was announced two months ago, Mr. Rodriguez said Venezuela was putting together a "pool of resources," principally with funds from the International Monetary Fund (IMF) and the World Bank for

the direct debt buy-back.

Mr. Rodriguez estimated at the time that 2.9 billion dollars would be raised to reduce the state's debt with the commercial banks by between six and 6.5 billion dollars.

But Wednesday he said "the resources will be very much above the original estimates, and if more resources are needed, we will look for them."

The four billion dollar pool includes two billion dollars from the IMF and the World Bank, a 500 million dollar loan from Spain, 500 million dollars from Japan's Eximbank and one billion dollars in Venezuelan funds.

The IMF, the World Bank and Eximbank have authorized Caracas to use a quarter of the funds they provide between 1990-93 to reduce its debt.

#90151d0890 05/31/1990 ~French/German News Agency

TOKYO (MAY 31) - Japan's Toshiba Machine Co. Ltd., one of the world's biggest machine-tool makers, said Thursday net profit soared 187 percent to 4.2 billion yen (27 million dollars) in the year to March.

Sales climbed 10.5 percent from a year earlier to 120 billion yen (760 million dollars), the company said.

The surge in earnings marks a solid recovery from the loss of 428 million dollars (2.7 million dollars) two years ago following a scandal involving illegal sales of sensitive machinery to the Soviet Union.

Toshiba Machine forecast profits to reach 4.3 billion yen (27 million dollars) in the current year on sales of 130 billion yen (823 million dollars.

-30- 854
#90151d0920 05/31/1990 ~French/German News Agency
Oslo (MAY 31) - The Norwegian shelf contains nearly twice as much oil as previously estimated, the state-run oil company Statoil said Thursday.

If the figures disclosed by Statoil are correct, Norwegian oil production from wells in the North Sea will last until the year 2020. This is 10 years longer than earlier estimates.

Statoil last year reexamined existing oil fields. Results indicate they contain far more oil than the company had thought.

Statoil also said that 40 percent of the North Sea oil reserves still had not been taapped.

Company spokesman Arild Steine said reserves representing six billion barrels of exploitable crude were unmapped in the North Sea. A year ago, this estimate was only half as high.

The company believes the hidden reserves off central Norway are almost equal to those in the North Sea. Reserves in the Barent Sea are estimated at more than three billion barrels.

#90151d1180 05/31/1990 ~French/German News Agency
PARIS (MAY 31) - The French luxury goods group LVMH Louis Vuitton Moet Hennessy announced on Thursday that it was buying up to 11.7 percent of the British Guinness brewery group in an operation costing about eight billion francs (about 1.4 billion dollars).

The share-exchange operation included a tender arrangement to buy 6.8 per

cent of the British Guinness brewery group.

Guinness holds 25.1 percent of LVMH, or 24.1 percent on a diluted basis. LVMH said it was buying 4.9 percent of Guinness as shares became available on Thursday to take its current holding to 17.3 percent.

The additional 6.8 percent would be acquired by means of tendering organised through the investment bank S.G. Warburg, the statement here said.

LVMH said that in the tender, valid until June 8, it would buy up to 59,446,392 shares at up to 825 pence for a total of about 4.8 billion francs (about 825 million dollars).

If both parts of the buying operation were successful, the company would spend eight billion francs.

If the number of shares offered for tender was not sufficient, LVMH would activate an option with Warburg to take its stake to at least 22.4 percent.

LVMH said that its stake in Guinness was "a long-term strategic investment".

It was increasing the holding under the terms of an agreement with Guinness permitting it to obtain a share equivalent to that held by Guiness in LVMH directly or indirectly on a fully-diluted basis.

LVMH said that it did not intend to exceed the maximum set under the agreement which worked out at 24.1 percent.

#90151d1320 05/31/1990 ~French/German News Agency

PARIS (MAY 31) - France plans to spend 530 million francs (93 million dollars) developing a "high-speed train of the future" to cover routine 1,000 kilometer (600 mile) routes within three hours, officials said here Thursday.

The current "train a grande vitesse", or TGV, manufactured by the French firm Alsthom and Britain's GEC, recently set a record of 515.3 kilometers an hour (305 miles an hour).

The government of France is launching the new programme with GEC, Alsthom and the SNCF state railways.

Officials said the future train should be able to reach speeds of more than 330 kilometers an hour (200 miles an hour) on normal commercial runs, while providing more safety and comfort than current models.

#90151d1390 05/31/1990 ~French/German News Agency

SEOUL (MAY 31) - South Korea's Samsung Electronics Co. announced Thursday that it had agreed with the Soviet Union to export and jointly produce Time Digital Exchange (TDX) systems worth 12 billion dollars.

A Samsung spokesman said the agreement would be the largest business deal ever reached between the two countries.

Under the agreement reached between Samsung and the Soviet telecommunication ministry in Moscow last week, Samsung will export and jointly produce 30 million lines for the TDX systems over the next five years.

The Soviet Union will provide Samsung with unspecified techniques related to satellite communications, according to the announcement. South Korea hopes to launch its own satellite by the end of 1990s.

Samsung will also export telecommunication equipment, including facsimile and car phones, worth 100 million dollars each year under the agreement.

Samsung and the Soviet telecommuncation ministry also agreed to jointly develop fire optic cables and fire optic transmission systems.

News of the agreement came just hours after Seoul announced that President Roh Tae-Woo would meet Soviet President Mikhail Gorbachev on Monday in San Francisco to discuss the normalization of ties between the two countries.

Moscow has long been a close ally of North Korea but has stepped up contacts with South Korea in the past few years, attracted by the country's rapidly developing economy.

PARIS (MAY 31) - The French Lyonnaise des Eaux conglomerate is to launch a convertible bond issue totalling two billion francs, extendable to 2.5 billion francs (about 467 million dollars), for environmental development, the company said on Thursday.

The company said that the money will be invested in environmental activities, and particularly in the treatment and distribution of water in France and abroad.

The issue, including an element of 720 million francs for international subscribers, will be priced at 800 francs, and will be redeemable in nine

years, six months and three days.

The nominal yield will be 6.50 percent, and the gross yield on an actuarial basis will be 7.27 per cent.

Early settlement will be possible through re-purchase on the stock market or at the issuer's wish after July 1 1993.

Cairo (MAY 31) - The price of all Egyptian crude oil brands will fall by 1.85 dollars per barrel on Friday in accordance with crumbling world prices, the Egyptian news agency Mena reported Thursday.

Al-Zeit Gulf and Ras al-Behar crudes will cost 13.30 dollars per barrel, the Suez Gulf brand 13 dollars, Balaim 12.15 dollars, Badran 11 dollars and the Ras Ghareb crude 10.70 dollars.

Egypt is not a member of the Organisation of Petroleum Exporting Countries and sets the prices of its crudes every two weeks.

Kuala Lumpur (MAY 31) - Malaysia is to decide whether or not to quit the Association of Tin Producing Countries (Atpc) in view of the fact that leading producers like Brazil and China are not members, Primary Industries Minister Datuk Seri Dr. Lim Keng Yaik said Thursday.

Commenting on a call by Malaysian Chamber of Mines President Ibrahim Menudn to disband the Atpc, Lim said he agreed with Ibrahim that there was ''no point for members restricting themselves within the Atpc while non-members played havoc with the market, especially when the Malaysian economy is now less dependent on tin.

''I will do the necessary assessment at the coming Atpc ministerial meeting in La Paz, Bolivia, to be held this October,'' Lim told reporters.

He said if there was ''no more discipline within the Atpc, its supply rationalisation scheme (Srs) might as well be scrapped.''

Lim said that ''since Malaysia has heeded Brazil's call to join the Cocoa Producers' Alliance (Cpa), Brazil rightfully should reciprocate Malaysia's gesture by becoming an Atpc member.

''Brazil as the world's biggest tin producer cannot run away from its responsibility as the Srs would be useless without its membership and Brazalians would also lose out over the long term if there is instability in the tin market,'' he added.

Ibrahim said ''Brazil alone has the capacity to produce up to 60,000 tonnes of tin per annum and yet it has chosen to remain out of the Atpc.

''With Brazil and China not in the Atpc, all the member countries should review their membership in the tin pact for the whole system cannot work if there is no co-operation among the producers,'' Ibrahim added.

PARIS (MAY 31) - A demonstration here Saturday to mark the first anniversary of the crushing of China's pro-democracy movement has been cancelled, but similar events are to go ahead Sunday and Monday, organizers said Thursday.

A spokesman for Maison Chinoise Pour la Democracie (Chinese Home for Democracy) said the first gathering was scrapped because the Human Rights Esplanade at Trocadero, by the banks of the Seine River, was "unavailable."

However an informed source said Paris police had refused to give organizers permission to launch balloons.

Leading Chinese dissidents are to attend a commemoration at the same site Sunday evening, while organizations close to the Chinese democracy movement are to lay a wreath Monday in front of the Chinese Embassy.

Hundreds of people died in Beijing last June when troops opened fire on pro-democracy demonstrators.

#90151d2280 05/31/1990 ~French/German News Agency

FRANKFURT (MAY 31) - The Bundesbank kept monetary policy steady at a regular meeting of its policy-making Central Council here Thursday, a central bank spokesman said.

The discount rate remains at six percent, and the Lombard rate (for loans using securities as collateral) at eight percent, their levels since last October 6.

West German Finance Minister Theo Waigel took part in the meeting, devoted primarily to economic, monetary and social union of East and West Germany, which is to take place on July 2.

A few days ago, there were reports of a dispute between the government and some Bundesbank officials about that union, as two members of the Central Council doffed that body's usual reserve to complain publicly of the cavalier treatment they said the government had meted out to the central bank in connection with the plan for economic and monetary union of the two Germanies.

The bank initially proposed a general exchange rate of two Ost marks for one Deutsche mark in connection with union, but the government decided on a general one-for-one rate.

Wednesday evening, however, Bundesbank President Karl Otto Poehl categorically denied the existence of a "war" between Bonn and the bank.9

And on Thursday, the central bank said in a communique concerning the Central Council's meeting that it was satisfied with the content of the union treaty signed by the two governments, not concealing its satisfaction that it will have full monetary control of what is now East Germany, as well as of West Germany.

The bank's decision to maintain steady monetary policy was in line with the expectation of the majority of analysts, who did not expect any increase in short-term interest rates. However, some of them had feared that the central bank might raise rates now to prove that it was still in charge of monetary policy. The bank is independent of the government.

But a Deutsche Bank economist commented that such an expectation was unrealistic, because "the Bundesbank Central Council is not a kindergarten. It's not gong to lift rates just because it feels put upon by the politicians."

Banking circles here feel the bank is very unlikely to raise rates before the fall. "First it's going to wait for monetary union to take place. Then it will see what that produces, for a few weeks or months. If need be, that's when it will move on rates," said Dresdner Bank bond manager Wolfgang Metzler.

"There is nothing in favor of hiking rates in West Germany," the Deutsche Bank econmist said. "The basic economic data are excellent." He noted that the inflation rate is only 2.5 percent a year while money supply growth was a very moderate 4.5 percent on an annual basis in April.

The Bundesbank estimates that the West German money supply wil rise by around 10 percent when Ost marks are changed into Deutsche marks starting on July 2. Mr. Poehl thinks this will not be inflationary since it will be approximately offset by the added volume of real output contributed by the East German economy.

#90151d2350 05/31/1990 ~French/German News Agency

BRUSSELS (MAY 31) - East German Prime Minister Lothar de Maiziere arrived here Thursday, airport officials said, for a 24-hour stay marking the first visit to the European Commission by an East German leader.

Mr. De Maiziere scheduled a meeting with Belgian Prime Minister Wilfried Martens for talks covering bilateral relations and German unification, East German and Belgian diplomats said.

On Friday morning, Mr. De Maiziere was to meet with the president of the European Economic Community's executive, Jacques Delors, for talks on the impact of German unification on the EEC, Commission sources said.

Two Commissioners with an interest in the German question will also attend, including Martin Bangemann, in charge of the internal market and industry portfolios, and Henning Christophersen, in charge of the budget, they said.

Later, in a full meeting with the Commission, discussions are likely to centre on East Germany's environmental problems and agriculture, they said.

German unification is likely to have a big impact on the Community spending, as East German territory will have the right to EEC funds to improve backward industrial and farm areas before it is exposed to the full force of competition.

The Commission has also made it clear that it is hoping for East German cooperation in preventing West German firms creating giant monopolies by buying up East German state enterprises.

"This will be our first official exchange of views," a source said.

"The important thing is to give (the East German leadership) first-hand knowledge of the Community. It is not a question of negotiating with the East Germans, as our chief interlocutors are West Germany."

#90151d2400 05/31/1990 ~French/German News Agency

LONDON (MAY 31) - British group Guinness welcomed the announcement Thursday by French luxury goods group LVMH that it was bidding to increase its stake in Guinness to 24 percent.

The British beer and spirits group said the same day that "Guinness welcomes the confidence which LVMH has shown by this increased investment."

LVMH (Louis Vuitton-Moet Hennessy) has just added 4.9 percent to its previous 12.4 percent holding in Guinness, and is bidding for another 6.8 per- cent to balance the current 24 percent holding Guinness has in the LVMH share capital.

The two groups approved the principle of a balanced cross-holding a long time ago.

The LVMH use of a tender arrangement to acquire another 6.8 percent surprised the City, as it is very rare in Britain in such operations. Analysts had expected a Guinness capital increase reserved for LVMH. Such an increase, while diluting profits, would have enabled Guinness to pocket the eight billion francs (1.4 billion dollars) that LVMH is now going to spend on the market.

Guinness shares were up 16 pence to 758 in mid-afternoon.

PARIS (MAY 31) - Western industrial countries and Japan strongly reiterated their support on Thursday for political and economic reforms in East and Central Europe, and pledged "every effort" to secure a successful outcome to the current Uruguay Round of trade negotiations by year-end.

A communique issued at the end of the annual council meeting of the Organization for Economic Cooperation and Development (OECD) reflected sharp differences between the United States and the 12-nation European Economic Community over agricultural trade liberalization.

But ministers of the 24 OECD countries said a successful outcome to the

multilateral trade negotiations in GATT (General Agreement on Tariffs and Trade) had "the highest priority on the international economic agenda."

They expressed "their determination to make the necessary difficult political decisions" to move ahead with the negotiations.

In a six-point "policy statement", they pledged "their resolve to fight protectionism in all its forms and to give their unreserved support to the strengthening of the open, multilateral trading system."

They said OECD governments were "determined to continue to offer all feasible support" to Central and Eastern European countries "striving to achieve market-oriented economic systems and pluralistic democracies."

The policy statement said they felt the OECD should play "a distinct and important role by engaging in a policy dialogue to promote the process of economic reform, with the objective of integrating the reforming countries into the international economic system."

The ministers instructed the OECD to "pursue and deepen" the dialogue it has initiated with six Dynamic Asian Economies (DAEs) -- Hong Kong, South Korea,

Malaysia, Singapore, Taiwan and Thailand -- and noted in their statement that their "role and responsibilities are steadily increasing in the world economy."

The OECD countries also reaffirmed their "commitment to assisting the developing countries, in particular the least developed among them, in their efforts towards economic growth and social progress."

They would do so by "enhancing market access to OECD economies, by improving the transfer of developmental resources, and through stable non-inflationary OECD growth."

#90151d2490 05/31/1990 ~French/German News Agency

CAIRO (MAY 31) - The Egyptian parliament has approved a 1990-1991 budget that increases spending by 22 percent over the previous year while providing for a more than five-fold hike in the government's deficit.

The new spending plan, approved Wednesday and published Thursday, amounts to 41.248 billion Egyptian pounds (15.44 billion dollars), leaving a deficit of 3.776 billion pounds (1.41 billion dollars) that is to be financed by bond issues and bank loans.

The deficit for the new fiscal year, starting July 1, widened from 660

million pounds provided for in the current fiscal period.

But the expansion reflects a sharp rise in the value of the dollar against the pound in the exchange rate used by the central bank for certain foreign financial transactions.

The International Monetary Fund had asked for all exchange rates to be unified as a condition for rescheduling Egypt's debt obligations.

Egypt's foreign debt currently stands at 50 billion dollars. President Hosni Mubarak announced earlier this month that a preliminary accord had been reached with the IMF that could allow Cairo to reschedule part of its obligations.

The accord is to be formally concluded over the next few weeks in talks with an IMF delegation here.

Presenting the new budget, Finance Minister Mohammad al-Razzaz said the government was determined to respect its commitments to service its foreign debt "in order to avoid the accumulation of charges that future generations will have to bear."

#90151d2570 05/31/1990 ~French/German News Agency

LONDON (MAY 31) - British Aerospace (BAe) said Thursday it had bought a 76 percent stake in Liverpool Airport Plc for 12 million pounds (20.4 million dollars) under a plan to upgrade the facility into a major international air travel hub for the 21st century.

BAe, which formed a subsidiary called British Aerospace (Liverpool Airport) Ltd to make the acquisition, also said it had paid a five million-pound (8.5 million-dollar) premium to the Liverpool City Council to secure long-term leases on land adjacent to the airport.

The land could eventually be developed following completion of an 18-month feasibility study, BAe said, adding that the five district councils in Merseyside, where the airport is located, would retain a 24 per cent stake in the facility.

"What we can say for certain is that it would provide a big boost to the area in terms of jobs and the economy," a BAe spokesman said of the purchase, giving no further details.

Patrick McLoughlin, the minister for aviation and shipping, said the government welcomed the move and congratulated BAe and the Merseyside district councils for making the facility at Liverpool the first local authority airport to be effectively privatized.

"I hope their efforts will encourage other local authorities to recognize the benefits they can gain from access to private sector finance," McLoughlin said.

NEW DELHI (MAY 31) - Despite declining international prices, India's earnings from coffee exports totalled nearly 200 million dollars in fiscal 1989-90, up eight million dollars on the previous year, a government release said Thursday.

India's financial year begins April 1.

Of the total exports, those of instant coffee soared from 9.5 million dollars in 1988 to 18.1 million dollars in 1989, it added.

India's domestic demand for coffee is estimated at 60,000 tons. The release did not say how much coffee was exported.

TOKYO (MAY 31) - Japan's Nippon Sheet Glass Co. said Thursday its net profit jumped 35.8 percent to 10.6 billion yen (67 million dollars) in the year to March.

Sales rose eight percent to 234.4 billion yen (1.5 billion dollars), the country's second-largest sheet-glass maker said.

Domestic sales and exports of sheet-glass totalled 165.4 billion yen (one billion dollars), while other construction materials were valued at 69 billion yen (437 million dollars).

The company predicted net profit would fall to 7.8 billion yen (50 million dollars) on sales of 246 billion yen (1.6 billion dollars) in the current

year.

BEIJING, May 31 (AFP) - General Liu Huaqing, vice chairman of China's Central Military Commission, left here Thursday for the Soviet Union at the head of an official delegation, the official New China News Agency said.

The agency gave neither the length nor the purpose of Gen. Liu's trip.

Gen. Liu was promoted in April to the vice chairmanship of the commission, which is headed by the Chinese Communist Party's secretary general, Jiang Zemin.

Mr. Jiang, who became head of the party in June 1989, also presides over the Communist Party's Central Military Commission, a separate body of which Gen. Liu is also a ranking member.

MOSCOW (MAY 31) - The Lituanian government has said it is ready to suspend the effects of its declaration of independence during talks on the matter with the central Soviet authorities, along the lines set down by the Baltic state's parliament last week.

The statement made late Wednesday was carried by Tass news agency Thursday and confirmed by the Lithuanian press agency.

It said that during talks with Moscow, the government is ready to suspend its decisions and acts flowing from the Lithuanian parliament's March 11 declaration of independence, which President Mikhail Gorbachev has rejected as unacceptable.

The latest government decision is along the lines of a resolution by the parliament in Vilnius on May 23, although observers noted that it constituted the first unilateral move by the government without consultation of the parliament.

Mr. Gorbachev had indicated that the May 23 resolution was not enough to allow the opening of negotiations because it failed to suspend the independence declaration itself as the Soviet leadership has been demanding.

According to Tass, the Lithuanian government has also given itself until Saturday to put the finishing touches to proposals for solving the "problems of political forces and ethnic groups representing Soviet

interests in Lithuania".

This, the agency said, represents "another step forward toward the easing of the Lithuanian government position regarding the independence question and toward creating favourable conditions for the opening of negotiations with Soviet leaders".

In Prague, Lithuanian president Vytautus Landsbergis said Thursday: "If the Red Army were to intervene in Lithuania to crush democratisation and the independence process like in Hungary in 1956 or Czechoslovakia in 1968, Lithuania would recover its freedom more quickly.

"Such an intervention would at the present time lead to the rapid disintegration of the Soviet Union, from which would emerge independent republics that would not oppress anyone," he said in a meeting with Czechoslovak student leaders.

#90151d2830 05/31/1990 ~French/German News Agency

AMMAN (MAY 31) - British Foreign Secretary Douglas Hurd said Thursday the PLO had made "important commitments" to Middle East peace but urged it to dissociate itself from a foiled Palestinian raid on Israeli beaches.

Speaking at a press conference, Mr. Hurd also reaffirmed support for an Israeli-Palestinian dialogue as proposed by U.S. Secretary of State James Baker and declared that Israel's "territorial occupation must be ended."

He said the PLO had "the right to be involved" in the dialogue, proposed by Mr. Baker to arrange elections in the occupied territories, but did not explicitly call for the group to lead the Palestinian delegation.

"I found no sympathy either in Europe or in the Middle East for the refusal of Israelis to sit down round the table with Palestinians," he said.

Earlier he expressed hope that the Israeli government would agree to a visit by a representative of U.N. Secretary General Javier Perez De Cuellar to monitor the situation in the occupied territories.

The foreign secretary, on a three-day official visit to Jordan, said "it would be sensible" for the PLO to "dissociate itself" from Wednesday's attempted attack on beaches north and south of Tel Aviv.

The Palestine Liberation Front, whose leader Abul Abbas sits on the PLO Executive Council, claimed reponsibility for the operation. The Israeli military said it foiled the raid, killing four assailants and capturing 12.

Mr. Hurd said the incident would inflict "substantial damage to the Palestinian cause and the PLO in particular."

He urged the PLO to "join in condemning the attack and take steps against any of their members who might have been involved in it."

Earlier in a speech to the Jordan-British Society, Mr. Hurd praised the Palestine Liberation Organisation, saying it had "made important commitments in search of a just and lasting settlement."

"The onus is now on Israel to put these commitments to the test by entering into dialogue with representative Palestinians," he added, saying such talks would be a prelude to an international peace conference.

#90151d2880 05/31/1990 ~French/German News Agency

MOSCOW (MAY 31) - The Latvian Government is to introduce rationing of basic foodstuffs from Friday because of panic-buying which followed the Baltic republic's declaration of independence of May 4, the Baltija news agency reported here Thursday.

A coupon system will be introduced allowing citizens to buy up to 125 grams of pasta and 500 grams of oatmeal per month, according to the independent Baltic agency quoted by the Estonian news service.

The Riga municipality trade department said the list of shortages was growing daily.

Meanwhile, in neighbouring Lithuania, each district now gets hot water only once a week because of the energy crisis brought about by the Soviet blockade, the Estonian news service said.

Finally in Estonia, the third breakaway Baltic republic, an opinion poll of 900 people across the republic found that "green" ideology was most popular.

The "Mainor" public opinion research centre said that 39 percent of respondents put environmental politics at the top of their list, while only eight per cent favoured communism or socialism.

Eighteen percent backed social-democracy, 12 percent christian-democracy and 11 percent liberalism. Conservative ideology scored three per cent and others two per cent. No question was asked about nationalism.

#90151d2930 05/31/1990 ~French/German News Agency

NAIROBI (MAY 31) - Eritrean rebels say they have killed over 7,000 Ethiopian government soldiers in an offensive along the Segeneyti front, south-east of Asmara.

The claim was made by the rebel ''Voice of the Broad Masses of Eritrea'' radio Thursday, which added that over 12,000 enemy soldiers were put out of action.

''Among them, more than 7,000 soldiers were killed, about 4,000 soldiers wounded and 1,100 soldiers captured'', the radio, monitored here, said.

''The Eritrean People's Liberation Front launched the offensive on the Segeneyti front on Monday, 28Th may 1990. It dispersed the forces stationed there and reinforcements sent in support. The offensive is continuing to push forward with vigour.''

The radio added that the 12,000 ''do not include those incurred in the offensive yesterday.''

DJIBOUTI (MAY 31) - A Somali military pilot and his flight engineer who asked for political asylum in Djibouti after diverting their aircraft here with 51 people aboard are to be handed over to the local office of the U.N. High Commissioner for Refugees, informed sources said Thursday.

They said another country of refuge was being sought for the deserters, Colonel Mohamed Sheikh Ibrahim Yussuf and Major Mussa Hersi Warsama, who landed here Tuesday.

Somalia had requested their extradition, or failing that, that they be put on trial here.

The request was put by Somali Defence Minister Hussein Sheikh Abdirahman, who arrived late Wednesday to arrange the return of the Antonov 26 plane

and the rest of its crew and passengers, who included a colonel and 13 soldiers.

Before flying back to Somalia on the plane, the defence minister said there were no territorial disputes between the two Horn of Africa neighbours, but there were "sometimes border difficulties because of third party interference," a reference to the rebel Somali National Movement which operates in the north of Somalia fronting Djibouti.

Paris (MAY 31) - The 24-nation Organisation of Economic Cooperation and Development (Oecd) offered Thursday to help newly democratised nations in Eastern Europe with advice and analysis.

Oecd finance or economy ministers meeting here also welcomed German unification and agreed they ought to integrate their ''economic and environmental policy decision making''.

But their meeting was marked by a wrangle over agricultural protectionism between the 12-nation European Community (E.C.) and the United States. The Americans gained support here from the rest of the Oecd with demands for clear promises, country-by-country, product-by-product, instead of vague undertakings to stop subsidies.

In their statement on eastern Europe, the 24 ministers said the success of reforms by the former communist countries would depend on ''their own efforts'' but the Oecd could contribute by opening markets, givivice and analysing the ''economic and social consequences of the transition''.

Oecd ministers praised German unification and the E.C.'s single market starting from 1993, saying these offered ''advantages to all countries through the expansion of world trade''. dpa jbp 311907 mai 90

#90151d3110 05/31/1990 ~French/German News Agency

KARACHI (MAY 31) - Gunmen killed 22 passengers in an attack on a packed Karachi metropolitan bus Thursday and slew nine more people in separate incidents as Pakistan's largest city experienced its worst day of violence so far in ethnic unrest shaking the region.

Prime Minister Benazir Bhutto's beleagured adminsitration reacted to the ongoing killings with a decision to assign Army troops to reinforce police patrols in the southern city.

It said it would also set up special security posts in sensitive areas of Karachi.

Such posts were first established in the city of 7 million people in 1988, after terrorists massacred nearly 250 people in Hyderabad just before the general elections which ended 11 years of military rule in Pakistan.

Observers said the active role being assigned to the Army not only reflected poorly on the police force but also documented a whittling down of Bhutto's increasingly fragile civilian administration. believed to be Mohajirs.

Sindh has been in turmoil since a military crackdown in 1983 on anti-martial law protestors turned simmering social tensions in the province into ethnic riots, particularly between Mohajirs and Sindhi nationalists.

An estimated 300 people have died violently in Sindh Province since the latest wave of violence between Sindhi nationalists and ethnic Mohjir settlers began two weeks ago.

#90151d3150 05/31/1990 ~French/German News Agency

JERUSALEM (MAY 31) - Two Palestinian youths were killed in the occupied West Bank Thursday, one by Israeli troops, the second by Arabs suspected of collaborating with the military authorities, Palestinian sources said.

Hassan Abdallah Sruji, 14, died after being hit in the chest by gunfire from Israeli troops trying to disperse demonstrators in the Tulkarm refugee camp.

He was the 692nd Palestinian killed by Israeli gunfire since the start of an uprising in the Israeli-occupied territories in December 1987, according to an unofficial toll compiled by Agence France-Presse.

The second victim, 17-year old Imad Abu Helteh, was killed in the town of Jenin after throwing stones at a car of a Palestinian suspected of collaborating with the Isreali authorities.

The driver got out of his car and opened fire, the sources said.

The West Bank was gripped by a general strike called by the uprising's Unified Leadership to mark the superpower summit in Washington.

In the occupied Gaza Strip, Israeli troops shot and wounded 10 Palestiniens in separate incidents in the Jabaliya refugee camp and Gaza City, they said.

Earlier Thursday, the Israeli army ordered six Palestinian universities in the occupied territories, closed since the start of the uprising, to stay shut for another three months.

The decision came just two weeks after Israeli authorities announced that they would allow a gradual reopening of the universities "on condition that they do not become centers of agitation."

A military spokesman said extending the closure "does not contradict our willingness to reopen Palestinian universities," adding without elaborating that "the problem is simply technical and is connected with Israeli law."

But Naim Abu al-Humus, head of the West Bank-based Palestinian Committee for Higher Education, charged that the latest decision "proves that the Israelis have no intention of allowing our students to continue their studies."

The closure affects some 18,000 students. Palestinian sources have said semi-underground informal classes have been held for a limited number of students in the West Bank and Gaza Strip.

#90151d3230 05/31/1990 ~French/German News Agency

ABIDJAN (MAY 31) - Several Liberian cabinet members have deserted President Samuel Doe in Monrovia as rebels of the National Patriotic Front (NPFL) marched toward the capital, diplomatic sources said here Thursday.

Topping the list are Information Minister Emmanuel Bowier and Posts and Telecommunications Minister Morris Dukuly, who failed to return from a

delegation to Washington at the beginning of the month.

The group met U.S. officials to see about a possible political end to the five-month-old rebellion launched by Charles Taylor's NPFL rebels.

But rebel representatives said they would not negotiate with Mr. Doe.

Diplomats said state radio and televison director Alhaje Kromah made off to neighboring Guinea with his employees' salaries.

Mr. Kromah, Mr. Bowier and Mr. Dukuly were said to be Mr. Doe's closest advisers.

The sources also said Foreign Minister Rudolph Johnson was in New York, reportedly for a medical examination.

Agriculture Minister Scott Toweh, a member of the Gio tribe whose young men have been hunted down by government soldiers in Monrovia during the past two weeks and summarily executed for alledgely being rebels, has also travelled abroad. The sources did not know his whereabouts.

Meanwhile, Finance Minister Emmanuel Shaw and Commerce Minister Wisseh McClain were in London, officially to "buy rice."

Several other cabinet members and other high officials were said to be trying to make their way over land to neighboring Sierra Leone.

On Wednesday, unofficial sources in Freetown said an unidentified leading minister in Mr. Doe's government had already taken refuge in Kenema near the Liberia border some 250 kilometers (155 miles) east of the Sierra Leone capital.

Mr. Doe himself sent his wife, Nancy, and their five children to London last week, the sources said.

#90151d3250 05/31/1990 ~French/German News Agency

PARIS (MAY 31) - The Eurotunnel company announced Thursday that it had obtained more than the 15 billion francs (2.6 billion dollars) it needed to finish its project of building a rail tunnel under the English Channel between England and France.

The firm, which has had to cope with rising project costs, said it had obtained an additional 20 billion francs from the banks, and also had negotiated a standby arrangement with "a group of banks and investors" so as to be able to increase its capital by 5.1 billion francs.

At the start of the week, it obtained an additional long-term loan of three billion francs from the European Investment Bank, and now it must have the new financial arrangements approved by the banking syndicate that granted the initial loans. But analysts believe that should present no major problems.

The capital increase and the bank loans will enable Eurotunnel to increase the funds available for the whole project from 60 billion to 85 billion francs,
 an amount well above the latest cost estimates.

The latest estimate by Eurotunnel itself is 76.6 billion francs, including interest payments, against about 50 billion francs at the outset.

The tunnel is scheduled to open on June 15, 1993.

NANCY, FRANCE (MAY 31) - A court here has rejected a libel suit brought by Robert Maxwell against a biographer and a regional French newspaper and ordering the British media mogul to pay legal costs.

Mr. Maxwell had filed suit in this eastern France city against Tom Bower, author of a critical biography of the publisher, and against the regional newspaper Est-Republicain, which published an interview with Mr. Bower.

Lawyers for Mr. Maxwell charged that Mr. Bower made defamatory remarks about Mr. Maxwell in the November 2, 1989 interview.

The court rejected the suit and ordered Mr. Maxwell to pay court costs of 10,000 francs (1,700 U.S. dollars) to Mr. Bower and 5,000 francs to the Est-Republicain.

Among his extensive publishing interests, Mr. Maxwell owns the Daily Mirror

JOHANNESBURG (MAY 31) - The anti-apartheid African National Congress (ANC) was seeking war and would get it, fiery rightwing leader Eugene Terre'Blanche threatened here Thursday.

"For people who want war there is only solution -- war," Mr. Terre'Blanche told about 600 members of his neo-fascist Afrikaner Resistance Movement (AWB) who had gathered at a park to celebrate the proclamation of South Africa as a republic on May 31, 1961.

"Tambo and Mandela want war and we'll give it to them," he said referring to ANC president Oliver Tambo and deputy president Nelson Mandela. The two men and their "terroristic" organisation were out to destroy the whites, he added.

To shouts of "hang Mandela," Mr. Terre'Blanche told the enthusiastic crowd that "Boer" commandos were being trained up to "defend our land".

Earlier Thursday, two AWB commando units were put through their paces -- -- drilling with batons before engaging in an exercise in which, to protect their leader, they beat imaginary attackers over the skull.

Mr. Terre'Blanche founded the AWB in 1973 to fight for a white state on the lands of the Boer republics of last century -- Transvaal, Orange Free State and Vryheid, which covers what is now northen Natal.

Since President Frederik de Klerk in February unbanned the ANC after 30 years and released Mr. Mandela from life imprisonment, Mr. Terre'Blanche has been warning whites to expect the worst.

He has also told twitchy whites, unsettled by talks between the guerrilla-backed ANC and the South African government, that Mr. De Klerk is simply handing control of South Africa over to the country's 28 million blacks.

OTTAWA (MAY 31) - Canada has opened a 500-million-dollar (425 million U.S.) line of credit to the Soviet Union to speed the launch of joint Canadian-Soviet ventures and facilitate Soviet purchases of Canadian equipment, it was announced Thursday.

The accord establishing the line of credit was reached during Soviet President Mikhail Gorbachev's visit to Canada Tuesday and Wednesday, officials said.

The credit is the second largest yet granted by Canada, following a two billion dollar (1.4 billion U.S.) agreement with China.

The agreement with Moscow replaced a more complex credit line that the Soviet Union had not fully used. Canadian financing under the former credit totaled 360 million dollars (306 million U.S.).

The Soviet credit was established between the Society for the Expansion of Exports, the credit agency for Canadian exports, and Vnesheconombank, the Soviet bank for foreign economic relations.

Canada hopes to sign a number of contracts soon with the Soviets in various sectors including oil-related equipment, pulp and paper and construction of hotels and office buildings in Moscow and Leningrad, officials said.

RANGOON (MAY 31) - The National League for Democracy (Nld), the Burmese opposition party that won a landslide victory in free elections this week, complained Thursday that the military junta remained ambiguous over whether it would hand over power.

But the Nld indicated it would wait for a constitution to be drafted rather than demand immediate power.

The party's acting general secretary, U chit Khaing, told reporters the first task of the party was to get a new constitution passed by the newly elected parliament, and form the new civilian government under that constitution.

''We have in readiness three or four alternative drafts of a constitution, and these will be considered by the party central executive committee at its meeting on Friday,'' he said.

The Nld had so far had no talks with Burma's military junta, the State Law and Order Restoration Council (Slorc), but would begin talks once the executive decided on its demands.

These would include release of the party's general secretary, Aung San Suu Kyi, from house-arrest, and party president U tin U from the jail term he is serving on political charges.

The head of the junta, General Saw Maung, said Wednesday the Slorc would continue to run the country until a government had been formed according to law. U chit Khaing describe this as ''unclear and ambiguous about the transfer of power''.

Foreign nations gave the Nld express recognition as the Sunday's election victors, sending diplomats Thursday to congratulate. Among those calling at Nld headquarters was the U.S. ambassador to Burma, Burton Levin, and the Japanese ambassador, Tomoya Kawamura.

#90151d3650 05/31/1990 ~French/German News Agency

CAGLIARI, Italy (MAY 31) - Bryan Robson is at the center of a new injury scare only 10 days from the start of England's World Cup campaign.

The England captain, who is the centerpiece of manager Bobby Robson's side, will only lead England into their final warm-up game in Tunisia on Saturday if he is happy that his sore heel will not suffer.

The manager wants to see his likely line-up for the opening first phase game against the Republic of Ireland suffering under the North African sun. And the Manchester United midfield man's role at the core of the side is a key ingredient in the England plan.

But he does not want the captain aggravating the injury on a hard.

"I've had a long talk with him and it's getting better every day," he said. "He wants to play in Tunis very much and I've told him just to make sure that it's okay."

Robson, who has had injury problems at the last two World Cups, was kicked in the first 10 minutes of the FA Cup Final replay against Crystal Palace.

"He's been in the sea out here and the salt water is helping. He's done everything in training and the soreness is rapidly disappearing."

Steve McMahon (calf) and Neil Webb (ribs) are also improving from knocks collected in Tuesday's friendly against Cagliari, and Terry Butcher "is back in the groove" after a two-day temperature worry.

Robson expects Saturday's game to be the biggest test yet of his side's stamina. "The pace of the game in Tunisia will be a bit more frantic than the other day, and it will be very hot."

That could be particularly hard on winger Chris Waddle who only joined the squad today after Marseille's FA Cup semi-final defeat.

Waddle looked jaded against Denmark and the Uruguayans. "He was a little weary, but looked a bit fresher today. He doesn't need much training and after Saturday he'll have more than a week before we play Ireland."

Waddle missed the shadow-squad's 6-0 showing on Tuesday, but his A-team colleagues were left in no doubt of an intensifying challenge for places.

"The ones who didn't play will have seen that," said Robson. "They are all as keen as mustard and they would all like to be in it.

"What's nice for me is that having seen it, I know that whatever team I choose, people will come in and stand up."

The England side will be named on Friday and it is possible that the only change from the side that went down 2-1 against Uruguay will be the return

of Gary Stevens at right back for Paul Parker.

Robson and his back-up force are keen to ensure that the nation's hopes are not hit by stomach bugs - and he is following the routine that staved off trouble in Mexico four years ago.

"We have outlined the responsibility of the players to keep taking daily tablets," said Robson. "We'll be extremely annoyed if they go without. We didn't have any problems at all in Mexico and we are not anticipating any here."

#90151d3850 05/31/1990 ~French/German News Agency

BUCHAREST (MAY 31) - A special military court trying the son and heir apparent of deposed Romanian dictator Nicolae Ceausescu adjourned proceedings Thursday until June 25, saying the recess was to allow the defence to gather more evidence on its client's behalf.

Nicu Ceausescu, the 39-year-old former Communist Party chief in Sibiu, went on trial last Saturday on charges of ordering forces to fire on unarmed protesters in the city's main square last December.

Prosecutors charge that Ceausescu, the youngest of the ousted president's three children, caused the deaths of 91 people in clashes between demonstrators and police December 21 and 22.

He is the first family member to face court proceedings since the secret trial and execution of President Ceausescu and his wife, Elena, on December 25 after weeks of popular uprisings against the hard-line Communist regime then in power.

#90151d3870 05/31/1990 ~French/German News Agency

ABIDJAN (MAY 31) - The Ivory Coast government on Thursday authorized the formation of nine political parties which have sought legalization, while the ruling party directed the authorities to reopen the country's schools after months of social unrest.

An official statement issued after Wednesday's weekly cabinet meeting said the legalised political parties should not "interfere with the integrity of the national territory and the republican form of government."

They also should not "compromise public safety, provoke hate among ethnic groups, bring on political trouble, discredit existing political institutions or their operation, incite citizens to break the law, or harm the country's general interests."

President Felix Houphouet-Boigny, after of years of dismissing multiparty democracy on grounds that it would "threaten national unity" and "promote tribalism," bowed to public pressure and introduced political pluralism on April 30.

His own Democratic Party (PDCI) has ruled the West African country since it won independence from France in 1960.

Those parties authorised Thursday were listed in order of their application as: the Ivorian People's Front, the Ivory Coast Democratic Party, the Ivorian Workers' Party, the Union of Social Democrats, the Ivorian Socialist Party, the Party for Joint Development, the National Socialist Party, the Social Democratic Party and the People's Unity Party.

BAGHDAD, (MAY 31) - Palestine Liberation Organization chairman Yasser Arafat refused here Thursday to condemn Wednesday's Palestinian commando raid on two Israeli beaches, but said the PLO was not behind the attack.

"We were not responsible for this operation and have no connection with it " Mr. Arafat said during a press conference.

Pressed by journalists, the PLO chief refused to denounce the attack, saying "My response is clear and obvious."

Four Palestinian commandos were killed and 12 captured in the foiled raids on two beaches north and south of Tel Aviv, according to the Israeli military.

BRUSSELS (MAY 31) - Five west European countries on Thursday removed the final obstacles to a historic treaty aimed at scrapping all controls on their internal borders, an official said.

The agreement by experts from West Germany, France, the Netherlands, Belgium and Luxembourg means that the so-called Schengen accord will be signed in June, five years after it was conceived, said Horst Glatzel, the German delegation chief.

The accord -- named after the tiny Luxembourg village that straddles the borders of three of the countries -- will allow people to travel freely within the signatory countries from mid-1992, with checks being made only on external frontiers.

The Schengen agreement is considered a test case for the European Economic Community's own plan for a barrier-free internal market for goods, people and services after 1992.

But it ran into problems that caused the signing ceremony, scheduled for last December, to be postponed. West Germany balked at requirements to screen incoming visitors on the inter-German frontier in order to prevent illegal immigrants from East Germany entering the border-free area.

Mr. Glatzel said the five Schengen countries, in an all-day session Friday, agreed to include three clauses in order to save West Germany from patrolling a frontier that it has never recognised and which has become virtually redundant.

The clauses say that the Schengen convention will apply to East German territory after German unification is achieved; that controls will be made not on the inter-German border but on East Germany's border with Poland and Czechoslovakia; and that West Germany will keep the other signatories fully informed of inter-German affairs.

Mr. Glatzel made it clear that he expected German unification to be complete by the time the agreement is ratified -- a process in itself that will take a year -- and takes effect.

The Schengen countries agreed to set up a computerised network, known as the Schengen Information System (SIS), to allow police forces to exchange data on up to 800,000 suspected or convicted criminals.

#90151d4120 05/31/1990 ~French/German News Agency

DHAKA (MAY 31) - The flood situation further worsened in parts of the northeastern tea-growing district of Sylhet as fresh areas were engulfed by flood waters, affecting some 10,000 people, news reports here said Thursday.

Three new villages of Kamalgang town in Maulvi Bazaar district were under water as high as waist deep as the Dhalai and other rivers crossing the area overflowed their banks overnight Wednesday-Thursday, crashing their protective embankments.

The Dhalai and the neighbouring Someswari and Khowai rivers in Sylhet, bordering India's rain-swept Assam state, crossed their red warning marks Tuesday.

An official at the Maulvi Bazaar district control room said that water was receding fast and the situation should improve "if there is no rain."

He said people were slowly returning to their homes in some parts, but they were still waiting for government help, adding that "relief should reach us shortly."

The Sangbad newspaper said evacuees were waiting for drinking water and food.

On Wednesday thousands of people were reported to be either marooned or were forced out of their homes in boats as flooded roads kept the town, 160 kilometers (100 miles) from here, cut-off.

The capital Dhaka and several other parts of the country experienced heavy rains Thursday as the sky remained overcast.

The water development board late Wednesday said most of the 230-rivers that criss-cross deltaic Bangladesh registered a further rise.

Bangladesh was devastated by floods in 1987 and 1988 which killed some 3,000 people and destroyed crops and property worth millions of dollars.

BUENOS AIRES (MAY 31) - The secretary general of the Argentine presidency Alberto Kohan, is to travel to South Africa June 4 to talk about economic and bilateral ties, officials said Thursday.

"We are making steps towards a clear resumption of relations with South Africa, which involve not only the trip of an official, but also an advancing diplomatic scheme," said Mr. Kohan Thursday.

Former Argentine president Raul Alfonsin broke relations with South Africa four years ago becuase of Pretoria's apartheid policy of racial discrimination.

Mr. Kohan will be the first Argentine official to visit South Africa since then.

Argentina hopes to strengthen its international ties and trade relations through the "pragmatism" of President Carlos Menem's administration, official sources said.

Argentina resumed relations with Britain this year, eight years after a short war over the Falkland Islands, also known as the Malvinas.

MONROVIA (MAY 31) - President Samuel Doe has said that he is willing to negotiate with rebels closing in on Monrovia, but will not resign in the midst of the crisis, acting Information Minister Moses Washington said Thursday.

Mr. Washington said at a press briefing that Mr. Doe told foreign diplomats and church organizations at a closed-door meeting Thursday that he did not believe his resignation would solve the current problems.

But Mr. Doe accepted a call by the legislature to negotiate with the rebels, he said. The legislature called on Mr. Doe Wednesday to negotiate with the rebels after rejecting the president's request for early general elections.

Mr. Doe has repeatedly refused previously to talk to the rebels fighting to unseat his government. His acceptance to open negotiations is seen by many observers as a sign of defeat as the rebels control most of the country.

Western diplomats told Agence France-Presse after the closed-door meeting that Mr. Doe had said he would be the last person to leave Liberia.

During a two-day debate on the request to move forward general elections scheduled for October 1991, many legislators suggested that the president and Vice President Henry Moniba resign and that an interim government be formed.

The legislators rejected the request for early elections, and called on Mr. Doe to make "sacrifices" to bring an end to fighting between Charles Taylor's National Patriotic Front rebels and government forces.

The rebels, who launched their bid to topple the government last December in northeastern Nimba County, have made advances in recent days and are now moving on Monrovia from two fronts some 50 kilometers (30 miles) from the capital.

At Thursday's meeting, Mr. Doe also told diplomats he would provide around-the-clock protection at their embassies.

BEIJING (JUNE 1) - A man convicted of setting fire to a military vehicle during last year's pro-democracy protests was among nine people who were executed in the south-western Chinese city of Chengdu 10 days ago, according to a report from the local branch of the Foreign Affairs Ministry.

Thursday's announcement came just four days before the first anniversary of Beijing's bloody crackdown on protesters in Tienanmen Square last June 4. Observers noted that it was apparently the first time in several months that people had been executed for their role in the June, 1989 events.

The announcement also followed Chinese press reports saying that the Beijing authorities had on Wednesday executed 11 common-law criminals as part of a "cleanup" campaign in the capital ahead of the September 22 to October 7 Asian Games.

A Foreign Ministry spokesman in Chengdu said the executions there were carried out immediately after death sentences were passed on the nine people on May 21 and May 23. He said the eight other people executed had been convicted of attempted murder, armed robbery and theft.

The ninth, identified only as a Mr. Yu who had already spent three years in a reeducation labour camp for theft, had set fire to an air force jeep last June 5, the spokesman said.

After the June 4 crackdown in Beijing, Chengdu was rocked by violent protests that left some 300 people dead. The city is the capital of Sichuan province, China's most populous.

The government also announced a ban Thursday on the most recent issue of the U.S. magazine Newsweek.

It gave no explanation for the move, although the issue contains a photograph of police shooting two convicted "counter-revolutionaries" in the back of the head, the most common form of capital punishment in China.

#90151d4990 05/31/1990 ~French/German News Agency

HONG KONG (MAY 31) - Students shouted anti-government slogans at a recent Guangdong university protest over alleged "rude behavior" by staff, while authorities in this southern Chinese province banned several publications,

press reports here said Thursday.

One of the reports in the Chinese-language Tin Tin Daily News said several hundred students at Zhongshan University staged protests early this month over alleged "rude behavior" by dormitory personnel by shouting anti-government slogans.

It said confrontation broke out when staff, annoyed by the students' complaints of a power blackout in one dorm, switched off power supplies to other dorms as well, but gave no other details.

The personnel were reportedly asked to apologise by school authorities, hoping to downplay any tension as the first anniversary of the June 4 Beijing massacre approaches.

Meanwhile, only 363 publications, including some 90 newspapers, were allowed to circulate in Guangdong after re-registering with authorities, the independent Ming Pao newspaper said.

The number represents about 10 percent of all publications ordered to re-register after last June 4, it said.

Of those, the Shekou Daily News, Transfer and Hong Kong-Macau Studies were banned for "serious political errors," the newspaper said, while some other publications had become internal organs and were no longer publicly circulated.

#90151d5000 05/31/1990 ~French/German News Agency

BONN (MAY 31) - Hans Friderichs, a former West German economics minister and a member of the liberal Free Democrat Party, is to head the East German government's program to privatise much of its huge state-run sector, the FDP said here.

Announcing the move, FDP president Otto Lambsdorff said: "the appointment of such a competent man, who is convinced of the value of a social market economy, will be very useful for East Germany."

The 58-year-old Mr. Friderichs, who was a minister in the government of the Social Democratic chancellor Helmut Schmidt from 1972 to 1977, is to be head of the Treuhandanstalt, East Germany's state holding company. As such he will in charge of selling off its assets.

Observers said the appointment demonstrated the desire of the conservative East German government to push ahead quickly with privatisation, so as to better attract Western capital.

TOKYO (JUNE 1) - The European Economic Community (EEC) has decided to use a Japanese government mediator for the first time to deal with complaints over Tokyo's non-tariff barriers to imports of EEC agricultural goods.

EEC officials here said Wednesday that the European Commission in Brussels ordered that 25 outstanding cases be submitted to the office of the trade and investment ombudsman under the Japanese Economic Planning Agency.

The list includes cases involving a variety of sanitary and administrative barriers, which delay or block the entry to Japan of a wide range of agricultural goods and create differences between the countries of origin.

"We try the front door and now the side door," a spokesman for the EEC here said to explain the decision, adding that previous complaints to Japanese ministry officials had failed.

The decision also shows that the EEC is giving priority to agricultural problems, the spokesman said.

The head of the mediation office said Wednesday he had not received the list of cases, which the EEC officials said was sent several days ago.

The mediation office is charged with settling disagreements on investment and trade issues and was set up in January 1982, with four employees.

It contacts various Japanese ministries and is supposed to propose speedy solutions.

Officially, the office is to reply to complaints within 10 days, but complaints lodged by European businessmen in a private capacity have taken more than 18 months.

Aside from technical barriers, agricultural products are also blocked from the Japanese market by quotas and customs tariffs. These, along with political matters, are those most often discussed at cabinet-level meetings or by the General Agreement on Tariffs and Trade.

Commission Vice President Frans Andriessen asked Tokyo for agricultural concessions during his most recent visit here at the end of March.

#90151d5090 05/31/1990 ~French/German News Agency
LAGOS (JUNE 1) - African ministers of maritime transport have urged the EEC to renew negotiations with the African, Caribbean and Pacific (ACP)

countries, especially African member-states, to increase the continent's share of the maritime trade, the official News Agency of Nigeria (NAN) reported here Thursday.

All Organization of African Unity (OAU) member-states should also coordinate their activities in maritme transport, the ministers said in a communique Wednesday at the end of their three-day meeting in Abuja, Nigeria's future capital.

The OAU should continue to cooperate with regional and sub-regional organisations within the framework of ACPEuropean Economic Community contacts in order to benefit from these bodies, said the text.

The ACP, with 58 member states, was set up under the Lome conventions to promote cooperation with the EEC, and aid and investment in developing countries.

LIMA (MAY 31) - Scores of families in northern Peru are mourning their lost ones in the streets -- fearful of a repeat occurrence of the earthquake which struck Tuesday, leaving 120 people dead or missing.

Civil Defense authorities were unable to confirm that three villages with some 6,000 inhabitants had disappeared in the Amazonas department, as was reported Thursday by a local authority in the departmental capital of Chachapoya.

General Jorge Ferreyros, Civil Defense chief, said 120 people had been reported killed or missing in the quake, which registered 5.8 degrees on the Richter scale.

At its epicenter 85 kilometers (50 miles) underground, the quake registered 6.7 degrees on the Richter scale, experts said.

Landslides caused by the earthquake dammed the Llanayaco River forcing people of La Florida district to seek refuge on higher ground as the water slowly flooded their homes.

Soritor, with more than 13,000 inhabitants, was hardest hit by the quake, which levelled 90 percent of its buildings. Some 60 people were reported killed or missing there.

Entire families were mourning their dead in front of rubble which was once their homes, many fearing to search for remains should another tremor hit the area.

Some 45 aftershocks have been felt in the region, the Geophysical Institute said.

Desperate calls for help were coming over short-wave radio from Rodriguez and Mendoza, towns near the border with Ecuador cut off by the quake.

Federal authorities have set up air links to the quake-ravaged area airlifting food and first-aid equipment and bringing back the most seriously injured.

The quake caused injuries to more than 1,000 people and left some 15,000 homeless, officials said.

Neighboring Chile Thursday sent a planeload of relief supplies for the quake victims.

#90151d9240 05/31/1990 ~French/German News Agency

TOKYO (MAY 31) - Japan's top 12 major city and three long-term credit banks have decided to further raise their loan-loss reserves for potentially bad foreign loans to Third World countries, the Nihon Keizai Shimbun reported Thursday.

The leading financial daily, quoting industry sources, said most of the banks plan to set aside 40 to 50 percent of their loans to financially troubled countries within a few years to match the levels of major U.S. banks.

They are currently increasing their reserves to an average 30 to 35 percent as the Finance Ministry abolished the 25 percent upper limit for the reserve-loan ratio effective in the new fiscal year begun last month.

The 15 banks are estimated to carry a total of 3.3 trillion yen (21.8 billion dollars) in outstanding loans to deeply indebted countries, the newspaper quoted the sources as saying.

Most of the outstanding claims were said to be susceptible to defaults because of multiple delays in repaying interest and principal, they said.

Since the reserves are taxable, raising a large sum of funds for the purpose is expected to have a significant negative effect on banks' profitability, the report said.

In the 12 months to March this year, the banks added a total of 170 billion yen (1.126 billion dollars) to their reserves against vulnerable foreign loans, which was believed to have suppressed their earnings considerably, the sources said.

HANOI (MAY 31) - Vietnam wants to further lift restrictions on foreign investment, which has brought the country one billion dollars over the past two years, a local newspaper reported.

Vietnam is "prepared to sign agreements to guarantee foreign investments and avoid double taxation," the daily Hanoi Moi quoted Dau Ngoc Xuan, head of the state commission on foreign cooperation and investment, as telling a group of foreign businessmen.

Hanoi has so far offered most-favored nation status to countries whose firms invest in Vietnam, but most of them want guarantees similar to those enjoyed by Vietnamese companies, diplomats here said.

The obstacles Hanoi wants to lift mainly involve bureaucratic delays in employment, banking, taxation, freedom of movement within the country and imports of raw materials and equipment, the newspaper said in its Wednesday edition.

Mr. Xuan told the businessmen at a meeting in the southern city of Vung Tau that he had personally solved some of these problems and that "it should be possible to find solutions" to the others, Hanoi Moi said.

It said the government had approved 150 investment projects worth a total one billion dollars since foreign investment legislation was enacted two years ago.

#90151d9710 05/31/1990 ~French/German News Agency
TOKYO (MAY 31) - Japan's Nissan Motor Co. Ltd., the country's second-biggest carmaker, said Thursday its net consolidated profit grew 1.2 per cent to 116 billion yen (734 million dollars) in the year to March.

Consolidated sales advanced 17.3 percent from a year earlier to 5.64 billion yen (36 billion dollars), the company said.

Vehicle production rose 7.4 percent to 3.02 million units with domestic output climbing 5.9 percent to 2.37 million units and production abroad jumping 13.3 percent to 650,000 units.

Sales by the parent company alone rose 11.9 percent to 4,005 billion yen (23 billion dollars), the company added.

Vehicle sales grew 11.8 percent to 3.26 billion yen (21 billion dollars).

Domestic sales soared 17.1 percent to 2.08 billion yen (13 billion dollars) and exports rose 3.4 percent to 1.18 billion yen (eight billion dollars).

The parent's volume of sales climbed 5.7 percent to 2.37 million vehicles overall with domestic sales jumping 19.4 percent to 1.38 million units while exports declined nine percent to 990,000 units.

Car sales advanced 9.9 percent to 1.98 million units with domestic sales surging 26.3 percent to 1.15 million units and exports falling 6.9 percent to 830,000 units.

But sales of commercial vehicles dropped 11.3 percent to 390,000 units. Domestic sales declined six percent to 240,000 units while exports of commercial vehicles plunged 18.3 percent to 160,000 units.

TOKYO (MAY 31) - The successful test-manufacturing of what is claimed to be the world's fastest and most efficient electric car was announced Thursday by Japan's Environment Agency.

The four-seater electric car was jointly developed by Nippon Steel, the racing car maker Tokyo R and D and the National Institute for Environmental Studies, the agency said.

It said the car had a maximum speed of 110 kilometers (66 miles) per hour and a range of 240 kilometers (144 miles) on an eight-hour battery recharge.

The car's height was lowered to reduce air resistance and its weight cut with the use of carbon fiber-reinforced plastics, it said.

The total development cost of 300 million yen (two million dollars) was provided by a fund set up by the state-financed Pollution-Related Health Damage Compensation and Prevention Association.

Nippon Steel, the world's largest steelmaker, plans to commercially produce the new car in cooperation with Japanese automakers, the Environment Agency said.

Officials said the agency would support improvements to the car, such as better storage batteries and lowered manufacturing costs.

LONDON (MAY 31) - The Commonwealth announced here Thursday plans to

launch a 100 million dollar equity fund aimed at boosting the flow of private institutional investment in Commonwealth developing countries.

In a statement, the Commonwealth Secretariat said half the new fund would be underwritten by The Nikko Securities Co. (Europe) Ltd., while the remaining 50 million dollars would come from founding shareholder's subscription in convertible preference shares.

The fund, formally known as the Ordinary Shares of the Commonwealth Equity Fund Limited, would be a registered company on the British offshore investment island of Guernsey and would have an intended life of 10 years.

The idea for the equity fund was first proposed by Commonwealth finance minister meeting in Cyprus in 1988, was reaffirmed by them the following year and was confirmed at the Commonwealth heads of government meeting last October in Malaysia.

The statement noted that in the past a lack of adequate financial and economic information coupled with other restrictions on investment had kept the level of private equity investment from developed countries into developing Commonwealth countries relatively low.

It also said that as of last December, developing Commonwealth countries had total equity market capitalization of around 74.5 billion dollars, or about 0.6 percent of world equity markets capitalization.

CANBERRA (MAY 31) - The government announced Thursday a 19.5 percent cut in the wool floor price and dismissed demands for compensation from Australian farmers who bitterly opposed the strategy aimed at easing the industry's crisis.

Some wool officials said they might take legal action to block the decision to drop the floor price from 8.70 Australian dollars (6.70 U.S.) to 7.00 dollars (5.39 U.S.) a kilogramme on July 1.

Primary Industries and Energy Minister John Kerin said the move was urgently needed to protect the Australian industry that supplies 70 percent of the world's wool.

But he dismissed as "ludicrous" industry claims for 600 million dollars (462 million U.S.) compensation, the value wiped off a record stockpile of 2.6 billion bales maintained to keep prices up.

"I categorically reject the claim that the government has reduced the income of all wool growers - the market has," he told parliament.

Mr. Kerin acted after the Australian Wool Corporation (AWC) refused to cut the floor price. Canberra said it was concerned about the industry's soaring debt needed to fund the stockpile amid a dwindling international market.

The government was also worried that falling wool exports would add to Australia's huge current account deficit. The conservative opposition, which relies heavily on rural support, backed the government's decision.

Mr. Kerin told reporters that no further cuts would be made after the government's first intervention with the minimum reserve price scheme in its 20-year history.

"The next time the floor price will be changed, will be upwards," the minister said.

The cabinet made the decision Wednesday but Mr. Kerin held off a formal announcement until he could meet Thursday with the board of the AWC in Melbourne to discuss its implications.

He said he knew the lower floor price would create woes for the industry. "The government would be prepared to look at this," he added, without elaborating.

MEXICO CITY (MAY 31) EFE - At least 23 people have died in a month-long Mexican heat wave that has hospitalized thousands of people with sunstroke and caused millions of dollars of damage to agriculture, officials said Thursday.

A Red Cross spokesman said that the northern state of Chihuahua was the worst affected by the heat wave, where temperatures have soared to 45 degrees centigrade. There has been no rainfall in the state for more than a year.

Cattle and crops have also been suffering the effects of the drought.

Hospitals across the country were treating numerous cases of dehydration among children, the spokesman added.

In Mexico City, temperatures of 34 degrees centigrade were recorded Thursday in the shade.

SANTIAGO (MAY 31) EFE - A Chilean human rights group, the National Commission Against Torture, announced its dissolution Thursday, declaring that the end of its nine years of existence was "an act of confidence in democracy and in the people".

The commission, founded in 1981, denounced thousands of cases of alleged torture against people detained by the security services set up by former military dictator Gen. Augusto Pinochet to root out leftist dissidents after he seized power in 1973.

"We have the calm conviction that torture will disappear as the political arm of an oppressive government," the group said in its closing statement, adding that torture "must never be exercized against anyone, at any time and under any circumstances".

The commissions' three founding members asked +for the forgiveness from the Chilean people for having had to exist+, adding that they +handed over responsiblity for the commissions' work to democracy and its institutions+.

After losing a referendum in 1988, Pinochet was forced to call elections that were won convincingly last December by Christian Democrat Patricio Aylwin.

Aylwin has instigated a cautious investigation into human rights abuses during Pinochet's 16-year dictatorship, to the disapproval of the general who is still head of the Armed Forces.

TEGUCIGALPA (MAY 31) EFE - Some 60,000 crates of Honduran bananas ready for export are rotting on the plantations of local producers awaiting the settlement of a dispute, dubbed the Banana War, between two multinational companies over marketing rights.

The Tela Railroad Company, a subsidiary of the U.S. Chiquita Brands Fruit Company, claims it has a contract giving it exclusive rights to market bananas grown by independent Honduran producers until December 1991.

The biggest Honduran producer, Compania Ganaderia de Sula, and other independents, say the contract is not longer valid.

They want to sell to Britain's Fyffes fruit concern, which is offering three times as much per crate as Tela.

A Sula spokesman said Thursday that failure to export the 60,000 crates would result in a loss of dlrs 240,000.

A similar sum has been written off each week since the start of April, when the dispute blew up.

Producers, meanwhile, are trying to keep the bananas from perishing, as the Honduran government applies pressure on the two companies to resolve the dispute that is costing the country valuable foreign exchange revenue.

BOGOTA (MAY 31) EFE - Colombian rescue workers Thursday were trying to recover bodies from beneath an avalanche of rocks and dirt that killed 11 people last weekend in the town of Samana, 300 km west of the capital, officials said.

The town's mayor, Juvenal Rueda Ariza, said that five bodies had been recovered and six were still missing following the landslide Saturday on a road near the town.

The victims were on their way to vote in Sunday's presidential elections.

MANILA (MAY 31) XINHUA - PHILIPPINE FOREIGN AFFAIRS SECRETARY RAUL MANGLAPUS SAID HERE TODAY THAT HE WAS CONFIDENT THE PHILIPPINES AND THE U.S. CAN COME UP WITH AN AGREEMENT ON THE AMERICAN BASES IN THE COUNTRY BEFORE THE PRESENT BASES AGREEMENT EXPIRES IN 1991.

MANGLAPUS SAID IN A PRESS CONFERENCE THAT "I CAN SAFELY PREDICT THAT BY SEPTEMBER 16, 1991, THERE WILL HAVE TO BE SOME KIND OF AGREEMENT ONE WAY OR THE OTHER" ON THE FUTURE OF THE U.S. BASES HERE.

MANGLAPUS MADE THE STATEMENT WHEN ASKED ON WHETHER THE U.S. WILL HAVE TO WITHDRAW ITS BASES FROM THE COUNTRY IF BY SEPTEMBER 16, 1991 THERE WOULD STILL BE NO TREATY ON THE BASES DULY RATIFIED BY THE PHILIPPINE SENATE.

HE SAID THAT THE PHILIPPINES' STAND IS THE PRESENT AGREEMENT ENDS ON SEPTEMBER 16, 1991. "WE ARE GOING TO ENTER INTO TALKS THAT MAY LEAD TO A TREATY THAT WILL COVER A POSSIBLE CONTINUING MILITARY PARTNERSHIP WITH THE U.S.," HE ADDED.

MANGLAPUS NOTED THAT THE DISCUSSIONS TO BE HELD IN JUNE OR JULY ON THE FATE OF THE U.S. BASES BEYOND 1991 WILL NOT LAST UNTIL SEPTEMBER 1991. "I WOULD CONSIDER A ONE-AND-A-HALF YEAR NEGOTIATION TO BE TOO LONG. I DON'T THINK EITHER SIDE IS READY TO UNDERTAKE IT. I HOPE THEY WILL NOT TAKE TOO LONG, AS SHORT AS POSSIBLE," SAID MANGLAPUS, WHO IS HEAD OF THE PHILIPPINE PANEL IN THE EXPLORATORY BASES TALKS WITH THE U.S. PANEL HERE FROM MAY 14 TO 18.

ASKED HOW LONG IT WOULD TAKE FOR BOTH SIDES TO HAMMER OUT A TREATY, HE SAID, "THERE ARE VARIOUS CONSIDERATIONS, ONE OF WHICH IS THE U.S. APPROPRIATION PROCESS. ANOTHER IS THE RATIFICATION PROCESS OF BOTH GOVERNMENTS."

"IF BOTH GOVERNMENTS ARE SERIOUS ABOUT IT, THEY WOULD HAVE TO EXPEDITE THE RATIFICATION PROCESS SO THAT A RATIFIED TREATY WILL BE IN PLACE BY SEPTEMBER 1991," HE SAID.

DHAKA (MAY 31) XINHUA - PRESIDENT H.M. ERSHAD TODAY ANNOUNCED THE STOPPAGE OF ADVERTISEMENTS OF CIGARETTES AND TOBACCO IN NEWSPAPERS AND OTHER PRINT MEDIA IN THE COUNTRY.

THE GOVERNMENT HAD ALREADY STOPPED ADVERTISEMENTS OF CIGARETTES AND TOBACCO IN ELECTRONIC MEDIA LIKE TELEVISION AND RADIO.

ADDRESSING A RALLY ON THE OCCASION OF THE THIRD "WORLD NO-TOBACCO DAY" HERE, THE PRESIDENT, WHO IS A NON-SMOKER THROUGHOUT HIS LIFE, SAID IT WOULD NOT BE POSSIBLE TO ACHIEVE THE OBJECTIVE OF "HEALTH FOR ALL" BY THE YEAR 2000 IF THE PEOPLE WHO SMOKE DID NOT STOP SMOKING.

REFERRING TO THE THEME OF "TOBACCO FREE CHILDHOOD AND YOUTH", HE URGED ALL TO STOP SMOKING IN THE INTEREST OF THEIR OWN HEALTH AS WELL AS THE NATION.

A LARGE NUMBER OF PEOPLE INCLUDING SCHOOL CHILDREN CARRYING ANTI-SMOKING PLACARDS AND BANNERS ATTENDED THE RALLY.

THE GOVERNMENT HAS INCLUDED ARTICLES IN TEXT BOOKS EXPLAINING VARIOUS BAD ASPECTS OF SMOKING.

BEIJING (MAY 31) XINHUA - THE WORK OF ASSIGNING JOBS TO NEARLY 560,000 COLLEGE GRADUATES AND POST GRADUATES THIS YEAR IS PROCEEDING SMOOTHLY, ACCORDING TO REPORTS AT A CONFERENCE HELD BY THE STATE COUNCIL'S GROUP IN

CHARGE OF THE WORK ON MONDAY.

THE CONFERENCE WAS PRESIDED OVER BY LI TIEYING, STATE COUNCILLOR AND MINISTER IN CHARGE OF THE STATE EDUCATION COMMISSION.

ACCORDING TO SOURCES AT THE CONFERENCE, BY MID-MAY, ALL COLLEGE GRADUATES AND POST GRADUATES HAD BEEN ENTRUSTED TO VARIOUS MINISTRIES AND PROVINCES, MUNICIPALITIES AND AUTONOMOUS REGIONS FOR ASSIGNMENT.

THE 150,000 COLLEGE GRADUATES AND 12,000 POST GRADUATES FROM UNIVERSITIES UNDER THE ADMINISTRATION OF THE MINISTRIES AND COMMISSIONS OF THE STATE COUNCIL HAVE BEEN GIVEN SPECIFIC JOB ASSIGNMENTS. MOST OF THE 56,000 COLLEGE GRADUATES AND 8,500 POST GRADUATES FROM UNIVERSITIES UNDER THE ADMINISTRATION OF THE STATE EDUCATION COMMISSION HAVE ALSO BEEN ASSIGNED JOBS.

THE ASSIGNMENT OF THE 310,000 COLLEGE GRADUATES AND 6,000 POST GRADUATES FROM UNIVERSITIES UNDER THE ADMINISTRATION OF LOCAL GOVERNMENTS IS UNDERWAY.

ALL GRADUATES ARE EXPECTED TO HAVE ASSIGNMENTS BY MID-JUNE. THE SOURCES SAID MOST OF THE GRADUATES OF SCHOOLS OF HIGHER LEARNING HAVE TAKEN THE WHOLE SITUATION INTO CONSIDERATION AND ARE SATISFIED WITH THE ASSIGNMENT. MANY HAVE VOLUNTARILY AGREED TO GO TO PLACES WHERE CONDITIONS ARE HARDEST, THE SOURCE ADDED.

BEIJING (MAY 31) XINHUA - OVER 40 SCHOLARS FROM THE CAPITAL'S UNIVERSITIES AND RESEARCH INSTITUTES EXPRESSED THE VIEW THAT FOREIGN AGGRESSION, AS TYPIFIED BY THE OPIUM WAR, MADE CHINA'S DECISION TO TAKE THE SOCIALIST ROAD TO DEVELOPMENT INEVITABLE.

THEY EXPRESSED THIS VIEW AT A THREE-DAY SYMPOSIUM ON THE OPIUM WAR (1840-1842), WHICH CLOSED HERE ON WEDNESDAY.

THE WAR WAS LAUNCHED BY THE BRITISH AGAINST CHINA ON THE PRETEXT OF A DISPUTE INVOLVING THE TRADING OF OPIUM.

THE SCHOLARS CONCLUDED THAT CHINA'S MODERN HISTORY HAS BEEN CHARACTERISED BY AGGRESSION BY FOREIGN IMPERIALISTS AND RESISTANCE ON THE PART OF THE CHINESE PEOPLE.

WANG XIAOQIU, PROFESSOR OF HISTORY AT BEIJING UNIVERSITY, SAID, "THE PURPOSE OF REMEMBERING THE OPIUM WAR TODAY IS TO REMIND PEOPLE OF THE HUMILIATIONS SUFFERED IN THE PAST AND TO REKINDLE A SENSE OF PATRIOTISM."

HOWEVER, HE CAUTIONED, BECAUSE CHINA WILL HARDLY BE ABLE TO ACHIEVE ITS MODERNIZATIONS WITHOUT REFORMS AND OPENING TO THE OUTSIDE WORLD PATRIOTISM BY NO MEANS IMPLIES XENOPHOBIA.

THIS YEAR IS THE 150TH ANNIVERSARY OF THE OPIUM WAR. IN THE PAST MONTH CHINA HAS COMMEMORATED THE WAR IN VARIOUS WAYS TO ENCOURAGE THE PEOPLE TO DEVOTE THEMSELVES TO CHINA'S CONSTRUCTION.

KUALA LUMPUR (MAY 31) XINHUA - FOREIGN DEBT PROBLEM FACING MANY DEVELOPING COUNTRIES WILL BE ONE OF THE IMPORTANT TOPICS AT THE GROUP OF 15 SUMMIT TO BE OPENED HERE TOMORROW, ACCORDING TO OFFICIAL SOURCES HERE TODAY.

THE G-15 SUMMIT, OR THE MEETING OF THE SUMMIT LEVEL GROUP FOR SOUTH-SOUTH CONSULTATION AND COOPERATION, IS SCHEDULED TO BE HELD HERE FROM JUNE 1 TO 3.

THE GROUP WAS FORMED IN SEPTEMBER LAST YEAR AT THE NONALIGNED SUMMIT MEETING IN BELGRADE.

SECRETARY GENERAL AHMAD KAMIL JAAFAR OF THE MALAYSIAN FOREIGN MINISTRY TODAY DESCRIBED THE DEBT PROBLEM AS A DIFFICULT PROBLEM FACED BY MANY COUNTRIES, NOT ONLY WITHIN THE G-15, BUT ALSO AMONG OTHER COUNTRIES.

LEADERS FROM THE 15 COUNTRIES ARE ARRIVING HERE TODAY TO ATTEND THE SUMMIT MEETING TO DISCUSS ECONOMIC COOPERATION AMONG THEM.

THE 15 COUNTRIES ARE: ALGERIA, ARGENTINA, EGYPT, INDIA, INDONESIA, JAMAICA NIGERIA, PERU, SENEGAL, VENEZUELA, YUGOSLAVIA, ZIMBABWE, BRAZIL, MEXICO AND MALAYSIA.

THEIR PERSONAL REPRESENTATIVES OR SENIOR OFFICIALS HAVE BEEN HOLDING PREPARATORY MEETINGS HERE FROM WEDNESDAY TO DISCUSS PROJECTS TO STRENGTHEN ECONOMIC COOPERATIONS PUT FORWARD BY MEMBER COUNTRIES.

A WORKING GROUP HAS BEEN SET UP TO DISCUSS THESE PROJECTS AND RECOMMENDATIONS. SO FAR, ARGENTINA, INDONESIA, INDIA, ZIMBABWE AND

MALAYSIA HAVE PROPOSED SOME PROJECTS FOR COOPERATION, JAAFAR SAID.

ACCORDING TO THE MEETING SOURCES, MALAYSIA HAS PROPOSED THAT A FINANCIAL MECHANISM BE SET UP TO ENHANCE TRADE AMONG DEVELOPING NATIONS AND A DATA BANK ON INVESTMENT IN THE SOUTH BE ESTABLISHED.

INDIA PROPOSES ON SETTING UP A GENE BANK FOR AGRICULTURE AND A SOLAR-POWERED REFRIGERATOR TO STORE VACCINES AND MEDICINES.

ARGENTINA'S PROPOSALS ARE ON PRIVATE SECTOR INVOLVEMENT IN SOUTH-SOUTH COOPERATION GOING BEYOND GOVERNMENTS AND THE PROPOSALS BY INDONESIA ARE ON FOOD AND FAMILY PLANNING AND POPULATION CONTROL.

THE SECRETARY GENERAL SAID ALL THESE PROPOSALS HAVE BEEN EXAMINED BY THE REPRESENTATIVES OR SENIOR OFFICIALS OF MEMBER COUNTRIES OVER THE TWO-DAY PREPARATORY MEETINGS HERE AND WILL BE DELIVERED TO THE HEADS OF THE G-15 FOR FURTHER DISCUSSIONS.

BESIDES THESE PROPOSALS, JAAFAR ADDED, THE WORKING GROUP ALSO DISCUSSED THE DRAFT JOINT COMMUNIQUE OF THE SUMMIT MEETING.

TOMORROW MORNING, AT THE OPENING CEREMONY, MALAYSIAN PRIME MINISTER DR. MAHATHIR MOHAMAD WILL DELIVER A KEYNOTE SPEECH, OTHER HEADS OF THE MEMBER COUNTRIES WILL DELIVER ADDRESSES IN RESPONSE TO DR. MAHATHIR'S SPEECH, JAAFAR SAID.

LUSAKA (MAY 31) XINHUA - THE ZAMBIAN GOVERNMENT AND THE RULING PARTY'S CENTRAL COMMITTEE WILL SOON HOLD A REFERENDUM ON POLITICAL SYSTEMS IN AN EFFORT TO SPEED UP THE PROCESS OF POLITICAL REFORMS IN THE COUNTRY.

ELECTIONS AND PUBLICITY COMMITTEE CHAIRMAN JOSEPH MUTALE TOLD REPORTERS ON WEDNESDAY THAT RESOLUTIONS ADOPTED AT THE 5TH EXTRAORDINARY NATIONAL COUNCIL MEETING STIPULATE THAT THE WHOLE PARTY STRUCTURE, INCLUDING THE ELECTIONS OF CENTRAL COMMITTEE MEMBERS AND GOVERNORS, WOULD BE REVIEWED AS SOON AS POSSIBLE TO MAKE ONE-PARTY RULE MORE DEMOCRATIC.

BUT ANY CAMPAIGN FOR OR AGAINST THE ONE-PARTY STATE IS BANNED UNTIL A COMMISSION IS FORMED TO FORMULATE THE REGULATIONS GOVERNING THE REFERENDUM WHICH MAY DETERMINE UNDER WHICH POLITICAL SYSTEM THE SOUTHERN AFRICAN COUNTRY SHOULD BE RULED IN FUTURE, ADDED THE CHAIRMAN.

NINE RESOLUTIONS COVERING POLITICAL AFFAIRS, ECONOMIC ISSUES, THE PARASTATAL REFORM PROGRAM AND THE STOCK EXCHANGE WERE RELEASED YESTERDAY AT THE END OF THE TWO-DAY MEETING.

THE CHAIRMAN RULED OUT THE POSSIBILITY OF PURGING THE PARTY MEMBERS WHO HAVE OBJECTED TO PARTY POLICIES AND PROGRAMS ON ONE PARTY PARTICIPATORY DEMOCRACY.

BUT HE SAID THAT THOSE WHO DISAGREE WITH THE PARTY'S POLICIES HAVE THE FREEDOM TO RESIGN OR QUIT.

HE ALSO SAID THAT NO FOREIGN OBSERVERS WOULD BE INVITED TO MONITOR THE REFERENDUM AS SUGGESTED BY THE ZAMBIA CONGRESS OF TRADE UNIONS (ZCTU) BECAUSE "SUCH AN ACTION IS TANTAMOUNT TO IMPORTING COLONIALISM AND CONSTITUTES POLITICAL INTERFERENCE IN ZAMBIA'S INTERNAL MATTERS."

THE CHAIRMAN URGED ZAMBIANS TO REFRAIN FROM MAKING INFLAMATORY STATEMENTS LIKELY TO CREATE DESPONDENCY AND SUSPICIONS IN THE MINDS OF THE PEOPLE, ADDING THAT THE RULING DOES PARTY NOT FEAR NOR HOLD A GRUDGE AGAINST THE ZCTU.

PANAMA CITY (MAY 31) XINHUA - THE U.S. ARMY'S PANAMA CANAL ZONE-BASED SOUTHERN COMMAND ANNOUNCED THAT THE PENTAGON HAS APPROVED THE REDUCTION OF U.S. ARMY "UNITS OF SELECTIVE REINFORCEMENTS" IN PANAMA.

IN A PRESS RELEASE WEDNESDAY, THE SOUTHERN COMMAND SAID MEMBERS OF THE AIR FORCE'S SEVENTH (LIGHT) INFANTRY DIVISION WERE ALREADY INSTRUCTED TO

PREPARE FOR WITHDRAWAL BY MAY 22, WHILE OTHER SELECT UNITS OF THE MARINE CORPS ARE UNDER ORDERS TO RETURN TO THE UNITED STATES IN THE NEXT FEW WEEKS.

THE RELEASE ADDED THAT THE U.S. MISSION, SINCE ITS DECEMBER 20 INVASION, HAS BEEN TO "INCREASE THE SOUTHERN COMMAND'S UNITS IN ORDER TO FULFILL ITS SECURITY OBLIGATIONS AS STIPULATED BY THE PANAMA CANAL TREATIES."

WITHOUT GIVING THE EXACT NUMBER OF THE OUTGOING UNITS, THE SOUTHERN COMMAND REPORTED THAT "THE CURRENT REQUIREMENTS AND INITIATIVES OF THE FORCES NOW ALLOW US TO RELIEVE THESE FORCES IN PANAMA."

ALSO THIS WEEK, THE U.S. SOUTHERN COMMAND BEGAN TURNING OVER TO PANAMA SOME OF THE AREAS AND INSTALLATIONS THE U.S. FORCES HAVE BEEN OCCUPYING SINCE THE INVASION.

ON TUESDAY, THE U.S. GOVERNMENT DONATED A FLEET OF 251 VEHICLES TO THE PANAMANIAN GOVERNMENT FOR THE USE OF THE NATIONAL POLICE AND OTHER SECURITY FORCES HERE.

SAN JOSE (MAY 31) XINHUA - GUATEMALAN GUERRILLAS HAVE PROPOSED NOT TO PARTICIPATE IN THE COMING NOVEMBER ELECTIONS, ACCORDING TO GUERRILLA REPRESENTATIVE COM. GASPAR ILOM.

PRESS REPORTS QUOTED GASPAR ILOM AS SAYING THAT THE PROPOSAL WAS PUT FORWARD BY GUATEMALAN NATIONAL REVOLUTIONARY UNITY (URNG) DURING CURRENT NEGOTIATIONS IN SAN LORENZO DE EL ESCORIAL, SOME 50 KILOMETERS FROM MADRID.

THE GUERRILLAS ARE MEETING IN SPAIN WITH REPRESENTATIVES OF NINE POLITICAL PARTIES AND A NATIONAL MEDIATION COMMISSION PRESIDED BY BISHOP RODOLFO QUESADA.

ACCORDING TO THE NEGOTIATORS, THE MEETING ARE DESIGNED TO SEEK A PEACEFUL SOLUTION TO THE PROLONGED FIGHTING IN GUATEMALA THAT HAS SO FAR COST 100,000 LIVES.

AT THIS POINT, NEGOTIATORS ARE NOT LOOKING TO ACHIEVE A CEASE-FIRE OR THE URNG'S PARTICIPATION IN THE ELECTORAL PROCESS, BUT A VIABLE LEGAL AND POLITICAL FRAMEWORK IN WHICH TO CONTINUE THE TALKS.

NEGOTIATORS BEGAN THEIR TALKS TUESDAY BY REVIEWING THE COUNTRY'S CURRENT SITUATION AND THE AGREEMENTS REACHED BY THE CONFLICTING SIDES AT AN EARLIER ROUND OF TALKS IN OSLO, NORWAY.

NEGOTIATORS ARE EXPECTED TO MAKE A FINAL DECLARATION AT THE END OF CURRENT

MEETING.

COLOMBO (MAY 31) XINHUA - THE SRI LANKAN GOVERNMENT IS DRAFTING LEGISLATION FOR THE DISSOLUTION OF THE NORTH-EAST PROVINCIAL COUNCIL, CABINET SPOKESMAN, PLANTATION INDUSTRIES MINISTER RANJAN WEJERATNE SAID HERE TODAY.

THE LIBERATION TIGERS OF TAMIL EELAM (LTTE), THE LARGEST AND MOST POWERFUL TAMIL GROUP IN SRI LANKA, HAS REPEATEDLY ASKED THE GOVERNMENT TO DISSOLVE THE NORTH-EAST PROVINCIAL COUNCIL AND HOLD FRESH ELECTIONS.

WIJERATNE, WHO IS ALSO STATE MINISTER FOR DEFENSE, TOLD REPORTERS THAT THERE IS NO PROVISION IN THE CONSTITUTION OR THE PROVINCIAL COUNCIL LAW TO ENABLE THE PRESIDENT TO DISSOLVE THE COUNCIL.

HE SAID THE CONSTITUTION ONLY PROVIDES FOR DIRECT RULE BY THE CENTER. "AN IMPASSE HAS DEVELOPED AND WE ARE DRAFTING LEGISLATION TO OVERCOME IT," THE MINISTER SAID.

THE LTTE BOYCOTTED PROVINCIAL COUNCIL ELECTIONS HELD IN NORTH AND EAST SRI LANKA IN NOVEMBER 1988. BUT THE LTTE'S MAJOR RIVAL, INDIA-BACKED EELAM PEOPLE'S REVOLUTIONARY LIBERATION FRONT (EPRLF) CONTESTED THE POLLS AND BECOME THE RULING PARTY IN THE COUNCIL.

WHEN TOLD THAT THE LTTE WAS BUILDING BUNKERS, TRAINING YOUTH AND PREPARING FOR A CONFRONTATION, WIJERATNE SAID: "WE WILL SOLVE THE LTTE'S PROBLEMS. BE PATIENT."

"WE ARE NOT PREPARED TO FIGHT," HE SAID, ADDING THAT "IF ANYBODY IS TRYING TO FIGHT HE WILL NOT GET AWAY SCOT-FREE."

#90151h0122 05/31/1990 ~Chinese News Agency
PANAMA CITY (MAY 31) XINHUA - U.S. AMBASSADOR TO PANAMA DEANE R. HINTON SAID WEDNESDAY THAT HIS COUNTRY "IS COMMITTED TO FULLY COMPLYING WITH THE PANAMA CANAL TREATIES".

ADDRESSING PANAMA'S AMERICAN CHAMBER OF COMMERCE, HINTON DENIED THAT THE UNITED STATES WOULD TRY TO "RENEGOTIATE THE PANAMA CANAL TREATIES INSTEAD OF HANDING THE CANAL OVER TO PANAMA".

ON THE CONTRARY, HE SAID, "IN THE YEAR 2000 WE WILL LEAVE THE SCENE CONFIDENT THAT THE CANAL REMAINS IN GOOD HANDS."

HINTON SAID THAT BOTH COUNTRIES SHARED SUCH COMMON OBJECTIVES AS "THE PEACEFUL AND ORDERLY TRANSITION OF CONTROL OF THE CANAL AT THE END OF THIS CENTURY AND AN APOLITICAL AND SECURE SERVICE FOR THE BENEFIT OF THE COMMERCIAL WORLD."

HINTON ALSO PROPOSED THAT "A NEW SPIRIT OF COOPERATION AND MATURITY" ACT AS THE "DOMINANT CHARACTERISTIC" IN ANY DIALOGUE BETWEEN THE TWO COUNTRIES ON MATTERS RELATING TO THE CANAL.

ACCORDING TO HINTON, FOUR "IMPORTANT MATTERS" CURRENTLY EXIST IN BILATERAL RELATIONS BETWEEN THE TWO -- THE U.S. ROLE IN "THE CONVERSION OF THE OLD DEFENSE FORCES INTO A NATIONAL POLICE FORCE, THE ROLE THE UNITED STATES WILL PLAY IN PANAMA'S ECONOMIC RECOVERY, THE BATTLE AGAINST DRUGS AND THE FUTURE OF THE PANAMA CANAL."

THE UNITED STATES IS TRAINING PANAMA'S POLICE FORCE BY GIVING COURSES ON A WIDE VARIETY OF TOPICS RELATED TO POLICE WORK, HE SAID.

THE "PRINCIPAL TOOL" IN THIS EFFORT IS THE PROGRAM OF "ASSISTANCE IN CRIMINAL INVESTIGATION TRAINING AT THE INTERNATIONAL LEVEL" (ICITAP). THE PROGRAM IS PART OF THE JUSTICE DEPARTMENT'S 1.2 MILLION-DOLLAR COMPREHENSIVE TRAINING PROGRAM FOR PANAMA'S NEW POLICE FORCE.

REGARDING THE NATION'S ECONOMY, HINTON SAID THAT THE U.S. AID PACKAGE WAS DESIGNED TO HELP TRADE AND THE PANAMANIAN GOVERNMENT TO RETURN TO ECONOMIC NORMALCY AND TO PROVIDE EMPLOYMENT.

"STRESECTOR THROUGH THE PRIVATIZATION OF SOME STATE-OWNED COMPANIES" IS ESSENTIAL TO ECONOMIC RECOVERY, HINTON SAID. THE REACTIVATION OF THE PRIVATE SECTOR IS THE NUMBER ONE PRIORITY OF U.S. ECONOMIC AID TO PANAMA, HE STRESSED.

#90151h0123 05/31/1990 ~Chinese News Agency

MANILA (MAY 31) XINHUA - A PHILIPPINE SENATOR TODAY RAISED CONCERN OVER THE GROWING BUDGETARY DEFICIT AND URGED THE GOVERNMENT TO EXAMINE ITS MONETARY AND FISCAL POLICIES.

IN A SPEECH AT THE SENATE GENERAL SESSION, SENATOR VICENTE PATERNO SAID THE POSSIBILITY THAT THE BUDGETARY DEFICIT WOULD RAISE TO 24 BILLION PESOS (1.09 BILLION U.S. DOLLARS) FROM ITS ORIGINAL TARGET OF 17.5 BILLION PESOS (795.4 MILLION U.S. DOLLARS) FOR 1990 WOULD HAVE SERIOUS REPERCUSSIONS, LEADING TO HIGHER INFLATION.

PATERNO SAID THE DEPARTMENT OF BUDGET HAS RAISED THE PROJECTED BUDGETARY DEFICIT DUE TO AN INCREASE IN INTEREST PAYMENTS BY GOVERNMENT.

"THE BUDGET THAT CONGRESS APPROVED LAST YEAR WAS PREMISED ON INTEREST PAYMENTS OF 18.5 BILLION PESOS (840 MILLION U.S. DOLLARS) ON FOREIGN DEBTS AND 46.3 BILLION PESOS (2.1 BILLION U.S. DOLLARS) ON DOMESTIC BORROWINGS LIKE TREASURY BILLS," PATERNO SAID.

"ON FOREIGN BORROWINGS, THE ESTIMATE OF INTEREST ON FOREIGN BANKS IS A SLIGHT REDUCTION OF 1.8 BILLION PESOS (81.8 MILLION U.S. DOLLARS), BUT ON DOMESTIC BORROWINGS, THE ESTIMATE IS AN INCREASE OF 8.3 BILLION PESOS (377 MILLION U.S. DOLLARS)," PATERNO SAID.

HE SAID THE PRESIDENTIAL OFFICE IS ASKING CONGRESS TO ENACT TAX MEASURES ON "SIN PRODUCTS" LIKE BEER AND ALCOHOLIC DRINKS AND CIGARETTES MAINLY TO RAISE ENOUGH MONEY TO COVER INCREASED INTEREST RATES ON TREASURY BILLS.

HE CALLED FOR A THOROUGH EXAMINATION OF THESE TAX MEASURES BECAUSE OF THE POSSIBLE INFLATIONARY EFFECTS.

THERE ARE ABOUT 280 BILLION PESOS (12.72 BILLION U.S. DOLLARS) WORTH OF TREASURY BILLS WHICH THE GOVERNMENT HAS ISSUED. A ONE PERCENT INCREASE IN INTEREST RATE WOULD MEAN AN ADDITIONAL 2.8 BILLION PESOS (127.2 MILLION U.S. DOLLARS) IN THE BUDGET DEFICIT.

BESIDES, MORE MONEY GETS INTO CIRCULATION TRIGGERING HIGHER INFLATION, PATERNO SAID.

PATERNO SUGGESTED LOOKING INTO THE NATURE OF THE COMMERCIAL BANKING SYSTEM TO DETERMINE WHETHER COMMERCIAL BANKS INFLUENCE THE INTEREST RATES ON TREASURY BILLS.

"THIS WAY CONGRESS COULD ENACT MEASURES PROTECTING THE NATIONAL ECONOMY," HE SAID.

#90151h0124 05/31/1990 ~Chinese News Agency

MANILA (MAY 31) XINHUA - THE PHILIPPINE AIR FORCE WILL RECEIVE IN AUGUST THE FIRST DELIVERY OF 22 MD-500 HELICOPTER GUNSHIPS FROM THE UNITED STATES AIR FORCE CHIEF MAJOR-GENERAL GERARDO PROTACIO SAID TODAY.

PROTACIO TOLD THE PHILIPPINE NEWS AGENCY THAT THE DELIVERY WILL BE COMPLETED WITHIN TEN MONTHS. 16 OF THE HELICOPTERS WILL BE DEPLOYED TO THE ARMY BRIGADES FOR COUNTER-INSURGENCY OPERATIONS, AND THE REMAINING SIX WILL BE USED FOR TRAINING, HE SAID.

THE HELICOPTERS, COSTING 1.1 MILLION U.S. DOLLARS EACH, ARE ARMED WITH 2.75 MM. AIR-TO-GROUND ROCKETS AND 50 CALIBER MACHINE GUNS.

THE MD-500 HELICOPTER GUNSHIPS ARE REPORTED TO BE EFFECTIVE IN CLOSE

COMBAT AIR SUPPORT AND MOBILE IN AIR-TO-GROUND COMBAT.

THE PHILIPPINE AIR FORCE IS PRESENTLY USING THE SIKORSKY GUNSHIPS AND "HUEY" HELICOPTERS FOR AIR SUPPORT OF GROUND TROOPS.

PROTACIO ALSO SAID THE PHILIPPINE AIR FORCE NEEDS 1.6 BILLION PESOS (72.72 MILLION U.S. DOLLARS) TO BUY PLANE AND HELICOPTER SPARE PARTS. HE NOTED THAT SEVERAL AIRCRAFT HAVE BEEN GROUNDED FOR LACK OF SPARE PARTS. OF THE NINE FOKKER PLANES IN ITS INVENTORY, ONLY FIVE ARE FLYING. TWO SIKORSKY HELICOPTERS ARE ALSO UNDERGOING REPAIR WAITING FOR ARRIVAL OF SPARE PARTS, PROTACIO SAID.

#90151h0129 05/31/1990 ~Chinese News Agency

TEHRAN (MAY 31) XINHUA - IRAN EXPRESSED TODAY ITS DISSATISFACTION AT THE FINAL STATEMENT ADOPTED BY ARAB LEADERS AT THEIR BAGHDAD SUMMIT WHICH DECLARED SUPPORT FOR THE IRAQI CLAIM OVER THE DISPUTABLE SHATT AL-ARAB WATERWAY.

IRAN'S FOREIGN MINISTRY ISSUED A STATEMENT, DESCRIBING THE STANCE ADOPTED BY THE EMERGENCY ARAB SUMMIT TOWARD THE ISSUE AS "INVALID, ILLEGITIMATE AND IN CONTRADICTION WITH IRAQ'S PEACE GESTURES."

THE FINAL STATEMENT, PASSED AT THE END OF THE THREE-DAY SUMMIT ON WEDNESDAY, BACKED THE FULL CONTROL SOUGHT BY IRAQ OVER THE SHIPPING ROUTE, WHILE CALLING FOR A COMPREHENSIVE PEACE IN THE GULF REGION.

THE WATERWAY, CALLED BY IRAN AS THE "ARVAND RIVE," SEPARATES IRAN AND IRAQ. THE TWO COUNTRIES HAVE DISPUTES OVER THE USE AND CONTROL OF THE WATERWAY.

THE FOREIGN MINISTRY STATEMENT SAID THAT THE ARAB LEADERS HAVE SURRENDERED TO THE IRAQI "ILLEGITIMATE DEMAND" OVER THE RIVER, WHICH "NOT ONLY WILL FAIL TO RESTORE PEACE AND SECURITY IN THE REGION, BUT WILL ALSO PERPETUATE THE STATE OF NO WAR, NO PEACE."

THE ARAB SUMMIT STATEMENT CALLED FOR AN EXCHANGE OF PRISONERS OF WAR BUT DID NOT EMPHASIZE THE WITHDRAWAL OF FORCES TO INTERNATIONAL FRONTIERS, THE IRANIAN STATEMENT SAID.

IRAN ASKS IRAQ TO PULL OUT ITS TROOPS FROM THE IRANIAN TERRITORY PRIOR TO OR AT LEAST SIMULTANEOUSLY WITH THE SWAP OF POWS, WHILE IRAQ LINKS THE TROOPS WITHDRAWAL TO A SETTLEMENT OF THE ISSUE OF THE SHATT AL-ARAB WATERWAY.

THE BORDER RIVER IS IRAQ'S ONLY OUTLET TO THE SEA AND THE CONTROVERSY OVER ITS SOVEREIGNTY BECAME A STUMBLING BLOCK TO PEACE TALKS BETWEEN THE TWO

GULF COUNTRIES.

IRAN'S QUICK AND HARSH REACTION TO THE ARAB SUMMIT RESOLUTION FURTHER REVEALED THAT THE TWO COUNTRIES ARE STILL FAR APART ON THE ISSUE CRUCIAL TO PEACE FOLLOWING THE EXCHANGE OF LETTERS BETWEEN IRAQI PRESIDENT SADDAM HUSSEIN AND HIS IRANIAN COUNTERPART HASHEMI RAFSANJANI IN THE PAST MONTH.

SADDAM HAS SENT TWO MESSAGES TO RAFSANJANI, CALLING FOR FACE-TO-FACE TALKS ON THEIR DIFFERENCES. THE IRANIAN PRESIDENT HAS REPLIED TO THE FIRST LETTER.

OBSERVERS HERE SAID THE POSITIONS ADOPTED BY ARAB LEADERS MAY MAKE DIRECT TALKS BETWEEN IRANIAN AND IRAQI LEADERS LESS LIKELY.

NICOSIA (MAY 31) XINHUA - TURKISH CYPRIOT SIDE TODAY RELEASED GREEK CYPRIOT YOUTH PETROS PAPALEONTIOU, 17, AFTER NEARLY THREE MONTHS OF DETENTION, THE CYPRUS NEWS AGENCY REPORTED.

PAPALEONTIOU WAS HANDED TO HIS PARENTS BY A UNITED NATIONS REPRESENTATIVE AT THE U.N.-CONTROLLED NICOSIA INTERNATIONAL AIRPORT, WHICH NOW HOUSES THE HEADQUARTERS OF THE U.N. PEACEKEEPING FORCE ON THE ISLAND (UNFICYP).

PAPALEONTIOU, WHO IS A GRADUATE OF A SECONDARY SCHOOL IN NICOSIA, WAS QUOTED AS SAYING THAT HE FELT PROUD OF WHAT HE HAD DONE.

HE WAS SEIZED BY TURKISH CYPRIOT POLICE ON MARCH 3, WHEN HE TRIED TO REMOVE A TURKISH FLAG ON A BASTION OF THE MEDIEVAL WALL OF THE DIVIDED CAPITAL CITY OF NICOSIA. HE WAS SENTENCED TO THREE MONTHS IMPRISONMENT BY AN TURKISH CYPRIOT COURT IN THE NORTHERN PART OF CYPRUS.

FIVE GREEK CYPRIOT YOUTHS WERE DETAINED BY TURKISH CYPRIOT POLICE BETWEEN FEBRUARY 16 AND MARCH 9 FOR ''ILLEGAL'' ENTRY AND PULLING DOWN A TURKISH FLAG. THE TURKISH CYPRIOT AUTHORITIES HAD RELEASED TWO OF THE FIVE EARLIER. TWO OTHERS, CHRISTOS SAVVIDES, 22, AND DEMETRIS LOUKA, 19, ARE STILL HELD IN TURKISH CYPRIOT JAILS.

#90151h0133 05/31/1990 ~Chinese News Agency

UNITED NATIONS (MAY 31) XINHUA - THE U.N. SECURITY COUNCIL TODAY DECIDED TO KEEP ITS OBSERVER FORCE ON THE GOLAN HEIGHTS FOR ANOTHER SIX MONTHS SO AS TO CONTINUE SUPERVISING THE CEASE-FIRE BETWEEN ISRAELI AND SYRIAN TROOPS.

IN A RESOLUTION ADOPTED UNANIMOUSLY BY ITS 15 MEMBERS, THE COUNCIL DECIDED

TO RENEW THE MANDATE OF THE U.N. FORCE, OFFICIALLY KNOWN AS THE U.N. DISENGAGEMENT OBSERVER FORCE (UNDOF) , FOR ANOTHER PERIOD OF SIX MONTHS FROM JUNE 1 UNTIL NOVEMBER 30 THIS YEAR.

THE SECURITY COUNCIL'S DECISION WAS REQUESTED BY U.N. SECRETARY-GENERAL JAVIER PEREZ DE CUELLAR, WHO SAID IN A REPORT TO THE COUNCIL THAT THE CONTINUED PRESENCE OF UNDOF IN THE AREA WILL BE "ESSENTIAL" TO THE SECURITY AND STABILITY IN THE REGION.

UNDOF, CURRENTLY CONSISTING OF 1,331 PERSONNEL FROM AUSTRIA, CANADA, FINLAND AND POLAND, WAS ESTABLISHED IN MAY 1974 TO SUPERVISE THE CEASE-FIRE CALLED FOR IN A DISENGAGEMENT AGREEMENT BETWEEN ISRAEL AND SYRIA FOLLOWING THE 1973 ARAB-ISRAELI WAR, DURING WHICH ISRAEL TOOK OVER PART OF THE GOLAN HEIGHTS.

THE U.N. CHIEF SAID IN HIS REPORT THAT ALTHOUGH, WITH THE SUPERVISION OF THE U.N. FORCE, THE SITUATION IN THE ISRAEL-SYRIA SECTOR HAS REMAINED QUIET, THE SITUATION IN THE MIDDLE EAST AS A WHOLE CONTINUES TO BE POTENTIALLY DANGEROUS AND IS LIKELY TO REMAIN SO BEFORE A COMPREHENSIVE SETTLEMENT IN THE REGION.

THE SECRETARY-GENERAL, WHILE RECOMMENDING THE EXTENSION, HOWEVER, ALSO URGED THE ISRAELI AND SYRIAN GOVERNMENTS TO MAKE "DETERMINED EFFORTS" TO TACKLE THE PROBLEM IN ALL ITS ASPECTS WITH A VIEW TO ARRIVING AT A JUST AND DURABLE PEACE SETTLEMENT.

HE SAID, BOTH GOVERNMENTS HAVE AGREED ON THE PROPOSED EXTENSION OF THE U.N. FORCE'S MANDATE.

TODAY'S SECURITY COUNCIL RESOLUTION ALSO REQUESTS THE SECRETARY-GENERAL TO SUBMIT A FURTHER REPORT ON THE DEVELOPMENTS IN THE AREA BEFORE NOVEMBER 30.

#90151h0137 05/31/1990 ~Chinese News Agency

ISTANBUL, MAY 31 (XINHUA) -- PEOPLE IN THIS LARGEST TURKISH CITY ARE NOW ASKED TO "TIGHTEN THEIR BELTS" ON USE OF WATER AS A PROLONGED DROUGHT IS CONTINUING THROUGH SUMMER.

BILLBOARDS AND PLACARDS ARE SEEN EVERYWHERE CALLING ON THE CITY'S 7.5 MILLION RESIDENTS TO SAVE WATER. SINCE THE BEGINNING OF THIS YEAR, NEWSPAPERS HAVE KEPT INFORMING PEOPLE OF THE WATER TABLE IN EVERY MAJOR RESERVOIR EVERY DAY.

"BELTS" ARE ALREADY TIGHT ENOUGH. THE GOVERNMENT HAS TWICE CUT WATER SUPPLIES THIS YEAR, COMPELLING SOME HOSPITALS TO OPERATE PARTIALLY OR LIMIT THEIR OPERATIONS TO EMERGENCY CASES.

OFFICIALS HAVE SOUNDED THE ALARM THAT ALL RESERVOIRS SUPPLYING ISTANBUL'S EUROPEAN SECTOR WILL HAVE RUN DRY BY MID-OCTOBER IF UPCOMING RAINS ARE NOT BIG ENOUGH.

THINGS ARE NO BETTER IN THE CITY'S ASIAN SECTOR AT THE OTHER SIDE OF THE BOSPORUS STRAIT.

AFTER THE DRIEST WINTER IN 40 YEARS, THE SEVEN RESERVOIRS IN BOTH SECTORS NOW HAVE LESS THAN 190 MILLION CUBIC METERS OF WATER IN STORE, COMPARED WITH 439 MILLION LAST YEAR, SAID OFFICIALS AT THE CITY'S WATER AND SEWAGE ADMINISTRATION (ISKI).

ON AN AVERAGE, THEY ARE ONLY 27 PERCENT FULL, DOWN FROM 62 PERCENT LAST YEAR. IN MOST CASES, A RESERVOIR BECOMES "DEAD" -- MEANING THE WATER TABLE IS TOO LOW TO ALLOW ANY OUT-GOING FLOW -- WHEN WATER IN IT ACCOUNTS FOR LESS THAN 20 PERCENT OF ITS DESIGNED STORAGE CAPACITY.

THE CITY NORMALLY RECEIVES SOMEWHERE BETWEEN 700 AND 850 MILLIMETERS OF RAIN A YEAR, BUT LAST YEAR'S PRECIPITATION WAS MEASURED AT A MERE 455 MILLIMETERS. SO FAR THIS YEAR, IT HAS HAD ONLY 262 MILLIMETERS.

THE TERKOS RESERVOIR, THE CITY'S SECOND LARGEST WATER SOURCE WHICH SUPPLIES THE NEEDS OF MORE THAN 2 MILLION OF THE 5.5 MILLION RESIDENTS IN THE EUROPEAN SECTOR, HAS SINCE MARCH 21 HAD THE LOWEST WATER TABLE IN 100 YEARS.

THE DROUGHT COMPELLED ISKI TO CUT THE DAILY WATER SUPPLY FROM 1.3 MILLION CUBIC METERS TO 800,000 CUBIC METERS IN FEBRUARY, AND THEN TO 500,000 IN MARCH AS RAINS WERE STILL OUT OF SIGHT.

RESIDENTS INTERVIEWED BY XINHUA COMPLAIN BUT EXPRESS UNDERSTANDING. DOCTORS, HOWEVER, SAY THAT TYPHUS AND HEPATITIS MAY BECOME A THREAT THIS SUMMER AND WATER SAMPLES ARE TESTED EVERY DAY TO PREVENT DISEASES.

MEANWHILE, ISKI HAS BEGUN RENOVATING THE CITY'S WATER SUPPLY NETWORK BLAMED FOR LOSS OF 40 PERCENT OF THE WATER TO LEAKAGE, SEEPAGE AND EVAPORATION.

ISKI OFFICIALS SAID THAT THE FIRST-PHASE WORK, SCHEDULED FOR COMPLETION BEFORE THE END OF 1991, INVOLVES REPAIRS AND REPLACEMENT OF PIPES OF 2,063 KILOMETERS, OUT OF A TOTAL OF 6,700 KILOMETERS.

Nightline (ABC) May 29, 1990

From the Front Lines in Eritrea: Yvan Patry, producer from Altocine, a Canadian documentary film company discusses his video filmed in civilian areas in the highlands of Eritrea and in the port city of Massawa, Ethiopia. Ethiopia's increasingly unwilling army is losing the war to the liberation fronts in Tigray and Eritrea, but its superior air force, its only effective weapon, is using cluster bombs and napalm to attack and massacre civilians as well as destroy crucial food supplies and food distribution efforts in a country beset by drought and famine. (Transcript #2352) See also the ''Africa'' topic list in the Journal Graphics catalog.

Crossfire (CNN) May 29, 1990

Risky Business: Medical Malpractice: Malpractice attorney Dr. Harvey Wachsman and Dr. Barry Manuel, President of the Massachusetts Medical Society, discuss the current medical malpractice system and its alternatives. (Transcript #62)

The Premium Dollar May 29, 1990

The Mechanism of Insurance: ''The Premium Dollar'' is a 13-part series on the subject of insurance which will ''bring together the many complicated aspects of the insurance industry and how they relate to the public's needs.'' The show will track the premium dollar-- where it comes from, what happens to it and where it goes. (Transcript #1)

See also: Nightline #1199, 12/26/85, ''The Cost of Insurance.''

Moneyline (CNN) May 29, 1990

The Washington Summit isn't likely to deliver on the expectations raised in Malta for a new era of U.S.-Soviet trade relations; the Federal Trade Commission began investigations into possible price setting by baby formula companies; the Navy is investigating a possible link between defective equipment supplied by one contractor, Buffalo Pumps, and a recent fatal accident at sea; Dan Dorfman with takeover talk about Syntex, the pharmaceutical giant; the Asian business report. (Transcript #107)

Back transcripts available on U.S.-Soviet trade relations.

Larry King Live (CNN) May 29, 1990

Modern medicine is now saving many babies that once would not have survived. Controversy surrounds saving these babies because of the permanent disabilities they are left with, representing a heavy financial, emotional and physical burden for the parents and bringing into question the policy of saving the babies to live a life of suffering and disability. Mr. King is joined by three guests in this segment-- Mary Thorp, mother of a premature baby, and Dr. Lucy Perrotta, who agree that parents should have a say in the degree of medical attention their premature child receives; and Dr. Thomas Storch, who thinks all premature infants should be saved, with the parents having no say. Mr. King's second guest is Judy Belushi, who has just published her memoirs, Samurai Widow, eight years after the death of her husband. She talks frankly about John's dependence on drugs and the feelings she went through in the process of grieving and healing. (Transcript #54)

See also: PrimeTime Live #123, 1/11/90, ''After the Miracle'' (severely brain-damaged children and premature babies are being kept alive by medical technology); Nightline #1214, ''Saving Premature Infants.''

Oprah Winfrey May 29, 1990

Women Living With Fear of Cancer in the Family: Dr. Steven Piver and Dr. Penny Wise Budoff discuss with women the various types of cancer, warning signs, when you should visit your gynecologist, what to do if you find something abnormal and what some of the risk factors are. Three women tell about cancer, how it's run in their family and how fearful they are of getting it. (Transcript #967)

See also: Nova #1506, 3/1/88, ''Battles in the War on Cancer: Breast Cancer''; Donahue #2524, 9/30/88, ''Beating Cancer's Death Sentence''; and the ''Cancer'' topic list in the Journal Graphics catalog.

Donahue May 29, 1990

Michael J. Fox: Actor Michael J. Fox talks about his family and his career in Family Ties and the Back to the Future movies. (Transcript #2956)

See also: Donahue #2074, 2/4/87, ''Michael J. Fox''; 20/20 #932, 8/11//89 ''Michael J. Fox.''

Geraldo May 29, 1990

Orphans of Crime: Special guest Pat Boone discusses Bethel Bible Village, which is a home for children whose parents are in jail. Children who have been in Bethel Village tell what it was like there, while their parents tell what crimes they were convicted of. Concern for what happens to children of criminals is discussed. (Transcript #704) See also the ''Crime'' topic list in the Journal Graphics catalog.

Sally Jessy Raphael May 29, 1990

Family Secrets: A repeat of the November 11, 1989, show. Guests share what they have kept to themselves for years-- one man saw his father murder his mother, then kill himself; another guest cheated on his wife numerous times. (Transcript #452)

Good Morning America (ABC) May 29, 1990

#90151k0027 05/31/1990 ~Japanese News Agency

TOKYO (MAY 31) KYODO - FACTORY PRODUCTION IN THE FIRST QUARTER OF 1990 ROSE IN ALL BUT FOUR INDUSTRIAL SECTORS, AND SHIPMENTS DECLINED IN ONLY ONE SECTOR, THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) REPORTED THURSDAY.

IN A REPORT ON SECTOR-BY-SECTOR INDUSTRIAL OUTPUT, MITI SAID OUTPUT BY THE STEEL, TRANSPORTATION MACHINERY, CHEMICAL, AND TEXTILE SECTORS POSTED DOWNSWINGS FROM THE PREVIOUS QAURTER, BUT ALL NINE OTHER SECTORS SHOWED HEALTHY RISES IN PRODUCTION.

SHIPMENTS IN THE FIRST THREE MONTHS OF 1990 DROPPED ONLY IN THE PRECISION INSTRUMENT SECTOR, IT SAID.

INVENTORIES FELL IN ALL BUT THREE SECTORS -- CERAMICS, PETROCHEMICAL, AND PAPER AND PULP, MITI SAID.

#90151k0062 05/31/1990 ~Japanese News Agency

TOKYO (MAY 31) KYODO - KYOWA HAKKO KOGYO CO., A MAJOR JAPANESE AMINO ACID MAKER, AND SUMITOMO CORP. SAID THURSDAY THEY HAVE TAKEN CONTROL OF THEIR JOINT VENTURE WITH THE MEXICAN GOVERNMENT THAT PRODUCES L-LYSINE, A SUBSTANCE USED IN ANIMAL FEED.

THE DEAL WAS MADE AT THE REQUEST OF THE MEXICAN GOVERNMENT WHICH PREVIOUSLY HELD A STAKE OF ABOUT 50 PERCENT IN THE JOINT VENTURE, FERMEX. THE MEXICAN GOVERNMENT IS TRYING TO PRIVATIZE STATE-OWNED COMPANIES TO REVITALIZE THE NATION'S ECONOMY, COMPANY OFFICIALS SAID.

THE PURCHASES BOOSTED KYOWA HAKKO'S EQUITY HOLDINGS IN FERMEX TO 75 PERCENT FROM THE PREVIOUS 38 PERCENT AND ALSO GAVE SUMITOMO, A MAJOR TRADING FIRM, A 25 PERCENT SHARE INSTEAD OF ITS PREVIOUS 13 PERCENT.

OFFICIALS SAID THE TRANSACTION COST KYOWA ABOUT 12 MILLION DOLLARS AND SUMITOMO SOME 4 MILLION DOLLARS.

FERMEX WAS SET UP IN 1975. THE MEXICO CITY-BASED JOINT VENTURE CURRENTLY PRODUCES 10,000 TONS OF L-LYSINE AND 2,000 TONS OF GLUTAMIC ACID SODA PER YEAR FOR SALE MAINLY IN CENTRAL AND SOUTH AMERICAN COUNTRIES, THE OFFICIALS SAID.

-30- 1258

#90151k0069 05/31/1990 ~Japanese News Agency

TOKYO (MAY 31) KYODO - DAICEL CHEMICAL INDUSTRIES LTD. SAID THURSDAY IT HAS AGREED TO SET UP A JOINT VENTURE WITH HOECHST AG, A MAJOR WEST GERMAN CHEMICAL MAKER, IN BRITAIN IN LATE AUGUST.

THE NEW COMPANY, WHOSE NAME HAS YET TO BE DECIDED, IS SCHEDULED TO BEGIN PRODUCTION OF NONFLAMMABLE ABS RESIN, A PLASTIC USED FOR ELECTRIC AND ELECTRONICS PRODUCTS, IN 1991, WITH ANNUAL OUTPUT TARGETED AT 3,000-4,000 TONS.

THE PRODUCTS WILL BE SUPPLIED MAINLY TO JAPANESE COMPANIES OPERATING IN EUROPE.

THE AGREEMENT FOLLOWS THE ESTABLISHMENT OF COOPERATIVE RELATIONS BETWEEN THE TWO COMPANIES IN MANUFACTURING AND MARKETING OF THE ABS RESIN LAST DECEMBER.

#90151k0072 05/31/1990 ~Japanese News Agency

MANILA (MAY 31) KYODO - THE ASIAN DEVELOPMENT BANK SAID THURSDAY IT HAS APPROVED FIVE LOANS AMOUNTING TO 569 MILLION U.S. DOLLARS, 21 TECHNICAL ASSISTANCE GRANTS TOTALING 9.59 MILLION DOLLARS, AND 16 GRANTS WORTH 3.47 MILLION DOLLARS FOR REGIONAL ACTIVITIES DURING THE FIRST QUARTER OF 1990.

DURING THE PERIOD, THE BANK SAID IT INVESTED 7 MILLION DOLLARS IN EQUITY OPERATIONS WITH TWO PRIVATE SECTOR ENTERPRISES.

AMONG THE FIVE LOANS, 129 MILLION DOLLARS WERE FOR A PROJECT TO MODERNIZE PORT AND SHIP REPAIR FACILITIES IN BOMBAY AND CONSTRUCT DEEP-WATER PORT FACILITIES AT KAKINADA IN THE STATE OF ANDHRA PRADESH IN INDIA.

TWO LOANS WERE GRANTED TO INDONESIA TOTALING 250 MILLION DOLLARS FOR ITS FOOD CROP SECTOR PROGRAM AND ANOTHER OF 114 MILLION DOLLARS FOR THE DEVELOPMENT OF SIX UNIVERSITIES.

ABOUT 51 MILLION DOLLARS WERE RECEIVED BY NEPAL FOR ITS SEVENTH POWER PROJECT TO REHABILITATE DISTRIBUTION NETWORKS IN FIVE TOWNS.

IN PAKISTAN, THE SECOND BARANI AREA DEVELOPMENT PROJECT BENEFITTING 40,000 LOW-INCOME FAMILIES GOT ABOUT 25 MILLION DOLLARS.

THE TWO EQUITY INVESTMENTS WERE OF 5 MILLION DOLLARS IN PAKISTAN'S NATIONAL DEVELOPMENT LEASING CORPORATION AND OF 2 MILLION DOLLARS IN THAILAND'S FARMERS' BANK.

MEANWHILE, THE ADB ALSO ANNOUNCED THURSDAY IT HAS LAUNCHED A 150 MILLION SWISS FRANC (ABOUT 107.4 MILLION DOLLAR) PUBLIC BOND ISSUE IN THE SWISS CAPITAL MARKET THROUGH AN UNDERWRITING SYNDICATE LEAD MANAGED BY THE UNION BANK OF SWITZERLAND.

THE SWISS BANK CORP AND CREDIT SUISSE WERE THE CO-MANAGERS FOR THE PUBLIC BOND OFFERING.

THE ISSUE -- TO BE LISTED ON THE STOCK EXCHANGES OF ZURICH, BASEL, AND GENEVA -- CARRIES A 10-YEAR BULLET MATURITY, BEARS A COUPON OF 7.25 PERCENT PER YEAR, PAYABLE ANNUALLY, AND IS PRICED AT 102 PERCENT.

THE BANK SAID PROCEEDS OF THE ISSUE WILL BE FUNNELED INTO THE BANK'S ORDINARY CAPITAL RESOURCES AND WILL BE USED IN ITS ORDINARY OPERATIONS.

THIS IS THE ADB'S 25TH PUBLIC BOND ISS IN SWITZERLAND, BRINGITOTAL BANK PUBLIC BORROWINGSN THE SWISS CAPITAL MARKET TO 2,518 MILLION SWISS FRA.

#90151k0086 05/31/1990 ~Japanese News Agency

TOKYO (MAY 31) KYODO - JAPAN MUST MAINTAIN SOME MEASURE OF CURRENT ACCOUNT SURPLUS TO FINANCE REFORMS IN EASTERN EUROPE AND THE U.S. EXTERNAL DEFICIT, A GOVERNMENT ADVISORY PANEL SAID IN A REPORT RELEASED THURSDAY.

IN AN INTERIM REPORT DRAFTED BY ITS SUBPANEL STUDYING INTERNATIONAL FINANCE TRANSACTIONS, THE COMMITTEE ON FOREIGN EXCHANGE AND OTHER TRANSACTIONS SAID JAPAN'S CURRENT ACCOUNT SURPLUS IS NOT NECESSARILY A FACTOR POSING A THREAT TO THE WORLD ECONOMY.

THE REPORT APPLAUDED PROGRESS IN SLASHING JAPAN'S CURRENT ACCOUNT SURPLUS SO FAR, SAYING THAT THE SURPLUS ON THE CURRENT ACCOUNT, A BROAD MEASURE OF TRADE IN GOODS AND SERVICES, HAS BEEN NARROWING ''AT A STEADY TEMPO.''

''THE NATION'S CURRENT ACCOUNT SURPLUS IS SERVING TO SUPPORT STABLE WORLD ECONOMIC GROWTH RATHER THAN CAUSING A CONFUSING FACTOR IN THE GLOBAL ECONOMY,'' THE REPORT SAID. THE REPORT CITED THE SURPLUS AS THE SOURCE OF CAPITAL TO HELP RAISE THE MONEY NEEDED FOR NATIONS WITH CURRENT ACCOUNT DEFICITS AND DEBT-PLAGUED DEVELOPING NATIONS.

THE REPORT IS AN APPARENT CALL FOR A SHIFT IN THE GOVERNMENT'S POLICY OF REDUCING THE NATION'S EXTERNAL SURPLUS, WHICH HAS BEEN SOUGHT FOR SOME TIME UNDER INTENSE PRESSURE FROM THE UNITED STATES AND OTHER TRADING PARNERS.

IN THIS CONTEXT, JAPAN HAS BEEN TRYING TO CUT ITS SURPLUS THROUGH MEASURES TO BOOST IMPORTS VIA DOMESTIC DEMAND.

WITH THESE STEPS, JAPAN'S CURRENT ACCOUNT SURPLUS HAS BEEN DWINDLING SIGNIFICANTLY, SHRINKING 30.8 PERCENT IN FISCAL 1989 FROM A YEAR EARLIER TO 53.5 BILLION DOLLARS, OR 2.0 PERCENT OF GROSS NATIONAL PRODUCT.

JAPAN'S CURRENT ACCOUNT SURPLUS PEAKED AT 94 BILLION DOLLARS IN FISCAL 1986, EQUIVALENT TO 4.5 PERCENT OF GNP.

THE REPORT IS IN LINE WITH THE LATEST WORLD ECONOMIC OUTLOOK RELEASED BY THE INTERNATIONAL MONETARY FUND EARLY THIS MONTH, IN WHICH THE WASHINGTON-BASED INTERNATIONAL AGENCY WARNED JAPAN AGAINST CUTTING ITS EXTERNAL SURPLUS TOO QUICKLY.

IN FORECASTING TRENDS IN THE NATION'S CURRENT ACCOUNT, THE REPORT TOOK A DIM VIEW OF THE POSSIBILITY THAT JAPAN WILL LOSE ITS SURPLUS IN THE NEAR FUTURE.

''IT IS A DOMINANT VIEW THAT THE SURPLUS ITSELF WILL NOT BE WIPED OUT SOON '' SAID THE REPORT, WHILE PREDICTING THAT THE SURPLUS WILL BE ON THE DECLINE FOR A WHILE GIVEN INCREASED OVERSEAS PRODUCTION BY JAPANESE FIRMS AND AN ONGOING SHIFT IN THE ECONOMY FROM AN EXPORT-ORIENTED ONE TO ONE DEPENDING ON DEMAND AT HOME.

TURNING TO JAPANESE INVESTMENT ABROAD, THE REPORT URGED CAUTION IN PURCHASING ''SYMBOLIC'' ASSETS IN FOREIGN COUNTRIES, PARTICULARY REAL ESTATE.

''IN SOME NATIONS WHICH ACCEPT JAPANESE DIRECT INVESTMENT, THERE IS A GROWING FEELING AGAINST THE INCREASING JAPANESE PRESENCE AND EMOTIONAL CRITICISM OF THE GROWING INDUSTRIAL DOMINANCE BY THE JAPANESE,'' IT SAID.

''DUE ATTENTION MUST BE PAID TO THESE INVESTMENT-RELATED DISPUTES,'' THE REPORT NOTED.

#90151k0089 05/31/1990 ~Japanese News Agency

TOKYO (MAY 31) KYODO - CHINA MAY FALL INTO A POLITICAL CRISIS UNDER THE WEIGHT OF HUGE GOVERNMENT DEBTS, THE RESULT OF LOANS IT TOOK OUT IN THE EARLY 1980S UNDER ITS OPEN ECONOMIC POLICY, A JAPANESE PRIVATE THINK TANK SAID THURSDAY.

IN A REPORT ANALYZING CHINA'S DOMESTIC AND OVERSEAS DEBT BURDEN, THE NIKKO RESEARCH CENTER SAID THAT CHINA IS SET TO ENTER AN ERA OF PRINCIPAL REPAYMENTS ON ITS MASSIVE OUTSTANDING GOVERNMENT BONDS NOW THAT IT IS ALREADY UNDER PRESSURE FROM INTEREST PAYMENTS ON THE NATIONAL DEBT.

THE MOUNTING DEBT BURDEN IS LIKELY TO FORCE THE CHINESE GOVERNMENT TO RAISE TAXES AND RESCHEDULE DEBT PAYMENTS TO ITS PEOPLE, A MOVE WHICH MAY LEAD TO POLITICAL TURMOIL BY SPAWNING DISSATISFACTION AMONG THE PUBLIC, THE REPORT SAID.

THE REPORT ALSO BASED ITS PESSIMISTIC PROJECTION ON THE WEAK CHINESE ECONOMY, WHICH IT SAID HAS SLIPPED INTO STAGFLATION, OR ECONOMIC SLOWDOWN WITH HYPERINFLATION, IN THE WAKE OF LAST JUNE'S TIANANMEN SQUARE INCIDENT AND THE AUSTERE FISCAL POLICY TAKEN SINCE SEPTEMBER 1988.

REVIEWING DOMESTIC AND EXTERNAL DEBTS OWED BY CHINA, THE REPORT STRESSED THE DANGER OF BORROWINGS MADE AT HOME RATHER THAN OF THOSE MADE ABROAD.

CITING STATISTICS FROM THE WORLD BANK, THE REPORT SAID CHINA HAD EXTERNAL DEBTS OF 42 BILLION DOLLARS AT THE END OF 1988, BUT THE AMOUNT DOES NOT CONSTITUTE A SERIOUS PROBLEM IN VIEW OF ITS RATIO TO GROSS NATIONAL PRODUCT.

AT STAKE IS GROWING INTEREST PAYMENTS ON DOMESTIC DEBTS, THE REPORT SAID, NOTING THAT THEY ARE SQUEEZING CHINA'S BUDGET.

CHINA'S BUDGET DEFICIT INCREASED TO 42.3 BILLION YUAN IN FISCAL 1990 FROM 36.9 BILLION YUAN IN FISCAL 1989, WHILE PRINCIPAL AND INTEREST PAYMENTS ON DOMESTIC DEBTS JUMPED 3.6-FOLD, THE REPORT SAID.

#90151k0097 05/31/1990 ~Japanese News Agency

TOKYO (MAY 31) KYODO - THE GOVERNMENT COLLECTED 6,330.9 BILLION YEN IN TAX REVENUES IN APRIL, A STRONG 26.8 PERCENT INCREASE FROM A YEAR EARLIER, THE FINANCE MINISTRY SAID THURSDAY.

THE APRIL TAX REVENUES BROUGHT CUMULATIVE REVENUES SINCE APRIL 1989, THE FIRST MONTH OF FISCAL 1989, TO 46,045 BILLION YEN, UP 7.4 PERCENT FROM THE PREVIOUS YEAR'S LEVEL, IT SAID.

GIVEN THE CURRENT PACE OF TAX REVENUE GROWTH, MINISTRY OFFICIALS SAID IT IS CERTAIN THAT THE GOVERNMENT WILL ACHIEVE ITS GOAL OF SKIPPING DEBT-FINANCING BONDS IN THE FISCAL YEAR ENDED ON MARCH 31 ONE YEAR AHEAD OF SCHEDULE, AS ANNUAL TAX REVENUES ARE LIKEY TO EXCEED FISCAL SPENDING BY MORE THAN 1.5 TRILLION YEN.

THE EXPECTED SURPLUS IS WAY ABOVE THE 1,331 BILLION YEN THE FINANCE MINISTRY HAD PLANNED TO RAISE IN DEBT-COVERING BONDS TO OFFSET REVENUE SHORTFALLS FOR FISCAL 1989.

TAX REVENUES FOR FISCAL 1989 WILL BE FIXED AT THE END OF JUNE AS REVENUES COLLECTED BY THAT MONTH ARE COUNTED FOR THE PREVIOUS FISCAL YEAR DUE TO A DELAY IN SOME KINDS OF TAX PAYMENTS.

THE FINANCE MINISTRY TO DATE HAS SKIPPED ANY ISSUANCE OF SUCH NATIONAL DEBTS FOR FISCAL 1989 THANKS TO BRISK TAX REVENUE GROWTH AGAINST THE BACKDROP OF THE BOOMING ECONOMY BASED ON BRISK DOMESTIC DEMAND.

IN APRIL, INCOME TAX REVENUES ROSE 33.3 PERCENT TO 1,673.1 BILLION YEN, WHILE CORPORATE TAX REVENUES GREW 11.5 PERCENT TO 738.1 BILLION YEN.

#90151k0100 05/31/1990 ~Japanese News Agency

TOKYO (MAY 31) KYODO - RECTIFYING TRADE IMBALANCE BETWEEN THE UNITED STATES AND THE EUROPEAN COMMUNITY (EC) SHOULD BE EASIER THAN CORRECTING JAPAN'S SURPLUS WITH THE U.S. BECAUSE THE AMERICAN AND EUROPEANS SHARE A GREAT NUMBER OF TRADING COMMODITIES, A BANK-AFFILIATED RESEARCH INSTITUTE SAID THURSDAY.

THE FUJI RESEARCH INSTITUTE, AN AFFILIATE OF FUJI BANK LTD., SAID IN A REPORT THAT THE U.S. TRADE DEFICIT WITH THE EC IN 1987 OF 20.6 BILLION DOLLARS TURNED INTO A SURPLUS OF 1.5 BILLION DOLLARS IN 1989 IN PART THROUGH ADJUSTMENT OF CURRENCY EXCHANGE RATES.

ACCORDING TO THE SURVEY, THE U.S. AND THE EC HAVE 13 ITEMS IN COMMON OUT OF THE TOP 30 TRADING COMMODITIES BETWEEN THE TWO IN VALUE TERMS, DISPLAYING A STRUCTURE OF "HORIZONTAL TRADE."

THE INSTITUTE ALSO SAID THAT U.S. TRADE IMBALANCES WITH ASIAN COUNTRIES HAVE BEEN REDUCED BY SOME 9 BILLION DOLLARS OVER THE TWO-YEAR PERIOD THROUGH 1989.

#90151k0104 05/31/1990 ~Japanese News Agency

TOKYO (MAY 31) KYODO - DRAWING SUPPORT FROM ROBUST SALES OF INDUSTRIAL MACHINERY, JAPAN'S SIX MAJOR COMPANIES MAKING HEAVY MACHINERY AND VESSELS POSTED GAINS IN UNCONSOLIDATED SALES FOR THE FISCAL YEAR ENDED ON MARCH 31.

ACCORDING TO EARNING REPORTS RELEASED BY THURSDAY, FOUR OF THE SIX CONCERNS ALSO SAW THEIR PRETAX PROFITS CLIMB, WITH YEAR-TO-YEAR GAINS RANGING FROM 18.7 PERCENT FOR ISHIKAWAJIMA-HARIMA HEAVY INDUSTRIES LTD. (IHI) AND 61.2 PERCENT FOR MITSUBISHI HEAVY INDUSTRIES LTD.

COMPANY OFFICIALS CITED ROBUST SALES IN THE HEAVY MACHINERY DIVISION AS WELL AS A RECOVERY IN SALES IN THE SHIPBUILDING DIVISION FROM A LINGERING

INDUSTRY-WIDE SLUMP.

THE BRIGHT BUSINESS PERFORMANCES ENABLED KAWASAKI HEAVY INDUSTRIES LTD., SUMITOMO HEAVY INDUSTRIES LTD. AND MITSUI ENGINEERING AND SHIPBUILDING CO. TO RESUME DIVIDEND PAYMENTS FOR THE FIRST TIME IN FIVE YEARS.

MITSUBISHI RETAINED ITS POSITION AS JAPAN'S TOP HEAVY MACHINERY MAKER, REPORTING A 22.4 PERCENT RISE IN SALES, TOTALING A RECORD 2,094.2 BILLION YEN, AND A 61.2 PERCENT PRETAX PROFIT GAIN, AMOUNTING TO 140.4 BILLION YEN.

KAWASAKI CAME SECOND WITH RECORD SALES OF 812.8 BILLION YEN, UP 5.9 PERCENT, AND A PRETAX PROFIT OF 17.1 BILLION YEN, UP 24.6 PERCENT.

FOR THE CURRENT FISCAL YEAR ENDING ON MARCH 31, 1991, ALL THE COMPANIES, EXCEPT HITACHI ZOSEN CORP., PREDICT INCREASES IN BOTH SALES AND PRETAX PROFITS.

FOLLOWING ARE COMPANY-BY-COMPANY RESULTS IN BILLIONS OF YEN WITH YEAR-TO-YEAR PERCENTAGE COMPARISIONS IN PARENTHESES:

	SALES	PRETAX PROFIT	AFTERTAX PROFIT
MITSUBISHI	2,094.2 (" 22.4)	140.4 (" 61.2)	55.2 (" 12.1)
KAWASAKI	812.8 (" 5.9)	17.1 (" 24.6)	12.3 (" 54.9)
IHI	632.8 (" 2.8)	15.3 (" 18.7)	12.1 (" 20.4)
HITACHI	307.7 (" 35.4)	2.0 (NA)	1.9 (" 69.1)
SUMITOMO	267.6 (" 3.6)	3.5 (" 42.8)	3.5 (" 70.0)
MITSUI	197.7 (" 11.6)	3.8 (- 64.9)	2.5 (NA)

NOTE: YEAR-TO-YEAR COMPARISIONS FOR HITACHI'S PRETAX PROFIT AND MITSUI'S AFTERTAX PROFIT ARE NOT AVAILABLE BECAUSE THEY INCURRED LOSSES IN THE PREVIOUS YEAR.

BONN, MAY 31 KYODO - THE WEST GERMAN GOVERNMENT WILL CONTINUE TO SUPPORT A EUROPEAN COMMON MARKET OPEN TO NON-EC COUNTRIES, CHANCELLOR HELMUT KOHL STRESSED IN HIS TALKS HERE THURSDAY WITH PRIME MINISTER LEE KUAN YEW OF SINGAPORE.

ACCORDING TO GOVERNMENT SPOKESMAN HANS KLEIN, BOTH LEADERS UNDERLINED THEIR INTEREST IN FURTHER IMPROVING BILATERAL ECONOMIC COOPERATION.

WITH A TRADE VOLUME AMOUNTING TO 5.6 BILLION MARKS IN 1989, WEST GERMANY IS SINGAPORE'S MAJOR NON-PACIFIC TRADE PARTNER AND SIXTH WORLDWIDE.

LEE ARRIVED WEDNESDAY IN BONN FOR AN OFFICIAL FIVE-DAY VISIT AT THE INVITATION OF KOHL ON THE LAST LEG OF A TOUR THAT HAS ALSO TAKEN HIM TO

TURKEY, FRANCE, AND BRITAIN.

THE TALKS, WHICH WERE HELD IN A FRIENDLY ATMOSPHERE, FOCUSED ON EXTENSION OF BILATERAL POLITICAL AND ECONOMIC RELATIONS, THE POLITICAL SITUATION IN EASTERN EUROPE, THE GERMAN UNIFICATION PROCESS AND EUROPEAN INTEGRATION, AS WELL AS DEVELOPMENTS IN SOUTHEAST ASIA AND CHINA, THE GOVERNMENT SPOKESMAN SAID.

KOHL THANKED LEE FOR HIS ''CLEAR AND FRIENDLY ATTITUDE TOWARD GERMAN UNITY '' KLEIN SAID.

#90151m0002 05/31/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (MAY 31) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"It is not a question so much of what the dollar is doing as much as what's really going on in the world," says TOM BARMAN of CREDIT SUISSE, describing why the currency market is all over the place with the dollar being strong against some currencies and weak against others. "So the market is looking for some direction and that direction doesn't seem to be coming from any one place." He continues, "The dollar is reasonably, fairly valued in a short-term sense. ... The dollar though, at these levels, is a little bit like a man dancing on the top of a souffle. We can't be sure it is going to hold these levels." (FNN "Marketwrap", 5/30)

"It was pretty much a day of position-squaring ahead of Friday's [U.S. May employment] numbers," says SUSAN BABCOCK, a corporate dealer for HONGKONG SHANGHAI BANK in New York. She reports the dollar ended mostly higher in a quiet session dominated by cross trading that featured selling of marks and a roller-coaster ride by sterling. (Reuters, 5/30)

In the face of a softening economy, JOHN LONSKI of MOODY'S INVESTORS SERVICE believes the Fed will ease. "If the economy remains flat much longer that could reduce inflationary pressures by enough to allow the Fed to ease monetary policy, and this is precisely what we foresee right now." (CNBC "Business View", 5/30)

"We've basically carried the [bond] rally as far as we can without further evidence of economic weakness," says CHARLES LIEBERMANN, senior economist at MANUFACTURERS HANOVER SECURITIES. He feels that the economy is still relatively strong, and therefore believes that the bond market has run its course. (CNBC "Market Wrap-Up", 5/30)

By late yesterday the Fed funds rate was trading at 7%, well below the 8 1/4% rate that is widely seen as the Federal Reserve Board's target. "The funds rate is often volatile on the final day of the two-week reserve period, and I would not read anything more into what happened to the funds rate than that," says RUDOLF THUNBERG, an economist at RIED THUNBERG & COMPANY, an investment advisory firm in Westport, Conn. "There is no reason to suspect the Fed has changed its apparent target of 8 1/4% funds." (NYT, 5/31)

"The treasury market is in an upbeat mood," says CAROLINE BAUM of TELERATE concerning its anticipated reception of employment figures tomorrow. "The expectation is for a number that would reinforce the 1 past few months' employment reports, signifying weak growth. Any sign of strength would probably mean the risk is to the downside." (FNN "World Business Report", 5/31)

THE ECONOMY:

"The economy is not booming, but [it is] not going into a recession either " says SUNG WON SOHN of NORWEST CORPORATION in Minneapolis. He believes that interest rates will not be going up and that economic growth will continue to be modest for awhile. (NYT, 5/31)

"The economy is doing what it has to do to in terms of clearing itself and freeing itself of the inefficiencies and the excesses and the other circumstances that had developed over the years, particularly in the '80s " says MONTE GORDON of the DREYFUS CORP. He believes this process will be a drag on growth but will result in an economy that avoids a recession at least through 1990 and avoids the risk of inflation. (FNN "Marketwrap", 5/30)

"The [economic] numbers [released yesterday] mean that the economy's going nowhere -- and that helps stocks and bonds because people won't need money and interest rates will come down," says TRACY HERRICK, economist for JEFFERIES & COMPANY in San Francisco. (NYT, 5/30)

RICHARD RIPPE of DEAN WITTER REYNOLDS believes the decline in retail sales and the index for leading economic indicators will translate into Fed easing. "I think the growth rate of the economy will be slow enough that the inflation numbers will return to the 4% to 4 1/2% zone, and if those forecasts are correct, I think there's room for interest rates to come down further over the next few months." ("Nightly Business Report", 5/30)

ALLEN SINAI, chief economist with BOSTON CO. ECONOMIC ADVISORS INC. says that although second-quarter economic information so far depicts a soft economy, gross national product should still grow close to 2% this year, after inflation. ("USA Today", 5/31)

"I think it's overall fairly good news," says KERMIT BAKER of CAHNERS ECONOMICS regarding the drop in retail sales and the index of leading economic indicators for April. "It means inflation won't get out of control as people had feared, and interest rates can probably soften a little bit." (CNBC "Business View", 5/30)

Commenting on the 0.2% drop in the index of leading economic indicators, ALFRED SMITH, a senior vice president of the NCNB CORPORATION in Charlotte N.C., says, "It doesn't signal any shift in the momentum of economic activity." (NYT, 5/31)

DAVID JONES, an economist with AUBREY G. LANSTON & CO., says the leading economic indicators index is "forecasting significant weakness in the next two to three months." ("USA Today", 5/31)

IN WASHINGTON:

PRESIDENT BUSH was told by his top arms control negotiators that talks have advanced to the point that he and MIKHAIL GORBACHEV will be able to issue an "agreement in principle" that they have resolved the major outstanding issues of a landmark Strategic Arms Reduction Treaty (START). They also are prepared to issue a second joint statement proposing objectives for broader and deeper cuts in a successor START II pact according to a White House official. Prospects of an agreement are much dimmer on Germany and Lithuania according to SECRETARY OF STATE JAMES BAKER. White House officials said Bush was advised that these difficult issues are not likely to be resolved here, but it may be possible to "set a direction" toward a future accord. ("The Washington Post", 5/31) 2

The Clean Air Bill will cost each and every one of us, says WALTER WILLIAMS, CEO of BETHLEHEM STEEL. "Who's going to pay for it?" he asks, and answers, "Society's going to pay for it. So whatever we have to pay, we've got to pass on." (FNN "Business Tonight", 5/30)

#90151p3525 05/31/1990 ~PR Newswire

BOSTON (MAY 31) PR NEWSWIRE - The probability that the earth will get at least 2 degrees Celsius (3.5 degrees Fahrenheit) hotter in the next hundred years is better than even, say nearly two thirds of a group of climate scientists. The results are part of a worldwide survey conducted by Global Environmental Change Report (GECR), a twice-monthly international newsletter of policy, science, and industry news covering ozone depletion, global warming, deforestation, and acid rain.

Thirty-one percent of the scientists surveyed don't think the odds of global warming are greater than 50 percent. A substantial majority of the respondents (73 percent) think climate change would be significantly

detrimental to human life. And, while the experts are divided on the scientific evidence, 89 percent still think the nations of the world should act now to reduce emissions that may cause warming.

GECR's survey also found that more than three quarters of the climate scientists believe that global warming is happening now, although only 41 percent of that subset believe that that conclusion can be drawn from available scientific evidence.

Two months ago, GECR sent questionnaires to 1,500 scientists around the world. The names were picked randomly from the publication's database of some 5,000 global environmental change researchers. The 23-question form was designed to assess scientific opinion on climate change rather than to measure conclusions drawn from the available evidence.

Three hundred and thirty scientists in 41 countries responded, giving the data a margin of error of plus or minus 5 percent (the 95 percent confidence interval is at most plus or minus 5 percent). Of the respondents, 39 percent work for government agencies, 34 percent are academics. Nineteen percent of all respondents are actively developing or using computerized global climate models.

Asked about an array of possible effects of global warming, 91 percent of the GECR survey respondents said global warming would alter rainfall patterns, shifting world agricultural breadbaskets. Eighty-eight percent said warming would cause sea levels to rise, although only 25 percent thought levels would rise as much as 1.5 meters in the next century. Sixty-six percent said they thought the severity of tropical storms would increase with warming, but a significant 55 respondents refused to answer this question with a simple yes or no. Eighty-four percent say the oceans would moderate climate change; that number drops to 64 percent for those who think clouds will moderate change. Forty-five respondents ducked the cloud question, an indicator of the uncertainties in that area of research.

The survey also polled the scientists for their perception of the media attention given to climate change. One fifth (20 percent) said the media attention was "premature, given current evidence." Fifty-six percent said media coverage of global warming is appropriate, and another 18 percent felt coverage was "inadequate, considering the threat."

The conclusions? A surprisingly large number of scientists agree on the need to reduce emissions. Even most (79 percent) of the 31 percent who feel a 2 degree C warming is unlikely still believe we should begin taking steps to reduce emissions - as a precaution. And a majority of the scientists believe that climate change - if it happens - would pose real problems for mankind. A final surprise was the 80 percent of the sample who believe that some human-induced warming is occurring right now.

Copies of the survey and tabulated responses are available on request. Global Environmental Change Report is published by Cutter Information Corp. of Arlington, Mass. Cutter publishes nine business-to-business newsletters, including four on environmental topics. In addition to GECR, Cutter publishes Oil Spill Intelligence Report, Energy Design Update, and Indoor Air Quality Update.

#90151p3541 05/31/1990 ~PR Newswire

PHILADELPHIA (MAY 31) PR NEWSWIRE - Pep Boys -- Manny, Moe & Jack (NYSE: PBY), the nation's leading automotive aftermarket retail chain, today announced record sales and earnings for the 13 weeks ended May 5, 1990.

Operating Results Sales for the quarter ended May 5, 1990, rose to a record $213,034,000, 19.5 percent greater than the $178,327,000 that was recorded last year. Sales in stores that were open both years increased 7.3 percent.

Earnings for the period were a record $9,440,000, a 23.8 percent increase over the $7,626,000 that was achieved last year. Earnings per share were $.17, a 21.4 percent increase over the $.14 that was recorded last year.

Store Expansion Program Five new automotive supercenters were opened during the first quarter and one outmoded unit was closed. The five new units, all of which include 10 bay service centers, were opened in Greensboro, N.C.; Palmdale, Calif.; Fresno, Calif.; Charlotte, N.C., and Tallahassee, Fla.

Pep Boys operated 285 units in 16 states as of May 5, 1990, and said it expects to open approximately 33 additional automotive supercenters during the balance of the current fiscal year.

Commentary Pep Boys' Chief Executive Officer Mitchell G. Leibovitz made the following comment:

"We were pleased with our first quarter results. The 7.3 percent increase in same store sales exceeded budget and was achieved in comparison with our strongest quarterly same store sales increase of 1989, 6.6 percent. Gross margins, which were under pressure throughout much of last year, have rebounded nicely as a result of improvements in acquisition cost, sales mix and pricing strategy. We look forward to the balance of fiscal 1990 with enthusiasm and are confident that a substantial increase in earnings will be achieved."

EL SEGUNDO, CA (MAY 31) PR NEWSWIRE - INFONET, the leading international value-added network services company, today announced that it will interconnect its worldwide NOTICE 400 electronic messaging service with Soft Switch X.400 Gateways.

NOTICE 400 is based on the X.400 data format, envelope and routing standard for messaging recommended by the international standards committee, CCITT. The service is accessible in more than 100 countries for worldwide electronic mail, facsimile and telex transmissions. Users may also transmit binary files via NOTICE 400 without first converting them to ASCII text.

Soft Switch X.400 Gateways will connect NOTICE 400 users through Soft Switch Central on an INFONET client's IBM mainframe. Soft Switch Central is an advanced function, multi-protocol electronic mail switch, or Message Transfer Agent (MTA), that enables more than 40 proprietary E-mail systems to communicate.

These proprietary electronic messaging systems include: IBM's Office Vision, PROFS and DISOSS; Digital's All-in-1 and VMS Mail; Wang OFFICE; Hewlett-Packard's Desk Manager; Banyan's VINES Mail; 3Com's 3+Mail, Consumers Software's Network Courier; cc: Mail and Enable's Higgins Mail.

According to Soft Switch President Michael D. Zisman, global reach is a key part of the value Soft Switch provides its 300 customers worldwide. "Our customers expect local support globally and the INFONET service helps us to deliver that," commented Zisman.

Local INFONET professionals in countries throughout the world connect users to the NOTICE 400 service, hold on-site education and training classes and provide ongoing support. In the process, these INFONET representatives help NOTICE 400 customers understand the regulatory guidelines governing transnational communications in their respective countries.

Established in 1970, INFONET is the leading standards-based, international value-added network services company. It provides communication and computer services and directly supports those services worldwide. The company is jointly owned by MCI and 10 major telecommunications administrations in Europe and the Asia-Pacific.

MADRID (MAY 31) PR NEWSWIRE - ENDESA (NYSE: ELE), the major electric utility in Spain, reported today that Spain's Minister of Industry and Energy has announced his ministry's decision not to permit the inclusion of expenditures relating to necessary repairs and required modernization of the Vandellos I Nuclear Power Plant in the base rate for electricity. A current estimate of these expenditures amount to 33 billion pesetas (approximately US$317 million). The Vandellos I Nuclear Power Plant has been closed since October 1989, following a non-nuclear incident and fire.

In light of the ministry's decision, the owner and operator of the 500-MW gas-graphite Vandellos I Plant, HIFRENSA, has decided to request the termination of its operator's license and to take the steps necessary for closing and dismantling the facility. ENRESA, the state- owned company in charge of nuclear waste treatment and disposal, will have the responsibility for decommissioning the facility. The ministry has stated that HIFRENSA's shareholders are to recover their investment and direct expenses related to the closing of the plant without incurring accounting losses. ENDESA's subsidiary, ENHER, holds a 23 percent interest in HIFRENSA. ENDESA believes that the closing of the Vandellos I Plant will not have a material effect on its consolidated balance sheet or results of operations.

PHOENIX, AZ (MAY 31) PR NEWSWIRE - The board of directors of StatesWest Airlines Inc. (NASDAQ: SWAL) has voted to reverse split the outstanding common stock on a one-for-six basis effective for stockholders of record on June 15, 1990. As a result of the split, stockholders will receive one share of common stock of the company for every six shares they hold as of the record date upon surrender of their present stock certificates.

Rudy R. Miller, chairman and chief executive officer stated, "The action was taken after recommendations from Wall Street investment firms that the company's common stock should receive better coverage in the financial community, thus benefiting the shareholders of StatesWest."

The company will purchase any fractional shares resulting from the split, at a price equal to the average of the closing bid and ask prices of the stock on the record date, as adjusted for the split. The company will send a letter to its stockholders which explains the procedure for receiving new certificates representing their shares and payment of any sum due in connection with the stock split or share purchase.

StatesWest also announced today that it is extending the termination date

of its Series A Common Stock Purchase Warrants (CUSIP No. 857657 11 8) which were issued in its April 1987 public offering to Sept. 1, 1990. All other terms and conditions of such warrants will remain the same, but will reflect the split.

StatesWest Airlines commenced flight operations Oct. 1, 1986 and on April 5, 1990, entered into a joint marketing service agreement with USAir (NYSE: U) to become effective July 15, 1990. USAir is the dominant major carrier in California. As part of the agreement, StatesWest will operate under the name USAir Express and all of the company's flights will carry USAir's designator code in the airline reservation systems.

The company operates one of the newest fleets of regional prop-jet aircraft in the United States. Present destinations include the Southern California locations of Burbank, Los Angeles, Orange County, San Diego and Santa Barbara, along with the Arizona cities of Phoenix, Tucson, Lake Havasu City, Sierra Vista/Ft. Huachuca and Laughlin, Nev./Bullhead City, Ariz. StatesWest operates 88 daily departures between these locations.

DOMINGUEZ, CA (MAY 31) PR NEWSWIRE - Pic 'N' Save Corp. (NASDAQ: PICN) announced today that The United States District Court of Los Angeles has granted its request for a temporary restraining order and has enjoined Girard Partners, L.P. from engaging in any solicitations until Tuesday, June 5, at which time Pic 'N Save's motion for a preliminary injunction will be heard.

In granting Pic 'N Save's motion, the Court found that Pic 'N' Save had raised serious questions going to the merits of its claims that Girard had violated applicable securities laws in conducting its solicitation. The Court noted, however, that it was not making a final ruling on the merits of Pic 'N' Save's motion for a preliminary injunction.

In order to preserve the status quo pending the preliminary injunction hearing, the Court ordered Pic 'N' Save not to solicit during the same period.

#90151p3558 05/31/1990 ~PR Newswire

LONDON (MAY 31) PR NEWSWIRE - British Gas (NYSE: BRG) today announced its

results for the financial year which ended on March 31, 1990.

British Gas reported increases in turnover, post-tax profit and dividend -- in spite of the exceptionally warm weather which affected sales of gas. The results also reflect the implementation of the Monopolies and Mergers Commission recommendations on contract gas sales to industry and commerce. These factors were more than offset by an improved performance from the company's Exploration and Production business, which more than trebled its operating profit as a result of increased sales and higher international oil prices, and by reduced group tax charges.

During the year British Gas continued to expand its business horizons abroad.

-- A recommended final dividend of 7.3 pence (net) which brings the total dividend for the year to 10.5p, an increase of 16.7 percent on 1988/89.

-- Current cost profit attributable to shareholders increased by pounds sterling 60 million to 680 million pounds sterling, in spite of a 2.2 percent decrease in operating profit mainly due to the exceptionally warm weather.

-- Operating profit of the Exploration and Production business increased by 255 percent to 149 million pounds.

-- Tariff gas sales volumes fell as a result of the warm weather: the underlying trend, at normal temperature, however, was an increase of around 2.5 percent in sales volumes.

-- Contract gas sales volumes recovered strongly, largely as a result of interruptible contracts.

-- British Gas added around 280,000 customers, and around 600,000 additional gas central heating systems were installed.

-- A gas transportation department was established to carry gas -- at a charge -- for competing gas suppliers.

-- British Gas signed a supply contract with Lakeland Power -- its first for the new generation of gas-fired power stations.

-- Turnover from installation and contracting work rose: appliance trading turnover fell, reflecting the general trend in the retail market.

-- Disconnections for non-payment of gas bills fell by 52 percent.

ONTACT: British Gas public relations or investor relations in London: 71-821-1444.

CHATSWORTH, CA (MAY 31) PR NEWSWIRE - The Software Toolworks, Inc. (NASDAQ: TWRX), a Chatsworth-based developer and publisher of personal productivity, education and entertainment software for personal computers and the Nintendo Entertainment System, today reported revenue and net income for its year that ended March 31, 1990, after giving effect to the March 1990 merger with Mindscape Inc. which was accounted for as a pooling of interests.

Revenue for the three-month period ended March 31, 1990, increased 78 percent to $21,946,000 from $12,322,000 for the comparable three- month period last year. Net income for the current quarter increased 217 percent to $2,347,000 from $740,000 for the comparable period last year, in spite of a $1,200,000 non-recurring charge connected with the Mindscape merger. Earnings per share increased to $0.12 per share from $0.05 per share even though average shares outstanding increased to 20,274,000 from 16,014,000. Contributing to the increase were several new OEM agreements and the company's release of Infiltrator on the Nintendo Entertainment System and World Atlas on the PC and CD ROM formats. Additionally, existing Nintendo products such as Paperboy and Road Blaster and computer software products such as The Hunt for Red October added to the company's fourth quarter revenues.

Revenue for the year ended March 31, 1990, rose 96 percent to $68,689,000 from $34,978,000 for the prior year. Net income for that period increased to $2,591,000 from a net loss of $(4,269,000) for the corresponding period last year. Earnings per share increased to $0.14 per share from $(0.29) net loss per share.

Les Crane, chairman and CEO of the Software Toolworks, Inc., stated, "We are delighted with our fourth quarter and yearly results. Excluding the effects of the Mindscape merger, the company has met or exceeded analysts' expectations."

Crane also announced that the company has signed a letter of intent with Canon, Inc., for the development of a software installation and menuing program for use in the Canon Navigator IBM PC compatible computer to be released later this year.

#90151p3560 05/31/1990 ~PR Newswire

LEICESTER, NY (MAY 31) PR NEWSWIRE - Thomas N. Hendrickson, president and chief executive officer of CPAC, Inc. (NASDAQ: CPAK), today announced that the company exceeded fiscal year earnings projections for the fourth consecutive year, and has declared its first cash dividend of $0.06 per share. "It has been almost nine years since our initial public offering, and we are pleased to now be in a position to further reward our shareholders," Hendrickson said. The dividend will be paid on Aug. 3, 1990, to shareholders of record at the close of business on June 29, 1990.

For the fiscal year ended March 31, 1990, CPAC reported record sales of $26.7 million, compared with $25.5 million in the previous fiscal year. Net income of $1,489,000 (excluding $54,000 of extraordinary income) was up 22 percent from last year's net income of $1,221,000 (excluding $90,000 of extraordinary income). Earnings per share, excluding extraordinary income of $0.02, increased to $0.65 per share from last year's earnings of $0.54 per share, excluding extraordinary income of $0.04 per share.

CPAC, Inc., also posted a record fourth quarter with sales of $5.7 million compared with sales of $5.6 million for the same period last year. Net income, excluding extraordinary income, increased 61 percent to $379,000 compared to $235,000 during the same quarter last year. Earnings per share increased 70 percent in the fourth quarter from $0.10 per share last year to $0.17 per share this year.

Hendrickson noted that these profits were recorded even after CPAC had

experienced significant losses and write-offs in its two equipment companies during the fiscal year. The two businesses were consolidated into a single facility in the fourth quarter, and all moving expenses, inventory adjustments and reorganization costs were expensed in that quarter.

Robert C. Isaacs, president of both CPAC chemical companies (Allied and Trebla), said, "Trebla's recent increase in private label business and in international sales helped us overcome the fourth quarter seasonality that is usually experienced in the photographic industry." Trebla manufactures photographic chemicals for all size photolabs, and has pioneered the photographic industry in the production of recyclable chemicals for pollution control. Isaacs also reported that gains in the Allied Photo Products division were attributable to intensive marketing efforts and reductions in operating expenses. Allied Photo Products Co., Inc., produces chemicals for the medical, dental, graphic arts and microfilm industries.

CPAC, Inc., a manufacturer of chemicals and pollution control equipment for the imaging industries, was recently listed for the second consecutive year as one of America's top 100 best small companies in Business Week.

CHICAGO (MAY 31) PR NEWSWIRE - EAC Industries, Inc. (AMEX: EAC), today announced that it has been successful in achieving an informal restructuring of both the trade creditors of Ideal Security Hardware Corporation and its lines of credit with its lender, BT Commercial Corporation.

In order to avoid a bankruptcy filing, Ideal proposed to pay its trade vendors all amounts due them commencing June 1, 1990 over a 24 month period. Over 90 percent of the unsecured creditors have agreed to this payout and, more importantly, to support Ideal with future trade credit.

BT Commercial Corporation has agreed to extend its financing by one year, to May 31, 1991, and to again provide the needed financing for Ideal to produce its successful line of Christmas tree stands.

The company has previously announced a change in the senior management of its Ideal unit with Vern Diedrick replacing Don MacPherson as president. Diedrick has extensive industrial experience and is a welcome addition to the EAC management team.

EAC is a holding company serving the hardware industry and

point-of-purchase advertising market through its subsidiary companies.

SYRACUSE, NY (MAY 31) PR NEWSWIRE - Niagara Mohawk Power Corporation (NYSE: NMK) announced today that it will redeem 640,000 shares of preferred stock, 10.75 percent series ($25 par value) on June 30, 1990. As of May 31, 1990, a total of 960,000 shares of this series of preferred stock was outstanding.

The preferred stock will be redeemed through operation of the mandatory and optional sinking fund at the redemption price of $25 per share, together with accrued and unpaid dividends to June 30, 1990. On and after June 30, 1990, dividends on the shares called for redemption will cease to accrue.

Niagara Mohawk will act as redemption agent for shares of preferred stock called for redemption.

The record date for determination of shares of stock to be redeemed will be May 18, 1990. Also on that date, stop transfer instructions will be placed on the shares called for redemption. A notice of redemption will be mailed by Niagara Mohawk to the registered holder of each share of preferred stock called for redemption at the last address appearing on the books of the company on May 18, 1990.

The optional redemption of this preferred stock is part of an ongoing program by Niagara Mohawk to reduce its average cost of capital.

YANCEYVILLE, NC (MAY 31) PR NEWSWIRE - Lamplighter Industries, Inc., a manufacturer of high-technology lighting products, today announced that it is the beneficiary of $50,000 in seed equity investment from the North Carolina Technological Development Authority, or TDA.

The money, administered through the Authority's Innovation Research Fund, will be used to further enhance the brightness of the company's ceramic electroluminescence (EL) lighting technology. Under terms of the joint agreement, $10,000 of the total $50,000 will be allocated to North Carolina State University, to fund advanced ceramics research, which the company may use as a supplement to its own research efforts.

"We believe this investment by the state represents an important vote of confidence in the future of this company," declared Dr. Arden Kelton, Lamplighter CEO. "It gives us a better opportunity to demonstrate the enormous potential of ceramic EL, and to show just what we're capable of accomplishing with it," he said.

Lamplighter Industries holds proprietary rights under a patent for ceramic electroluminesence. It manufactures products for both the OEM and consumer markets, including backlighting for instrument panels and clocks, lighted signs, and lighted architectural and information displays. The technology is known to have a number of competitive advantages in comparison with incandescent and fluorescent fixtures, notably its low operating cost, durability, and slender profile.

Since its inception, the Technological Development Authority has invested $3.0 million in small business research and development through the Innovation Research Fund. Applicants for TDA funds must survive a rigorous process of review regarding the technological, commerical and financial feasibility of their projects before any awards can be made.

WAUKESHA, WI (MAY 31) PR NEWSWIRE - The Waukesha County Commission has selected Westinghouse Electric Corp. (NYSE: WX) as the preferred vendor to negotiate a contract for a resource recovery center here.

Pending successful completion of negotiations, Westinghouse will design, construct and operate the facility.

The plant, equipped with two Westinghouse O'Connor combustors, will process up to 600 tons of municipal solid waste each day to fuel a 20-megawatt (net) power plant. Construction could begin by November of next year, with commercial operation scheduled for early 1994.

Prior to construction, the plant must receive environmental permits from

the Wisconsin Department of Natural Resources. The Westinghouse design must meet all current federal, state and local requirements, including the U.S. Environmental Protection Agency's New Source Performance Standards.

Waukesha County will finance the plant with project revenue bonds. Electricity generated at the facility will be sold to Wisconsin Electric Power Co.

Today's announcement marks the second time within two months that Westinghouse has been selected as the preferred vendor for a waste-to-energy plant. In March, the corporation was selected to negotiate a full-service contract for a 1,700 ton-per-day, 57-megawatt plant in Monmouth County, N.J.

The corporation presently has three resource recovery plants in operation, one under construction, five under contract and two under contract negotiation. The plants have a combined capacity of nearly 12,000 tons of municipal solid waste per day.

ASHLAND, KY (MAY 31) PR NEWSWIRE - Ashland Oil Inc. (NYSE: ASH) announced today that a jury in a state court in Charleston, W.Va., awarded four plaintiffs a total of $10.3 million in compensatory and punitive damages in a civil lawsuit.

The lawsuit sought nuisance damages for emissions from Ashland's Catlettsburg, Ky., refinery.

A company spokesman said, "We believe the jury's verdict was erroneous and the award was ridiculous. Ashland believes numerous errors were made during the course of the trial which prejudiced Ashland's ability to defend itself. Ashland plans to aggressively pursue an appeal to the West Virginia Supreme Court and is confident that it will be successful."

Several related suits are pending.

MINNEAPOLIS (MAY 31) PR NEWSWIRE - First Bank System, Inc. (NYSE: FBS), announced today that it will raise $175 million through a private placement of approximately 12.6 million shares of newly issued common stock at $13.875 per share, subject to regulatory approval. Investors in the private placement are Corporate Partners, an investment partnership, which is investing $145 million in the newly issued shares, and the State Board of Administration of Florida, which is investing $30 million. FBS also announced that, in connection with this transaction, it has updated its review of the credit portfolio and is reconfirming the adequacy of reserve for loan losses at this time.

The price of the newly issued common stock was conditionally established during an extensive period of due diligence conducted by Corporate Partners. During that time, the stock traded at an average price of approximately $13.50 per share. Details of the transaction's terms are provided in an accompanying summary.

The additional common equity investment improves FBS's common equity ratio from 4.0 percent to 4.8 percent and its Tier 1 capital ratio from 4.6 percent to 5.4 percent on a pro forma basis at March 31, 1990. Book value per share increases from $12.75 per share to $12.93 per share (pro forma) as of March 31, 1990.

Corporate Partners is a $1.6 billion fund organized, on behalf of major U.S. and foreign institutions, to make friendly, minority investments in the equity of companies with significant potential for long-term growth in

shareholder value. Corporate Partners' equity investments to date include the Albert Fisher Group PLC, Zapata Gulf Marine Corporation, Transco Energy Company and Polaroid Corporation. Corporate Partners is managed by Lester Pollack and Jonathan Kagan.

First Bank System is a regional bank holding company headquartered in the Upper Midwest with assets of $20.8 billion. The company provides complete financial services to individuals and institutions through 35 banks and trust companies with more than 150 offices located in Minnesota, Colorado, Montana, North Dakota, South Dakota, Washington and Wisconsin.

#90151p3584 05/31/1990 ~PR Newswire

SAN LEANDRO, CA (MAY 31) PR NEWSWIRE - ECI Environmental, Inc. (AMEX: ECI) today provided an outlook for revenue and net income for its third quarter ending May 31, 1990. According to Kurt Zimmerman, chairman of the board, the company expects revenue for the period to be between $5.6 million and $6.0 million resulting in net income of approximately $180,000, or $.04 per share. For the third quarter of fiscal 1989, ECI reported revenue of $5.5 million and net income of $672,000, or $.19 per share.

"Our results for the third quarter are being affected by a variety of factors," stated Zimmerman. "We have experienced cost overruns from original estimates on several of our major projects and additional development costs for our southern California operations. Also, during February and March, we believe there was a discernible decline in new projects awarded in the San Francisco commercial high rise marketplace.

"We have taken corrective action to address both the San Francisco marketplace and our operating results as discussed for the third quarter and we presently believe there should be a material improvement in our fourth quarter revenue and net income levels. However, while we anticipate that revenue for the fiscal year ending Aug. 31, 1990 will exceed the $22.3 million generated in fiscal 1989, net income for the year will fall short of the $1.9 million achieved last year."

Zimmerman noted that the company has established a new operations position of project management who will undertake the coordination of the work activities on site for each project. In addition, the criteria used to develop all project bids has been strengthened at the corporate level. "Through this enhanced project management we anticipate profit margins to improve beginning in the fourth quarter of this current fiscal year," stated Zimmerman.

Looking ahead, Zimmerman expressed optimism about ECI's future. "We will enter the fourth quarter of fiscal 1990 with one of our highest backlog levels," said Zimmerman. "In addition, in southern California, the market for our services remains strong due to the continued investment in commercial real estate by Pacific Rim concerns, existing structure renovation and the implementation of Los Angeles County's sprinkler retrofit regulations. In order to increase our current market share in this region we have taken several steps to strengthen the management team in our Burbank office and expect to see results from this effort during fiscal 1991."

ECI Environmental, Inc. is one of the leading providers of asbestos remediation services in the western United States. The company primarily serves the California commercial market through offices in Oakland and Burbank.

PITTSBURGH (MAY 31) PR NEWSWIRE - Westinghouse Electric Corp. (NYSE: WX) today announced it will begin purchasing up to 20 million shares of its common stock.

Chairman John C. Marous said the purchases will be through open-market transactions or through private purchases at prices management considers appropriate over the next 12 to 18 months.

"At the current market price, we believe Westinghouse stock is an attractive investment and the stock purchase is in keeping with our strategic direction of enhancing shareholder value," Marous said.

"Even with these purchases, we will maintain excellent liquidity and have the flexibility to continue a strong capital investment program and to take advantage of attractive acquisition opportunities."

Initial funding for the share purchase program may be from existing cash, internally generated funds or short-term debt.

Shearson Lehman Hutton Inc. and the First Boston Corp. have been retained as financial advisors.

ARLINGTON HEIGHTS, IL (MAY 31) PR NEWSWIRE - Toyoda Machinery USA Inc., headquartered here, today announced that it has entered into an agreement with AEG Westinghouse Industrial Automation Corporation to cooperate in the marketing of flexible machining cells and systems in this country.

Both companies are leaders in their respective markets. Toyoda Machinery USA is one of this country's leading engineers, manufacturers, and marketers of automated flexible machining cells and systems as well as stand-alone machine tools. AEG's Unicell family of integrated software products and its computer integration expertise have become the standards in many industries.

"The combined strengths of our two companies will be a powerful force in the industrial automation marketplace," said Michael J. Wicken, president and CEO of Toyoda Machinery USA. "It's been our opinion that the lack of this type of technology relationship has restrained this country's adoption of computer integrated manufacturing at a rate comparable to Western Europe and Japan. We've been actively seeking a technology partner of the status of AEG for some time."

Wicken added: "The market for computer integrated manufacturing systems is still in its infancy and has been fragmented by shifting vendor relationships. We're certain that this agreement between such major and trusted forces in their respective technologies will engender the kind of confidence on the part of U.S. manufacturers to adopt these systems in order to attain or retain competitiveness within the global economy."

Toyoda Machinery USA Inc. is a major manufacturer and distributor of CNC vertical and horizontal machining centers, CNC turning centers, CNC and manual universal, toolroom and production grinders, programmable controllers, industrial robots, flexible machining cells and manufacturing systems, and flexible transfer lines. Through its Grinders for Industry subsidiary, the company is also a leading manufacturer and remanufacturer of special purpose and automotive grinding machines. The company has three major manufacturing plants and a number of demonstration, sales, and service facilities in the U.S. It employs 590.

AEG Westinghouse Industrial Automation Corporation is headquartered in

Pittsburgh and is a subsidiary of AEG, an international high technology manufacturer of electronic and microelectronic systems for the automation, transportation, communication and information industries, and itself a member of the Daimler Benz Group.

KILLINGTON, VT (MAY 31) PR NEWSWIRE - S-K-I Ltd. (NASDAQ: SKII) today reported third quarter earnings of $6,211,000, or $1.09 per share, an 8.5 percent increase over last year's third quarter earnings of $5,726,000, or $1.00 per share. Revenues for the quarter increased 9.5 percent to $37,093,000.

For the first nine months of fiscal year 1990, S-K-I's earnings were $6,241,000, or $1.09 per share on revenues of $80,428,000 compared to earnings of $7,040,000 or $1.23 per share, on revenues of $78,322,000 the prior year. Results for the nine-month period one year ago included $917,000, or 16 cents per share, which represented a non-recurring gain from the recovery of certain tax credit reserves.

Preston Leete Smith, president and chief executive officer, said, "Snow depths were maintained throughout the season due to S-K-I's snowmaking capabilities. That, combined with our marketing efforts, allowed S-K-I to capture a larger share of the market during the last half of the season following an unusual pattern of business during the first half of the year. Skier visits at our Vermont and Bear Mountain areas, after lagging early in the season, improved significantly in the third quarter, bringing skier visits virtually even with last season's total while at the same time the company continued to reduce overall expense levels."

S-K-I Ltd., which has maintained its profitability for 30 years, owns and operates the two largest ski resorts in the Eastern United States, Killington and Mount Snow in Vermont, and the Bear Mountain Ski Area in Big Bear Lake, Calif. In addition, the company has a management contract with the Pico Peak Ski Area, which is adjacent to its Killington resort.

JERICHO, NY (MAY 31) PR NEWSWIRE - American Claims Evaluation, Inc. (NASDAQ: AMCE), today announced revenues of approximately $4,363,835 and net earnings per share of 55 cents for its fiscal year ending March 31, 1990, as compared to revenues of $2,687,118 and net earnings of 17 cents per share for the comparable period ended March 31, 1989. This reflects an increase in revenues and net earnings of approximately 62 percent and 233 percent, respectively, over last year's comparable figures.

In addition, in its fourth quarter ending March 31, 1990, the company had sales of $1,345,014 and earnings per share of 17 cents as compared to sales of $786,982 and net earnings of 8 cents per share for the comparable period, reflecting an increase in revenues of approximately 71 percent and an increase in earnings of 131 percent over last year's comparable period.

AMERICAN CLAIMS EVALUATION, INC.

Periods ended	Three Months		Year	
March 31	1990	1989	1990	1989
Revenues	$1,345,014	$ 786,982	$4,363,835	$2,687,118
Operating earnings	174,523	56,400	606,697	69,039
Earns. bef. provision for income taxes	245,699	128,203	847,017	266,330
Net earnings	$ 159,699	$ 69,103	$ 520,517	$ 156,330
Net earns. per share of common stock	$.17	$.08	$.55	$.17

Gary Gelman, president and chairman, stated that he was pleased with the continuing uptrend in the company's revenues and earnings and indicated that management is attempting to continue this trend in the current fiscal year. He also noted that, while he had indicated some concern about the company's increased backlog of evaluations at the end of the previous fiscal year, management felt this had now been resolved in view of the fact that the backlog of claims to be processed, when taken as a percentage of estimated revenues, had decreased. The current backlog of evaluations is approximately 4,059 as at March 31, 1990, as compared to approximately 2,400 and 3,325 evaluations as at March 31, 1989, and May 31 1989, respectively.

American Claims Evaluation, Inc., is a health care services company primarily engaged in reviewing hospital bills throughout the United States for insurance carriers and corporations which maintain self- insurance programs. The company's services are designed to enable insurers to pay only for those medical services that were actually provided to the patient.

CALGARY, ALBERTA (MAY 31) PR NEWSWIRE - Shell Canada Ltd. (Montreal, Vancouver, Alberta, Toronto: SHC) today announced completion of a detailed review of its petroleum product and chemical manufacturing and marketing business.

Implementation of business and organizational restructuring initiatives will start immediately, the company said, and will continue into 1991. Shell's oil products segment, now organized on a regional basis, will be separated into distinct businesses, each with a national focus.

''This will lead to a more effective organization,'' J. M. MacLeod, president and chief executive officer, said.

''It will result in fewer levels of management, more responsiveness to market dynamics and opportunities, and clearer lines of internal delegation, responsibility and accountability. These actions will contribute to achieving significant, sustained improvement in earnings and return on investment and position Shell to meet the competitive challenges of the 1990s.''

This restructuring of business activities, together with other programs in progress, will lead to a phased reduction of regular and contract staff totaling some 800 before the end of 1991.

MacLeod said the company is committed to deal openly and fairly with its employees in managing the reduction.

Coincident with the restructuring, the company will be making extensive capital investments to modernize and improve the efficiency of Shell-branded retail and agency networks as well as the distribution and manufacturing infrastructure.

''The rejuvenation of the marketing networks will coincide with creating new business relationships between Shell and its dealers and agents, giving them more scope and flexibility to provide enhanced service to our customers,'' MacLeod said.

"The company will also undertake a staged divestment of under-performing assets to focus on growth and further strengthen the business base.''

The staff-related expense associated with restructuring is estimated at $45 million before tax, or approximately $25 million after tax, which will

be charged against second-quarter earnings.

HARRISON, NJ (MAY 31) PR NEWSWIRE - Lechters, Inc. (NASDAQ: LECH) today reported sales of $10.8 million for the four-week period ended May 26, 1990, an increase of 20 percent over sales of $9.0 million during May 1989. The company's comparable store sales increased 2.0 percent during May 1990 as compared with May 1989.

Sales of $44.0 million for the seventeen weeks ended May 26, 1990 represent an increase of 22 percent over sales of $36.1 million for the same period in 1989. Year-to-date through May 26, 1990, the company's comparable store sales were up 1.4 percent.

Lechters, Inc., based in Harrison, N.J., operates 321 specialty housewares stores in thirty states as compared to 271 stores on May 27, 1989, an increase of 18 percent.

BOCA RATON, FL (MAY 31) PR NEWSWIRE - The Peripheral Systems Division of Siemens Information Systems Inc. has announced the opening of a sales office here to market Siemens complete line of high-speed non-impact printing systems. The division now operates 22 offices nationwide.

The new office, located at Siemens Information Systems Bldg. 3, 5500 Broken Sound Blvd. in the Arvida Park of Commerce, will provide sales and services to Siemens high-speed printing systems in Broward, Dade, Monroe and Palm Beach counties. The area was previously supported from Siemens Atlanta location.

Lawrence Greenley has been named account manager and will head up the location's staff of support and sales personnel.

Peripheral Systems Division Director, Dominick Caputo cited the sales and marketing expertise of Greenley, who was an IBM Account Marketing Representative for 18 years prior to joining Siemens. In this position, he was responsible for marketing computer products throughout South Florida. "Larry is a valuable addition to our sales team," said Caputo. "He is extremely knowledgeable in terms of area businesses."

Greenley is a graduate of Michigan State University, where he obtained a B.A. degree in business administration. He has been a resident of Fort Lauderdale for 20 years.

A division of Boca Raton-based Siemens Information Systems, Siemens Peripheral Systems Division, headquartered in Anaheim, Calif., markets high-speed, high performance, non-impact printing systems, based on laser and LED technologies. Siemens Information Systems is one of the Siemens U.S. group of companines which had 1989 sales of $3.5 billion, employing more than 31,000 people at 400 sales and service locations and more than 50 manufacturing sites.

KENTON, OH (MAY 31) PR NEWSWIRE - Rockwell International Corp.'s Automotive Operations has produced its five-millionth trailer axle at its Kenton facility. This significant occasion was celebrated at a ceremony here today.

"Producing five million trailer axles is a noteworthy milestone for our company and in our role as a major trailer products supplier," stated Prakash R. Mulchandani, general manager - Trailer Products and manager of the facility, which is part of Rockwell's On-Highway Products business.

"This achievement further strengthens our commitment to continual improvement in manufacturing, product quality and prompt customer delivery. Each of our 700 employees has contributed as a team member to this accomplishment," he added, noting that Rockwell produces more truck trailer axles than any other manufacturer in the world.

The 537,000-square-foot Kenton plant, which produces trailer axles for medium- and heavy-duty truck trailer applications worldwide, manufactured more than 200,000 axles in 1989.

Mulchandani noted the plant's cooperative partnership with its union, Allied Industrial Workers (AIW) - Local 109, has helped the facility maintain high-quality component standards, as well as winning attitudes.

Union President Donnovan L. Klinger added, "We continue to work on open communications and maximizing employees' experiences into a competitive tool. That kind of dedication has helped reach this production milestone."

Built in 1949 and expanded four times, the Kenton facility also produces air disc brake rotors, automatic slack adjusters, hubs and drums, and has

earned several customer quality awards, including Freightliner's Masters of Quality in 1988, 1989, and 1990.

Most recently, the facility began producing air disc brake rotors and automatic slack adjusters as a result of plant workers' cooperation and new government training programs. In 1990, the company began outfitting trailer axles with new Q Plus longer service life cam brakes, and in limited numbers, trailer anti-lock brake systems.

Rockwell's On-Highway Products organization produces an evolving lineup of drivetrain components and component systems - including axles, brakes, clutches, drivelines, transmissions, anti-lock brake systems and a complete lineup of aftermarket components for commercial medium- and heavy-duty vehicle manufacturers around the world.

RIVERHEAD, NY (MAY 31) PR NEWSWIRE - Suffolk Bancorp (NASDAQ: SUBK) today announced that the board of directors, at their regular meeting on May 29, 1990, voted to increase the regular quarterly dividend to $0.14 per share of common stock to all shareholders of record on June 15, 1990, payable on July 2, 1990. The aggregate dividend will be $463,070.44 based on 3,307,646 shares outstanding.

Edward J. Merz, president and chief executive officer, commented: "This regular dividend is 7.7 percent higher than the dividend paid by the company last quarter. It is an expression of the board's confidence in the company's performance for the remainder of the year. Our company's history has been one of stable, consistent performance. Suffolk Bancorp has always managed its assets conservatively and efficiently. In this time of confusion in the banking industry, with loan losses running at post-war highs, this strategy has paid off for our company, avoiding the kind of losses which impair many banks' profitability. Once again, the Suffolk County National Bank was included in "The Highest Rated Banks in America 1989," published by Sheshunoff Information Services, Inc. of Austin, Texas. This means that our banking subsidiary was among the top one-fifth of banks, rated by capital, asset quality, earnings, and liquidity. We followed this with the strongest first quarter in the company's history. We believe that our shareholders are entitled to share directly in the company's earnings, particularly in a time of depressed share prices. This dividend does exactly that."

Suffolk Bancorp is a one-bank holding company engaged in the commercial banking business through the Suffolk County National Bank, a full service commercial bank headquartered in Riverhead, N.Y. "SCNB" is Suffolk Bancorp's wholly owned subsidiary. Organized in 1890, the Suffolk County National Bank is the second largest independent bank headquartered on Long Island.

The Suffolk County National Bank maintains offices in Center Moriches, Cutchogue, Hampton Bays, Mattituck, Medford, Port Jefferson, Riverhead, Wading River, and Westhampton Beach, N.Y.

Suffolk Bancorp also owns Island Computer Corporation of New York, a bank data-service company located in Bohemia, N.Y.

NEW YORK (MAY 31) PR NEWSWIRE - Reuters Information Services Inc. today announced an agreement with Fulton Prebon (USA) Inc. for delivery of broker fixed income and money market information via Reuter money and capital markets services.

Fulton Prebon (USA) Inc. is a leading fixed income and foreign exchange broker based in New York.

Information to be provided includes U.S. Treasury and mortgage- backed repurchase agreements (REPOs), forward rate agreements, and strip rates. It will also include U.S. dollar and non-dollar interest rate swaps, caps, collars and floors, as well as spot and forward currency rates, Fed Funds, and Eurodollar rates.

Fulton Prebon (USA) Inc. will write daily commentary on Fed Funds and the money markets. Weekly economic analyses will be provided by American Business Econometrics, an associate of Fulton Prebon.

"This agreement is a key part of our continuing strategy to provide Reuter subscribers with data of the highest quality from the fixed income and money markets," said Brian Vaughan, president, Reuters Information Services Inc.

Reuters Information Services Inc. is the primary operating company in North America of Reuters Holdings PLC (NASDAQ: RTRSY).

Reuters supplies a wide range of services to both business subscribers and to the news media. It obtains its information from around 160 exchanges and over-the-counter markets, from data contributed directly by more than 3,715 subscribers in 82 countries and from a network of over 1,270 journalists, photographers and cameramen. Reuters distributes information via around 199,700 video terminals and teleprinters. This includes information directly transmitted to clients' computers.

NEW YORK (MAY 31) PR NEWSWIRE - At a hearing May 30 in Los Angeles, Superior Court Judge Ronald M. Sohigian dismissed all claims in a lawsuit filed March 21 by the Washington-based Public Citizen consumer organization against Pfizer and Shiley, Pfizer Inc. (NYSE: PFE) announced today.

In the suit, Public Citizen had sought to use a California statute to require Pfizer and Shiley to communicate directly with all recipients

worldwide of Shiley's Convexo/Concave heart valves. The suit also sought payment for medical monitoring and psychological counseling for heart valve recipients.

Dr. Roger M. Sachs, vice president and medical director of Shiley, said, "Our patient awareness efforts are directed to physicians, who are in the best position to communicate with patients and provide them with informed advice about their individual medical conditions. We believed from the outset that this lawsuit was totally without merit."

This policy was reiterated at a recent Congressional hearing by an FDA representative who stated: "FDA has chosen to notify the physicians who use or implant these valves rather than communicating with patients."

The hearing focused on legal arguments interpreting the extent to which the federal Food, Drug and Cosmetic Act governs exclusively the regulation of medical devices, such as heart valves. Judge Sohigian's decision thus upholds the supremacy of federal regulatory law relating to medical devices and leaves intact the longstanding policy of both FDA and Pfizer and Shiley of communicating with patients through their physicians.

The dismissal was granted without leave to amend the complaint.

DENVER (MAY 31) PR NEWSWIRE - Asset Investors Corp. (NYSE: AIC) today announced its board of directors had declared a quarterly dividend of 45 cents per share payable on June 29, 1990 to stockholders of record on June 15, 1990. This is the company's third consecutive quarterly dividend of 45 cents per share.

In addition, the company also announced that it had completed the renewal and restructuring of its bank credit agreement. Under the revised one-year agreement, the maximum amount available to be borrowed will be $30,000,000 and will decline by $5,000,000 at the end of each quarter with a final maturity date of May 31, 1991. The company currently is borrowing $16,713,000 under the bank credit agreement and $24,849,000 on short-term borrowings with repurchase agreements.

Spencer I. Browne, Asset Investors' president and chief executive officer, stated that he was pleased that the company, in this difficult credit environment, was able to renew its bank line of credit. "The company has reduced its short-term debt-to-equity ratio to less than .25 to 1 from .39 to 1 during the past year," Browne said, "largely as a result of

applying substantially all of its cash flow, after making annual dividend distributions, which equal at least 95 percent of the company's net income for federal income tax purposes, to reduce bank debt and other short-term borrowings."

Separately, the company announced that Donald L. Kortz, Lewis S. Ranieri and Richard L. Robinson were elected directors at its annual meeting of stockholders held May 17, 1990. In addition, the company announced that the annual meeting was adjourned to June 7, 1990 to allow stockholders additional time to vote on a proposal to amend the company's 1986 Stock Option Plan.

Asset Investors is a real estate investment trust that generates income primarily from a portfolio of ownership interests and issuances of collateralized mortgage obligations and other mortgage-related assets.

RESTON, VA (MAY 31) PR NEWSWIRE - Lafarge Corporation (NYSE: LAF) today

announced that a new aggregate and asphalt company has been formed from assets purchased from Parker Brothers & Co., Inc., of Houston. Lafarge will own 52 percent of the venture.

The new company, known as Parker Lafarge, Inc., headquartered in Houston, consists of a limestone quarry in New Braunfels, Texas, adjacent to Lafarge's Balcones cement plant; five distribution terminals in Houston; and the Western Railroad Company. Parker Lafarge is expected to yield over $40 million in sales annually.

Robert W. Murdoch, president and chief executive officer of Lafarge Corporation, commented that the acquisition "fits well with Lafarge's construction materials and cement operations in Texas."

Lafarge Corporation is one of the largest manufacturers of construction materials and cement in North America and is a significant supplier of concrete-based construction materials. The company operates more than 250 construction materials operations in Canada and the United States, as well as 14 full-production cement plants with a combined annual rated capacity of 11 million tons, supplemented by six grinding plants and four deep water ocean import terminals.

A Fortune 500 company headquartered in Reston, Lafarge Corporation totaled $1.5 billion in sales in 1989.

WALTHAM, MA (MAY 31) PR NEWSWIRE - Thermo Instrument Systems, Inc. (AMEX: THI) announced today that it has completed, through a wholly owned subsidiary, a cash tender offer for the outstanding shares of common stock of Finnigan Corporation (NASDAQ: FNNG) at $20 per share. Preliminary figures indicate that approximately 4.9 million shares were tendered and accepted for payment, which, together with previously acquired shares, results in total ownership by Thermo Instrument and its affiliates of approximately 90 percent of the outstanding shares of Finnigan common stock.

The offer and withdrawal rights expired at 12:00 midnight, Eastern Daylight Time, Wednesday, May 30, 1990. Thermo Instrument and Finnigan have entered into a definitive merger agreement under which those holders of Finnigan common stock who failed to tender their shares in the tender offer would be entitled to receive $20 per share in cash, and Finnigan would become a wholly owned subsidiary of Thermo Instrument.

Arvin H. Smith, president and chief executive officer of Thermo Instrument Systems, said, "We'll be building upon Finnigan Corporation's clear leadership in manufacturing advanced instruments for environmental, organic, and biochemical analyses. The prospects for continued growth and success certainly are exciting, and we believe we've strengthened our position as a premier provider of advanced instruments worldwide with major facilities throughout North America, Europe and Asia."

Finnigan is the world's leading manufacturer of mass spectrometers. Its products, sold under the trade name Finnigan MAT, are used in industrial, analytical, service, university, and government research laboratories. Applications include analysis for pharmaceuticals, foods, chemicals, petrochemicals, and environmental, health, and forensic science. Based in San Jose, Calif., the company has manufacturing facilities there, in the United Kingdom, and a major product development, engineering, and manufacturing site in Bremen, West Germany.

Thermo Instrument Systems develops, manufactures, and markets analytical instruments used to detect and monitor air pollution, radioactivity, complex chemical compounds, and toxic metals and other elements in a broad range of liquids and solids. The company also provides environmental science and engineering services, laboratory- based testing and nuclear health physics services. Thermo Instrument Systems is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

#90151p3637 05/31/1990 ~PR Newswire

THE WOODLANDS, TX (MAY 31) PR NEWSWIRE - Mitchell Energy and Development Corp. (AMEX, PSE: MND) today reported net earnings of $6,667,000, or 14 cents per share, for the first three months of its current fiscal year. Revenues for the quarter ended April 30 amounted to $160,508,000. In the same period last year, the company earned $6,069,000, or 13 cents per share, on revenues of $158,222,000.

Chairman and President George P. Mitchell said the company's energy operations in the first quarter were adversely affected by unseasonably warm weather which drove down demand and prices for natural gas and natural gas liquids.

The sharp decline in spot-market gas prices led the exploration and production division to shut in most of the gas it sells at market-sensitive prices - a situation that has persisted into the second quarter.

Transmission and processing division operating earnings were ahead of those of the comparable prior-year period. Mitchell attributed the gain principally to higher pipeline volumes and realizations.

In the real estate division, operating earnings were lower because the prior-year period benefitted from the sale of a 50 percent interest in four industrial buildings at The Woodlands, the community the company is developing in the northern Houston metropolitan area. Excluding the $2 million gain on that sale, Mitchell said, the division's operating earnings were ahead in the current year.

As a result of a lower average debt balance, interest expense in the first quarter of the current year was considerably lower than in the comparable prior-year period.

However, Mitchell noted, substantial debt repayments were made at the end of the prior-year period using proceeds from gas contract settlements, and because of subsequent additions, the amount of debt outstanding at the end

of this year's first quarter exceeded the level at the end of the prior-year period.

Mitchell Energy and Development Corp. is a large independent energy company with real estate interests.

NUTLEY, NJ (MAY 31) PR NEWSWIRE - Hoffmann-La Roche Inc. today announced that ddC (dideoxycytidine) will soon be available to AIDS and advanced ARC patients who are intolerant to or have failed AZT (zidovudine) and also are intolerant to the experimental drug ddI (dideoxyinosine). This expanded access program has been approved by the Food and Drug Administration (FDA).

Dr. Whaijen Soo, M.D., Ph.D., director of the Clinical Virology Program at Roche, said that because clinical trials are ongoing, the safety and efficacy profile of ddC is still being evaluated.

"However," said Soo, "everyone involved with finding treatments for AIDS recognizes the critical need to provide an option for those individuals who cannot tolerate the currently available treatments."

Expanded access to ddC, also known as HIVID(TM), will be provided through an open-label safety study, which will be implemented by Roche on June 25, 1990. Beginning on that date, physicians may call 800-ddC-21-HIV, Monday through Friday, from 9 a.m. to 8 p.m., Eastern Daylight Time, for more information about entering a patient in the study.

Because ddC has not been studied previously in patients intolerant to ddI and AZT, the expanded access program will be carefully monitored in an attempt to identify any unexpected drug-related toxicities. For example, patients intolerant to ddI must not have experienced toxicities that overlap with those seen in patients receiving ddC.

This study also will attempt to collect data to monitor the efficacy of ddC in this population. In addition, during the first phase of this study, only investigators having experience with ddC will be permitted to administer the drug.

After data have been reviewed on the first 25 patients receiving four weeks of ddC treatment, and if no serious toxicities have occurred, any licensed physician who has experience in treating AIDS will be eligible to participate in this study.

Roche also has taken steps to amend and expand the two ongoing pivotal ddC clinical trials that are necessary for filing a New Drug Application (NDA) with the FDA.

The first pivotal trial compares ddC with AZT in patients with AIDS or advanced ARC. It is ongoing at more than 26 sites across the United States and is currently open to enrollment.

The second trial compares ddC with AZT in patients who have completed one year of treatment with AZT. This trial, which also is open to enrollment, has been expanded to include nine sites.

Patients in either study who become intolerant to AZT will be able to receive ddC. Furthermore, in keeping with AZT labeling changes, the dose of AZT given in both pivotal trials has been reduced to 600 mg a day.

ROSLYN, NY (MAY 31) PR NEWSWIRE - Cheyenne Software, Inc. (AMEX: CYE) today announced the appointment of James P. McNiel as director of business development. McNiel's responsibilities will include U.S. and international OEM accounts, as well as major sales opportunities and the customization of software for large OEM customers.

In making the announcement, Eli Oxenhorn, chairman and CEO of Cheyenne, said, "Cheyenne is in the forefront of network technology because we are committed to understanding and bringing solutions to the networking market. Jim's unique knowledge and successful management experience in product development and marketing make him a tremendous asset to Cheyenne. We're looking forward to working with Jim as we continue to make Cheyenne products the defacto standards in network technology."

McNiel was previously manager of LAN marketing, responsible for all LAN

product development and worldwide marketing at Maynard Electronics and Archive Corporation. Also prior to joining Cheyenne, McNiel was senior manager of advanced products for AST Research, a computer manufacturer, where he was responsible for development and marketing of all software and networking products, and also worked in the major accounts area. Additionally, McNiel who has a software engineering background, was a senior software manager at Lucasfilm Ltd., where he developed editing systems for film and video.

Cheyenne Software, founded in 1983 and publicly held since 1985, is a leading developer of sophisticated LAN and business management software products. Cheyenne's Network Products Group develops and markets ARCserve Monitrix and NetBack. Cheyenne's Business Analysis Group offers The Organization Analyst, a PC-based software product which is used for corporate restructuring.

CONTACT: Eli Oxenhorn, president, or Elliot Levine, vice president and CFO, both of Cheyenne Software, 516-484-5110.

#90151p3650 05/31/1990 ~PR Newswire

ATLANTA (MAY 31) PR NEWSWIRE - Marketing Communications Networks, a subsidiary of BellSouth Enterprises, today launched its first national distribution of the CableDirect Program, a new approach to distributing cents-off coupons.

The Brand Book(TM), CableDirect's coupon delivery vehicle, was mailed to 34 million households in the top 163 markets in the United States this week. "Our new approach to coupon sales promotion provides consumer goods marketers with access to the prime cable television market, creates an advertising synergy with our coupon vehicle - The Brand Book, and offers retail outlets the opportunity to use local advertising spots on the cable systems whose subscribers are receiving The Brand Book," said Michael Jackson, president of Marketing Communications Networks.

The CableDirect program consists of a stapled book of product category-exclusive coupons mailed to households in markets where cable systems sell local advertising. One week before the book reaches consumers, a 30-second spot describing the coupon book will appear on national cable television networks. For the next two weeks, additional 30-second commercials featuring participating brands will urge consumers' use of the book. Marketing Communications Networks will also place local cable television advertising for marketers that want to run brand or retail outlet advertising during the coupon drop.

"Results from our 1989 trials were much better than we anticipated and we believe that results from this, our first national mailing, will be even

more impressive," said Mr. Jackson.

Marketing Communications Networks (MCN) was created in 1988 by BellSouth Enterprises in order to explore integrated, targeted marketing programs utilizing both advertising and sales promotion vehicles. The CableDirect Program is MCN's initial project. MCN is headquartered in Atlanta and has offices in Chicago and New York.

BellSouth Enterprises manages a group of companies within BellSouth Corporation that provide advertising/publishing services, mobile telecommunications, and telecommunications and data processing equipment throughout the world. BellSouth Corporation is a $30 billion international telecommunications holding company headquartered in Atlanta.

#90151p3652 05/31/1990 ~PR Newswire

WEST ORANGE, NJ (MAY 31) PR NEWSWIRE - What written expression turns you off the most?

For communication expert Roger Flax, it's "needless to say" which, he said is "needless to say."

Flax is campaigning to eliminate "outdated, overused and imprecise" expressions from America's memos, letters and reports. He said, "Hackneyed, awkward, antiquated writing is bad business. It confuses, bores and irritates readers, while reducing the writer's credibility."

Flax is president of Motivational Systems, an international management development and communication training organization.

More than 7,500 recent participants in his company's writing programs for managers and executives listed the hackneyed expressions and phrases they find most annoying.

The 10 leading offenders and Flax's recommendations:

1. "To be perfectly honest" -- Eliminate! It implies that everything else has been dishonest.

2. "Needless to say" -- Needless? Then don't say it.

3. "Enclosed herewith, please find" -- Fine for a Dickens character, not for you. Use "enclosed is."

4. "As you know." "As you are well aware." "As per our conversation" --

Ban forever. It's unnecessary, even condescending and insulting, to tell people what they already know. Or to suggest that they can't remember speaking with you.

5. "I am writing this letter to inform you that" -- Never use. It's obvious that you're writing, that it's a letter, and that a letter informs.

6. "Please rest assured" -- Avoid. It sounds as if you're asking the reader to take a nap.

7. "At your earliest convenience." "As soon as possible" -- Give a specific date. Don't be vague. You may mean next Tuesday, but the reader may find 1992 more convenient.

8. "Please be advised that" -- Never use. It's absolutely meaningless.

9. "If you should have any further questions, please do not hesitate to contact me" -- "Please call me if you have any questions."

10. "For your perusal, review and consideration" -- Don't use -- unless you're writing to someone in the 18th century.

Other Flax suggestions:

-- "Thanking you in advance" -- "Thank you"
-- "I am in receipt of" -- "I received"
-- "We are of the opinion that" -- "We believe"
-- "In the event that" -- "If"
-- "Pursuant to your request" -- "As you requested"
-- "Your immediate attention to this matter would be greatly appreciated" -- "Please respond by (date)"
-- "Due to the fact that" -- "Due to," or "because"
-- "It is recommended that" - "I (or we) recommend"
-- "It is incumbent upon us" -- "We must"

"Express, don't impress," said Flax. "If you'd be embarrassed to say it, don't write it."

Motivational Systems, headquartered in West Orange, conducts a wide range of management development, communication and sales training programs for corporations, institutions and government agencies throughout the world.

WELLESLEY, MA (MAY 31) PR NEWSWIRE - The board of directors of EG&G, Inc.

(NYSE: EGG), meeting in West Germany on May 31, 1990, declared a regular quarterly dividend of 19 cents per share on the company's common stock. The dividend is payable on Aug. 10, 1990 to each stockholder of record at the close of business on July 20, 1990. EG&G has paid cash dividends to its stockholders, without interruption, for 25 years, and has increased its dividends every year since 1974.

The meeting in Wildbad, West Germany, coincided with a visit by EG&G's directors to Laboratorium Professor Dr. Berthold, the world's leading supplier of luminometer instruments used in molecular biology, and in immunoassay and cellular chemistry. The Berthold organization was acquired by EG&G in October of 1989.

EG&G is a Fortune 300 company with annual sales in excess of $1.6 billion. It employs more that 30,000 people in the design and manufacture of laboratory and field-test instruments and electronic and mechanical components for commerical customers worldwide. EG&G also provides systems engineering, precision component manufacturing, and test-site operating and management services to many agencies and laboratories of the U.S. government. The company's shares are traded on the New York Stock Exchange under the symbol EGG.

NORFOLK, VA (MAY 31) PR NEWSWIRE - BSI Holdings, Inc., (NASDAQ: BKRS) today announced it will continue to remain in the financial services industry. BSI Holdings, Inc., formerly Brokers Securities, Inc. sold its discount stock brokerage operation to Norstar Brokerage in December 1988.

The company will become a consumer finance concern engaged in purchasing installment sales contracts from selected retail vendors, automobile dealers and home improvement contractors in the Tidewater Virginia area.

Roger S. West III, Chairman, made the announcement at the annual meeting of shareholders today in Norfolk. In addition, the company announced that it will expand its present three member board of directors to five, and that a search has begun for a new chief executive officer to replace Roger West III. BSI Holdings, Inc. is a NASDAQ listed company and has 630 shareholders.

HOUSTON (MAY 31) PR NEWSWIRE - Wainoco Oil Corporation (NYSE: WOL) today announced completion of a horizontally drilled Austin Chalk oil discovery in La Salle County, Texas.

Pinnacle Royalty and Operating Company's No. 1 Joey Smith flowed 1,170 barrels of oil and 470 mcf of natural gas on a 24-hour test through a 20/64 inch choke with tubing pressures averaging 620 psi. The well was drilled 3,088 feet horizontally in the Austin Chalk Formation at a vertical depth of approximately 7,400. Wainoco owns a 19.75 percent working interest in the well and the surrounding 4,502-acre lease block.

Wainoco also reported that two additional Austin Chalk horizontal wells in which it owns a 50 percent and a 17.8125 percent interest, respectively, are currently drilling on other lease blocks in the general vicinity of the No. 1 Joey Smith.

Wainoco Oil Corporation is a publicly held oil and gas exploration and production company with operations throughout North America. Wainoco's common shares are listed on the New York and Alberta Stock Exchanges.

EXETER, NH (MAY 31) PR NEWSWIRE - Tyco Laboratories, Inc. (NYSE: TYC) announced today that its Simplex Wire and Cable Company subsidiary has received a contract valued at $42 million from AT&T Federal Systems Division for the first of a new family of undersea fiberoptic cables for the United States Navy. Under this contract, Simplex will manufacture state-of-the-art undersea fiberoptic cables to be used by the Navy for oceanographic research.

This contract reflects Simplex' continuing leadership in the field of undersea fiberoptic cables. Simplex has already manufactured more than 17,000 nautical miles of commerical fiberoptic undersea cables for AT&T and is currently manufacturing another 2,500 nautical miles for TAT-9, the second-generation fiberoptic cable system to cross the Atlantic in 1991.

Tyco is a manufacturer of fire protection/flow control systems, electrical and electronic components and packaging materials.

SIMSBURY, CT (MAY 31) PR NEWSWIRE - Kollmorgen Corporation (NYSE: KOL) announced today that, based on the proxies received and voted by Kollmorgen at the annual meeting of shareholders held today, Kollmorgen is confident that it has won its election contest against Vernitron Corporation by a significant margin. Kollmorgen stated that it believes all its nominees have been elected to the company's board of directors and that the Vernitron proposals have been decisively rejected by shareholders. The report of the inspectors of election with the final results of the voting will not be available for approximately one week.

John Youngblood, chairman and chief executive officer of Kollmorgen, stated, "We are gratified that Kollmorgen's shareholders have spoken so clearly and decisively today, and we are pleased with the strong support they have shown for our efforts to restructure the company and build the value of Kollmorgen for all our shareholders. We are firmly committed to aggressively pursuing the various elements of our restructuring program which we have outlined over the past several weeks and we are confident that, without the continued disruption of Vernitron's activities, the results of that program will benefit all our shareholders.

"We are also particularly thankful for the determination and perseverance of our employees and customers throughout the extensive period of disruption we have experienced," Youngblood concluded.

Kollmorgen has continuing operations focused into two business segments; special purpose servo motors and controls and electro-optical instruments.

ST. PETERSBURG, FL (MAY 31) PR NEWSWIRE - Geonex Corporation (NASDAQ: GEOX) has been awarded a $2.5 million contract with the Jacksonville Electric Authority (JEA) of Jacksonville, Fla.

The contract involves using sophisticated Global Positioning System surveying technology along with new aerial photography to create a highly accurate landbase of Jacksonville Electric Authority's 900 square mile service territory. After development of the landbase, Geonex will check, inventory and verify the entire electrical distribution network and then incorporate the information into the digital computer mapping system, providing a complete graphics and associated database package. After completion, Jacksonville Electric Authority will be able to maintain all of their outside plant in a highly accurate and advanced database which will allow rapid access, ease of design and more timely service to JEA's 300,000 customers.

Geonex Corporation, based in St. Petersburg, Fla., is the nation's largest geo-information company. Using the most advanced technology, Geonex provides mapping and resource interpretation services to telephone, electric and gas utilities, local, state and federal government agencies and a variety of commercial industries. Geonex now has overall competence in mapping for agriculture and forestry as well as oil, gas and mineral exploration. In the environmental and hazardous waste area, Geonex provides the following services through two units: analysis and testing services; and environmental hazardous waste site investigation and data base management services.

ATLANTA (MAY 31) PR NEWSWIRE - Academy Insurance Group Inc. (NASDAQ: ACIG) announced today that its executive committee has authorized management to explore the feasibility of a "going private" transaction, whereby the stock of all public shareholders of Academy would be acquired for approximately book value per share in cash.

In order to complete such a transaction, the company will need to obtain regulatory authority approvals and financing. Moreover, any such "going private" transaction must be approved by the company's board of directors and its shareholders. Preliminary discussions with regulatory authorities have taken place, as well as meetings with several financial institutions in connection with obtaining a financing commitment. While there can be no assurance that such approvals or financing will be obtained or that the transaction will be consummated, management believes, based on its discussions over the last few days, that such a transaction is feasible.

Academy Insurance Group Inc. is an insurance and financial services

company that provides life, health and property/casualty products to specialty or "niche" markets. The company's primary market is noncommissioned and petty officers and their families. Academy's products are endorsed by the Non Commissioned Officers Association (NCOA).

#90151p3690 05/31/1990 ~PR Newswire

LOUISVILLE, KY (MAY 31) PR NEWSWIRE - Humana Inc. (NYSE: HUM) has elected to call for redemption on July 2 all of its 8 1/2 percent Convertible Subordinated Debentures due August 15, 2009. The redemption price is $1,042.50 plus accrued interest of $32.35 from February 15 through July 2, for a total payment of $1,074.85 per $1,000 principal amount of debentures. Approximately $199,958,000 principal amount of debentures is outstanding.

An expiration deadline of 5:00 p.m. New York City time on June 18 has been established for converting the debentures into common stock. Bankers Trust Co., New York, is the conversion agent. The debentures are convertible at a price of $37.80 per share, which equals 26.455 shares of common stock per $1,000 principal amount of debentures. The last reported sale price of Humana common stock on the New York Stock Exchange-Composite Tape yesterday was $45.875.

Assuming full conversion, Humana's earnings per share would not be affected because the company has included the effect of equivalent shares in its earnings-per-share computation since the debentures were issued in 1984. The redemption will result in savings of approximately $17 million a year in interest costs.

So long as the market price of the company's common stock is at least $40.75 per share, a holder of the debentures who converts will receive common stock with a market value, plus cash in lieu of any fractional share, greater than the amount of cash the holder would be entitled to receive upon redemption.

In connection with its call for redemption of debentures, the company has today entered into a standby agreement whereby Salomon Brothers Inc will, subject to certain conditions, offer to purchase the debentures through June 18 at a flat price of $1,075.85 for each $1,000 principal amount. Salomon Brothers has agreed to convert all debentures so purchased.

In addition, Salomon Brothers will, at Humana's option, purchase and offer for resale the quantity of shares of common stock that remained unissued because debentures were not surrendered for conversion. Proceeds received under the standby agreement will be used to reimburse the company

for redemption payments for unconverted debentures.

In connection with the standby agreement with Salomon Brothers, a registration statement was filed today with and made effective by the Securities and Exchange Commission relating to 5,289,896 shares of Humana common stock, the maximum number of shares issuable upon the conversion of the debentures outstanding at the close of trading on the New York Stock Exchange on May 30.

A Notice of Redemption and a Letter of Transmittal (which may be used to surrender debentures for conversion, redemption or purchase by Salomon Brothers), together with a Prospectus covering the common stock that may be offered by Salomon Brothers are being mailed to all registered holders of the debentures. Copies of the Notice of Redemption, the Prospectus and the Letter of Transmittal may be obtained from the conversion and redemption agent, Bankers Trust Company, Corporate Trust and Agency Group, Securityholder Relations Department, P.O. Box 9006, Church Street Station, New York, New York, 10249, telephone (212) 250-6000.

Humana owns and operates 85 hospitals and operates health benefit plans for employee groups and Medicare beneficiaries.

HOUSTON (MAY 31) PR NEWSWIRE - Global Natural Resources Inc. (AMEX: GNR) announced today four successfully completed new wells which extend the productive area of three existing oil and gas fields. Two of the fields are located in the Hugoton region of southwest Kansas; the other field is located in the Texas state waters of the Gulf of Mexico.

In the Hugoton region, the Eatinger No. 3-10 produced 185 barrels of oil with no water on pump during a 24-hour production test from the Morrow Formation. The well was drilled as a step-out to Global's Hartland Field in Kearny County, Kan. Additional development drilling is planned. Global is the operator and owns a 37.5 percent working interest.

The Walker No. 5-20 pumped 203 barrels of oil per day with no water from the Morrow Formation and was completed as a new pool discovery adjacent to Global's Congdon NW Field, Finney County, Kan. Additional development drilling is planned. Global is the operator and owns a 37.5 percent working interest.

In the Texas state waters of the Gulf of Mexico, the Galveston Block 335-L No. 9 was dually completed in Miocene sands with the upper zone testing 2.24 million cubic feet of gas per day and 15 barrels of condensate with

1,750 pounds flowing tubing pressure on a 16/64-inch choke.

The lower zone tested 2.6 million cubic feet and 16 barrels of condensate with 1,995 pounds flowing tubing pressure on a 16/64-inch choke. Global owns a 12.5 percent working interest.

The Galveston Block 335-L No. 10 was completed in a new fault block and production tested gas at a rate of 3.2 million cubic feet, 20 barrels of condensate and 49 barrels of water per day with 2,230 pounds flowing tubing pressure on a 16/64-inch choke. Global owns a 12.5 percent working interest.

Global Natural Resources Inc. is a Houston-based energy company engaged in the exploration, development and production of oil and gas in North America and owns an interest in long-term oil and gas production sharing contracts in Indonesia.

#90151p3697 05/31/1990 ~PR Newswire

WORCESTER, MA (MAY 31) PR NEWSWIRE - Cambridge BioScience Corporation (NASDAQ: CBCX) today announced it has been granted a license from the United States Food and Drug Administration (FDA) for the recombinant MicroTrak(R) HIV-1 EIA (env & gag) test. Cambridge will manufacture the test, which will be distributed by Syva Company, a subsidiary of Syntex Corporation (NYSE: SYN).

MicroTrak is a new, second generation HIV-1 test which can be used on Syva's automated MicroTrak EIA System. It detects antibodies to HIV-1 in human serum or plasma, and gives results in about two hours.

Both MicroTrak and Cambridge BioScience's recently FDA-licensed recombinant EIA, Recombigen(R) (env & gag) HIV-1 EIA, use a CBC-patented recombinant antigen called CBre3. The antigen, derived from the envelope

portion of the HIV-1 virus, also forms the basis for CBC's five-minute Recombigen HIV-1 LA test, which was licensed by the FDA on Dec. 13, 1988.

CBre3 is a most sensitive marker for HIV-1 antibody detection, comprised of highly reactive and conserved regions of the HIV-1 virus glycoprotein. It is composed of those portions of the HIV-1 envelope polypeptides gp41 and gp120 which have been shown to be early serological markers of HIV infection. The test also used CBrg3, a recombinant version of the polypeptide p24 from the core or gag portion of the virus.

The recombinant MicroTrak HIV-1 EIA (env & gag) is a very sensitive and specific test for HIV-1 antibody testing. In clinical trials, it had a sensitivity of 100 percent and a specificity of 99.98 percent. The test was designed for use in hospitals, commercial clinical laboratories, and public health settings.

The MicroTrak Recombinant HIV-1 EIA (env & gag) test is available immediately through Syva Company.

Syva Company is a developer, manufacturer, and marketer of diagnostic tests and instrument systems. Syntex Corporation is an international health care company engaged in the research, development, manufacturing and marketing of human and animal pharmaceuticals and medical diagnostics.

Cambridge BioScience Corporation is a leader in recombinant technology, which it utilizes in the development and production of antigens, adjuvants and monoclonal antibodies, as the basis for its product lines of diagnostics, vaccines and therapeutics for humans and animals.

#90151p3698 05/31/1990 ~PR Newswire

NEW YORK (MAY 31) PR NEWSWIRE - John R. Stafford, chairman and chief executive officer of American Home Products Corporation (NYSE: AHP) announced today that Bernard Canavan, M.D., was elected president of the company. Dr. Canavan, 54, assumes the president's title which has been held since 1981 by Stafford, who is 52.

Canavan was previously executive vice president of American Home Products and chairman of its Wyeth-Ayerst Laboratories subsidiary. Prior to assuming these duties in August 1987, Canavan had, since 1984, been president of Wyeth Laboratories.

Canavan has been with American Home Products since 1969, serving in

various managerial capacities with Wyeth International Limited and before that with Wyeth Limited (Canada). Before joining American Home Products, Canavan was, for eight years, a practicing physician in Toronto.

In January 1990, Canavan was elected to the board of directors and assumed responsibility for most of the company's health care operations. In his new position, Canavan will be responsible for all of American Home Products' operations, which include the worldwide manufacture and marketing of prescription drugs, medical devices, supplies and instrumentation, over-the-counter medications, as well as food and household products.

Continuing to report directly to Stafford will be Robert G. Blount, executive vice president with responsibility for the finance and administration functions, and also Roger Kapp, senior vice president and general counsel, and Joseph Bock, senior vice president in charge of industrial relations. The company's ethical drug research and development activities, which previously reported to Canavan, will henceforth report to Fred Hassan, president of Wyeth-Ayerst Laboratories.

"American Home Products has become increasingly focused on health care, with 85 percent of our sales now coming from activities in that area," Stafford said. "It is most appropriate that as the company has become more concentrated in the areas of Ben Canavan's expertise, that he take on a greater role in the management of all our operations.

"His election symbolizes the company's growing emphasis on the fast-growing health care markets and our commitment to expand our research and development activities."

Canavan received his medical training at the University of Edinburgh M.B. Ch.B. He is a member of the College of Physicians and Surgeons of Ontario and of the Canadian and British Medical Association.

#90151p3704 05/31/1990 ~PR Newswire

NEW YORK (MAY 31) PR NEWSWIRE - Vernitron Corporation announced today that it believes a majority of Kollmorgen Corporation's (NYSE: KOL) common shares were cast in favor of four of Vernitron's nominees, and perhaps all six nominees, for election to Kollmorgen's board of directors at today's annual meeting of shareholders. Giving effect to the votes of the preferred stock issued to the Ruttenberg group, it appears that management may have won all six seats.

Stephen W. Bershad, Vernitron's chairman and chief executive officer, stated, "We are disappointed that we failed to gain a majority of the Kollmorgen board. The preferred stock voted by the Ruttenberg group was the decisive factor in this election. Without the preferred stock vote, we believe we would have had a clear victory. Shareholders have sent a strong message that they want Vernitron's auction and merger proposals and that they want Kollmorgen sold now. Shareholders have rejected management's record and programs."

Bershad added, "The facts are that without the approximately 1.7 million shares voted by the Ruttenberg's and the 1.4 million shares voted by management and related parties, very few independent shares voted in favor of management."

Bershad continued, "The failure of the courts to understand the harmful effect of 'white squire' preferred stock, such as the stock issued to the Ruttenberg's means that shareholders have been disenfranchised and management has succeeded in entrenching themselves. The global competitiveness of American industry can only be harmed by a system of corporate governance which fails to recognize unequivocally that shareholders, not management, are the true owners of a corporation. Nowhere is the harm more apparent than in the case of Kollmorgen and Vernitron, where the combination of the two businesses offers an opportunity for significant operating efficiencies which neither company can achieve alone."

Bershad also stated, "We still feel that the combination of Vernitron and Kollmorgen is in the best interests of shareholders. In light of the meeting's results, we are evaluating all of our options with respect to our investment in Kollmorgen. As part of our evaluation, we intend to

continue our dialogue with our fellow significant shareholders as to the best way to maximize the value of Kollmorgen shares. We also intend to pursue our claims against Kollmorgen in Federal Court."

A final tally of votes cast at the annual meeting is expected next week.

PASADENA, CA (MAY 31) PR NEWSWIRE - Jacobs Engineering Group Inc. (NYSE: JEC) today announced the acquisition of Pegasus Engineering Holdings Ltd. of Cork, Ireland.

Pegasus is one of the largest process engineering companies in Ireland. According to Noel G. Watson, president and chief operating officer of Jacobs, "This move has significant strategic importance to Jacobs in that it adds valuable technical resources and experience to our growing European operations. In addition, it provides further access to markets in Ireland, England, and continental Europe. It also solidifies our position as the largest full-service engineering and construction company in Ireland."

Pegasus was established in Cork, Ireland, in 1980 to provide process engineering and construction support services to the Irish chemical industry. Pegasus serves clients in the fine and bulk chemicals, pharmaceutical, and petroleum industries throughout Ireland and England, as well as elsewhere. The company was established by a group of chemical engineers led by Dr. James Healy and enjoys and excellent reputation for providing high quality engineering services, according to Watson.

"With Pegasus joining the Jacobs family, we expect to substantially increase our share of the Irish and U.K. markets for engineering and

construction projects and provide our existing clients with greater depth " said Arlan C. Emmert, Jacobs managing director in Dublin. "Jacobs also sees significant potential for growth in certain key markets in England and the continent through the Manchester office of Pegasus," according to Gerald L. Stevenson, group vice president of Jacobs.

Jacobs Engineering Group Inc. provides single-source environmental and hazardous waste management, consulting, engineering, design, architectural construction, construction management, contract maintenance, and operations services to government and industry worldwide.

MORRISTOWN, NJ (MAY 31) PR NEWSWIRE - AT&T Capital Corporation and Encore International, Inc. announced today that AT&T Capital completed its acquisition of 100 percent of Encore International.

Encore International will operate as a wholly owned subsidiary of AT&T Capital under the name AT&T Systems Leasing Corporation. AT&T Systems Leasing will specialize in buying, selling, leasing, financing and remarketing computer equipment such as mainframes, disk drives and other peripheral equipment.

Current management of Encore International will remain intact, operating from its Bloomfield Hills, Mich., headquarters. No further details of the agreement were disclosed.

AT&T Capital Corporation is a full-service finance company offering equipment leasing and financing services for both AT&T and non-AT&T equipment.

BACKGROUND: AT&T CAPITAL CORPORATION AT&T Credit Corporation was established by AT&T in 1984 to finance the sale of AT&T products. Rapid growth and diversification prompted the company to reorganize early in 1990 into AT&T Capital Corporation -- a new company with five strategic business units.

Today, AT&T Capital has evolved into a full-service equipment leasing and finance company offering creative lease terms for both AT&T and non-AT&T equipment.

The company has grown rapidly from no customer accounts in 1985 to more than 400,000 active accounts. Today, with some 1,300 employees, the company's assets exceed $4 billion.

In 1989, the company achieved a net income of $41.7 million and financed more than one-third of all AT&T business equipment sales in the United States.

AT&T Capital is organized into five market-focused subsidiaries as follows:

-- AT&T Credit Corporation, Irving H. Rothman, chief operating officer. AT&T Credit is focused on providing specialized financing for AT&T customers acquiring AT&T and associated non-AT&T equipment. -- AT&T Commercial Finance Corporation, Richard B. Lasken, chief operating officer. AT&T Commercial Finance provides inventory financing for dealers and distributors, vendor financing programs for manufacturers, financing for media customers, and leasing and financing programs for franchise owners and operators. -- AT&T Capital Holdings, Charles D. Van Sickle, chief operating officer. AT&T Capital Holdings offers lease and project financing, automotive fleet leasing to AT&T and AT&T employees, leasing services for products utilized by AT&T, and the coordination of the company's international efforts. -- AT&T Systems Leasing Corporation, Edward Cherney, chief operating officer. AT&T Systems Leasing participates in the specialized business of leasing and trading non-AT&T manufactured computer systems. -- Eaton Financial Corporation, Paul S. Gass, chief operating officer. Eaton Financial Corporation provides small-ticket, general purpose office and business equipment leasing services. AT&T Capital's corporate support units include: -- Corporate Resources, Ruth A. Morey, senior vice president. Corporate Resources is responsible for human resources, information systems, and facilities. -- Risk Management, G. Daniel McCarthy, general counsel. The general counsel oversees legal, corporate governance, public affairs, and credit, pricing, and residual policy. -- Finance, Maureen B. Tart, chief financial officer. The CFO coordinates the controller, treasury, tax, and business planning functions. -- Corporate Development, William T. Zadrozny, senior vice president. Corporate development is responsible for business development, corporate marketing and public relations, industry relations, and quality programs. Thomas C. Wajnert, chief executive officer of AT&T Capital, expects the company to double in size over the next five years to become one of the top five equipment leasing companies in the nation.

DENVER (MAY 31) PR NEWSWIRE - MinVen Gold Corp. (AMEX: MVG) today disclosed additional ore reserves at its Blackdome Mine, near Clinton, B.C. and updated prior exploration results.

Based on results from recent underground exploration and development activities using drifting and raising on the new No. 18 Vein, MinVen has increased the ore potential from 29,000 tons to 31,000 tons and to date has converted 16,707 of those tons into proven and probable mineable ore reserves (using a six-foot mining width) as follows:

Tons	Grade

		Gold	Silver
Proven	9,559	0.76	4.60
Probable	7,148	0.78	4.80
Total	16,707	0.77	4.69
Oz. contained	---	12,864	78,356

James A. Anderson, MinVen president and chief executive officer said, "We are obviously quite pleased with these new reserves from No. 18, and we believe that the vein has strong potential to provide continuing high-grade mill feed in the future."

Anderson noted that 1,133 tons of ore, grading 0.84 ounces of gold per ton has already been mined from the new vein. He also pointed out that the new vein will be mined using shrinkage stoping versus the more expensive cut-and-fill method, which is expected to result in significant savings.

Updating exploration information released last month, Anderson said that to date, 483 feet of drifting and raising, 21 drill holes and surface trenching have shown a potential of 31,000 tons of ore now estimated to average 0.72 ounces of gold which include the above-noted reserves.

MinVen Gold is a publicly held, Denver-based mining company with interests in five operating gold mines in the U.S. and Canada. Its shares are traded on the American, Toronto and Vancouver stock exchanges under the symbol MVG.

ST. LOUIS (MAY 31) PR NEWSWIRE - Thomas M. Gunn, vice president of program development at McDonnell Aircraft Co., has been named president of the McDonnell Douglas Helicopter Co. in Mesa, Ariz., effective today. The announcement was made by John F. McDonnell, chairman and chief executive officer of McDonnell Douglas Corp. (NYSE: MD)

Gunn, 46, replaces William P. Brown, who resigned earlier this month. Gunn joined the company in 1975 as manager of marketing operations at McDonnell Douglas Astronautics Co. after serving in various Washington-based government positions with the Federal Trade Commission, U.S. Committee on Judiciary, U.S. Senate Committee on Government Operations and the U.S. Senate Committee on Appropriations.

His previous McDonnell Douglas assignments include serving as special assistant to the vice president of engineering and marketing and director of government affairs at the company's corporate office.

Gunn transferred to McDonnell Aircraft in 1982 as director of marketing operations and strategic planning. That same year, he moved back to Washington as staff vice president in the company's office there. In 1986, he returned to St. Louis as vice president of marketing for McDonnell Aircraft. He was named to his most recent position in 1989.

In making the announcement, McDonnell said that Gunn had a proven track record as a leader with a strong commitment to further the Total Quality Management System process through continuous improvement at the helicopter company.

NEW YORK (MAY 31) PR NEWSWIRE - The American Stock Exchange announced that Community National Bancorp, Inc., today became the only Staten Island N.Y., company trading on the exchange. Community National Bancorp is the holding company for Community National Bank and Trust Company of New York, which operates in Staten Island and in Brooklyn and Manhattan.

The company began trading 3,029,017 common shares; 1,190,000 common stock purchase warrants; and $10,000,000 principal amount of 11 percent subordinated notes, due 1999.

Community National Bancorp, which also trades on the Boston Stock Exchange previously traded in the NASDAQ National Market System under the symbols CNBT and CNBTW.

Trading under ticker symbol CNB, the common stock opened on 100 shares at 6-3/8; the warrants, trading under ticker symbol CNB.WS, opened on a bid and offer of 7/8-1 1/8; and trading under ticker symbol CNB.A, the notes opened on a bid and offer of 70-76.

John J. Amodio, president and chief executive officer of Community National Bancorp, said the move to the American Stock Exchange is being made in connection with the company's continued growth and sound financial condition, and its strong desire to increase its visibility among the investment community.

Community National Bancorp was formed in June 1988 as the holding company for Community National Bank & Trust Company of New York, the successor to a national banking association chartered in 1965. The bank is the largest independent, community-oriented, commercial banking institution with headquarters in Staten Island. It has a network of seven branch offices, including five locations in Staten Island and one each in Brooklyn and

Manhattan.

The bank's primary services include commercial and consumer banking, cash servicing and trust administration. The bank places a special emphasis on lending to small and medium-sized commercial organizations, and also makes loans to individuals and originates and services mortgage loans to the secondary market.

QUEBEC (MAY 31) PR NEWSWIRE - ABB will invest $8 million in a manufacturing plant for electrical equipment in Canada and an additional $5 million for the construction phase. The plant is to be located in the Quebec Metro High Tech Park.

The ABB Group is the most important manufacturer in the electrotechnical and environmental technology sector employing some 215,000 people in 140 countries. The Power Transmission Segment is one of the eight business segments involved in worldwide operations comprising power generation, power transmission, power distribution, transportation, environmental control, communications, industrial automation and some related business.

These global activities generate $30 billion in annual sales of which the Power Transmission Segment constitutes approximately 20 percent, 10,000 employees work in the Power Transmission Segment in North America, which represents approximately one third of the total sector.

Quebec Metro High Tech Park is the site of ABB's 86,000 square foot new plant. Construction should begin within several weeks and the opening ceremony is planned for the fall of 1990. Pierre Racine has been named general manager for Quebec City's ABB plant.

In addition, ABB Canada has access to the expertise and global resources of the ABB Group to remain at the leading edge of technology in the North American market.

This recent investment will allow ABB to double its present employment in the Quebec region and will also bring a large increase in indirect jobs. At present, ABB Canada employs 5,000 people with annual sales of $1.3 billion of which $450 million comes from the Power Transmission Segment.

Established in North America since the beginning of the century, the companies that now make up ABB supply much of the equipment and systems for energy production, transportation and distribution to industry and residences. Through the acquisition in July 1989, of Westinghouse's

transmission and distribution facilities and of Combustion Engineering in January 1990. ABB's activities have acquired greater depth, further confirming its role as a leader in the electrotechnical field.

OAKBROOK TERRACE, IL (MAY 31) PR NEWSWIRE - Harry R. Thompson, chairman of Telesphere Communications Inc. (AMEX: TSP), a national long distance telephone company and provider of enhanced telecommunications services, today announced that a definitive agreement has been reached for the previously announced acquisition of National Telephone Services, Inc. ("NTS"), of Rockville, Md.

Under the definitive agreement, Telesphere will purchase NTS for $49 million consisting of $21 million in cash, $14 million in notes, and three million shares of Telesphere's common stock. Also, as previously announced, Williams Telecommunications Group ("WilTel") will provide Telesphere with a $26 million bridge loan enabling NTS to repay its debt to Ronald Haan, its major shareholder. Closing of the transaction is anticipated by Aug. 1, 1990. Telesphere is working with several major financial institutions concerning permanent financing for this transaction and working capital sufficient to the needs of the combined companies.

Commenting on the agreement, Thompson said, "We're pleased to have moved ahead to this very important stage in our announced acquisition of National Telephone Services. The agreement will allow us to begin the process of integrating the two companies which we believe to have outstanding synergies. We expect that process to be approaching 60 percent completion by the anticipated Aug. 1 closing date when the companies will begin to operate on a consolidated basis. Our ability to cross this threshold was greatly assisted by the close cooperation of WilTel." The combined companies are expected to have revenues approaching $500 million at the end of 1990.

Telesphere Communications Inc. operates a nationwide state-of-the- art, digital fiber optic network over which it provides long distance, operator interactive 900 and other enhanced telecommunications services.

#90151p3731 05/31/1990 ~PR Newswire

TORRANCE, CA (MAY 31) PR NEWSWIRE - Sales of cars produced at Toyota's three North American car plants increased 104 percent during the first

four months of 1990 versus 1989, continuing the company's move toward increased domestic production and fewer imports.

Sales of Toyota Camrys from Toyota Motor Manufacturing (TMM) in Georgetown Ky., and Corollas produced at New United Motor Manufacturing Inc. (NUMMI) in Fremont, Calif., and Toyota Motor Manufacturing Canada (TMMC) in Cambridge, Ontario, totalled 111,350 from January through April, 1990, compared to 54,535 for the same period in 1989.

In 1988, seven percent of the Corollas and Camrys sold in the United States were domestically produced. In 1989, that number increased to 47 percent, and in the first four months of this year, 69 percent were built in North America. Toyota's goal for the mid-90s is to have nearly half of all its cars and trucks sold in the United States built in North America.

"Toyota's emphasis on increased North American production is in keeping with our philosophy of globalization through localization," said Bob McCurry, executive vice president, Toyota Motor Sales U.S.A. Inc. (TMS/USA). "By producing where we sell, Toyota strengthens its worldwide capabilities and, at the same time, enhances its partnership with America."

Since Toyota began North American production in October, 1986, more than 448,000 domestically produced Camrys and Corollas have rolled off the line. "Although Toyota has made great strides in the past four years, this is just the beginning of Toyota's North American production and expansion of our North American supplier base," noted McCurry. "Next year, Toyota will begin production at NUMMI of 100,000 trucks annually to bring our total domestic production to almost 500,000 by the end of 1992."

Purchases of automotive components and raw materials from North American-based suppliers during 1989 by NUMMI, TMM, TMMC, TABC Inc. (manufacturer of Toyota truck beds and catalytic converters in Long Beach, Calif.), and TMS/USA totaled more than $1 billion, a 400 percent increase from the prior year. It is estimated that this total will rise to more than $1.8 billion a year by 1992.

As Toyota continues to expand North American production, exports of domestically produced models will continue to climb as well. In 1989 more than 5,800 Camrys and Corollas were exported to Taiwan with that number increasing to 20,000 this year. By 1992, approximately 50,000 vehicles will be exported along with some 100,000 engines.

#90151p3740 05/31/1990 ~PR Newswire

ROSEMEAD, CA (MAY 31) PR NEWSWIRE - The 100-year-old spinning disk meter, long a venerable component of the electric utility industry, is giving way to NetComm, Southern California Edison's revolutionary new remote electronic communication technology.

In a rapidly expanding industry, NetComm is spearheading a trend in the utility marketplace to further develop research programs that focus on ways to use energy more efficiently and provide customers with better value and more choices for their energy dollar.

Doug Whyte, Edison's NetComm project manager, said that NetComm is currently linking more than 1,000 Edison Valencia-area customers' new all-electronic meters to the utility's computers via a communications network of high-frequency packet switching radios (located atop street lights). The NetComm field tests include a variety of metering, monitoring and diagnostic functions and are preceding NetComm commercial meter testing now underway.

Whyte said that NetComm is proving to be the fastest, most reliable and least expensive communication system for electric utility applications such as remote metering, remote service diagnostics and energy management.

Whyte added that NetComm will replace many routine and labor- intensive field service functions with computer-based information systems, improving the quality and convenience of service while reducing costs.

More far reaching will be NetComm's affect on automating Edison's distribution system. NetComm will monitor and control devices in Edison substations and on its distribution lines, and will act as sensors of the quality of power delivered to customers. This information will improve Edison's energy delivery efficiency and control.

Edison is expanding its NetComm field testing to include 2,000 meters this year, and has recently begun the demonstration phase, deploying NetComm in the first of several selected locations throughout its service territory. NetComm will be installed commercially beginning January 1991.

#90151p3757 05/31/1990 ~PR Newswire

ST. LOUIS (MAY 31) PR NEWSWIRE - Kellwood Company (NYSE: KWD) today announced year-end results for the period ended April 30, 1990. Net earnings of $14,025,000, or $1.17 per share declined 58 percent from the previous year's earnings of $33,503,000, or $2.80 per share. Sales for the year increased 3 percent to $779,866,000 from $753,682,000 last year.

Results for the fourth quarter showed a net loss of $3,414,000, or $.28 per share, compared to net earnings of $9,736,000, or $.82 per share, for the same period last year. Sale for the fourth quarter declined 4 percent to $191,503,000 from $199,185,000 last year.

Operating results were very weak for the fourth quarter in all three areas -- private label, branded, and the Far East.

Losses from operations due to lower sales, margin pressure, and excess production capacity, contributed to more than half the $13 million swing in profitability. Other impactors to quarterly earnings were charges associated with facility realignments and certain costs created by recent acquisitions.

William J. McKenna, president and chief executive officer, said, "After nine years of annual growth in net profits, our results for the year are poor. Earnings have suffered for several reasons. A downturn in general business conditions led to a softened demand for our products at the store and consumer level. Sales to our major private label customer have continued to decline. The small gain we have made in sales for the year can be attributed to volume added by our new acquisitions."

"Chaos created by bankruptcies in the retail community resulted in an oversupply of goods. This situation put tremendous pressure on margins. Additionally, the cost of strategic moves taken by Kellwood in the United States and offshore to allow for long-term growth and profitability have been more expensive than we originally expected," he added.

"The Saipan operations which we acquired last year have been undergoing a total modernization. Upon completion we will have a state- of-the-art shirt factory; however, the transformation process to fully automated facilities has been costly and time consuming."

"The conversion of production facilities to manufacture better, fully constructed shirts in Costa Rica has been more difficult than we anticipated. Operations in both Saipan and Costa Rica experienced losses but are expected to turn around during the current fiscal year," McKenna noted.

The board of directors declared a quarterly dividend of $.20 per common share payable June 22, 1990, to shareholders of record June 11.

Kellwood Company is an international manufacturer and marketer of apparel, home fashions, and camping soft goods.

#90151p3762 05/31/1990 ~PR Newswire

LOS ANGELES (MAY 31) PR NEWSWIRE - For the second consecutive year, EMI Music achieved record results for the year ending March 31, 1990, with best ever sales and profits.

This year, EMI Music's sales increased 34 percent from $1.26 billion (765.9 million British pounds) to $1.69 billion (1028.1 million pounds), while profits doubled from $73.5 million (44.8 million pounds), to $150.2 million (91.6 million pounds). Approximately 50 percent of the earnings improvement was due to internal growth and 50 percent from acquisitions.

The company's strongest improvements in profit were achieved in North America, Japan, and Europe. Within Europe, EMI companies which realized outstanding profit growth were Italy, Spain, Holland, and Sweden. EMI Music Publishing also attained substantial profit growth, following its successful integration with SBK Music Publishing.

EMI Music experienced a 21 percent growth in recorded music sales compared to nine percent worldwide, increasing its share of the world market by one percent to 12 percent. Contributing to this accomplishment were market share gains in the United States, the United Kingdom, Germany, Italy, and Japan.

New acquisitions contributed to the company's record year. In addition to the acquisition of SBK, EMI Music also acquired 50 percent of Chrysalis Records. Chrysalis has enjoyed worldwide success with Sinead O'Connor, whose album went to No. 1 in 16 countries, while recently Billy Idol and Slaughter have quickly climbed the charts in the U.S. Fifty percent of heavy rock label, Enigma Records, was also purchased and is performing well.

Additionally, SBK Records was established as a joint venture and experienced major sales and chart success with Technotronic, Wilson Phillips, and the soundtrack album to the blockbuster motion picture, Teenage Mutant Ninja Turtles.

Artists who experienced gold, platinum, and multi-platinum successes in the international pop sector included Richard Marx, M.C. Hammer, Paul McCartney, Tina Turner, Queen, Great White, Joe Cocker, The Beach Boys, The Doobie Brothers, Queensryche, Beastie Boys, Duran Duran, Cliff Richard BeBe & CeCe Winans, Kate Bush, Stevie Nicks, Tin Machine, Whitesnake, Natalie Cole, and Bonnie Raitt, who swept this year's Grammy Awards.

Local and regional pop acts also added to the company's results: Swedish

duo Roxette achieved No. 1 singles in 21 countries around the world and Belgian artists Soulsister broke in Europe. Local Japanese artist Yumi Matsutoya sold over two million albums in her native country. Other regional artists who experienced notable sales accomplishments include Italy's Vasco Rossi and Argentinean Pablo Ruiz.

The company's classical music business enjoyed a successful year with recordings by Nigel Kennedy (who reached No. 3 in the U.K. "pop" charts with his platinum album of Vivaldi's "Four Seasons"), Itzhak Perlman, Simon Rattle, and Roger Norrington.

In response to the changing demand for vinyl records, cassettes, and compact discs, European manufacuturing operations were upgraded and restructured. A new CD plant was established in Uden, Holland, and was brought on-line ahead of schedule.

Commenting on the company's record results, Jim Fifield, president and chief executive officer, EMI Music Worldwide, said, "EMI is now recognized as a force in the music industry. We currently have the top four albums as well as eight of the top twenty records on "Billboard's" pop album chart. We have strong momentum and are attracting new artists and talented employees. We are perceived as being innovative and aggressive and capable of developing and delivering acts internationally."

#90151p3765 05/31/1990 ~PR Newswire

VANCOUVER (MAY 31) PR NEWSWIRE - Quintette Coal Limited today filed a petition asking the Supreme Court of British Columbia to set aside portions of the price ruling issued Monday by a three-man B.C. arbitration panel.

In its petition, Quintette said that by fixing different prices that Quintette may charge its customers -- the Japanese steel industry -- between April 1, 1987 and March 31, 1991, the panel has gone "beyond the scope of the submission to arbitration."

The petition says that the panel was asked only to determine what price should be set as of April 1, 1987. The panel set that price at $95.30, and under the terms of the long-term contracts between Quintette and its customers, that price would then be subject to quarterly escalation.

However, because the panel fixed multiple prices, it "has made a decision on a matter that was not submitted to the arbitration tribunal and is therefore not a matter in dispute," the petition says.

Paul Kostuik, Quintette's president and chief operating officer, said that "pending the outcome of the appeal, we are carefully evaluating options that would best enable us to attain our primary goal, which is to ensure the long-term well being of Quintette and its employees."

HOUSTON (MAY 31) PR NEWSWIRE - Eastex Energy Inc. (NASDAQ: ETEX) today announced that of the 4,770,000 shares outstanding as of the March 29 record date, 93 percent or 4,442,778 shares were voted at the annual shareholders' meeting held May 23. Of the votes cast, at least 99.5 percent voted in favor of the reelection of each of the seven directors and the ratification of Arthur Andersen as the company's independent auditors. Of the stockholders eligible to vote on the proposal which provided for the company to enter into an insurance-funded buy-sell agreement between the company and its largest stockholder, 99.05 percent of the eligible shares represented at the meeting voted in favor of the proposal. With respect to the proposed insurance-funded buy-sell agreement, eligible stockholders were defined as those stockholders other than company management, directors and their affiliates.

At the meeting, Robert G. Phillips, chairman and chief executive officer, announced the promotion of David H. Eargle to executive vice president and the election of Douglas W. Kuni as vice president, gas supply. Eargle joined the company in March 1983 as vice president, marketing, and was credited by Phillips as being key to the rapid growth the company has achieved in its first decade of existence. Kuni was employed in April 1988 in the company's gas trading department as manager of gas supply and has played a key role in the company's continued performance as one of the leading independent gas marketing firms.

Eastex Energy Inc. is involved in the storage, marketing and transportation of natural gas.

MADISON, NJ (MAY 31) PR NEWSWIRE - An agreement to develop new drugs for the treatment of Alzheimer's disease and other neurodegenerative disorders was announced today by Schering-Plough Corporation (NYSE: SGP) of Madison, N.J., and Cephalon, Inc., of West Chester, Pa.

Under the terms of the agreement, Schering-Plough will provide $20 million of capital to Cephalon over a five-year period. The agreement provides for a wholly owned subsidiary of Schering-Plough to receive exclusive worldwide rights to certain existing technology and to the products and technology co-developed within this program.

The innovative scientific program outlined in the agreement will focus on two highly integrated approaches. One is to regulate specific genes in the nervous system which will affect the prognosis of several neurodegenerative diseases. The second approach is to prevent the formation of amyloid plaques, a hallmark of Alzheimer's disease, by inhibiting a protease known as clipsin.

The discovery of clipsin, a chymotrypsin-like protease, was reported by Robert Siman, Ph.D., a senior scientist at Cephalon, and Robert B. Nelson, Ph.D., in the March 1990 Journal of Biological Chemistry. This portion of the program will focus on the development of novel clipsin inhibitors as potential therapeutic compounds that can halt or reverse the process of neuronal degeneration that underlies Alzheimer's disease.

Dr. Frank J. Bullock, senior vice president of Schering-Plough Research, said, "Cephalon provides a good fit with Schering-Plough's research organization and with the strategic direction the company has taken in research on central nervous system disorders." He added, "The agreement will facilitate a broader exploration and development of new therapeutics in this field than might have been possible through internal research

alone. It will also position us well to participate in what we anticipate will be a rapidly developing field in the 1990s."

According to Frank Baldino, Jr., Ph.D., president and research director of Cephalon, Inc., "This agreement is a synergistic step that will be beneficial to both of our companies. I am convinced that the relationship between Cephalon's technology base and Schering-Plough's extensive capabilities in research and drug development will lead to the discovery of new types of agents for the treatment of Alzheimer's disease and other neurodegenerative disorders. The agreement will also lead to considerable expansion of Cephalon's research operations in this area.

"As promising as this line of research may be," Dr. Baldino noted, "we are also enthusiastic about our efforts to regulate specific genes. Ten years ago, the prospect of regulating the expression of genes in the nervous system that code for therapeutically relevant proteins was one of those ideas that was consigned to the realm of science fiction. That is no longer the case," he continued. "With present technology, we are now able to have an impact on the regulation of these genes and create, for the first time, therapeutic agents that will alter the clinical course of conditions like Alzheimer's disease and Parkinson's disease instead of searching for palliative measures."

Cephalon, founded in 1987, is a development-stage company that specializes in neuroscience research. The company's core research efforts are supported by a collaborative network with leading universities, such as Harvard University and Baylor College of Medicine.

Schering-Plough is a research-based company engaged primarily in the discovery, development, manufacturing and marketing of pharmaceutical and health care products worldwide.

WASHINGTON (MAY 31) PR NEWSWIRE - Washington Bancorporation (NASDAQ-NMS: WWBC) today announced that John J. Mason, former chairman and chief executive officer of NS&T Bank, N.A., and Crestar Bank, N.A.; and Michael F. Ryan, former president of NS&T Bank, N.A., have been elected chairman and chief executive officer and president and chief operating officer, respectively, and will also serve in such capacities for WBC's principal subsidiary, The National Bank of Washington.

The board also gave preliminary approval to the general terms of a previously announced proposed financial restructuring program for WBC.

John M. Toups, who has served as interim chairman and chief executive officer since Feb. 1, will continue as a member of the board of directors. Toups said: "I am absolutely delighted that bankers with the experience and proven track record of John Mason and Mike Ryan have agreed to set the course for the future direction of the corporation and its subsidiary banks. This is good news for all of our constituencies."

As previously announced Mason has been instrumental in assisting WBC to formulate a proposed refinancing program which, subject to investor commitments and appropriate regulatory reviews and approvals, is expected to be put in place in the next few weeks. Under the plan, investors including Mason, the Wafic Said trust, Safinance (WBC's principal stockholder), and a number of local and other investors, will purchase approximately $45 million in new debt securities, secured by substantially all of the assets of WBC. It is expected that the investors and others will receive warrants, with anti-dilution protection, to acquire 60 percent or more of the common stock of WBC at a nominal price. Contemplated future equity offerings or other financings, on terms not yet determined, will provide funds for additional capital contributions to The National Bank of Washington.

At its meeting today the WBC board of directors gave preliminary approval to the terms of the program and authorized action to obtain required investor commitments, complete regulatory reviews, and take steps to implement the program when such commitments and reviews are complete.

Mason said: "We have reviewed the refinancing program for WBC extensively with the appropriate federal banking regulators. I believe that they are pleased with the progress we have made, understand our plans, and, assuming satisfactory completion of the loan portfolio review now under way, will continue to work with us as we proceed with the program."

Mason stated: "I have two immediate goals in mind. First, resolution of liquidity issues at Washington Bancorporation. Second, and no less important, prompt restoration of public confidence in The National Bank of Washington, which has a proud tradition of 181 years' service to our community. Mike Ryan and I are prepared to devote our full energies to addressing these issues. I am very encouraged that Mr. Said, a number of prominent members of our Washington business community, and others have indicated their interest in participating financially in this investment.

"I strongly believe that a service-oriented, locally based bank can compete very effectively with other institutions which are based elsewhere. With strong, locally experienced leadership, I am confident we can look forward to a return to financial strength and profitability as our plans for the bank are implemented."

VANCOUVER, B.C. (MAY 31) PR NEWSWIRE - Further to Wall Street Ventures Inc. (Vancouver: WSV) news release of Feb. 9, 1990, the company announced today that after five months of negotiations with Lon Morris, it has concluded the acquisition of a 50 percent interest in Reno Ranch Company Partnership in exchange for 62,000,000 Deutsche Marks of Middle Eastern Postage-Stamps, which represent 25 percent of the assets of the company.

The assets of the Partnership consists of approximately 10,000 acres of real property adjoining the city of Reno, Nev.; and the Partnership has targeted a 1250 home Master Planned Community.

The General Partner Reno Ranch Development Corporation, a wholly owned subsidiary of Venture Corporation, has extensive experience in California as to the development and construction of residential and mixed-use developments; and is presently in the process of obtaining zoning approvals and financing for the project.

Reno, Nev., is one of the fastest growing areas in the western United States, and an increasing demand is projected for the expanding population growth.

Reno is centrally located near the California/Nevada border and is bisected by two major US Interstate Highways, 80 and 395, which are the principle highways for East/West travel across the United States. The project is centrally located for easy access from both of these highways.

MENLO PARK, CA (MAY 31) PR NEWSWIRE - In an agreement announced today, Activision, a leading publisher of video games for the Nintendo Entertainment System (NES), has granted Nintendo Co. Ltd., of Kyoto, Japan worldwide publishing rights for two of its popular video games - Activision's "Stealth A.T.F." and Absolute Entertainment's "A Boy and His Blob" - both for the Nintendo Entertainment System.

The agreement, which excludes North America, Mexico and Japan, will allow Nintendo to market these games under their own brand name in rapidly growing new markets for the Nintendo Entertainment System around the world. In the United States alone, more than 20 million households own an

NES.

According to Bruce L. Davis, chairman and CEO of Activision's parent company, Mediagenic (NASDAQ: MGNC), Nintendo carefully selected a small number of key titles to carry the Nintendo brand name. "We are excited about the potential royalties that our games will generate when backed with Nintendo's tremendous marketing and distribution capability," said Davis.

Davis described "Stealth A.T.F." as an air combat simulation with advanced flight modeling and player control, a "stealth" feature to avoid enemy radar, and a three-dimensional front view of red hot action. "A Boy and His Blob," from affiliated publisher, Absolute Entertainment, is an adventure/strategy game that will delight gamers as they recount the whimsical adventures of a boy who befriends a jelly-bean-eating Blob.

Mediagenic is an international publisher of entertainment and video game software, headquartered in Menlo Park. The company publishes Activision, Infocom, Gamestar, Electric Dreams, and serves as an exclusive distributor for Absolute Entertainment, Interplay Productions, Dynamix Inc., Sierra On-Line and System 3.

AVON, MA (MAY 31) PR NEWSWIRE - Child World, Inc. (NASDAQ: CWLD), the nation's second largest toy retailer, reported that net sales for the first quarter ended May 5, 1990 totaled $130.1 million compared to $131.7 million for the same period a year ago. For the first quarter, total sales decreased by 1.2 percent and comparable store sales decreased 7.0 percent. Net loss for the first quarter totaled $7.4 million or $.65 per share compared to $5.1 million or $.45 per share last year.

Peter J. Hayes, president and CEO stated that "Our post-Christmas inventory out-of-stock position was the primary contributor to the first quarter sales and earnings decline. By April, we had significantly improved our inventory in-stock levels and achieved a same store sales gain. Sales improvement has continued in May."

Child World's business is highly seasonal with operations in the fourth quarter, which includes the Christmas selling season, providing almost half of the annual sales and all of the company's earnings for the year.

Child World operates 175 toy supermarkets in thirty-one states, offering a broad assortment of merchandise including toys, bicycles, baby furniture, electronics, learning toys, juvenile apparel, children's sporting goods

and outdoor play equipment.

#90151p3785 05/31/1990 ~PR Newswire

DALLAS (MAY 31) PR NEWSWIRE - Southwest Airlines' (NYSE: LUV) famed flying whale, Shamu I, has a brand new sibling. Named Shamu II, the sleek Boeing 737-500 aircraft today joined the Southwest fleet as the carrier's 100th airplane.

The plane, painted to resemble its namesake killer whale of Sea World renown, commemorates Southwest's partnership as official carrier of Sea World of California at San Diego. Shamu I made its debut two years ago this month when Sea World of Texas at San Antonio opened and Southwest became its official airline.

Sea World of California at San Diego has been operating since 1964, and Southwest has been serving that city since early 1982.

Southwest's newest Shamu plane is the sixth state-of-the-art Boeing 737-500 to be delivered to the airline this year. Southwest is the first airline to fly the quick, quiet, fuel-efficient new airplane, which carries 122 passengers.

Shamu II's paint job is a Boeing masterpiece. Its distinctive black-and-white whale markings required 14 gallons of white gloss, 16 gallons of black gloss, and 10 gallons of additional paint in Southwest's own warm red, orange, and desert gold corporate colors.

The airplane is just under 102 feet long (versus 20 feet for its namesake killer whale) and weighs 120,500 pounds fully loaded (versus 7,000 pounds for the live Shamu right after a meal of salmon, squid, and herring.)

Also, Shamu II is a little faster than its mammal namesake. It travels at a top speed of approximately 390 miles per hour, vs. the whale's top speed of 30 miles per hour.

Shamu II enters into scheduled service tomorrow and soon could be spotted anywhere on the airline's 30-city, 14-state route system -- much to the delight of Shamu-watching kids of all ages.

Southwest, which achieved "major airline" status in 1989 with over one billion dollars in operating revenues, began scheduled service in June 1971 and is the original low-fare, frequent-flight "fun" airline. It is the eighth largest independent U.S. airline in terms of passengers carried and is consistently ranked high in overall cusomer satisfaction, fewest

baggage complaints, and on-time arrivals. Southwest operates the youngest pure jet fleet in the industry, with an average aircraft age of 5.7 years.

#90151p3788 05/31/1990 ~PR Newswire

ALBUQUERQUE, NM (MAY 31) PR NEWSWIRE - Diagnostek Inc. (NASDAQ: DXTK) today announced net earnings of $7,243,000 or 38 cents per share, on revenues of $147,313,000 for the fiscal year ended Mar. 31, 1990.

The net earnings were 176 percent higher than the $4,109,000 for the fiscal year ended Mar. 31, 1989, and earnings per share were 158 percent higher than the 24 cents per share of the previous fiscal year. The revenues were 174 percent higher than the revenues of $84,896,000 generated in the previous fiscal year.

Nunzio P. DeSantis, chairman of the board and chief executive officer, said that "the significant growth in our financial results is attributable to our acquisition of HPI Health Care Services Inc. (HPI), our pharmacy service and management company, in August 1989 and the continued growth of Health Care Services Inc., our mail service pharmacy company. Both of these businesses continue to expand their revenue base and to improve operating margins."

DeSantis also today announced an agreement which makes HPI the prime vendor of pharmacy services for HCA Management Co. Inc. (HMC), the nation's largest hospital management group. Jim Stokes, HMC vice president, said plans are currently being formalized on how HMC will coordinate this new business relationship between HPI and the 230 HMC-affiliated hospitals.

"We awarded this agreement to HPI based on the strength of their proposal and their experience and success in the hospital pharmacy business," said Stokes. According to Arthur Solomon, HPI's president, the health care industry's challenging financial environment has required hospitals to seek ways to reduce costs without reducing patient service levels. "For HMC, this agreement allows member hospitals to augment clinical pharmacy services while achieving the cost reduction objective without the corresponding overhead of personnel, inventory and equipment," Solomon said.

HPI provides more than 400 acute-care hospitals nationwide with pharmacy management services, including recruiting, training and operations management as well as drug procurement, storage, inventory and record keeping, clinical services and quality assurance programs.

LOS ANGELES (MAY 31) PR NEWSWIRE - Northwest Airlines will open a new trans-Pacific route from Los Angeles tomorrow (June 1), solidifying Northwest's position as Los Angeles' leading airline to Asia.

Northwest will begin nonstop service three times a week between Los Angeles and Taipei, Taiwan. The airline will fly all Boeing 747s on the route.

The expansion continues Northwest's growth between the United States and Asia that in 1989 featured the introduction of Boeing 747- 400 service, the inclusion of Singapore and Saipan in Northwest's route system, and inauguration of nonstop passenger service from Los Angeles to Osaka, Japan.

The new nonstop flights to Taipei will depart Los Angeles on Wednesdays, Fridays and Sundays at 1:30 p.m. and arrive in Taipei at 6:20 p.m. the following day. Return service will depart Taipei on Tuesdays, Fridays and Sundays at 1:20 p.m. and arrive in Los Angeles at 10:30 a.m. the same day.

With the addition of Taipei, Northwest will provide nonstop trans-Pacific flights from Los Angeles to Tokyo, Osaka, Seoul and Taipei with connecting flights to Guam, Saipan, Bangkok, Hong Kong, Okinawa, Manila, Singapore and Shanghai.

Northwest is the fourth largest U.S. airline and has provided service to Asia for 43 years. Northwest carries more passengers to Asia than any other U.S. airline.

#90151p3802 05/31/1990 ~PR Newswire

DALLAS (MAY 31) PR NEWSWIRE - Comstock Resources Inc. (NASDAQ-NMS: CMRE) today announced that it has retired its bank debt with Union Bank, Los Angeles and First City, Texas, of $9.6 million with funds from the closing of the $14,375,000 Common Stock Offering of 2,500,000 shares with Eppler, Guerin & Turner Inc., the representative of the Underwriters.

The remaining net proceeds will be used for development drilling and well completion activities on the Bivins Ranch Lease located near Amarillo, Texas; and other general corporate purposes, including acquisitions.

The net proceeds from the Common Stock Offering after the bank debt retirement resulted in a 61.1 percent increase in shareholders' equity from $19.8 million to $31.9 million on a pro forma basis at March 31, 1990. In addition, the company's working capital deficit of $3.8 million at March 31, 1990 is eliminated and working capital is at a positive level of $2.7 million on a pro forma basis. Total assets at March 31, 1990 also increased by 8.5 percent from $33.8 million to $36.7 million on a pro forma basis.

Comstock Resources Inc. owns and manages income producing assets in oil, casinghead and natural gas, precious metals and real estate, with subsidiary operations since 1865. DEARBORN, MI (MAY 31) PR NEWSWIRE - Ford Motor Company (NYSE: F) has achieved strong quality improvements with its 1990-model cars and trucks - capturing quality leadership among domestic manufacturers for the tenth consecutive year.

"Ford's quality improvements are, in fact, among the best we've ever recorded and show year-to-year gains over our American, European, and Asian competitors," said Toby N. Hynes, director of marketing research for Ford's North American Automotive Operations.

According to the recently completed Ford and Competitive New Vehicle Quality Study (CNVQ), owners of 1990-model Ford, Lincoln, and Mercury car lines and Ford light trucks have fewer problems on average with their vehicles than any other cars and trucks designed and built in North America. The study is conducted annually for Ford by an independent marketing research firm.

The CNVQ is a very comprehensive, large-scale, and well-established study with a ten-year history. Its methodology has been substantiated by the Federal Trade Commission, the National Advertising Division of the Better Business Bureau, and the three major television networks.

Owners of more than 51,000 Ford and competitive cars and light trucks responded to the 1990 CNVQ study by completing an extensive, 180-item questionnaire approximately three months after they purchased their new vehicles.

TROY, MI (MAY 31) PR NEWSWIRE - Inacomp Computer Centers, Inc. (NASDAQ: INAC), based in Troy, announced today that Albert Montross, formerly vice president - corporate operations, has been promoted to executive vice president.

Prior to joining Inacomp, Montross was president of Erintec. Previously, he had also been senior vice president with Moore Corporation.

William Gowan will replace Montross as vice president - corporate operations. Gowan comes to Inacomp after 10 years with Apple Computer, Inc., most recently as the director of Apple's customer support center in Illinois. Prior to joining Apple, Gowan was director of national operations for General Electric Corporation.

Joan Brancheau, C.P.A., corporate controller, has been promoted to treasurer. Brancheau came to Inacomp in 1985 from Coopers & Lybrand.

Gerald Blouch, executive vice president and chief financial officer, has left the company to pursue personal interests in Cleveland.

"We think that our new management alignment will provide a strong foundation for Inacomp's future," said Rick Inatome, chairman, president and chief executive officer. "Although Gerry has moved on to other interests, his unique insight has contributed significantly to our success over the years, and he will continue to be a presence in the company as a special consultant. We wish him much happiness and success in his endeavors."

Inacomp Computer Centers, Inc. markets microcomputer systems and related products and services through more than 200 company-owned, dealer and affiliate locations across the country. The company provides system consultation, installation, classroom training, system maintenance and repair to its customers. Inacomp also provides short- term rental and long-term leasing of microcomputer systems. Corporate offices are in Troy.

ROCHESTER, NY (MAY 31) PR NEWSWIRE - Frank P. Strong, group vice-president and general manager of Eastman Kodak Company's (NYSE: EK) Commercial Systems Group, today was elected to the board of directors of the National Action Council for Minorities in Engineering (NACME).

As a board member, Strong will participate in the development of policy for NACME's long-range programs and will assist in fund raising and in recruiting other corporate board members.

NACME is dedicated to bringing the talents of underrepresented minorities - African Americans, Hispanics and American Indians - to the nation's engineering workforce. Strong also serves as Kodak's chief liaison with Howard University, where he pioneered programs to help the company and the school develop closer ties.

The Kodak group vice-president, who joined the company in 1957, has held various management positions in engineering, marketing, business research and finance in the United States and internationally.

SAN RAMON, CA (MAY 31) PR NEWSWIRE - As the sale of Breuners' furniture retailing business was completed yesterday, the new owners, Prism Capital, announced initial restructuring plans for the company.

With the intention of instituting a strong and dedicated management team, Prism disclosed that it will be adding new talent from the retailing industry and introducing an equity participation scheme for these senior managers. Other management changes include the departure of several senior executives, who will be leaving Breuners to pursue outside interests.

In addition, Prism disclosed that it is in the process of developing a company-wide profit sharing program so that all employees will benefit from Breuners' future successes.

"We believe that giving employees a vested interest in the company through a profit sharing plan is the best way to ensure Breuners rapid return to prosperity," said Frank Ricci, Breuners' vice president of human resources.

A plan that rationalizes staffing at the company's credit facility was also detailed. Approximately 30 employees from the company's credit operation will be laid off today with generous termination packages.

Commenting on the cutbacks, Ricci said: "Breuners has always bucked the industry trend by owning and running its own credit operation. It has never been a cost-effective way to provide customer credit, and we intend to contract out this operation to eliminate inefficiencies and improve customer service. I would like to emphasize that customers will experience no change in their credit relationships with Breuners."

Other plans for the store include a return to the core business of selling high-quality furniture. Programs to expand the number of stores are still in development and will not be put into effect until the business is returned to profitability.

Founded in 1856, California-based Breuners owns and operates 18 furniture retailing stores in Northern California, Arizona and Nevada and is the dominant retailer of high-quality furniture on the West Coast.

Prism Capital is a merchant bank founded in 1989.

ELKIN, NC (MAY 31) PR NEWSWIRE - Brendle's Incorporated (NASDAQ-NMS: BRDL) today reported results for the first quarter of fiscal 1991. For the three months ended May 5, 1990, sales were $48,249,000, an increase of 16.4 percent from $41,322,000 recorded in the first quarter of fiscal 1990. The Company incurred a net loss of $2,117,000, or $.26 per share, compared with a net loss of $1,894,000, or $.24 per share, in the same period last year.

According to Douglas D. Brendle, Chairman of the Board and Chief Executive Officer, comparable store sales increased by 2.0 percent during the first quarter with the balance of the sales increase coming from five new stores opened since the first quarter of fiscal 1990.

Commenting on the results, Brendle remarked, "We are pleased with the first quarter performance. Increased sales, coupled with an improved gross margin, resulting from a planned increase in jewelry mix and a renewed effort to control our selling expenses, enabled us to operate ahead of our budget for the quarter. We are further encouraged by the fact that the quarter's results reflect an improved per store performance compared to the first quarter of fiscal 1990. The Company is on schedule to relocate 3 existing stores and open 12 new stores for the fiscal year."

Brendle's Incorporated operates 47 discount stores in North Carolina, South Carolina, Virginia, Tennessee and Georgia which offer jewelry and

nationally advertised, brand-name merchandise. The Company's shares are traded in the NASDAQ National Market System under the symbol BRDL.

HUNTINGTON BEACH, CA (MAY 31) PR NEWSWIRE - McDonnell Douglas Space Systems Co. through its wholly owned subsidiary, McDonnell Douglas Commercial Delta Inc. has been selected to launch a second communications satellite for the North Atlantic Treaty Organization (NATO).

The contract calls for launch of the NATO IV-B satellite aboard a Delta II expendable launch vehicle in the fourth quarter of 1991. McDonnell Douglas has a previously signed contract to launch NATO IV- A in the fourth quarter of 1990.

The NATO IV program is composed of two satellites that will form the space segment for a NATO satellite communications system from 1990 to 2000.

This selection marks the eleventh commercial contract for the Delta launch vehicle.

McDonnell Douglas has launched three commercial rockets since August 1989 and has contracts for launches of the INSAT-1D for the government of India and the BSB-R2 for British Satellite Broadcasting, which will bring five additional television channels to the United Kingdom.

Other commercial launch contracts include two for the International Maritime Satellite Organization (INMARSAT) to provide mobile maritime communications; one for GE American Communications Inc. to accommodate communications in Alaska; and one for Contel ASC to supply additional space capacity for the growing two-way data communications market.

Over the past 12-1/2 years of 60 launches, Delta rockets have maintained a 98.3 percent success record.

ST. PAUL, MN (MAY 31) PR NEWSWIRE - Green Tree Acceptance Inc. (NYSE, PSE: GNT) announced today at its annual meeting in St. Paul that it has in place a new $200 million committed borrowing facility with Merrill Lynch Capital Markets. This commitment is in addition to the company's existing $150 million revolving bank credit facility.

In commenting on the commitment, Lawrence M. Coss, chairman, president and chief executive officer, said that the new facility "will enable Green Tree to cost effectively finance its production of conventional manufactured home contracts from the time we originate a contract until it is sold."

In his prepared remarks, Coss told the audience that loan production grew 38 percent in the second half of 1989, and 57 percent in the first quarter of 1990. He assured shareholders that the condition of Green Tree's business is good and the company's portfolio is in excellent shape.

Coss also told shareholders that Green Tree has signed a contract with AMRE Inc. to offer conditional sales financing of their products beginning in June 1990. AMRE Inc. is the leading direct marketer of home improvement products in North America. Its products are sold and installed under multiple licensing agreements with Sears Roebuck & Company.

Coss closed by telling shareholders that "we believe the outlook for the company is positive" and that "our overriding goal remains to profitably expand Green Tree's business and ultimately reward the shareholders, who have stood by Green Tree and who believe in the company's investment

merits."

Green Tree Acceptance purchases, pools, sells and services conditional sales contracts for manufactured homes and home improvements through 40 regional offices. Green Tree common stock is traded on the New York and Pacific Stock Exchanges under the symbol "GNT".

DETROIT (MAY 31) PR NEWSWIRE - U.S. automakers resumed production Tuesday May 29, following an extended holiday weekend in observance of Memorial Day. They planned to assemble an estimated 121,895 cars over four days this week, down 8.1 percent from last week's actual count of 132,617, Ward's said.

Daily average build, however, was estimated at 30,473 units compared to last week's rate of 26,523 cars per day.

Car output for same-week 1989 was 121,995 units. Ward's reported that total estimated U.S. car output for calendar 1990 through the end of this week is 2,581,888 units, trailing year- ago's build of 3,284,569 by 21.4 percent

All General Motors Corp.'s car plants are up and running except the Arlington, Texas, plant which was closed to retool for '91 Caprice output.

Saturday overtime was scheduled at car plants in Lansing (Skylark/Calais/Grand Am), Orion, and Hamtramck, Mich., and Lordstown, Ohio.

Ford Motor Co.'s Atlanta plant reopened this week following a one- week shut down for stock reduction. The Wixom and Wayne, Mich., plants reported daily overtime this week.

Chrysler's St. Louis car plant continues to operate on one shift. The plant will close permanently on Nov. 9, 1990.

Ward's said U.S. truck production will be an estimated 75,930 units compared to last week's count of 85,551. This compares with year-ago's count of 72,054.

U.S. truck production for calendar year 1990 through the end of this week is estimated at 1,677,339 vs. year-ago's 1,926,173, said Ward's.

Ford's Norfolk, Va., and Lorain, Ohio, plants slated daily overtime. Weekend output was scheduled at truck plants in Kansas City, Mo., Louisville, Ky., St. Louis, and Twin Cities, Minn.

All General Motors' truck plants are up and running, with Saturday overtime planned at the Flint, Mich., and Moraine, Ohio, plants.

Chrysler's Dodge City plant in Warren, Mich., continues to operate on two nine-hour daily shifts this week.

Of this week's estimated U.S. car output, GM accounts for 46.8 percent; Ford, 22.2 percent; Chrysler, 13.3 percent; Honda of America Manufacturing Inc., 6.2 percent; Mazda Motor Manufacturing (USA) Corp., 1.8 percent; Nissan of America Manufacturing Corp., 1.0 percent; New United Motor Manufacturing Inc., 3.5 percent; Toyota Motor Manufacturing USA Inc., 2.9 percent; Diamond-Star Motors Corp., 2.0 percent; and Subaru-Isuzu Automotive Inc., 0.3 percent.

OAKLAND PARK, FL (MAY 31) PR NEWSWIRE - Capital Factors, Inc., the fast-growing factoring subsidiary of Miami-based Capital Bank, announced today it has opened a regional office in New York City as part of a strategic expansion drive intended to take advantage of consolidation trends in the factoring industry.

The company also said it has relocated its headquarters to Oakland Park, Fla., just west of Fort Lauderdale. Capital Factors previously was headquartered in Deerfield Beach.

"With our entry into New York, the nation's largest factoring market, Capital Factors has effectively established a presence in three of the nation's prime factoring regions," said John W. Kiefer, president of Capital Factors.

"The opening of our New York office follows closely on the heels of our expansion into California last August. Within two years, we expect our New York operation to account for approximately 30 percent of our total sales volume."

The only full-service, old-line factor based in Florida, Capital Factors in recent years has emerged as one of the nation's leading factoring companies with annualized factored sales of approximately $500 million, based on April 1990 figures. Kiefer said it is an opportune time for Capital Factors to expand by filling a void created by consolidation of the factoring industry.

"Our mission is to establish relationships with start-up and existing small businesses which neither the large factoring companies nor the regional banks can effectively serve," Kiefer explained.

In August 1989, Capital Factors acquired the California assets of NatWest Commercial Services, Inc., thereby establishing a West Coast regional office at NatWest's former Los Angeles location.

The California operations of NatWest, a factoring subsidiary of National Westminster Bank Group in New York, had been generating annual factored sales of more than $100 million. Capital Factors' California regional office now has more than 40 clients in place and is expected to generate approximately $250 million in factored sales this year, according to Kiefer.

Located at 1633 Broadway in Manhattan, the New York regional office of

Capital Factors is headed by factoring veteran Stephen Donohue, who was named senior vice president/regional manager.

Donohue, who has 25 years of factoring experience, formerly served as vice president/senior account executive, and earlier as general credit manager, for Bankers Trust in New York, where he had been employed for 20 years.

DALLAS (MAY 31) PR NEWSWIRE - Southwest Airlines (NYSE: LUV) is expanding the scope of its Senior Fares effective June 1 by making seats available on every flight, every day.

"In the past, Senior Fares were limited to departures scheduled between 9 a.m. and 3 p.m. Monday through Thursday and all day Saturday," said Don Valentine, vice president marketing for the airline. "Extending the schedule for Senior Fare bookings makes it much easier for many Seniors to book convenient itineraries, especially in certain longhaul markets where flights are not always scheduled during the current Senior Fare day and time parameters. We feel that the changes will greatly benefit our Senior Customers."

Advance purchase is not required; however, Senior Fare seats are limited and reservations must be made before departure. Fares are available to Customers 65 years of age or older, and Customers traveling at these fares must be able to present valid identification proving age at time of travel.

Tickets are refundable in full, and changes are permitted provided that seats are available in the applicable fare class.

Senior Fares are no higher than $99 one way.

MIAMI, (MAY 31) PR NEWSWIRE - Cosmo Communications Corporation (NASDAQ: CSMO), the Miami-based manufacturer and distributor of consumer electronic and houseware products today announced the results for the first quarter ended March 31, 1990. Sales for the first quarter of 1990 decreased by $4,367,000 compared to the corresponding period in 1989. The company noted that sales decreased primarily because of an overall weak market.

Results for the quarters ended March 31, 1990 and 1989 were as follows:

	1990	1989
Sales	$ 5,057,000	$ 9,424,000
Net Income (Loss)	$(1,245,000)	$ 225,000
Net Income (Loss) per share	$ (.25)	$ .04
Average Outstanding Shares	5,060,000	5,060,000

#90151p3836 05/31/1990 ~PR Newswire

NEEDHAM, MA (MAY 31) PR NEWSWIRE - LoJack Corp. (NASDAQ: LOJN; Boston: LOJ.B) reported today that total revenues for fiscal 1990, ended Feb. 28, were $5,394,000 compared to $4,853,000 a year ago. The net loss for fiscal 1990 was $2,047,000 or $.18 a share, compared to net income of $102,000, or $.01 a share, a year ago.

For the three months ended Feb. 28, 1990, total revenues were $1,302,000 compared to $1,165,000 a year ago. The net loss for the fourth quarter was $1,037,000, or $.09 a share, compared to a net loss of $120,000, or $.01 a share, for the fourth quarter a year ago.

Revenues from non-refundable fees associated with the granting of distributorships and revenue recognized in connection with the sale of components of the LoJack System and initial supplies of inventories to distributors decreased by $88,000 and $993,000 in the three months and fiscal year, respectively. These decreases reflect the company's previously reported change in strategy from using distributorships to LoJack's retaining majority ownership for each state's distributorship.

In reporting the results, C. Michael Daley, president, said that the revenues and net loss for the fourth quarter met previously reported expectations. The increased net loss also reflects costs incurred in expanding into New Jersey, Michigan, Illinois, and Los Angeles County, Calif.

Revenues reflect the operations of the LoJack System in one state, Massachusetts, where sales to consumers rose 41 percent for the year and 23 percent in the fourth quarter.

"We expect revenues to increase significantly during the current fiscal year because the LoJack System has recently become operational in New Jersey and Michigan; Los Angeles Country and Illinois are expected to both become operational during the summer, and, additionally, as a result of

the recent acquisition of our Florida distributorship.

"We also have realized approximately $11 million from the private placement of convertible subordinated debentures, which will provide us with funds to proceed vigorously with our expansion into the state with the highest population combined with the greatest vehicle theft problems. As a result of the costs of this expansion, together with the interest expense on our recently issued 10 percent convertible subordinated debentures, we expect our losses to continue during the present fiscal year," Daley said.

WESTBORO, MA (MAY 31) PR NEWSWIRE - Alden Electronics Inc. (NASDAQ: ADNEA) announced a contract award from American Airlines for the installation of an Alden C5020 Color Weather Graphics Dissemination System in American's new Systems Operations Center at their Ft. Worth, Texas Flight Academy.

This modern Control Center will house American's flight dispatch and system control personnel who will use state-of-the-art display and communications equipment to monitor and control the airline's worldwide operations.

The Alden C5020 System will acquire and store real time weather graphics received from the U.S. National Weather Service. The weather maps, satellite and radar pictures will be used by American's staff of

meteorologists to support flight operations including dissemination of these and custom-created weather graphics to C5020 color display workstations in the Ft. Worth Systems Operations Center and to crew ready rooms at 23 major airports. The contract over five years is expected to have a value of $1 million.

Captain George Hof, VP Flight Operations, stated, "The new Alden C5020 Color Weather Graphic Dissemination System provides American's flight crews, dispatch and systems operations personnel with finger-tip access to pertinent weather information that graphically displays areas of turbulence and significant weather throughout American's route structure from the United States to Europe, the Far East and Central and South America.

American and Alden have entered discussions relative to expanding the satellite broadcast of these graphics from the current 23 airport flight crew ready rooms, to as many as 200 locations.

#90151p3838 05/31/1990 ~PR Newswire

SEATTLE, WA (MAY 31) PR NEWSWIRE - The Civil Aviation Administration of China (CAAC) has ordered 36 Boeing airplanes and taken options on 36 more, Boeing Commercial Airplane Group confirmed today.

Total value of the order, including options, is approximately $4 billion and represents the largest aircraft order placed by CAAC.

The firm orders comprise five 747-400s, one 747-200F (freighter), four 767s, 13 757s and 13 737-300s. CAAC has chosen Pratt & Whitney PW4056 engines for its new 747-400s, PW4052 engines for its 767s, Rolls Royce RB211-535E4 engines for its 757s and CFM56-3-B1 engines for its 737-300s. The 747 freighter will have Pratt & Whitney JT9D-7R4G2 engines. Three of the 757s confirmed today had been announced publicly late last year.

CAAC is the agency which oversees the purchasing of aircraft for China's airlines. The jetliners ordered today will be used by Air China, Guangzhou CAAC, China Southwest Airlines and other airlines.

Hu Yizhou, director general of CAAC, who is presently visiting the U.S. at the invitation of the Federal Aviation Administration; Ambassador Zhu Qizhen from the Peoples Republic of China to the U.S.; and Liu Yuanfan, president of China Aviation Supplies Corporation, attended the ceremonial signing which took place at the Boeing Commercial Airplane Group administration building in Renton, Wash.

At the signing ceremony, Dean Thornton, president of Boeing Commercial Airplane Group, praised the long, successful history Boeing has had with CAAC. "Boeing was the first U.S. company to sell to China in 1972," he said. "Ten 707s valued at about $125 million were ordered then and deliveries began the next year."

Since 1972, China has purchased 101 Boeing airplanes including several through other agencies.

Boeing orders for the 747 family now total 1,007, of which 284 are for the 747D400 airplane. Boeing orders for the year for all models now stand at 187 valued at about $16.2 billion.

WAKEFIELD, MA (MAY 31) PR NEWSWIRE - Fuddruckers Inc. ("Fuddruckers") and Atlantic Restaurant Ventures Inc. ("ARVI") today announced that they have completed several transactions under which ARVI issued to Fuddruckers 2 million shares of ARVI common stock for an aggregate price of approximately $820,000. Fuddruckers will manage the operations and administration of ARVI for a fee, pursuant to a long term Management Agreement.

ARVI simultaneously sold to Roger W. Kisiel, former president and director of ARVI, for approximately $1,560,000, ARVI's interest in two wholly-owned subsidiaries which operate 19 hamburger restaurants known as Little Tavern Shops in Maryland, Virginia and the District of Columbia and ARVI's interest in two Fuddruckers restaurants located in Richmond and Virginia Beach, Va., respectively. Joseph R. O'Brien, formerly executive vice president of ARVI has been elected as president and chief operating officer of ARVI. Fuddruckers also obtained the right to vote 865,000 shares of ARVI common stock owned by Kisiel and O'Brien.

ARVI currently operates four and is developing two new franchised Fuddruckers restaurants in Maryland and Virgina. There are 5,551,642 shares of ARVI common stock outstanding. Fuddruckers has voting rights for approximately 52 percent of such shares outstanding. ARVI's stock is traded in the OTC Pink Sheets.

Fuddruckers Inc. operates, franchises and manages 122 Fuddruckers restaurants with system-wide sales in excess of $150 million that specialize in high-quality, upscale hamburgers together with a variety of other menu items and that emphasize fresh ingredients at moderate prices. Fuddruckers is a wholly-owned subsidiary of DAKA International Inc. a

company publicly traded in the NASDAQ National Market System under the symbol DKAI.

WILMINGTON, DE (MAY 31) PR NEWSWIRE - Subsidiaries of The Columbia Gas System Inc. (NYSE: CG) and Equitable Resources Inc. (NYSE: EQT) announced today they have reached an agreement settling a rate dispute pending before the Federal Energy Regulatory Commission (FERC).

The agreement will be subject to FERC approval. The rate dispute involves a proposal by Kentucky West Virginia Gas Co., an Equitable subsidiary, to recover increased prices for its own pipeline production during the period 1979-1983. FERC had previously denied such recovery, but reviewing courts overturned these FERC decisions. In January 1989, the FERC approved a proposal by Kentucky West to "direct bill" a portion of these increased prices to its sales customers, based upon their levels of purchases during the 1979-83 period.

The direct billing proposal resulted in Columbia Gas Transmission Corp., a Columbia System subsidiary and a sales customer of Kentucky West, facing a total potential billing of $57 million. Columbia Transmission argued that a direct billing mechanism was unlawful and questioned the level of such costs.

Under the agreement reached between Kentucky West and Columbia Transmission, Kentucky West will be permitted to recover $21.3 million plus FERC authorized carrying charges through a demand surcharge amortized over an eight-year period. Kentucky West will also recover $3.2 million in interest for the period February 1988 through May 1990 during the amortization period. The agreement contemplates recovery by Columbia Transmission from its customers through a similar surcharge.

The agreement also calls for the sales contract between Kentucky West and Columbia Transmission to be canceled and for Transmission to expand and reform its transportation agreement with Equitrans Inc., another Equitable subsidiary, to an open access transportation arrangement for Equitarans and its affiliates. Details of this reformed transportation agreement have yet to be finalized.

Columbia Transmission and Kentucky West said they intend to file the settlement with FERC in the near future.

CLINTON, MD (MAY 31) PR NEWSWIRE - Atlantic Restaurant Ventures Inc. (OTC: ARVI), a public restaurant company in the Greater Washington Area, today announced that it has completed several transactions under which it sold shares of common stock, sold its interest in certain companies which owned and operated Little Tavern Shops, sold two franchised Fuddruckers restaurants, and restructured its corporate overhead.

It is contemplated that these transactions will increase ARVI's working capital by approximately $1 million and reduce its current liabilities and long term debt by approximately $1.5 million.

Fuddruckers Inc. ("Fuddruckers") purchased two million shares of ARVI common stock for an aggregate price of approximately $820,000. In addition Fuddruckers will manage the operations and administration of ARVI for a fee, pursuant to a long term Management Agreement.

Roger W. Kisiel, former president and director of ARVI, acquired the subsidiaries of ARVI which owned and operated the Little Taverns Shops and ARVI's interest in two franchised Fuddruckers restaurants located in Richmond and Virginia Beach, Va., respectively, for an aggregate price of approximately $1,560,000.

Joseph R. O'Brien, director and shareholder and form executive vice president of ARVI, was elected president and chief operating officer. In addition, all members of the board of directors, other than O'Brien, resigned.

Fuddruckers will, through the purchase of the shares and voting trusts of shares presently owned by Messrs. Kisiel and O'Brien, have voting rights in excess of 50 percent of the outstanding ARVI common stock. There are currently 5,551,642 shares outstanding. ARVI's stock is listed in the OTC

Pink Sheets.

ARVI currently operates four franchised Fuddruckers restaurants and is developing two new franchised Fuddruckers restaurants in Rockville, Md., and Herndon, Va.

Fuddruckers Inc. operates, franchises and manages 122 Fuddruckers restaurants with system-wide sales in excess of $150 million that specialize in high-quality, upscale hamburgers together with a variety of other menu items and that emphasize fresh ingredients at moderate prices.

Fuddruckers is a wholly-owned subsidiary of DAKA International Inc., a company publicly traded on the NASDAQ National Market System under the symbol DKAI.

WESTBORO, MA (MAY 31) PR NEWSWIRE - Alden Electronics Inc. (NASDAQ: ADNEA) announced a contract award from American Airlines for the installation of an Alden C5020 Color Weather Graphics Dissemination System in American's new Systems Operations Center at their Ft. Worth, Texas Flight Academy.

This modern Control Center will house American's flight dispatch and system control personnel who will use state-of-the-art display and communications equipment to monitor and control the airline's worldwide operations.

The Alden C5020 System will acquire and store real time weather graphics received from the U.S. National Weather Service. The weather maps, satellite and radar pictures will be used by American's staff of meteorologists to support flight operations including dissemination of these and custom-created weather graphics to C5020 color display workstations in the Ft. Worth Systems Operations Center and to crew ready rooms at 23 major airports. The contract over five years is expected to have a value of $1 million.

Captain George Hof, VP Flight Operations, stated, "The new Alden C5020 Color Weather Graphic Dissemination System provides American's flight crews, dispatch and systems operations personnel with finger-tip access to pertinent weather information that graphically displays areas of turbulence and significant weather throughout American's route structure from the United States to Europe, the Far East and Central and South America.

American and Alden have entered discussions relative to expanding the satellite broadcast of these graphics from the current 23 airport flight crew ready rooms, to as many as 200 locations.

TROY, MI (MAY 31) PR NEWSWIRE - Standard Federal Bank announced a 1/4-percent decrease for both 15-year and 30-year fixed-rate mortgage loans effective immediately. Fixed-rate conventional home mortgage loans are now available at the following interest rates:

15-year fixed-rate mortgage - 10 percent
30-year fixed-rate mortgage - 10.25 percent

To obtain these interest rates, the borrower will pay a two-percent loan discount fee plus the normal application fee and out-of-pocket expenses. If the borrower elects to pay a three-percent loan discount fee for a fixed-rate mortgage, the interest rate will be reduced by an additional 1/4 percent.

"We are pleased to announce this 1/4-percent reduction in interest rates for fixed-rate mortgage loans," stated Thomas R. Ricketts, chairman and president of Standard Federal. "These lower rates come during the midst of the peak buying season, and will help in the continuation of a strong real estate market."

Headquartered in Troy, Standard Federal Bank (NYSE: SFB) operates 113 branch offices throughout Michigan and Indiana. The bank's current total assets are approximately $9.7 billion.

#90151p3858 05/31/1990 ~PR Newswire

RALEIGH, NC (MAY 31) PR NEWSWIRE - North Carolina Electric Membership Corporation (NCEMC) officials said today they have formally ended plans to build the proposed peaking generation facility at Deep Gap in Watauga County.

After the NCEMC board met the decision not to proceed with the Deep Gap project at a special meeting Tuesday, NCEMC formally withdrew its request of the North Carolina Utilities Commission (NCUC) for a "Certificate of

Convenience and Necessity" for that site.

"Our legal staff withdrew the request for a certificate on Tuesday afternoon," said Wayne D. Keller, Executive Vice President of NCEMC. "The Rural Electrification Administration (REA) in Washington, DC, was notified by phone on Wednesday and the official withdrawal letter will arrive at REA by the end of the week."

When the actions were taken, NCEMC was awaiting a NCUC hearing on the certificate and a ruling on REA's "Finding of No Significant Impact" (FONSI) for the Deep Gap project.

NCEMC also called the North Carolina Department of Environmental Management, Air Quality Section on Tuesday afternoon to inform the agency that the Air Quality Permit for the Deep Gap plant was being returned.

"We physically returned the original permit to NCDEM by mail on Wednesday " Keller added.

These withdrawals do not affect the NCEMC plans for the peaking diesel generators at Buxton and Ocracoke on the Outer Banks of North Carolina. Both the 15-megawatt site at Buxton and the 3-megawatt site at Ocracoke are under construction and should be on-line by this fall.

"NCEMC will begin its study next week to find a use or a buyer for the 10 diesel generators originally scheduled for Deep Gap," said Keller. "We'll carefully evaluate each of the alternatives available for making the best use of this investment."

LOS ANGELES (MAY 31) PR NEWSWIRE - Twentieth Century Fox's "Predator 2," the sequel to the action-adventure hit "Predator," which grossed over 100 million dollars worldwide, completed principal photography on May 18, 1990.

The Gordon/Silver/Davis production, starring Danny Glover, Gary Busey, Ruben Blades, Maria Conchita Alonso, Bill Paxton, and Kevin Peter Hall reprising his role as the Predator, is directed by Stephen Hopkins, who previously directed "Nightmare On Elm Street V: The Dream Child."

The film is produced by Lawrence Gordon, Joel Silver and John Davis, from a script by James Thomas and John Thomas, who wrote "Predator." The executive producers are Michael Levy and Lloyd Levin. Suzanne Todd is the associate producer.

"Predator 2 " started filming Feb. 19 on locations in and around Los Angeles and on soundstages at Twentieth Century Fox. The technical team

includes director of photography Peter Levy, production designer Lawrence G. Paull (Oscar-nominated for his work on "Blade Runner"), costume designer Marilyn Vance-Straker (an Oscar nominee for "The Untouchables"), editor Mark Goldblatt, special makeup effects designer Stan Winston (who created the Predator and won an Oscar for "Aliens"), and Richard and Robert Greenberg, whose R/Greenberg Associates will create new and startling versions of the magical visual effects they devised for "Predator."

Twentieth Century Fox is primarily engaged in the financing, development, production, distribution and marketing of motion pictures throughout the world and is a unit of Fox Inc.

DENVER (MAY 31) PR NEWSWIRE - The McDonald's Corp. (NYSE: MCD) and McDonald's Owner/Operators in Colorado have announced the largest-ever polystyrene recycling program involving 130 McDonald's restaurants in Colorado. Polystyrene is the material McDonald's uses to package its large sandwiches.

The program is being launched by 19 McDonald's restaurants in Colorado. Additional stores will begin recycling until 30 percent of the region, which includes Wyoming, Utah and Northern New Mexico, is recycling by the end of 1990, and all stores participating by December of 1991.

McDonald's restaurants and their customers will be separating polystyrene, foam and other plastic packaging such as salad containers, hot drink and sundae cups in special trash bins marked "for recyclable plastic only."

"We view this as a terrific opportunity to recycle more of our polystyrene packaging than ever before and to work with our customers to help the environment," says Shelby Yastrow, McDonald's senior vice president, director, environmental affairs. "Our customers can now help local recycling efforts by separating their polystyrene in our restaurants."

"We know how important it is for Colorado to eliminate waste in landfills " says Ron Lessnau, district manager, McDonald's. "At McDonald's we want to help in the efforts to preserve our state. By recycling our polystyrene and other plastic packaging we help eliminate the need to send our recyclable waste to landfills."

According to Kelly Drake, executive director, Colorado Wildlife Federation "The program announced today is consistent with our efforts to encourage recycling and waste minimization. We hope that other large companies

follow McDonald's lead to undertake similar programs."

The resins will be sold to companies such as Rubbermaid and Traex, which will use it to create products such as videocassettes, office and household items, even McDonald's restaurant trays.

McDonald's is the world's leading quick service restaurant organization, serving 22 million people each day in more than 11,000 restaurants in 51 countries. Seventy-five percent of McDonald's restaurants are locally owned and operated by independent entrepreneurs.

RICHMOND, VA (MAY 31) PR NEWSWIRE - The Old Dominion Electric Cooperative and Virginia Power today awarded a $358 million contract for a coal-fired power generating unit to a consortium of Westinghouse Electric Corp. (NYSE: WX), Combustion Engineering Inc. (CE), H. B. Zachry Co. and Black & Veatch Engineers-Architects.

The contract is for the design, supply and erection of a 393-megawatt pulverized coal-fired generating unit with the latest enviornmental protection devices. The unit will be built on a turnkey basis and is the second unit supplied to the utilities by the consortium. The consortium was awarded a contract for an identical unit in April 1989. Both units will be sited at the new Clover Power Station in Halifax County, Va.

The Old Dominion Electric Cooperative and Virginia Power each will own 50 percent of the Clover station. Both units have received Certificates of Convenience and Necessity from the Virginia State Corporation Commission.

Westinghouse Electric Corp. will supply the steam turbine-generator, thermal cycle equipment, WDPF total plant controls and the plant electrical systems for the Clover plant. Westinghouse has successfully supplied over 270,000 megawatts of power generating capacity to 45 countries during its 105 years in the global power generation business.

Combustion Engineering Inc., a subsidiary of Asea Brown Boveri Inc., will supply the plant's boiler island, bag house and scrubber. CE is a worldwide technology leader in coal-fired steam supply systems and related environmental equipment.

H. B. Zachry Co. will construct the plant. H. B. Zachry has constructed over 20,000 megawatts of energy capacity during its 65 years in the construction business.

Black & Veatch Engineers-Architects will design the plant. Black & Veatch is a leading designer of coal-fired generation facilities. The company has designed coal-fired generation stations with cumulative capacity of 20,000 megawatts.

Construction of Clover Unit 2 is scheduled to follow by approximately one year the construction of Unit 1. The first unit is expected to begin

operations in early 1994.

HUNTSVILLE, TX (MAY 31) PR NEWSWIRE - NCNB Texas confirmed today that it has entered into a purchase and assumption agreement with the Federal Deposit Insurance Corp. (FDIC) to assume approximately $111.6 million in deposits and acquire $7.6 million in small loans of the former Huntsville National Bank, headquartered here.

The bank was declared insolvent earlier today and turned over to the FDIC as receiver. NCNB TExas acquired the assets at a price that represented a discount of $1.008 million.

"Huntsville has always been a very attractive market to NCNB Texas, and because of that we are pleased to be the winning bidder of Huntsville National," said Larry Beaumont, an NCNB Texas district manager based in Houston. "As the strongest capitalized bank in Texas, we want to assure the former Huntsville National Bank customers that we want them to continue with NCNB."

The transfers represent approximately 14,250 accounts from Huntsville National. Beaumont said the former Huntsville National facilities will reopen on their regular schedules on Friday, June 1, as NCNB branches.

The former Huntsville National main location is at 1301 Sam Houston Ave. A branch is located at One Financial Plaza and a convenience center is located at 13th Street and University Avenue.

NCNB Texas has more than $30 billion in assets and serves customers through a banking network of more than 220 branches in 70 Texas communities.

BROOKLYN, NY (MAY 31) PR NEWSWIRE - Supreme Equipment & Systems Corporation (NASDAQ: SEQP), a manufacturer of filing cabinets and storage systems, "through further staff reductions and management salary cuts reduced third-quarter operating losses by almost two-thirds, despite an 11 percent sales decline," Martin Frederick, president, reported today.

Frederick noted that, "The severe austerity program is aimed at bringing Supreme to breakeven at sales levels even lower than those now being reported, and to profitability when the sale of one of our two manufacturing facilities is consummated. Though painful, the program is working," he said.

On May 16, the company announced it signed a contract for the sale of its 53rd Street facility in Brooklyn for $3.2 million, contingent in part on the buyer obtaining IDA financing.

Frederick pointed out that, "In the first nine months of the current fiscal year, selling and manufacturing overhead was reduced by $2.1 million, with the effectiveness of these programs most graphically demonstrated during the latest quarter, when cost of goods sold fell to 71.7 percent from 73.9 percent in the comparable period the year before. Labor and overhead reductions in this period exceeded raw material cost increases for the first time in many quarters. Selling and administrative expenses in the quarter declined to 33.5 percent from 36 percent, and savings of almost a half million dollars were achieved primarily by reduced staffing and the elimination of related fringe benefits."

For the third quarter ended April 30, 1990, net sales of Supreme Equipment amounted to $6,873,000 against $7,683,000 in the like period the year before. Net loss for the quarter was $359,000 or $.34 per share, compared with a net loss of $972,000 or $.91 per share in last year's third quarter.

For the nine months ended April 30, 1990, net sales amounted to $22,593,000, down from the $25,060,000 reported in the like period a year

earlier. Net loss for the first nine months of the current fiscal year amounted to $1,187,000 or $1.11 per share, against a net loss of $1,533,000 or $1.43 per share in the first nine months of fiscal 1989. All per-share earnings have been computed on an average of 1,072,632 shares outstanding.

SAN FRANCISCO (MAY 31) PR NEWSWIRE - Chevron U.S.A. Inc. today announced that Michael D. Hannan has been named general manager of the company's refinery in Richmond, Calif. He will succeed Paul E. Ruhter, who is retiring July 31. Graham F. Somerville will replace Hannan as general manager of Chevron's Pascagoula, Miss., refinery.

Hannan, 52, joined Chevron in 1962 in the Engineering Department in San Francisco. He held various operating assignments of increasing responsibility at the company's refineries in El Segundo, Calif., and Perth Amboy, N.J. In 1977, he was named operations coordinator of Chevron U.S.A.'s Manufacturing staff. He became refinery manager at Irving Oil in Saint John, New Brunswick, Canada, in 1979, moving to Salt Lake City in 1981 to manage the Chevron refinery there.

He was named manager - operations at the Pascagoula Refinery in November, 1983 and general manager in April, 1985. A native of Spokane, Wash., Hannan is a graduate of the University of Washington with a BS degree in electrical engineering.

Somerville, 55, is currently general manager - operations of Chevron U.S.A.'s Manufacturing Department. He joined Chevron Research Company as an associate research engineer in 1962. In 1966 he became operations foreman, Catalytic Cracking Division, at the Richmond Refinery, and later held management positions at Chevron refineries in Hawaii, El Segundo and Pascagoula before returning to the Richmond Refinery in 1977. He was named refinery manager at Irving Oil in Saint John, New Brunswick, Canada, in 1981, becoming vice president - refining and director in 1982.

He was named assistant secretary of Chevron Corporation in 1985 and vice president, Process Engineering Department at Chevron Research Company in 1986. A native of British Columbia, Somerville holds a BS degree in chemical engineering from the University of British Columbia and a MS degree in chemical engineering from UC Berkeley.

Ruhter began his Chevron career in 1958 as a research engineer in Chevron Research Company. He held a number of management positions at the Richmond and El Segundo refineries before becoming refinery manager at Perth Amboy in 1973 and general manager in 1977. He was named general manager of the Pascagoula refinery in 1982.

He returned to the Bay Area in 1985 as general manager - operations for Chevron U.S.A. Manufacturing staff. He was named general manager of the Richmond Refinery in 1986. Ruhter is a native of Monrovia, Calif., and holds a BS degree in chemical engineering from the University of Nebraska.

HOUSTON (MAY 31) PR NEWSWIRE - Granada Foods Corp. (AMEX: GNF) reported first quarter 1990 net income rose significantly on 10 percent higher revenues, reversing the profit squeeze that affected the meat processing and distribution operation through most of the prior year.

According to David G. Eller, chairman and chief executive officer, the improvement in earnings reflected higher gross margins as well as the results of effective cost containment efforts.

Revenues for the three months ended March 31, 1990, were $32,681,000 compared to $29,728,000 for the like period last year. Net income was $59,000, or 2 cents per share, compared to a net loss of $116,000, or 5 cents per share, for the first quarter of 1989. The 1989 per share amount was based on 2,200,000 average outstanding common shares, whereas the 1990 per share amount was based on 3,178,000 average outstanding common shares.

On March 31, 1990, the company had working capital of $21,346,000 and a ratio of current assets to current liabilities of 2.5 to 1. Stockholders' equity was $24,514,000, a 44 percent improvement from stockholders' equity of $17,071,000 at Dec. 31, 1989.

Granada Foods Corp. is the largest meat purveyor in Texas and the largest smoker of whole body turkeys in the nation. The company is a producer, marketer and distributor of value-added food, specializing in certain red meat and poultry products. The company's Texas-based processing and distribution facilities service various metropolitan areas in the continental United States and certain international markets.

Granada Foods common shares are traded on the American Stock Exchange under the ticker symbol GNF.

MOUNT LAUREL, NJ (MAY 31) PR NEWSWIRE - Marlton Technologies, Inc. (AMEX: MTY), reported a profit of $2,194, or less than $.01 per share for the first quarter and three month period ended March 31, 1990. This reflected a one time gain of $150,453 on the redemption of Audio Information Sciences, Inc. (AIS) preferred stock, and compares with a loss of $213,561 or $.06 per share in the same period of 1989.

The company pointed out that although it reported only insignificant sales its principal holding, Audio Information Sciences, Inc. did have substantial sales and moderate profits in the first quarter. These are not reflected in the company's report because its investment in AIS is treated under the cost method of accounting.

The company also reported that it had executed an agreement for the acquisition of Sparks Exhibits Corporation, a company engaged in the custom design, manufacture and servicing of sophisticated trade show exhibits and displays. It stated that Sparks' clients comprise a large number of accounts, including a number of major industrial, government, health care, telecommunications and other specialized entities. The proposed acquisition is subject to ratification by its shareholders at the company's annual meeting scheduled for June 19, 1990. The company stated its belief that this acquisition, if approved, will make positive contributions to its sales, profits, and future growth.

SPOKANE, WA (MAY 31) PR NEWSWIRE - Washington Water Power's Pentzer Corporation announced Thursday it has signed a two year contract with the Spokane real estate firm of Kiemle & Hagood to manage Spokane Industrial Park. The move to bring in a full service independent firm to manage the park will improve its marketability in both Spokane and throughout the Northwest, Pentzer president Richard A. Davis said.

Theron Rust, manager of the park, has announced he intends to leave Pentzer to pursue new challenges, according to Davis. "With Theron's departure, it seemed appropriate to re-examine how we were approaching the management of our real estate assets," Davis said.

"Our selection of Kiemle & Hagood came from a desire to keep Spokane Industrial Park the predominant industrial development in the Inland Empire and to help the park compete more effectively within the region," Davis said.

Kiemle & Hagood has been in business since 1971 and is the largest company of its kind in the area, according to Gerald L. Hagood, president and co-founder of the firm.

"Spokane Industrial Park is an outstanding real estate asset, and we believe our involvement will allow Pentzer and Washington Water Power to gain additional value from their holding," Hagood said.

While K&H is a leader in commercial real estate, the arrangement does not amount to an exclusive franchise for the firm. Other real estate brokers will still receive full commissions on any tenants they bring to the park, Davis said.

Pentzer is wholly owned by Washington Water Power and operates its non-utility businesses. Spokane Industrial Park, 11 miles east of Spokane at Trentwood, covers more than four million square feet and houses 100 businesses which employ more than 4,000. A former Navy installation during the second world war, the facility was the area's first industrial park and remains Spokane's leading industrial development.

NEW YORK (MAY 31) PR NEWSWIRE - Toyota Motor Corporation (NASDAQ: TOYOY) and Chubu Electric Power Co., Inc. recently agreed on joint production of a battery-powered, multipurpose van to promote the use of electric vehicles. Based on the Toyota Hi Ace Van, three units of the vehicle will

be produced, two of which will be used for vehicle evaluation at Toyota.

The two companies have been working actively from their respective standpoints on research, prototype development, and publicity for the electric vehicle. With growing international concern about environmental problems and rising demand for efficient use of energy, they have decided to produce a vehicle of this type and to publicize it widely to increase awareness of electric vehicles.

Toyota has been commissioned by Chubu Electric Power Co. to develop and manufacture the vehicle. Once it has been completed, the power company plans to rent it out for various events, for example, as an escort vehicle for marathons.

Production of the vehicle is scheduled for completion at the end of 1990. It will be delivered at the end of January 1991, and rented to the general public from mid-February of that year.

NEW YORK (MAY 31) PR NEWSWIRE - Glaxo Holdings p.l.c. (NYSE: GLX), a London-based international pharmaceutical firm, reported to U.S. financial analysts today that the company's level of activity in research and development over the past 12 months is unprecedented for the firm and may be the most active pace in the industry.

Richard B. Sykes, Ph.D., Glaxo Group Research director, presiding over the company's fourth annual research and development update to financial analysts, reported that Glaxo's progress over the past year included the filing of five major product license applications and the addition of six new research compounds in exploratory development. Additionally, three compounds were approved for marketing in the past year.

Compounds entering full pharmaceutical development include ranitidine bismuth citrate, which is being evaluated as a treatment for peptic acid diseases. According to Dr. Sykes, Glaxo will assess the potential of this new compound to heal ulcers and keep them healed longer than is possible with currently available therapy. Clinical trials are also planned to monitor the presence of the compounds' affect on the bacterium Helicobacter pylori (formerly known as Campylobacter pylori), the bacterium believed by some to contribute to gastrointestinal disease. The first product license application worldwide could be made in 1993/94.

Product license applications have been filed for salmeterol, a long-acting

beta2-agonist for the treatment of asthma, in both the aerosol and dry powder formulation. According to the company, a new drug application for salmeterol in the aerosol formulation is expected to be filed in the U.S. in the first half of 1992.

According to the company, applications have also been filed in a number of countries for the anti-inflammatory steroid fluticasone propionate in topical form for skin diseases, and lacidipine, a calcium antagonist for the treatment of hypertension.

Product license applications for a suspension form of Ceftin(TM) (cefuroxime axetil) have been filed, with expected U.S. filing later this year, the company reported.

Glaxo Holdings p.l.c. is the U.K.'s largest pharmaceutical firm.

LOS ANGELES (MAY 31) PR NEWSWIRE - L.A. Entertainment (NASDAQ: LAET) today announced the appointment of James S. Kolitz as executive vice president, chief operating officer effective May 25, 1990.

Kolitz succeeds Lawrence Kieves who has resigned as president, chief operating officer and director effective May 11, 1990. Kieves has agreed to remain with the company on a consultant basis to assure an orderly transition. Bruce Littell, chairman and chief executive officer assumes additional position of president of the company.

A veteran of the home entertainment industry for over thirty years, Kolitz was a top executive from 1971 to 1982 with Integrity Entertainment Corp. of Gardena, Calif., dba The Wherehouse record and video stores and was one of those responsible for the growth of The Wherehouse into more than 100 outlets in both video and music retailing. He directed The Wherehouse's entry into videocassette sales and rentals. He also held posts as vice president for merchandising and advertising with Integrity.

Most recently, Kolitz was associated with CEVAXS Corp., a video rental rack jobbing company for convenience stores throughout Canada and the United States where he was responsible to direct a $40 million annual product acquisition budget.

#90151p3933 05/31/1990 ~PR Newswire
WASHINGTON (MAY 31) PR NEWSWIRE - United Press International has named Michael Keats senior vice president for international operations.

Keats, who has led UPI's Asia-Pacific operation as vice president and general manager since 1984, will be succeeded in that post by Arnold Zeitlin, a long-time reporter and bureau chief with The Associated Press, according to UPI Executive Vice President-Editorial Operations Pieter VanBennekom.

"Michael Keats' knowledge of Europe, Asia and international operations, generally, makes him a natural for this job," said VanBennekom. "He not only has the keenest eye for news, he is a tenacious problem-solver who understands every nuance of UPI's presence in the global news and information industry."

Keats' assignments since joining UPI in 1956 include covering battles for independence in former colonies in Africa and the social upheaval in the Republic of South Africa, both as a Johannesburg-based reporter and as a London-based editor.

He reported the early days of renewed fighting in Lebanon as Middle East chief correspondent during 1974-1976, and then served as London bureau manager, until becoming Asia-Pacific regional editor in Hong Kong, in 1978.

After working as a journalist in Melbourne, Australia, Keats went to Europe in 1956 and soon joined UPI in London. By 1959 he was in Madrid, Spain, establishing UPI's service to the U.S. Armed Forces Network. Beginning in 1960, he was posted successively in London, Johannesburg and Harare (then, Salisbury). His 32 years service with UPI was interrupted only by a two-year stint, 1982-1984, with Australian Media Company, David Syme, Ltd., publishers of The Age newspaper in Melbourne.

While in the Middle East, Keats covered the Turkish invasion of Cyprus in 1974, and in Asia in 1980, was in Afghanistan when soviet troops arrived for their ill-fated attempt to subdue Moslem rebels.

Zeitlin, most recently contributing editor for Dialogue, a news and opinion weekly published in Bangladesh, served with The Associated Press (AP) more than 20 years, holding such posts as Manila bureau chief, Pakistan-Bangladesh-Afghanistan bureau chief and West Africa correspondent.

His reporting assignments have included U.S. withdrawal from Vietnam, coups and the hijacking of the U.S. freighter Mayaguez. His stateside AP duties included editing and reporting assignments in New York City, Philadelphia and Boston. From 1958-1961, Zeitlin was television columnist for the Pittsburgh Sun-Telegraph and Post-Gazette.

A widely published writer, Zeitlin has written for such news media as The Boston Globe, The Saturday Evening Post, The New York Times Book Review, The Philadelphia Inquirer, Des Moines Register, Variety, The Journal of Commerce and the Far East Economic Review.

Zeitlin has served as consultant, lecturer and adjunct professor for several institutions, including Boston University, Harvard Law School, Nieman Fellows Program, the Fletcher School of Law and Diplomacy and others.

He earned his bachelor of arts degree-journalism with honors at the University of Pennsylvania in 1953 and attended the Columbia University Graduate School of Journalism in 1956. He was a fellow of Columbia's International Reporting Seminar, 1965-1966.

UPI, founded in 1907, has 200 bureaus and is represented in 97 nations. UPI is owned by Infotechnology, Inc. (NASDAQ-NMS: ITCH), the New York City-based information and communications company that also owns 47 percent of Financial News Network Inc. (NASDAQ-NMS: FNNI)

MIAMI (MAY 31) PR NEWSWIRE - Atico Financial Corporation (NASDAQ-NMS: ATFC) announced today it has received approval from the Federal Deposit Insurance Corporation to merge its Atico Savings Bank subsidiary into its commercial bank subsidiary, Interncontinental Bank.

The merger, which still requires the approval of the Federal Reserve Board previously was approved by the Office of Thrift Supervision and by the Florida State Comptroller's office.

"We fully anticipate the merger becoming effective in July," Atico's Chairman William H. Allen Jr. said. "Once the merger is completed, we will operate solely as a commercial bank holding company and our involvement in the thrift industry will be terminated," Allen stated.

The company had previously reported a net profit of $1,006,000 in the most recent quarter ended March 31, 1990. Allen said, "The company and the two banking subsidiaries meet all current capital requirements."

Atico Financial Corporation, through its subsidiaries, operates 15 banking offices in Florida, with total assets of $668 million.

#90151p3936 05/31/1990 ~PR Newswire

HOUSTON (MAY 31) PR NEWSWIRE - Granada BioSciences Inc. (AMEX: GBI) reported a further narrowing of its losses for the three months ended March 31, 1990, despite lower revenues.

"If we continue at the current pace, in all likelihood we will attain profitability in 1991," David G. Eller, chairman and chief executive officer of the Houston-based biotechnology and genetic engineering company said.

Granada BioSciences has successfully made the transition from pure research to the marketing of its genetic products and engineering technology, he noted. "We have confirmed orders for our services and are in negotiations to extend our business into other parts of the world."

The company reported a net loss for the first quarter of $3,353,000, or 52 cents per common share, 13 percent less than the net loss of $3,848,000, or 73 cents per common share for the 1989 first quarter. 1989 results were based on 5,300,000 average common shares outstanding with 1990 results based on 6,475,000 average common shares outstanding during the quarter.

Revenues for the 1990 quarter were $2,682,000, down from $3,196,000 in the same period a year ago.

In the final quarter of 1989, the company had a loss of $4.9 million, or 92 cents per share, on revenues of $3.2 million.

According to Eller, the decrease in revenues for the 1990 quarter was due primarily to a decrease in the number of breeding herd animals sold.

"Although revenues declined due to the timing of breeding herd animal sales, we expect revenues to increase significantly during the last half of 1990 as a result of two recently reported multi-year contracts. Under the contracts, we will furnish genetically superior dairy embryos to dairy farmers in the United Kingdom and in the Northern Spain Province of Cantabria. Additional contracts are now being negotiated to extend the company's cattle embryo cloning and sexing technology into other parts of the world."

Working capital at March 31, 1990 was $8,012,000, compared to $5,701,000 at Dec. 31, 1989, and the ratio of current assets to current liabilities was a strong 3.5 to 1. Stockholders' equity was $36,388,000, an 18

percent improvement from stockholders' equity of $30,818,000 at Dec. 31, 1989.

Granada BioSciences is a biotechnology and genetic engineering company which focuses its technologies on improving the quality of food products. It is a leading supplier of genetic products and reproductive technical services, including embryo cloning and transfer and sire services to both domestic and international customers in the food animal industry.

LOS ANGELES (MAY 31) PR NEWSWIRE - Continental Express today announced its expanded summer schedule for customers traveling from Los Angeles thru Boston, La Guardia and Newark. The initial schedule change for Hyannis and the islands of Nantucket and Martha's Vineyard is effective on May 25 and will increase throughout the season with the largest expansion occurring on June 28.

With the schedule change, Continental Express is introducing its newest aircraft to the Northeast region, the Embraer 120 Brasilia. This 30-passenger, state-of-the-art aircraft includes reclining seats, fold-down work tables, overhead storage, and inflight service. The airline's 46 passenger Aerospatile/Aeritalia ATR-42, equipped with the same jet-like amenities, will continue operating with the Brasilia on service from Newark and La Guardia. The average age of these aircraft is under two years.

Tom Barber, president of the Eastern Region of Continental Express, said, "We are very enthusiastic about providing our customers service with the newest generation of aircraft operating in the regional airline industry. Coupled with our increase in frequency over last summer, traveling on Continental Express to the Cape and Islands has never been more convenient." Barber also indicated that the airline intends to maintain a convenient schedule for the off-season.

Effective on June 28, La Guardia will have exclusive Embraer and ATR-42 service with five non-stop flights to Nantucket, and four non- stop to Martha's Vineyard. The La Guardia schedule also includes six flights to Hyannis. Newark will have three daily non-stop flights and one direct flight to Nantucket and Martha's Vineyard with all large aircraft. The Newark schedule will also include seven daily flights to Hyannis. From Boston, Continental Express will operate all non-stop flights including six departures to both Nantucket and Martha's Vineyard and seven to Hyannis.

Continental Express flights to Cape Cod and the Islands are timed for easy connections to and from Continental Airlines in Boston, La Guardia, and Newark. Continental Express offers customers advanced seat selection, one time baggage check in, OnePass bonus mileage, and low thru fares. Frequent travelers can take advantage of membership in Continental Express's exclusive "Sandpiper Club." Membership includes preferred check in, commuter book savings, and access to a toll-free number for personalized assistance.

Reservations and further scheduling and fare information may be contained from local travel agencies or by calling Continental Airline's toll-free number, 1-800-525-0280.

WATERBURY, CT (MAY 31) PR NEWSWIRE - Walter R. Griffin and Richard G. Morgan were reelected as directors of Webster Financial Corporation for three year terms at the corporation's annual shareholders' meeting held today in Waterbury, Conn. Webster Financial Corporation is the holding company for First Federal Savings and Loan Association of Waterbury, a Waterbury-based savings institution with nearly $700 million in assets.

The appointment of KPMG Peat Marwick as independent auditors of the corporation for the fiscal year ending Dec. 31, 1990 was ratified at the meeting.

James C. Smith, president and chief executive officer, reviewed the highlights for 1989 and the first quarter results of 1990. Webster reported earnings of $608,000, or 17 cents per share for the first quarter of 1990.

Smith said, "As previously announced, the board of directors declared a regular quarterly cash dividend of 13 cents per share in consideration of the corporation's earnings and strong capital position." The dividend is payable on June 15, 1990 to shareholders of record on May 18, 1990.

Also, Smith noted that the board of directors has recently approved a plan to repurchase up to 10 percent of its currently outstanding common stock from time to time over the next 12 months because the board considers Webster stock to be an attractive investment. The objective is to increase book value and earnings per share of those shares of Webster stock that remain outstanding after the repurchase.

HOUSTON (MAY 31) PR NEWSWIRE - Daniel Industries Inc. (NYSE: DAN) board of directors today adopted a shareholder rights plan. The plan is designed to enable the company and its board to develop and preserve long-term values for stockholders and to protect stockholders in the event an attempt is made to acquire control of the company through certain coercive or unfair tactics or without an offer of fair value to all the stockholders. The company stated that the plan was not adopted in response to any specific takeover attempt and that it was not aware of any such effort now underway or contemplated.

Under the plan, each stockholder of record at the close of business on June 18, 1990, will receive as a dividend one right for each share of common stock held. The rights expire on May 31, 2000.

Each right entitles the holder to purchase from the company a one one-hundreth interest in a share of a new series of preferred stock at an exercise price of $60.00. The rights will become exercisable, and will detach from the common stock, only in the event a person or group acquires 20 percent or more of Daniel's common stock, or commences to tender or exchange offer that, if consummated, would result in that person or group owning at least 20 percent of the common stock.

If a person or group acquires a 20-percent-or-more position in Daniel, each right (except those held by the acquiring person) will then entitle its holder to purchase, for the $60.00 exercise price, the number of shares of Daniel common stock having twice the value of the exercise price.

Also, if following the rights becoming exercisable, the company is acquired in a merger or other business-combination transaction, or sells more than 50 percent of its assets or earning power to any person, each right will entitle its holder to purchase for the $60.00 exercise price the number of shares of common stock of the acquiring company having twice the value of the exercise price.

The company may redeem the rights at 1 cent per right at any time on or prior to the tenth business day following the acquisition of 20 percent or more of its common stock or commencement of a tender offer for such 20 percent ownership.

Details of the shareholder rights plan are outlined in a letter that will be mailed to all stockholders.

CLARK, NJ (MAY 31) PR NEWSWIRE - Ketchum & Co., Inc. (AMEX: KCH) reported that William L. Glosser, a shareholder of Ketchum, has initiated a class action in the Supreme Court of the State of New York, County of New York (Index No. 11731/90) styled William L. Glosser vs. Ketchum & Co., Inc., OCP International, Inc. and Office Commercial Pharmaceutique S.A., in connection with OCP International's proposal to acquire the remaining shares of Ketchum which it does not already own through a merger of Ketchum with a newly formed, wholly owned subsidiary of OCP International.

As previously announced, under the terms of the proposed merger the shareholders of Ketchum, other than OCP International, would receive $2.25 per share in exchange for their shares of common stock and Ketchum would become a wholly owned subsidiary of OCP International.

Plaintiff alleges, among other things, that Office Commercial Pharmaceutique has violated its fiduciary duties by proposing the merger at a grossly unfair price to the public shareholders. Plaintiff seeks to maintain the action as a class action on his own behalf and on behalf of all shareholders of Ketchum, except the defendants, and seeks, among other things, injunctive relief and compensatory damages in an amount to be determined.

Ketchum indicated that plaintiff has not alleged any wrongdoing on the part of Ketchum and that the proposed merger transaction is subject to the completion of a definitive merger agreement and to approvals of the merger by an advisory committee of independent members of the board of directors of Ketchum, by the board of directors of Ketchum, by the board of directors of OCP International and by the shareholders of Ketchum holding

two-thirds of Ketchum's outstanding shares of common stock. Ketchum and the other defendants believe that plaintiff's allegations are without merit.

Ketchum is a drug and health and beauty aid distribution company, serving independent, chain and hospital pharmacies in the east and midwest.

BALTIMORE (MAY 31) PR NEWSWIRE - The board of directors of Baltimore Bancorp (NYSE: BBB) today reiterated its rejection of the unsolicited conditional proposal made by Allied Irish Bank and its wholly owned U.S. subsidiary, First Maryland Bancorp.

Harry L. Robinson, chairman and chief executive officer of Baltimore Bancorp, responding to a May 29 letter from First Maryland, said today that the Baltimore Bancorp board saw no reason to revisit their original decision to reject the proposal. "You have reiterated your view that $17 is a 'full and fair' offer, as have your spokesmen in the press," the letter said. "Our financial advisors have opined to the board, and the board concurs, that $17 per share is an inadequate price. Nothing contained in your letter leads us to question the analysis that led to our conclusion," the letter stated.

Robinson also said in the letter, "I do not believe our position could be clearer than we have made it in our press releases and this letter. The time has come for you to accept our board's considered decision to reject your proposal and stop trying to pressure us by misleading disclosures to the press," the letter stated.

The May 29 letter from First Maryland stated that the bank wanted to clarify its position on certain matters and asked board members to "give the offer the further serious consideration it deserves."

On April 27, Allied Irish Bank made an unsolicited, conditional proposal to acquire Baltimore Bancorp for $17 per share. On May 16, the Baltimore Bancorp board said that it had unanimously resolved to reject the proposal.

BELLEVUE, WA (MAY 31) PR NEWSWIRE - - When Mikhail Gorbachev and his entourage arrive in Minneapolis Sunday, they will be carrying 10 U S WEST

Cellular phones.

Officials from the Soviet Embassy called U S WEST last week requesting 10 cellular phones for Gorbachev and his party to have throughout his entire United States visit.

The effort to keep Gorbachev in constant contact with a cellular phone has become a trans-continental relay.

Last week a U S WEST Cellular representative quickly made arrangements for phones to be flown to Washington D.C. The phones were programmed for use on the city's cellular system and will be used by the Gorbachev party throughout his three-day stay there, beginning Thursday.

On Sunday, the phones will travel for Washington D.C. to Minneapolis/St Paul on the same plane with Gorbachev. At the Twin Cities airport the original phones will be instantly exchanged for another 10 cellular phones programmed for use on U S WEST Cellular's Minneapolis/St Paul system.

Minutes after Gorbachev lands in Minnesota, a U S WEST representative will pack the first 10 cellular phones and catch the next plane for San Francisco, arriving only hours before Gorbachev. There the phones will again be reprogrammed, this time for use in the Bay City area.

When Gorbachev arrives at the San Francisco airport, the phones used in Minnesota will be exchanged for the reprogrammed ones.

The Soviets called U S WEST because the company has proposed to build the first trans-Soviet fiber optic cable across the Soviet Union. No cellular telecommunications system currently exists in the Soviet Union.

EDMONTON, ALBERTA (MAY 31) PR NEWSWIRE - The board of directors of Terra Mines Ltd., Edmonton, Alberta, Canada, (NASDAQ: TMEXF; Toronto: TER) announced today that Paul C. Jones of Golden, Colo., has been appointed director of the company and elected chairman of the board, president and chief executive officer. In addition, Rodney D. Knutson, a Denver, Colo. attorney has been appointed to the board of directors and elected as secretary/treasurer of the corporation. Robert A. Evans, former president of the company, resigned as a director and Garry M. Paulson, executive vice president of the company, resigned as an officer and director effective today.

This change in the management structure of Terra signifies the commencement of an intense effort to rebuild Terra into an aggressive mining company engaged in the precious metal industry. Terra currently owns property in the Northwest Territories and in Mexico. Efforts will commence immediately to reacquire its interest in the Amelia Mine in Sonora which Terra operated during 1988-89. Efforts will also commence to acquire additional properties for development of their precious metal resources.

The newly appointed management of Terra looks forward to returning Terra to a progressive mining company with enhanced shareholder value. The old board of directors effected the write down of assets and recognized losses of $7,928,000 in 1989. Jones said ''We realize that Terra currently faces several problems, but believe, with serious effort these can be overcome and the confidence of the investing public in the company can be restored.''

Terra released today its audited financial figures for 1989 and unaudited figures for the first quarter of 1990. These figures indicate a net loss of $7,928,000 (Cdn.) in 1989 as compared to a loss of $2,568,000 in 1988, or $0.41 per share versus $0.13 per share loss respectively. The

principle cause of the net loss is a reduction of $5,084,000 in the value of Terra's Mexican affiliates. This write down of assets of its Mexican affiliate is primarily related to the loss of ownership in the Amelia Mine in early 1990. The 1989 net loss also includes a $1,140,000 provision for loss on a portfolio investment and a $731,000 provision for loss on the sale of a portable mill which was completed in early 1990.

Terra's unaudited financial figures for the first quarter of 1990, ending March 31, indicate a net loss of $199,000 or $0.010 per share compared to $236,000 of $0.012 per share for the same period of 1989.

DALLAS (MAY 31) PR NEWSWIRE - Paddington Realty Partners Ltd. today

announced that it had proposed to Consolidated Capital Equities Corp. (CCEC) a transaction which contemplated that it would offer to purchase for cash at least a majority of the units of the following Limited Parnterships of which CCEC is managing general partner:

Consolidated Capital Institutional Properties
Consolidated Capital Institutional Properties/2
Consolidated Capital Institutional Properties/3
Consolidated Capital Properties III
Consolidated Capital Properties IV
Consolidated Capital Growth Fund

Paddington stated that it has requested a meeting with the management of CCEC at the earliest possible time to discuss its proposal. Paddington characterized its proposal as friendly, and emphasized that it presently intends to proceed with its proposal after discussions with CCEC and obtaining from CCEC a commitment to recommend the proposed offer to unitholders, or an undertaking not to oppose the proposed offer.

Each proposed offer for units would be subject to customary terms and conditions, including: reasonable access to the books, records and properties of the Limited Partnership, receipt of at least 51 percent of the units, waiver by CCEC of transfer fees with respect to unit purchases, and funding of financing.

Michael D. Young, president of the general partner of Paddington, commented: "We have been interested in investing in units since we were first contacted by CCEC in January 1990. We believe our proposal will be of great interest to the over 130,000 unitholders of these partnerships, who have had no real opportunity to obtain liquidity for their investment at a reasonable price since the partnerships were organized."

WASHINGTON (MAY 31) PR NEWSWIRE - At 7 p.m. today, Judith A. Walter, Senior Deputy Comptroller for Administration, Office of the Comptroller of the Currency, declared Rocky Mountain National Bank, Denver, insolvent and appointed the Federal Deposit Insurance Corporation (FDIC) as Receiver.

In 1987, the OCC noted a substantial deterioration in the loan portfolio due to poor lending practices and ineffective supervision.

The OCC obtained a formal commitment from the Board of Directors to address the bank's problems. The composition of management changed but the deterioration in the loan portfolio continued. In late 1989 the Board of Directors again committed to address the problems. However, losses mounted and finally exhausted the bank's capital, resulting in insolvency.

Rocky Mountain National Bank was chartered in 1985. On April 30, 1990, the bank had total assets of approximately $9 million.

The FDIC is expected to release additional information later today.

#90151u0081 05/31/1990 ~United Press International

AUBURN HILLS, MI (MAY 30) UPI - Sometimes even the league's best defensive team needs an offensive spark.

And Wednesday night, when the Detroit Pistons moved within one victory of their third straight trip to the NBA finals, Mark Aguirre was it.

He came off the bench to ignite a fourth-quarter run that gave the Pistons a 97-83 victory over the Chicago Bulls and a 3-2 lead in the Eastern Conference finals.

The defending champions can now put this series to rest Friday night at Chicago Stadium. The Pistons eliminated the Bulls 4-2 in the conference finals last year en route to their first NBA title.

Aguirre finished with 19 points on 8 of 10 shooting. He opened the final period hitting a 3-point basket, driving for a layup and converting a 3-point play as the Pistons drew in front 80-68 with 8:52 remaining.

''Dennis (Rodman) and I work as a tandem,'' Aguirre said. ''When he plays like he did in Game 4 (20 points, 20 rebounds), I know my time will be limited. You have to accept it on some nights.''

Aguirre scored just 2 points in 9 minutes in Game 4.

''Everyone wants to play and be on the floor,'' he said, ''but with this team it's to win. You have to stick with what the group wants.''

Detroit opened its biggest lead at 89-71 with 5:28 remaining on another Aguirre basket and coasted the rest of the way.

''It was one of those nights where we had the shots but we didn't hit them '' Chicago Coach Phil Jackson said.

Joe Dumars led Detroit with 20 points, while teammates Bill Laimbeer (16 points) and James Edwards (13 points) broke out of scoring slumps and John Salley grabbed 10 rebounds.

Dumars also did an outstanding defensive job on Chicago's Michael Jordan,

who was limited to 22 points (7 of 19 shooting), 13 points below his average in this series. Jordan has averaged 23 points in the three losses at the Palace and 44.5 points in the Bulls victories at Chicago Stadium.

''You've got to give their defense credit,'' Jordan said. ''They took out us out of sync on offense. Our effort was there, but they stepped up their effort a notch.''

Scottie Pippen added 19 for the Bulls and Horace Grant had 15 points and 12 rebounds. The Bulls shot just 33 percent from the field and their bench was outscored 35-13.

''They wore us down prety good and that is because their bench is deeper than ours,'' Pippen said.

Detroit did a better job of handling the Chicago press and converted 56 percent of its shots.

Tempers flared at the end of the third period, and Salley and Will Perdue were given technicals for their exchange of shoves. Salley had been fouled originally and sank a pair of free throws to give the Pistons a 72-64 lead at the end of three periods.

Jordan scored 11 in the period of Chicago, which trailed by as many as 9 in the quarter. Dumars had 9 in the third for Detroit.

Laimbeer, who scored just 4 points in the two games in Chicago, broke loose for 11 points in the second period to pace the Pistons to a 46-41 lead at intermission. Detroit converted 60 percent of its first-half shots while the Bulls hit for just 37 percent. Detroit also owned a 25-15 rebounding edge after two periods.

Laimbeer and Aguirre each scored 4 points in an 8-0 run to open the second period as Detroit built a 33-25 lead. Pippen scored Chicago's first 9 points in the second to keep the Bulls close.

Jordan misread the clock at the end of the first period and sank a 3-point shot just two steps inside the halfcourt line with 11 seconds remaining. Jordan's basket capped an 8-0 Chicago run and left the score 25-25 after one period.

Dumars scored 11 for Detroit and Edwards, yet another Piston who played poorly in Games 3 and 4, had 8 in the opening period. Edwards converted 6 of 7 shots from the field.

''Maybe we solved some of the problems,'' Detroit Coach Chuck Daly said. ''But we know we are going back to (Chicago) Stadium where we haven't done well the past two games.''

#90151u0142 05/31/1990 ~United Press International

SAN FRANCISCO (MAY 31) UPI - A medical team specializing in fetal therapy announced they had for the first time performed successful surgery in the womb to correct a lung defect that usually kills the child after birth.

Two babies who were the first to survive corrective prenatal surgery for a rare and life-threatening lung disorder cuddled, cooed, and cried at a news conference held Wednesday by the physicians at the University of California at San Francisco.

Within five or ten years, the medical team said, advances in fetal therapy will be entering a brave new era - with doctors able to correct many genetic defects that are now considered to be lifelong disorders after birth.

In the procedure announced Wednesday, open fetal surgery was performed on to correct two cases of congenital diaphragmatic hernia, a disorder during which organs such as the stomach and intestines become stuck in the fetus' lungs. About 75 percent of unborn babies with the condition die at or before birth, and the rest must undergo extensive and expensive hospital treatment.

After six failures, the UCSF surgical team appeared with the two children who underwent the successful operations to correct the disorder, in which a hole in the chest prevents the lungs from developing properly.

Pediatric surgeon Michael Harrison, co-director of the school's Fetal Treatment Program, held nine-month-old Blake Schultz of Chelsea, Mich., in his arms. He said the infant weighs 14 pounds and is happy and healthy after being the first successful birth in the program. Beside him, five-pound Devona Anderson of Tacoma, Wash., born six weeks ago after a similar procedure, was being rocked in her father's arms.

"If we wait to operate on newborn babies to correct the hole in the diaphragm, they often die anyway," Harrison said. "It is heartbreaking. The baby's lung, compressed by the other organs throughout fetal development, is simply too small to support life outside the womb." Medically, the condition occurs in about one out of 2,200 births.

Harrison, who also has performed fetal surgery to correct other defects that if not corrected in the womb leave children impaired for life, said the surgical team had six failures - four of them because of technical problems with the kidney - before achieving success with the pregnancy of Beth Schultz.

The mother, a 28-year-old data processor, and her husband, Rick, said they decided to undergo the surgery even though they knew the procedure was experimental.

"I'd never had any surgery before, and the idea was scary," said Mrs. Schultz, who also has a five-year-old boy. "But the chances of the baby surviving wasn't good. We just hoped that this would be the operation that worked."

Harrison said the surgical technique involved putting the mother to sleep, opening the uterus and taking the fetus partially out of the womb. The team then removed the intestines, stomach and spleen from the fetus' chest and plugged the hole in the lung cavity.

"We then closed up the uterus and abdominal wall," Harrison said. "We weren't worried about the surgery, we were worried about losing the baby. The main problem afterwards was to keep the mother from pre-term pregnancy (premature birth), which required constant monitoring."

He said the surgery was developed from 12 years of animal research which showed that in-uterus procedures were possible during experiments with about 1,000 sheep. He said monkeys were used in later surgical experiments to determine that the operation was safe for the mother.

"At first we failed," said Harrison, citing the first six surgeries in which the babies died either before or just after birth. "But the mothers that went through the procedure encouraged us to press on with our efforts." The surgeons' news conference coincided with a scientific article on the fetal surgery in the New England Journal of Medicine.

Dr. Mitchell Golbus, a geneticist and co-director of the UCSF prenatal surgery program, said the future of the program will involve such corrective procedures but, more important, will include prenatal therapy advances for correcting genetic defects before birth.

He said gene replacement to fix heredity defects or stem cell replacement - to provide missing proteins or enzymes - is now being studied by scientists in dozens of laboratories around the nation.

"The technologies are not fully developed, but they will be in five or ten years," Golbus said. "The gene gnome that you are conceived with may not be the one you have to carry all of your life."

#90151u0192 05/31/1990 ~United Press International

(MAY 31) UPI - The Soviet Embassy in Washington, D-C, will serve as President Gorbachev's headquarters and home during his summit with President Bush. The Kremlin leader arrived by motorcade at the building just three blocks north of the White House Wednesday evening, following his arrival at Andrews Air Force Base in suburban Maryland. The summit opens Thursday morning.

NO reports yet of casualties or damage from a strong aftershock the U-S Geological Survey in Golden, Colorado, says hit northeastern Romania early Thursday... just 14 hours after a powerful earthquake rocked the area. U-S officials say the aftershock measured five-point-nine on the Richter Scale. The earlier quake- which measured up to seven-point-five- killed at least nine people, injured hundreds more and caused widespread damage. It was felt in several other countries.

The U-S Southern Command in Panama City says about 650 troops will return to the United States within the next month. That will bring the number of American soldiers stationed in Panama to just under 13-thousand... close to the number prior to last December's invasion. Some 14-thousand troops were sent to Panama the night of the invasion. Most have since returned to the United States.

Authorities say a man involved in a hostage drama in Tyler, Texas, had been arrested at the Dallas-Fort Worth International Airport in February 1986 after he took a flight attendent captive aboard a flight from Florida. He later was found innocent by reason of insanity. On Wednesday, officials say 38-year-old Ralph Hughes held a nurse hostage in a Tyler clinic for more than three hours but was arrested after police stormed the building. The body of his father was found in his car.

(MAY 31) UPI - A grim discovery Wednesday afternoon by police in Port Chester, New York. An anonymous phone call led them to an apartment, where they found the bodies of four children between the ages of three and 11 with slash wounds to their necks. Their mother... who authorities say has a history of mental illness... was found critically wounded in the same

apartment.

Warner Brothers Records says officers of Toronto's morality squad tried to get Madonna to change the content of her final show at the SkyDome Tuesday night. However, company officials say the officers WEREN'T able to reach the pop star and the show went on as scheduled. A police spokesman says the department had received complaints that Madonna's first two shows were obscene. But he says officers merely viewed the third show Tuesday night and determined charges were NOT warranted.

WASHINGTON (MAY 31) UPI - The following is the schedule for the U.S.-Soviet summit Thursday:

Thursday:

10:00 a.m. President and Mrs. Bush welcome President and Mrs. Gorbachev.

10:25 Ceremony concludes, presidents and wives enter White House.

10:30 Bush and Gorbachev begin first meeting.

Noon Gorbachev departs White House for embassy luncheon.

1:00 p.m. Joint U.S.-Soviet press briefing.

4:00 Gorbachev arrives for second White House meeting.

5:30 Gorbachev departs for private time at the embassy.

6:00 U.S.-Soviet press briefing.

7:15 Bushes welcome Gorbachevs for White House state dinner.

10:45 Gorbachevs depart for embassy.

-30- 857

#90151u0240 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - Camera-friendly Raisa Gorbachev, who petted a 3-foot-long snake and toured a children's dinosaur display while on a state visit to Canada, turned her sights Thursday to summit events in Washington.

The Soviet first lady had a crowded day, starting with the formal red carpet welcoming ceremonies on the south lawn at the White House to kick

off the superpower meeting between President Bush and Soviet President Mikhail Gorbachev.

Afterward, Mrs. Gorbachev scheduled a tea in the family quarters with Barbara Bush and some of the diplomatic wives.

Mrs. Gorbachev demonstrated she knows how to play to the cameras during her 36-hour visit to Ottawa Tuesday and Wednesday. Several times the fashionable Mrs. Gorbachev broke away from her hostess, the equally stylish Mila Mulroney, to talk with children and adults who lined up to see her.

And showing she can be as unpredictable as her husband, she at one point rerouted her entourage for an unscheduled tour of a museum's dinosaur display because children told her it was the best exhibit to see.

Ever conscious of the media, the Soviet first lady several times turned children in the direction of the cameras so photographers could have a better angle.

Yet she seemed to sense that petting a snake would be the best picture of the day. It was.

Mrs. Gorbachev wore bright colors, including a pink suit, and changed to a matching green outfit for the trip to Washington. The Gorbachevs arrived in the nation's capital Wednesday evening.

The highlight of Mrs. Gorbachev's visit to the United States will be her joint address with Mrs. Bush to graduates at Boston's Wellesley College on Friday.

The Soviets gave no advance word on the subject of Mrs. Gorbachev's speech. On previous occasions she has reflected strong ideological views, but considering the changes in the Soviet Union, she may steer away from that approach this time.

The Gorbachevs had a full social schedule, hosting luncheon at noon Thursday in honor of some 70 so-called American intellectuals.

In the afternoon, Mrs. Gorbachev opens a special exhibition of rare historic manuscripts of Russian works at the Library of Congress and mingles with some government dignitaries and Washington elite at a reception.

The reception's host is Armand Hammer, chairman of Occidental Petroleum Corp., and a longtime friend of the Soviet Union.

She also will tour the Capital Children's Museum, where she will meet with

Anton Kumankov, author of a Soviet children's book, ''No Children in the World Are Strangers.'' At the museum, she will see a state-of-the-art television station for children and an animation laboratory.

In the evening, Mrs. Gorbachev will accompany her husband to the White House for a state dinner in their honor.

Mrs. Gorbachev and Mrs. Bush have been invited to join their husbands during the signing of several treaties and agreements in the East Room on Friday evening.

The Gorbachevs will hold a banquet at the Soviet Embassy Friday in honor of the Bushes.

Both couples will fly to Camp David by helicopter, with the Gorbachevs returning to Washington after an early supper.

An aide to the first lady said that it will be ''down time, a time for relaxation'' in rustic surroundings for Mrs. Gorbachev, but there is ''plenty to do if she desires.''

Mrs. Bush swims regularly when she is at the mountaintop retreat in Western Maryland. She also bowls on occasion.

#90151u0305 05/31/1990 ~United Press International
(MAY 31) UPI - Andy Van Slyke would like to enlist the fans' help when it comes to his fielding.

''It's no fun making an error, no fun making an ass of yourself,'' he said of his two errors in the Pittsburgh Pirates 5-3 victory over the Los Angeles Dodgers.

''I felt like wearing a sign on my back asking fans to tell me when the ball was coming my way.''

Van Slyke suffered through what he called his worst game since a four-error performance at third base for Class AAA Louisville in 1983.

Walt Terrell, 2-4, had a better night. He scattered five hits and three runs over 6 1-3 innings to help Pittsburgh complete its seventh series sweep of the season and stretch its winning streak to five games. Bill Landrum, who pitched the ninth, got his seventh save. Ramon Martinez, 5-3, suffered the loss.

The Pirates scored three times in the first. Wally Backman reached base on Juan Samuel's error and took second on catcher's interference with Van Slyke at bat. Backman scored on Bobby Bonilla's flair single to left and Barry Bonds followed with his 10th homer.

Pittsburgh made it 5-0 in the third. Bonilla tripled to lead off and scored when Bonds grounded out. Sid Bream then smacked Martinez's 3-2 pitch to right for his third homer.

The Dodgers chased Terrell in the seventh, but relief work by Bob Kipper and Ted Power limited the damage to one run.

''They took the bubble out of us tonight,'' Dodgers third baseman Lenny Harris said. ''It seems like we were playing a defensive ballgame and we didn't really try to supply any runs until late.''

In other NL games, San Francisco defeated Chicago 4-1; Montreal topped Atlanta 9-6; San Diego topped Philadelphia 8-3; and Houston edged St. Louis 2-1.

In the AL, it was: Oakland 8, Toronto 5; Chicago 5, New York 2; Kansas City 4, Detroit 3; Minnesota 12, Baltimore 3; Texas 4, Boston 3 in 10 innings; Seattle 2, Milwaukee 1; and Cleveland 4, California 2.

-- AROUND THE NL --

Giants 4, Cubs 1

At Chicago, John Burkett pitched a five-hitter over eight innings, drove in a run with his first major-league hit and was supported by Matt Williams' two-run homer to lift San Francisco. Burkett, 4-1, walked three and struck out one. Steve Bedrosian pitched the ninth for his seventh save. Shawn Boskie, 1-2, suffered the loss.

Expos 9, Braves 6

At Atlanta, Tim Wallach homered and drove home four runs and Dave Martinez added a solo homer to lead Montreal. Winner Dave Schmidt, 1-0, allowed three hits over 2 2-3 innings in relief of emergency starter Bill Sampen. Drew Hall picked up his second save. Tom Glavine, 2-3, took the loss.

Padres 8, Phillies 3

At Philadelphia, Bip Roberts and Tony Gwynn each drove home two runs in a five-run fourth inning, helping San Diego hand Philadelphia its fourth loss in a row. Andy Benes, 5-4, won for the fourth time in as many career starts against the Phillies. Greg Harris finished for his second save. Bruce Ruffin, 3-5, was the loser.

Astros 2, Cardinals 1

At Houston, Glenn Wilson singled home Ken Caminiti in the eighth to carry Houston. With the score 1-1, Caminiti hit a one-out double off Joe Magrane 2-8. Wilson followed with a single that second baseman Jose Oquendo knocked down, but Caminiti beat the throw to the plate. Winner Juan Agosto 4-1, pitched one inning in relief of starter Mike Scott. Dave Smith earned his 10th save.

#90151u0323 05/31/1990 ~United Press International

(MAY 31) UPI - The way things have been going this season, it would not be surprising if the Chicago White Sox believe in ghosts.

Scott Fletcher hit only his second home run in the past three seasons and starter Greg Hibbard overcame some ''messed up'' early innings Wednesday night, leading the White Sox to a 5-2 decision over the New York Yankees.

''Maybe the ghosts of Comiskey (Park) are coming alive,'' catcher Carlton Fisk said.

Fletcher hit an unexpected three-run homer and Sammy Sosa added a solo shot to power the White Sox to their fifth straight victory.

''Here's a game where we got more runs than hits. That's taking advantage of things,'' White Sox Manager Jeff Torborg said. ''Scotty's been hitting the ball real well. Here, we had the big guys hitting balls up in the air and Fletcher gets the home run. However we get them, I'm not going to question it.''

Fletcher's homer was his first of the season and first since last Sept. 12 against Baltimore. That was his only home run of 1989 and he did not hit any in 1988. He now has 18 in eight seasons.

''I don't have a hard time remembering my home runs,'' Fletcher said.

It also was the first home run in 35 2-3 innings off Yankees starter Chuck Cary - the last coming Aug. 29 by Oakland's Jose Canseco.

Hibbard, 4-3, gave up four hits over 7 1-3 innings, struck out three and walked two for his first win in his last four starts. Bobby Thigpen pitched the ninth for his 16th save.

''I didn't have anything working early,'' Hibbard said. ''Mentally, I was all messed up.''

Cary, 2-1, took the loss despite scattering four hits over 7 2-3 innings.

''(Cary) threw the ball well,'' Yankees Manager Bucky Dent said. ''He had good stuff. He just made a few mistakes and right now we can't afford any mistakes.''

The White Sox scored four runs in the fourth inning to overcome a 2-0 deficit.

Ivan Calderon walked with one out and scored on Ron Kittle's double off the left-field wall, the first hit off Cary. Fisk walked and after Carlos Martinez struck out, Fletcher drove an 0-2 pitch over the left-field wall. The ball hit a fan, who lost the souvenir as it bounced back onto the field.

''I slipped and didn't see where the ball was. I thought I'd better get back to second base,'' said Fletcher, who entered the game batting .205, but is 10 for 27 in his last 11 games.

Elsewhere in the American League, Oakland beat Toronto 8-5, Kansas City clipped Detroit 4-3, Minnesota routed Baltimore 12-3, Texas edged Boston 4-3 in 10 innings, Seattle downed Milwaukee 2-1 and Cleveland doubled up California 4-2.

In the National League, it was: San Francisco 4, Chicago 1; Pittsburgh 5, Los Angeles 3; Montreal 9, Atlanta 6; San Diego 8, Philadelphia 3; and

Houston 2, St. Louis 1.

-- AROUND THE AL --

Athletics 8, Blue Jays 5

At Oakland, Calif., Jamie Quirk drove home two runs to lead the Athletics. Quirk, who had only 10 at-bats before starting at catcher Wednesday, tripled in the second inning and doubled in a four-run fifth. Todd Burns, 1-0, pitched 3 1-3 innings of shutout relief for the win. Willie Blair, 0-1, took the loss.

Royals 4, Tigers 3

At Kansas City, Mo., Kevin Seitzer and Bo Jackson each scored one run and drove in another to lead the Royals to their first series sweep this season. Luis Aquino, 1-0, earned the victory in relief of Storm Davis, who left in the fourth inning after being hit by a line drive. Jeff Montgomery pitched the ninth for his fourth save. Dan Petry, 4-2, took the loss.

Twins 12, Orioles 3

At Minneapolis, Fred Manrique drove in three runs and Brian Harper doubled twice to lead a 16-hit Minnesota attack. Roy Smith, 4-4, won his fourth game in his last five starts. Pete Harnisch, 5-2, gave up eight hits and six runs in three-plus innings for Baltimore.

Rangers 4, Red Sox 3 (10 innings)

At Arlington, Texas, Pete Incaviglia doubled home Julio Franco with one out in the 10th inning to lift the Rangers. Franco led off with his third single of the game and stole second. One out later, Incaviglia ripped a shot off Wes Gardner, 0-2, down the right-field line to score Franco. That gave the victory to Kenny Rogers, 2-1.

Mariners 2, Brewers 1

At Seattle, Jeffrey Leonard hit a solo homer and five Seattle pitchers combined on a three-hitter. Bryan Clark, 2-0, picked up the victory and Mike Schooler earned his 14th save. Chris Bosio, 4-3, took the loss in pitching his fourth complete game.

Indians 4, Angels 2

At Anaheim, Calif., Joel Skinner singled home two runs and Doug Jones earned his major-league-leading 17th save to carry the Indians. Tom Candiotti, 5-2, yielded one run and eight hits over first seven innings. Mark Langston, 3-5, took the loss.

(MAY 31) UPI - A full measure of protocol will be served up Thursday morning when President and Mrs. Bush welcome Soviet President Gorbachev and his wife, Raisa, to the White House . Following a 25-minute ceremony, Bush and Gorbachev will open their summit. A reduction in strategic nuclear arms is the agreement most likely to be signed during the three-plus days of talks. But the issues of German reunification and the restive Baltic states also are likely topics of discussion.

Nearly 14 hours after Wednesday's powerful earthquake in northeastern Romania, a strong aftershock is reported. Officials at the U-S Geological Survey in Golden, Colorado, say the aftershock- measuring five-point-nine on the Richter scale- hit early Thursday. NO immediate reports of casualties or damage. Wednesday's quake killed at least nine people, injured nearly 300 more and caused widespread damage. It was felt throughout the Balkans and into the southwestern Soviet Union as far away as Moscow, 700 miles to the northeast.

UNofficial results from Sunday's balloting in Poland indicate Solidarity candidates trounced their communist opponents, taking 41-point-five percent of the posts to the communist's point-three percent. Also faring well in the balloting were independent candidates, who garnered 38 percent of the more than 52-thousand local government posts. The downside to the figures is that a mere 42 percent of eligible voters cast ballots.

New Jersey Governor Jim Florio signed into law Wednesday a measure he says gives the state the toughest law in the nation regulating assault weapons. The new measure bans the sale of semi-automatic weapons in New Jersey. It allows current owners to keep the guns if they register them and join target shooting clubs. Collectors are also able to keep the weapons if they are registered and their firing pins removed. California has the only other statewide ban, with sales barred, but owners are allowed to keep their guns if they're registered.

(MAY 31) UPI - Vice President Quayle Wednesday praised this year's U-S Naval Academy graduating class for committing themselves to military careers. Despite the growing trend toward democratic governments throughout the world, Quayle urged the 890 new Navy ensigns and 90 Marines to ''be prepared.'' He told his audience in Annapolis, Maryland, that although reforms have occurred around the globe- in his words- ''the world is still a dangerous place.''

The Democratic national committee's site selection panel is recommending either New York or New Orleans hold the party's 1992 presidential convention. A final decision by party chairman Ron Brown will made next month. In New York, Mayor David Dinkins... a family friend of Brown's...

says the city will redouble its efforts to host the convention. And he joked that it's NOT true he's ''started the rumor that thedome leaks.''

LIMA, Peru (MAY 31) UPI - More than 20 aftershocks followed an earthquake that killed at least 83 people, injured nearly 500 and destroyed the homes of hundreds of others in northern Peru, the same region where tens of thousands were killed by a temblor 20 years ago Thursday.

The earthquake, which lasted 48 seconds and registered 5.8 on the open-ended Richter scale, struck the Amazon basin region on the eastern slope of the Andean mountain range late Tuesday and was followed Wednesday by numerous aftershocks of lesser intensity, authorities said.

The quake, which Peru's Geophysical Institute said was centered 15 miles southeast of the city of Moyobamba, about 400 miles northeast of Lima, killed 27 people in Moyobamba, 25 in Rioja, 19 in Nuevo Cajamarca, and 12 in Soritor, said Peruvian civil defense chief Gen. Jorge Ferreyros.

Civil defense official Ciro Ugarte said the number of deaths could ''rise considerably'' after more reports are received from remote communities in the region.

The quake also injured 494 people, mostly children, and 40 people were missing, Ferreyros said. About 800 people lost their homes, and 15,000 people across the country suffered property losses, he added.

It was 20 years ago Thursday, May 31, 1970, that an earthquake measuring 7.7 on the Richter scale rocked northeastern Peru, killing at least 50,000 people, and possibly as many as 70,000.

More than 20 aftershocks from Tuesday's quake were felt Wednesday in the stricken area, the most serious registering 4.8 on the Richter scale, Ferreyros said. Almost all the homes in Rioja and Moyabamba were destroyed and the roof of the Moyabamba cathedral caved in.

Shocks from the quake were felt up to 300 miles from the epicenter,

shaking buildings in the coastal cities of Trujillo, Chepen, Pacasmayo, Chiclayo and Piura.

Ferreyros said rescue organizers appealed to Health Ministry doctors, who ended a one-month strike to aid the relief effort.

Antonio Mestanza, prefect of the department of Amazonas, said in a radio interview that ''the quake damaged 90 percent of the homes'' in Rodriguez de Mendoza, which has a population of 4,000 people.

He said he has received ''reports that the town of Achabamba has totally disappeared, as well as Limabamba, Chirimoto, and others.''

Air force planes airlifted food, medicine, tents and clothing to aid the homeless.

Mateo Casaverde, chief of the Geophysics Institute, said the temblor was similar to one that shook the same region June 19, 1968, measuring 6.4 on the Richter scale. Each point on the Richter scale means the ground motion is 10 times greater.

#90151u0416 05/31/1990 ~United Press International

MANAGUA, Nicaragua (MAY 31) UPI - About 500 Contra rebels surrendered their weapons in the largest one-day disarmament since the process began more than a month ago, U.N. officials said.

Contra leaders signed an agreement earlier Wednesday with President Violeta Chamorro pledging to disarm at least 500 troops a day, with the last rebel to give up his weapons by June 10.

However, Santiago Murray, spokesman for the Organization of American States' Support and Verification Commission, which is monitoring the process said it was not possible to complete the disarmament on time.

''We have the capacity to oversee the disarmament of 200 troops a day in each of the five security zones,'' Murray said, referring to areas set aside for the disarmament process.

''But there are more than 10,000 Contras, so even if 1,000 a day are disarmed, it wouldn't be in time,'' he said. ''But it's not important because enough of them will be disarmed by June 10.''

Col. Manuel Maldonado, chief of the U.N. peace-keeping force in Nicaragua, said 498 Contras disarmed Wednesday, the most since the Contras began the process after Chamorro took office April 25, following her election victory two months earlier over Sandinista President Daniel Ortega.

The Contras have fought a bloody, nine-year civil war with the Sandinistas who, despite their election loss to Chamorro Feb. 25, still control the military.

Many of the Contras have said they will not turn in their arms until the Sandinista army does the same.

''We are all Nicaraguans and we all want peace,'' Chamorro said Wednesday after all-night talks with rebel leaders. ''Our friends of the resistance have promised to comply with all the agreements and to completely disarm by June 10.''

In an apparent gift to Chamorro - who has four children and is seen as a mother figure by many Nicaraguans - the Contras said many rebels would hand in their weapons ''in honor of Mothers' Day,'' which was celebrated by Nicaraguans Wednesday.

The agreement signed by Chamorro, rebel leader Israel Galeano, alias ''Commander Franklin,'' and Catholic Cardinal Miguel Obando y Bravo, who mediated the talks, provides that at least 100 rebels a day will set down their arms in each of the five security zones set up for the disarmament process.

The agreement also reaffirmed earlier accords whereby the rebels have vowed to disarm by June 10.

More than 12,500 of the 15,000 Contras still retained their weapons as of Wednesday morning, according to U.N. officials who are monitoring the disarmament.

Though technically complying with earlier accords, the Contras have delayed the disarmament process as long as possible and it had been suspended since May 18 over various Contra complaints.

Sandinista military leader Humberto Ortega also appeared at the news conference Wednesday to announce the new pact and said he would comply with Chamorro's orders to reduce the size of the army. Chamorro has said she will announce plans June 10 for a reduction of the army.

''As far as the reductions and changes in the army, we will comply with the central government once she completes her studies on how we can do this in a proper manner,'' said Ortega, brother of Daniel Ortega.

Daniel Ortega had said the disarmament of the Contras was necessary for a peaceful transfer of power to Chamorro after more than a decade of Sandinista rule.

''The president has listened to some of the reforms we have asked for, because many of us have no place to go,'' Contra leader Galeano said at the news conference.

The agreement smoothed over differences between the rebels and the government over land that is to be given to the Contras once they disband.

The Contras are to be given their own plots of land in the southeast of the country, near El Almendro. The acreage was not announced.

Under a compromise, Contra members are to participate in a police force in the region, but the force will ultimately answer to the Interior Ministry.

Also promised was immediate medical assistance to sick and wounded Contras and help for their families and orphans, including monthly stipends. The government also promised to help the Contras find jobs on their return to civilian life, and to assist those who want to return to their hometowns rather than the new land.

The agreement also reaffirmed the Contras' right - and intention - to form a legal political party after the disarmament.

#90151u0429 05/31/1990 ~United Press International

BEIJING (MAY 31) UPI - The Foreign Ministry announced Thursday that a senior official will visit Hanoi next month for talks with Vietnamese officials on a peace settlement for Cambodia, signaling possible progress in the negotiations.

The visit by Assistant Foreign Minister Xu Dunxin, director of the Chinese ministry's Asian affairs department, will be the first by a Chinese official to Hanoi following several rounds of talks in the past 18 months in Beijing.

China is the chief military supplier of the three-faction Cambodian resistance fighting the Hanoi-backed Cambodian government. Peace efforts among the Cambodian factions themselves have largely stalled in disputes over a political settlement.

Chinese Foreign Ministry spokeswoman Li Jinhua, at a weekly news briefing, said Xu would travel next week to Bangkok for talks with officials in Thailand on Cambodia.

After that, she said, Xu will fly to Hanoi as guest of the Chinese ambassador to Vietnam and ''will exchange views with the Vietnamese on Cambodia.''

Western diplomats saw the visit as a potential sign of progress, but cautioned against expecting a breakthrough. Relations between Beijing and Hanoi have been poor since Vietnam invaded Cambodia in 1978 and then fought a brief border war with China in 1979.

''The Vietnamese want to improve bilateral relations, but the Chinese are telling them there must be a solution in Cambodia first,'' a diplomat said.

Xu's trip to Hanoi appeared to be an outgrowth of a visit last month to Beijing by Vietnamese Vice Foreign Minister Dinh Nho Liem, who extended his visit by several days and met with Chinese Foreign Minister Qian Qichen.

The resistance has demanded the inclusion of the Chinese-backed Khmer Rouge, the strongest resistance faction, in a transition government to be set up at the time of a peace settlement. Phnom Penh and Hanoi have steadfastly rejected the demand.

The Vietnamese invasion in 1978 toppled the Khmer Rouge from Phnom Penh after a four-year reign of terror that killed at least 1 million Cambodians.

All sides, however, have been discussing an Australian proposal under which the United Nations would assume temporary administration of Cambodia until free elections could be held.

Prince Norodom Sihanouk, the resistance leader, is to meet next week in Tokyo with Cambodian Prime Minister Hun Sen to sign a cease-fire agreement but Sihanouk said in Bangkok Wednesday that the Khmer Rouge might ''sabotage'' the pact.

The Khmer Rouge has objected to the agreement, saying it should be signed by the other two resistance factions as well as Sihanouk. But the prince said he would go ahead and sign the accord.

#90151u0459 05/31/1990 ~United Press International

BANGKOK, Thailand (MAY 31) UPI - Burmese junta leader Gen. Saw Maung warned senior officers not to allow partisan politics to feed dissension in the armed forces following national elections that clearly rejected the pro-military government.

The general, in his first public comment since Sunday's elections, indicated the military would still be responsible for law and order and the basic needs of the people even after handing over power to an elected government.

''No matter what the outcome, it is essential that (armed) services personnel do not personalize the victory of the party they like and the defeat of the party which they do not like,'' he said in a speech broadcast late Wednesday.''It is vital to avoid conflict between among personnel.''

The speech highlighted the military leader's fear of internal dissension in the military since election results indicated large numbers of lower-ranking soldiers had voted for the opposition National League for Democracy, or NLD.

Such dissension has long been predicted by opponents of the military regime, but little sign of it has yet to surface. Support for the opposition, or at least for the opposition's legal rights, may make it more difficult for hard-line army leaders to continue their 28-year domination of Burma, analysts said.

The speech was also notable for its refusal to acknowledge the NLD victory which a government spokesmen earlier admitted was clear even though it was based on unofficial returns.

The NLD won a landslide victory in the country's first multi-party polls for 30 years, so far winning 388 seats in the 485-seat National Assembly, according to unofficial returns. The National Unity Party, or NUP, largely comprised of former military officers, suffered a humiliating defeat - winning only nine of the races decided by Thursday.

The much slower officially ratified, hand-counted returns, however, show the NLD has won 78 out of 83 seats decided so far with the NUP failing to win a seat.

Saw Maung, speaking to the ruling State Law and Order Restoration Council and senior Defense Ministry officials, said the council had carried out its self-appointed tasks of holding free and fair elections. He said the polling had been orderly and the country was stable.

''From a security point of view, there is no great disturbances threatening today's situation,'' he said.

He appeared satisfied with foreign news reports that showed the elections were fair. Foreign reporters were allowed into the country for the first time in nearly a year only two days before the polling.

But the general said the military's tasks ''will not be over until a government has been formed in accordance with the law.''

Since the constitution was abrogated when the military seized power, the reference to law appeared to confirm earlier military insistence that the

newly elected legislature must first draft a constitution before forming a government.

Even after the elected government takes office, he said, the military will still have the ''responsibility of enforcing the rule of law and order and regional peace and tranquility.''

He said the military will also continue to be responsible for transport and basic needs of the people.

Saw Maung specifically warned against the public demonstrations and strikes that led to his taking power from the beleaguered, military-backed government.

''We can never allow the conditions of 1988 to take place again,'' he said.

The general made no reference to the fate of the two top leaders of the NLD, Aung San Suu Kyi and Tin U, who have been under arrest since July.

Earlier, an NLD spokesman said the military should act on its own to release the thousands of opposition political prisoners in the wake of the opposition's election victory.

The Democratic Alliance of Burma, a grouping of ethnic insurgents and political dissidents, welcomed this week's opposition election victory and demanded a role in drafting a new constitution.

The demand threatened to complicate the delicate process of transferring power to civilian hands, analysts said.

The alliance, which includes about a dozen ethnic groups that have fought the central government for 40 years, said there should be political talks to settle the problems between the government and the various ethnic minorities before a constitution is drafted.

#90151u0470 05/31/1990 ~United Press International

MEXICO CITY (MAY 31) UPI - A moderate earthquake registering 4.9 on the Richter scale rattled Mexico City early Thursday, the Tacubaya Seismological Service Institute said.

There were no immediate reports of injuries or damages.

The quake occurred at 1:35 a.m. and lasted about 20 seconds, the institute said.

The 4.9 temblor's epicenter was located about 190 miles southeast of

Mexico City, the institute said. The quake also was felt in Guerrero and Oaxaca.

In the capital, some residents ran into the streets, apparently recalling of the September 1985 temblor that collapsed large buildings and killed at least 7,000 people.

The open-ended Richter scale defines a 5.0 earthquake as having the potential to cause considerable damage.

The latest Mexico City quake came in the same week that deadly temblors struck in Romania and Peru.

#90151u0485 05/31/1990 ~United Press International

BOSTON (MAY 31) UPI - Two Soviet cosmonauts, in Boston for the opening of a Soviet space exhibit, say man would be flying to Mars today if the United States and Soviet Union had not stalled progress with its secretive space race of the 1960s.

''If we could have gotten together earlier, we would already have built an international observatory on the moon and we would be flying to Mars right now,'' Aleksei Leonov, 56, the first man to walk in space, told The Boston Globe Thursday.

Leonov and fellow cosmonaut Valentin Lebedev, who lived in space for 211 days aboard Salyut 7 in 1982, said that while the superpower competition initally spurred technical achievements, it eventually proved counterproductive.

Their comments came as the United States and the Soviet Union are considering a joint manned mission to Mars, a prospect both men enthusiastically support.

The pair also said the ''lazy'' Soviet media were as much to blame for the clandestine nature of the Soviet space program as was government policy.

''Failure was never reported. Of course some of that depends on the country's leadership. But the press in our country was not persistent,'' said Leonov, who also flew on the joint U.S.-Soviet Apollo-Soyuz mission in 1975.

Only recently has the Soviet media reported that after Leonov's historic space walk in 1965, he and his crewmate, Pavel Ivanovich, spent three days trapped inside their Voskod 2 spacecraft on the Russian tundra, awaiting rescue.

''There was no reason to keep that a secret,'' Leonov said.

The cosmonauts were in Boston for the opening Friday of an exhibition of more than 50 Soviet artifacts documenting the history of the Soviet space program.

#90151u0551 05/31/1990 ~United Press International

NEW YORK (MAY 31) UPI - Transit officials have passed new guidelines that call for all panhandlers - even those who only silently extend a cup - to be tossed out of the subway system, it was reported Thursday.

The guidelines follow a federal appeals court decision earlier this month that upheld a Transit Authority ban on begging in the subways. The court said begging was not a constitutionally protected form of speech, as ruled by a lower federal court.

The new rules clarify what constitutes panhandling and how the ban should be enforced, The New York Times said.

Chief William Bratton of Transit Police said in a videotaped message to officers Wednesday that the guidelines were needed to ''clear up any misunderstanding and confusion,'' The Times said.

He told officers to toss out panhandlers on their first encounter.

''Ejection, rather than warning, will be the preferred and recommended method of correcting a condition when a summons or an arrest is not appropriate,'' The Times quoted Bratton saying.

''Eventually, these offenders will get the point that they cannot lay waste to our transporation system.''

Under the new rules, a panhandler is defined as anone soliciting money or charity for his own purposes. The ban prohibits all forms of panhandling, including just extending a cup without speaking.

Artistic performers and members of charitable, religious or political groups may still solicit as long as they do not obstruct or interfere with services and stay out of the trains.

Those organizations must also be able to prove they are licensed, registered or tax exempt.

The 2nd U.S. Circuit Court of Appeals ruled May 10 that subway begging is often ''nothing less than an assault'' on passengers and ''a menace to the common good.'' The 2-to-1 vote upheld the Transit Authority's ban on

panhandling that was struck down Jan 26 by a U.S. district judge who said that begging is free speech.

The Times said the guidelines were given out to 40 transit officers on Wednesday at a roll-call meeting at the District 2 Transit Police station in Manhattan.

#90151u0553 05/31/1990 ~United Press International

(MAY 31) UPI - Around the world... around the clock, U-P-I has the latest news.

The superpower summit officially opens today when President and Mrs. Bush welcome Soviet President Gorbachev and his wife, Raisa, to the White House. The two leaders will spend nearly four days engaged in talks concerning German reunification, Baltic secession, and arms control.

Gorbachev arrived yesterday evening at Andrews Air Force Base in suburban Maryland and was greeted by Secretary of State Baker. Before the Soviet leader left Canada, where he met with Prime Minister Mulroney , he emphasized his determination to settle problems within his country without meddling from the West.

The U-S Geological Survey in Golden, Colorado, reports a second earthquake rocked northeastern Romania last night. Just 14 hours earlier, a strong quake hit the area, killing at least nine people and injuring nearly 300 others. Officials say the aftershock measured five-point-nine on the Richter scale. There are NO reports of any casualties or damage.

A P-L-O faction is claiming responsibility for yesterday's attempted attack on the Israeli shores off Tel Aviv. The attack failed and Israeli soldiers killed four of the guerrillas. The P-L-O offshoot reportedly is the same group that was behind the 1985 hijacking of the Italian cruise liner, the Achille Lauro.

A medical team specializing in fetal therapy yesterday announced the first successful fetal surgery outside the womb. Physicians at the University of California at San Francisco showed off two babies who survived the experimental surgery to correct a lung defect that usually kills infants after birth.

#90151u0572 05/31/1990 ~United Press International

PLANT CITY, FL (MAY 31) UPI - A man forced to leave California after his parole in the rape and mutilation of a 15-year-old girl faces a charge Thursday of attempting to steal a $10 disposable camera from a drugstore.

Lawrence Singleton, 62, of Tampa, was ordered to appear before Hillsborough County Circuit Judge Debra Behnke for the second time on the misdemeanor petty theft charge. He pleaded innocent at his May 2 arraignment.

Singleton was arrested April 8 by sheriff's deputies at a Brandon drugstore. He has been free on bond since his arrest.

Assistant State Attorney Ronald Darrigo said he would seek a sentence of 60 days in jail and four months probation, the maximum penalty for the second-degree misdemeanor, if Singleton is convicted.

Singleton was released from prison in California in 1987 after serving eight years and four months of a 14-year sentence for raping the teenager, hacking off her arms and leaving her for dead along a road in central

California in 1978.

In the shoplifting case, a sheriff's report says a security guard at a Phar-Mor drugstore spotted him tearing a $9.98 Fuji Quicksnap camera from its package and head for an exit. He was stopped by security guard Debra A. Love, who detained him for about 15 minutes until a deputy arrived.

Singleton was arrested, given a court notice and released. He said nothing during the process, police records show.

A former merchant seaman and two-time divorcee, Singleton arrived in Tampa his hometown, in May 1988. When he registered as a Florida citizen, he told authorities he was fully disabled and living on social security.

Singleton's release from prison in San Quentin, Calif., sparked a storm of protest as state authorities tried to find a town where he could serve his one-year parole.

Shortly after his arrival in Tampa, someone tossed a homemade bomb on the front lawn of Singleton's brother's house, where he was staying. No one was hurt and there were no arrests.

-30- 2206

#90151u0633 05/31/1990 ~United Press International

BANGKOK, Thailand (MAY 31) UPI - Khmer Rouge guerrillas captured a district town less than 10 miles from the ancient ruins of Angkor Wat, the national symbol and its leading tourist attraction, resistance radio reported Thursday.

The radio said resistance forces began a three prong-attack Saturday against the town of Roluos.

''We used infantry, artillery and commando units to raid the township,'' the radio said. ''After one and a half hours of fighting, we took complete control of Roluos, a township of Siem Reap District''

The report said the attack liberated 11 villages nearby.

''The villagers in the 11 villages expressed welcome and support to the national resistance forces that had liberated their localities from the grip of the Vietnamese enemies and their lackey puppets,'' it said.

The attack, if true, brings the fighting closer to the Angkor Wat ruins whose distinctive silhouette is featured on the flags of both the government and the resistance.

The massive temple and surrounding ruins are among the world's greatest

archeological sites and are the main focus of the trickle of tourists who still visit Cambodia despite the war.

Roluos, less than 10 miles from the 12th century ruins of Angkor Wat, itself contains at least two major ruins - Prasat Kleng Kung and Prasat Prey Rumte.

The resistance, which includes two U.S.-backed, non-communist groups along with the Khmer Rouge, has vowed not to launch any attacks that would damage the magnificently carved ruins.

Resistance officers have said their long-term strategy is to cut all supply routes to government forces at the ruins and the nearby provincial capital of Siem Reap.

Without supplies, government troops are expected to either surrender or desert so the resistance can capture the area without major fighting, a senior resistance officer said.

The capture of Siem Reap would be a major psychological blow against the government installed by the 1978 Vietnamese invasion.

The report on Roluos comes three days after the Khmer Rouge reported a successful offensive nearby and a week before the four battling groups are scheduled to sign a cease-fire agreement in Tokyo.

Cambodian resistance leader Prince Norodom Sihanouk, in a speech before his departure for peace talks in Tokyo, lashed the Vietnamese as aggressors and thieves and called his negotiating counterpart a traitor.

Sihanouk, however, said he would fulfill promises to talk peace and sign a cease-fire agreement during the June 4-6 meetings with Prime Minister Hun Sen of the Vietnamese-backed government of Cambodia.

In a speech broadcast by the Cambodian resistance radio, Sihanouk said the Hun Sen government was ''a satellite, a lackey of the Hanoi Vietnamese.''

Three days earlier, the Khmer Rouge radio reported guerrilla forces cut Route 6 about 30 miles southeast of Roluos, and the Kompond Kdei district.

''Our resistance forces cut off six small and large bridges and dug 24 large pits - each pit measuring two meters (yards) deep and three meters diameter - on the route,'' it said.

It said another 15 villages were ''liberated'' by the Khmer Rouge, who are blamed for the deaths of more than 1 million people during their brutal rule from 1975 to 1979.

''At present, the Vietnamese enemies and puppets are still not able to use the route for their trucks, tanks and so on,'' it said.

It said government forces and their Vietnamese allies still held positions along the highway but they were isolated.

Vietnam has repeatedly denied that it has any combat troops in Cambodia, but senior U.S. officials have said Vietnam has advisors and technicians actively supporting Cambodian government army combat activities.

#90151u0691 05/31/1990 ~United Press International

(MAY 31) UPI - Presidents Bush and Gorbachev open their summit talks in Washington today... strong aftershocks follow deadly earthquakes in Peru and eastern Europe. The latest news details and developments... from United Press International.

The Soviet flag with its distinctive hammer-and-sickle is flying in Washington, D-C, as President Bush welcomes Soviet President Gorbachev to the White House for the first day of their superpower summit.

Arms control... Soviet policy toward the Baltic states... and NATO membership for a unified Germany are at the top of the agenda during the four days of talks. Gorbachev objects to German membership in the Western alliance... accusing the West of short-sighted thinking on NATO and the Warsaw Pact.

Bush and Gorbachev are expected to nail down an agreement to reduce long-range strategic weapons by one-third... as well as sign pacts on investments, cultural relations and the environment.

U-S officials say the real measure of success will lie NOT in what is signed in public... but what the two leaders discuss in private.

The two presidents have arranged to meet for six hours today and tomorrow... and nine hours more in an all-day outing at the Camp David presidential retreat on Saturday. Bush and Gorbachev will conclude their summit on Sunday at a private breakfast before the Soviet leader flies to Minnesota.

There will be a state dinner this evening at the White House for Gorbachev and his wife, Raisa... and a reciprocal dinner tomorrow night at the Soviet Embassy for Bush and his wife, Barbara.

Bush and Gorbachev last met in December on the Mediterranean island of Malta.

Gorbachev arrived in the nation's capital yesterday after a two-day visit to Canada and talks with Prime Minister Mulroney. In Ottawa, Gorbachev warned the West NOT to interpret his domestic woes for weakness in foreign affairs.

#90151u0697 05/31/1990 ~United Press International

JERUSALEM (MAY 31) UPI - The prosecution began its rebuttal of convicted war criminal John Demjanjuk's appeal Thursday, insisting less physical evidence is required to convict Nazi war criminals than other defendants.

In opening statements filled with emotional references to the Holocaust, prosecutor Michael Shaked also asked the five-judge Supreme Court hearing the appeal to ''suspend logic in a case that defies logic.''

''The events of the Holocaust are beyond human comprehension,'' he said in the 11th day of the appeal. ''And seeking logic in madness is an impossible task. The court must attempt to see things from that prospective - where there is no logic.''

In April 1988, a District Court convicted Demjanjuk for war crimes and sentenced him to death, largely on the strength of Treblinka death camp survivors who identified the retired U.S. auto worker as the brutal guard ''Ivan the Terrible.''

Shaked said Israel's 1950 Nazi and Nazi Collaborators law on which the Demjanjuk verdict rests was broad enough to convict war criminals with less physical evidence and witness testimony than needed in ordinary criminal proceedings.

Adolf Eichmann, architect of the Nazi's ''Final Solution'' for the extermination of Jews, is the only person convicted and executed under the law.

''Every trial conducted within the context of this law is bound to create an extraordinary situation. Not every question, not every problem, can be resolved neatly,'' he said.

Demjanjuk says he is a victim of mistaken identity. He claims to have been a Red Army conscript who was held in a German prisoner of war when about 850,000 people, mostly Jews, were killed in gas chambers at Treblinka.

In the 10 previous sessions, Demjanjuk's lawyer attempted to pick apart the testimony of death camp survivors who identified his client as the Treblinka guard and criticized the methods of investigators who he said misled survivors with biased photo spreads.

''It would be better if those who were there had an absolutely clear recollection of what happened,'' Shaked said, ''but the (Nazi and Nazi Collaborator) law does not expect the record to have precise data. The law does not expect every survivor to recollect every detail, or that every possible document be put at the disposal of the court.''

The defense also introduced new evidence Tuesday from a Polish couple claiming to have known Ivan the Terrible as Ivan Marchenko, not Ivan Demjanjuk. Demjanjuk changed his first name to John from Ivan after emmigrating to the United States in 1952.

Shaked told the justices he did not believe the testimony of Kazmir and Maria Dudek, whose description of Ivan the Terrible does not match Demjanjuk. He also said the new evidence should not have been allowed in the appeal.

After his general remarks, Shaked also said the lower court was not biased against Demjanjuk, as the defense had suggested.

As in the past, Demjanjuk, 70, who had been living in a Cleveland suburb, showed little emotion during the proceedings. About 60 spectators, including a group of about 20 religious schoolboys, filled the small chambers. Before entering the courtroom, their teacher emptied his pockets at a security desk, leaving a loaded magazine from an automatic weapon.

The prosecution has about two weeks to presents its rebuttal.

#90151u0709 05/31/1990 ~United Press International

LIBREVILLE, Gabon (MAY 31) UPI - Authorities said Thursday that opposition leader Joseph Redjambe, whose death in a hotel room sparked a week of riots in the central African country, died of natural causes and not from foul play.

An autopsy on Redjambe's body revealed no traces of violence and that the syringe marks on his body were due to a treatment for diabetes, French and Gabonese officials said.

Death was said to be from natural causes.

Redjambe's death in a Libreville hotel room last week sparked riots across the country and nearly halted oil roduction. Redjambe was found with syringe marks on his abdomen and officials said the Ivory Coast woman he met there has disappeared. The government has not permitted Redjambe's funeral to occur for fear it might spark further riots.

The number of victims in the street fighting in the oil producing center

of Port Gentil rose to three Thursday with the death of a man killed by army troops after he opened fire on them, witnesses said.

In Paris, French Foreign Affairs Minister Roland Dumas told the National Assembly Wednesday French troops sent to protect key installations and French nationals would remain in the country until order is completely established.

Gabon was reported generally calm Thursday, with oil production almost back to the normal 270,000 barrels a day capacity after having dropped to only 20,000 barrels a day.

The president of the Gabonese National Assembly, who was reported by his relatives as kidnapped Wednesday, was back home after mysteriously disappearing for 24 hours.

The family of Augustin Boumah, a leading member of the ruling Democratic Party, said he was walking in his Libreville neighborhood late Tuesday when an unspecified number of armed men took him prisoner.

No one has claimed responsibility for the kidnapping and the government has made no comment on the disappearance.

Boumah, 63, held several ministerial posts and was president of the Supreme Court before becoming head of the National Assembly in 1980.

#90151u0713 05/31/1990 ~United Press International

GRAND PRAIRIE, TX (MAY 31) UPI - LTV Corp.'s Aircraft Products Group plans to eliminate 1,000 jobs - almost 10 percent of its Grand Prairie work force - by the end of next year.

Group President Gordon Williams said Wednesday the cutback of 100 jobs this year and another 900 to 1,000 in 1991 stem from anticipated reductions in military spending and the need for the LTV division to streamline its operations.

Both manufacturing employees and office support personnel will be affected by the cuts, he said. Between 500 and 600 manufacturing jobs will be lost, and another 400 to 500 support positions will be eliminated, he said.

LTV Aircraft Products Group now employs 11,000 people at its manufacturing facility in Grand Prairie.

Carroll Butler, president of United Auto Workers Local No. 848, which is the union chapter representing LTV's manufacturing workers, declined comment. Butler said he did not know the details of LTV's work force

reduction plan.

The LTV action is the latest in a series of military-related job cuts in the Dallas-Fort Worth area in 1990. Earlier this year, General Dynamics said it will cut 7,000 people from its work force by the mid-1990s. Texas Instruments also has implemented several small work force cuts, and company Chairman Jerry Junkins has said TI's defense group will ''size the business'' to correspond to the shrinking federal military budget.

About half of the cutbacks planned at LTV are directly related to military budget reductions proposed last month by U.S. Defense Secretary Dick Cheney, Williams said. Two key LTV subcontract programs, the B-2 bomber and the C-17 cargo plane, were recommended for cuts by Cheney. More than half of the LTV group's employees work on the two programs, including the 4,000 employees involved in the B-2 project.

In April, Cheney recommended that planned purchases of the B-2 bomber be trimmed to 75 planes from 132. The defense secretary also said he wants to cut purchases of C-17 cargo planes to 120 from 210 over the life of the program.

However, Williams said the announcement of LTV job reductions is not a ploy to generate more support for the B-2 program, which faces considerable political opposition from federal budget-makers in Washington D.C.

''We have no intention to try to sell 132 B-2s,'' Williams said. ''We can fully support Cheney's recommendation of 75 planes.''

As a subcontractor for the B-2, LTV manufactures the middle section of the bomber that makes up about one-third of the airframe by weight. Last year, the B-2 accounted for $163 million in revenues or about one-fourth of the aircraft group's revenues.

''The job cuts are part of the hazard of being in the defense industry,'' Williams said. ''It's a cyclical business.''

Williams said the elimination of 500 jobs to streamline LTV's operations would touch all areas of the group's businesses, including its commercial contracting unit. LTV builds tail sections of Boeing Corp.'s 747, 757 and 767 airplanes.

Last year, LTV's aircraft products group recorded a loss of $99.7 million on revenues of $673 million compared with earnings of $28.5 million on revenues of $867 million in 1988.

#90151u0722 05/31/1990 ~United Press International
(MAY 31) UPI - An accidental chemical reaction inside a ship at a Dow Chemical U-S-A plant in Freeport, Texas, forced the evacuation of about two-thousand people yesterday.

The reaction occurred when Dow loading crews accidently mixed two chemicals together- a substance used to make shampoos and cleansers and a soil insect-spray. Dow workers were evacuated from part of the plant when the gas seeped from the vessel Marine Chemist.

A Dow spokeswoman says this kind of reaction can lead to higher temperatures, rising pressures and, eventually, a gas leak. Dow fire crews ended spraying by last night with the gas temperature starting to drop.

Freeport residents were asked to voluntarily leave their homes and nearly 19-hundred students were moved from schools in the path of the gas. NO injuries were reported as a result of the chemical leak.

A P-L-O faction is claiming responsibility for yesterday's attempted terrorist attack on Israel's Mediterranean shores off Tel Aviv. Israeli soldiers stopped the attack and killed four Arab guerrillas.

The Israeli Army says it sustained NO casualties during the gunfight on a stretch of beach near Tel Aviv's hotel district.

The Iraqi-based Palestine Liberation Front- an off-shoot of the Palestine Liberation Organization- says the planned assault was in retaliation for the killing of seven Palestinian laborers south of Tel Aviv 11 days ago.

Israeli officials are using the thwarted attack as proof that the P-L-O has NOT abandoned terrorism, despite a December 1988 denouncement of terrorism by P-L-O leader Yasser Arafat.

The Palestine Liberation Front is the same group reported to have been behind the 1985 hijacking of the Italian cruise liner, the Achille Lauro.

#90151u0723 05/31/1990 ~United Press International
(MAY 31) UPI - Anarchy is growing in the West African country of Gabon ... while in Liberia, diplomats say the goverment of President Doe is about to fall to rebel forces.

In Gabon, relatives report the kidnapping of the president of the National Assembly as he was walking in his Libreville neighborhood Tuesday evening. NO one has claimed responsibility for the kidnapping... and the government has made NO comment on the disappearance.

However, the army is firming its control of the petroleum center of Port Gentil after a week of anti-government riots. The fighting has killed two soldiers and seriously wounded 14 other people.

In Liberia, rebel leader Charles Taylor told U-P-I that his fighters are poised to capture the capital airport.

A Western diplomat stationed in Monrovia predicts the demise of Doe, a former sergeant who seized power in a bloody coup in March 1980.

Taylor also said the abduction and possible massacre of about 40 refugees from a U-N compound by government forces yesterday shows the brutality of Doe's government. Tribal animosity was blamed for the killings.

#90151u0726 05/31/1990 ~United Press International

MOSCOW (MAY 31) UPI - Prime Minister Nikolai Ryzhkov was slightly injured in a collision between his limousine and a military troop bus, the official Tass news agency said Thursday.

One of the 20 soldiers in the bus and one of the people traveling with Ryzhkov was also injured in the accident Wednesday morning, Tass said. Details of the injuries were not released, but Tass said they were all minor.

Boris Koryakovtsev, chief of the Interior Ministry road inspection department, told Tass the accident occurred Wednesday morning on the Rublev-Uspensk highway west of downtown Moscow.

Tass said the military bus was heading toward the convoy that included Ryzhkov's limousine. When one of the escort cars in the convoy flashed its lights, the bus driver swerved to the right, hit a curb and lost control.

''The bus spun and blocked the road, prompting the collision,'' Tass said. ''According to the information of the militia, the accident was due to the lack of experience of the military driver.''

Soviet officials normally travel in convoys of several black Zil limousines along with Volga escort cars carrying security men. Main Moscow roads have special center lanes specifically for official vehicles. It was not known if the military bus was driving in such a lane.

#90151u0739 05/31/1990 ~United Press International

(MAY 31) UPI - Stock prices on the Tokyo Stock Exchange closed higher Thursday in active trading as investors dismissed evidence of a weak yen

and demonstrated faith in the market's ability to recover.

The blue-chip Nikkei Average of 225 selected issues, which gained 108.59 points Wednesday, climbed 204.54 points to 33,130.80.

The broader-based Tokyo Stock Exchange Index of all listed major shares, which added 5.43 points Wednesday, jumped 18.65 points to finish at 2,435.74.

An estimated 800 million shares changed hands, compared with 801 million shares on Wednesday.

Advances outnumbered declines 612 to 346, while 160 issues remained unchanged.

Investment trusts bought shares through index-linked trading, pushing prices higher.

Analysts said prices were also boosted by speculation that forecasts for the Japanese yen as well as the stock market remain strong.

On the Tokyo Foreign Exchnage, the U.S. dollar ended sharply higher against the Japanese yen as currency dealers bought dollars ahead of the superpower summit and the release on Friday of the U.S. unemployment data for May.

The dollar closed at 151.75 yen, up 1.00 yen from Wednesday's close of 150.75 yen, the Bank of Japan reported.

Market participants said they were confident the dollar will not fall drastically for the time being. They cited the dollar's quick recovery Tuesday after it momentarily dipped below 149 yen.

Expectation of possible progress on disarmament talks in the U.S.-Soviet summit meeting also spurred purchase of the U.S. dollar, analysts said.

On the trading floor, shipbuildings, textiles and chemicals ended higher.

Pharmaceuticals and some machineries eased slightly.

Elsewhere in Asia, stock prices surged on the Hong Kong Stock Exchange amid a wave of positive signs from China, in the heaviest trading in over seven months.

The closely-watched Hang Seng Index, which surged 34.80 points Wednesday, jumped 48.97 points, or 1.59 percent, to 3,132.32.

Among the narrower indexes, utilities rose 53.13 points, financials gained

20.78, industrials jumped 55.70 and properties climbed 81.27 points.

Volume ballooned to 2.11 billion shares, the heaviest since Oct. 16, 1989, up from the 1.55 billion shares traded on Wednesday.

Analysts noted the Hang Seng close was its highest since the violent suppression of the pro-democracy movement in China last summer.

''The background for the market is favorable right now,'' said Howard Gorges, an analyst with South China Securities.

''Stocks in New York and London have had strong showings and that trend has benefited Hong Kong to some extent.

''The news from China seems to be getting better and better as we go on. The Chinese leaders are starting to make positive noises about economic reforms,'' Gorges said.

In the wake of China's army-led crackdown on the mainland democracy movement last year, the Hang Seng Index plunged.

The market had the jitters as the first anniversary of the June 4 demonstrations draw near, but with the date less than one week away, analysts say any doubts have been shaken off.

''I think the market has decided that there is not going to be any craziness on June 4,'' Gorges said.

''June 4 will become just another positive sign for the market's rally.''

In Singapore, stock prices on the Singapore Stock Exchange closed mixed in listless trading despite the streak of gains on Wall Street and Tokyo.

The key Straits Times Industrial Index, which eased 0.76 points Wednesday, slipped 3.80 points to 1,553.64. The narrower All Singapore Index eased 0.28 points to 435.24.

An estimated 53.2 million shares chnaged hands, compared with 59 million shares on Wednesday.

Brokers said institutional buyers were subdued with most major investors shifting their interest recently to other more active Asian markets such as Hong Kong.

Analysts said many investors still remain cautiously optimistic about the markets prospect in June.

On the trading floor, Singapore Land warrants paced the declining issues

followed by Singapore Land, Overseas Chinese Banking Corp. (foreign) shares and Overseas Union Enterprise.

Shangri-la led the advancing issues followed by Wearne Brothers, IGB Corp. DBS Land, Bukit Sembawang and Singapore Press (foreign shares).

In Australia, stock prices closed mixed in moderate trading on the Sydney Sharemarket.

The blue-chip All Ordinaries Index, which gained 4.6 points Wednesday, climbed 11.6 points to 1511.1, the closely-watched Gold Index eased 6.3 points to 1,422.6.

An estimated 78.3 million shares changed hands, compared with 78.8 million shares on Wednesday.

Analysts said the market was in a state of shock following Wednesday's inexplicably high March quarter 1.8 percent rise in Australia's gross domestic product.

The March GDP figure, analysts said, washed away any hopes that local interest rates would fall soon and the ailing local economy be revived.

On the trading floor, Bond Media ended unchanged 13 cents a share as investors waited for Kerry Packar to announce a new bid.

The bid is expected to be either 15 cents or 20 cents a share.

Elsewhere in the banking sector, Westpac Bank lost 1 cent to $4.93, NAB Bank eased 4 cents to $6.40 and ANZ Bank slipped 3 cents to $4.96.

Among some of the blue chip issues, Amcor fell 6 cents to $4.24, Elders IXL slipped 2 cents to $1.84 and Santos Oil rose 1 cent to $4.38.

#90151u0741 05/31/1990 ~United Press International

BARTOW, FL (MAY 31) UPI - A distant relative of ousted Panamanian leader Manuel Noriega was convicted on cocaine charges in a drug sting operation and faces up to 30 years in prison.

Jurors deliberated just over an hour before finding Domingo Negrette, 26, guilty of grand theft and cocaine trafficking Wednesday. Circuit Judge J. Tim Strickland set sentencing for June 20.

Negrette looked straight ahead as the verdict was read. He has been jailed in lieu of $750,000 bond since his arrest in October and was to remain in the Polk County Jail until sentencing.

Sheriff's officials said Negrette is married to a cousin of Noriega.

Jurors saw a videotape of Negrette taking $26,000 worth of cocaine in an Oct. 12 meeting with an undercover officer at a Polk County warehouse. Negrette was arrsted shortly thereafter in a gray pickup truck.

His attorney, Anthony Genova, argued that his client was entrapped and therefore should be acquitted.

Negrette testified that he was coerced into the drug deal by a confidential informant working for the state, contending the informant threatened him and then offered him $1 million to deliver drugs.

Negrette, an automobile broker, said he first became involved with the informant to negotiate a truck purchase. He said the informant later asked him to get involved in the transporting of 6,000 pounds of marijuana.

Negrette testified that after some 200 pressuring telephone calls from the informant he agreed at first but later reneged. The informant then threatened him with a .45-caliber gun, Negrette said.

To make amends for hedging on the marijuana deal, the informant forced Negrette to pick up the 2 kilograms of cocaine at the warehouse, Negrette testified.

Negrette was the second of 37 people arrested in a drug sting known as ''Operation Corinthian'' to go to trial. In the first trial, William Santos of Miami was convicted of trafficking in marijuana and is awaiting sentencing.

The operation was so named because Colombians refer to high-grade marijuana as Corinthian. Working with the Drug Enforcement Administration, sheriff's undercover officers infiltrated a drug group in Colombia. They persuaded the kingpin to store marijuana in rural Polk County to be picked up and distributed, Assistant State Attorney David Bergdoll told jurors during Negrette's trial.

Thirteen groups of people came to the warehouse and a ranch between late 1989 and early 1990 to pick up the drugs, Polk sheriff's officers testified.

#90151u0826 05/31/1990 ~United Press International

MOSCOW (MAY 31) UPI - A giant Proton booster rocket launched a high-tech modular addition to the Mir space station Thursday from the Baikonur cosmodrome in Central Asia.

The ''Kristall specialized technological module'' lifted off the launching pad in the republic of Kazakhstan at 2:33 p.m. Moscow time, the official Tass news agency said.

The module, dubbed ''the microfactory in orbit'' by the Soviets, is carrying advanced equipment for producing crystals and performing other experiments in conditions of near-zero gravity to cosmonauts Anatoli Solovyov and Alexander Balandin

Solovyov and Balandin, the second crew to occupy the Mir since it was remanned last September after a year-long vacancy, have been on the floating space station for nearly four months.

Deputy mission chief Viktor Blagov said the launch of the Kristall was postponed several times ''due to the need to adjust a new powerful computer capable of controlling the (Mir) complex.''

The Kristall will be the third module to increase the size of the space station.

The launch of the last addition, the Kvant-2, experienced such long delays that the Soviets finally decided to bring the cosmonauts then on the Mir back to Earth and leave the space station unmanned until the module could be sent.

The Kristall is scheduled to dock with the Mir on June 6, Tass said.

#90151u0844 05/31/1990 ~United Press International

ANNAPOLIS, MD (MAY 31) UPI - Bellybutton down the hatches. The 990 new graduates of the "Navel Academy" have a serious spelling error on their diplomas. A printer's mistake spelled the word "naval" as "navel" on the diplomas that were passed out at Wednesday's commissioning ceremony.

"We're trying to look at the bright side," said an academy spokesman, Lt. Cmdr. Mark Van Dyke. "There are 990 of our graduates tonight with a very unique souvenir from the Naval Academy - that's with an A."

Van Dyke said officials detected the mistake on the parchments before graduation but decided it was too late to correct the misspelling before the commissioning exercises. Van Dyke said the error was the fault of the printer who was contracted by the Navy and would be corrected.

The error, produced on the parchment in ornate script, said: "In testimony whereof, this diploma is issued and signed by the Superintendent and the Academic Dean, and the Seal of the Navel Academy is hereunto affixed, this thirtieth day of May in the year of our Lord one thousand nine hundred and ninety." "The commercial contractor has agreed to reprint the diplomas and distribute them to our graduates at no cost to the government," Van Dyke said.

Vice President Dan Quayle spoke Wednesday to the academy graduates, whose commencement came amid congressional and internal investigations into hazing incidents, including one in which a female midshipman was handcuffed to a bathroom urinal while other middies took pictures of her.

The Annapolis academy also has come under fire in recent months because of accusations that the academic and training standards used for preparing Navy and Marine Corps personnel have declined.

#90151u0851 05/31/1990 ~United Press International

(MAY 31) UPI - Soviet President Gorbachev is in Washington for nearly four days of talks with President Bush. Secretary of State Baker greeted the Kremlin leader when he arrived yesterday. During his arrival speech, Gorbachev noted the summit's potential to- quote- take ''the first steps to reduce strategic nuclear arms.'' Negotiators have NOT reached a firm agreement, but the leaders are expected to agree on initial cuts on arsenals.

Both chambers of the Soviet parliament have initially approved two

landmark bills creating a multi-party political system and expanding religious freedoms. The two measures would implement two of the most dramatic reforms of President Gorbachev's perestroika plan. The Communist Party's 70-year hold on power would end, as well as the government's official policy of atheism.

More than 20 aftershocks hit northern Peru yesterday hours after a strong earthquake killed at least 83 people and injured nearly 500 others Tuesday night. Peruvian civil defense officials say the death toll may rise considerably as more information is gathered from remote communities in the Amazon jungle region. 20 years ago today, at least 50-thousand people were killed when an earthquake rocked the same area.

A moderate earthquake registering four-point-nine on the Richter scale shook Mexico City early this morning. Mexican seismologists says the quake lasted about 20 seconds but there were NO immediate reports of damage or injuries. The temblor was centered about 190 miles southeast of Mexico City.

#90151u0853 05/31/1990 ~United Press International

BRUSSELS, BELGIUM (MAY 31) UPI - The 12-nation European Community's Executive Commission called on France Thursday to revoke its ban on imports of British beef and cattle because of the ''mad cow'' disease.

A spokesman said France had not formally notified the Commission of the ban, decreed Wednesday, and that EC's decision in February to limit exports of British beef to the continent was sufficient to safeguard health.

The ''mad cow'' disease, known by its scientific name as bovine spongiform encephalopathy, affects the brain of cattle over 6 months old. Thousands of cows in Britain have been registered as suffering from it. The origin is believed to be in cattle fodder in which sheep meal has been mixed.

Commission officials have said the health risk to humans from eating meat from affected cows is very remote.

The latest Commission move aims at obtaining from France the repeal of the measure and introduction of a formal request, including full justification the spokesman said.

A Commission statement said it regretted ''the action of the French authorities, taken without full consultation, to ban imports of beef and cattle from the United Kingdom.''

''In the absence of convincing arguments for this action, the Commission

calls upon France to revoke the ban immediately,'' the statement said.

France is the largest export market for British cattle.

''The Commission is satisfied that the measures it has taken provide the fullest guarantees as regards consumption of beef,'' the statement said.

In February, the Commission banned exports of live British cattle over 6 months old to EC countries.

#90151u0859 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - Factory orders plunged 2.3 percent to $5.5 billion in April on a weakened demand for automobiles and aircraft while inventories edged up 0.1 percent to $500 million, the government said Thursday.

The monthly estimate by the Commerce Department was in line with the forecasts of private analysts.

Not including transportation equipment, April factory orders were unchanged. Not counting defense equipment, April orders were down 2.4 percent.

''The decrease in April new orders was concentrated in the durable goods sector which declined $5.5 billion or 4.3 percent to $123.4 billion,'' according to the department's Census Bureau.

Durable goods are expensive items made to last three or more years.

''The largest decrease was in transportation equipment, down $5.4 billion or 14.7 percent to $31.7 billion,'' the report said. ''Both motor vehicles and aircraft were down.''

Total orders stood at $235.6 billion in April after leaping to $241 billion in March from $231.8 billion in February, the Commerce Department said.

April shipments were off $2.9 billion, or 1.2 percent, to $234.4 billion, while unfilled orders were up $1.3 billion, or 0.2 percent, to $517.7 billion, the department said.

''Orders have fluctuated between $230 billion and $241 billion per month since the beginning of 1989,'' the report said. ''Although the trend has been relatively flat, new orders continue to exceed shipments.''

Part of the reason for that lag is the length amount of time it takes to

build new aircraft to replace the world's aged commercial aviation fleets.

The April increase in inventories, to $372.3 billion, was concentrated in automobiles and aircraft, the Commerce Department said.

''Manufacturers have held inventory growth close to zero in recent months, reflecting their cautious outlook on the economy,'' according to financial analysts at Fuji Securities in Chicago.

''However, carmakers' stocks may contribute to a somewhat higher pace of accumulation in coming months, as the auto industry prepares for possible work stoppage during next September's wage negotiations,'' the analysts said.

#90151u0876 05/31/1990 ~United Press International

(MAY 31) UPI - New Jersey Governor Jim Florio has signed into a law legislation banning the sale of assault weapons in that state. Florio said the measure gives New Jersey the nation's toughest law regulating military-style guns. The new law bans the sale of assault weapons but allows current owners to keep them if they register the guns and join target shooting clubs.

In Boston, a Christian Scientist accused of manslaughter in the death of his young son broke down on the witness stand yesterday as he described holding the child in his arms as the toddler died. David Twitchell and his wife, Ginger, are charged with the 1986 death of their two-and-a-half-year-old son, Robyn, who died of a bowel obstruction. Prosecutors have tried to prove the boy died as a result of the couple's wanton neglect.

Researchers at The Children's Hospital of Denver say a new treatment for the most common form of leukemia among young children may provide new hope for survival. Doctors say the new approach to treating lymphoblastic leukemia eliminates radiation therapy and instead uses a cancer chemotherapy drug. During a six-year study, the treatment produced successful results in 79 percent of 16-hundred patients.

Two Canadian researchers say that fish and other wildlife can bounce back from acid rain damage if the acid-forming pollution level is drastically reduced. The researchers presented their findings from a 10-year study of a forested area in Ontario that had high levels of sulfur in the 1960's and 70's. From 1978 to '88, after sulfur emissions were cut, the water quality improved and fish started to reproduce again.

#90151u0883 05/31/1990 ~United Press International

BANGKOK, THAILAND (MAY 31) UPI - Organized refugee smugglers have found a way to smuggle Vietnamese boat people into Thailand by sailing them toward U.S. warships heading for Thai ports, an Interior Ministry spokesman said Thursday.

Spokesman Pathai Wichanpreecha said the Interior Ministry has observed that the smugglers take Vietnamese refugees out to sea when U.S. Navy vessels are scheduled to call on Thai ports.

''They seem to know in advance when the American warships planned to visit Thailand so they could bring Vietnamese boat people out to the vessels,'' the spokesman said. ''The sea is so wide, they should not have met the warships so often.''

He said five U.S. warships have picked up 286 Vietnamese refugees at sea on their way to Thailand since last June. The USS Roark picked up 42 Vietnamese boat people in the latest incident on May 18, he said.

Pathai said the Thai Interior Ministry passed on its observations to the UNHCR and to the U.S. ambassador to Thailand.

''We are worried about it because the number of incidents indicate that it is done by intention,'' he said.

He said Thailand has given first asylum to 16,573 Vietnamese refugees.

-30- 1383

#90151u0884 05/31/1990 ~United Press International

DETROIT (MAY 31) UPI - Gerald Greenwald, heir apparent to Chrysler Corp. Chairman Lee Iacocca, has resigned and is expected to become chief executive officer of UAL Corp., the parent of United Airlines.

Greenwald will serve as chief executive officer of a union-led group representing UAL employees who are spearheading a $4.36 billion buyout of the nation's second-largest airline.

United Employee Acquisition Corp., the group formed by United Air Lines' three major unions, announced Wednesday Greenwald would become chairman and chief executive officer of UAL following the buyout.

The first task facing Greenwald, who signed a five-year contract with the union group, will be to help arrange financing for the UAL acquisition.

''I've been offered an opportunity to lead another great company during a period of major transition, and it's an opportunity I can't turn down,'' said Greenwald, Chrysler's vice chairman.

Greenwald, 54, joined Chrysler in 1979 as controller and was widely regarded as the architect of the firm's recovery from a near brush with bankruptcy.

Greenwald was a member of the ''Gang of Ford,'' executives recruited by Iacocca from his own former employer, Ford Motor Co. In November 1988, Iacocca told Greenwald the top job is ''yours to lose.''

''Jerry was one of those who left a secure and comfortable career to join Chrysler at a time when the company's survival was doubtful,'' Iacocca said Wednesday. ''He played a major role in that survival and in the subsequent success of the company.

''I can understand Jerry's interest in an opportunity like the one United Air Lines presents today. He is a major management talent, and he'll have a chance to show it. We will miss him at Chrysler.''

Greenwald's resignation had been rumored for some time.

''He has told me that it's time for him to run his own show...,'' said Iacocca, who called Greenwald ''a major management talent.''

The Detroit News reported Thursday that a vacationing Iacocca unsuccessfully urged Greenwald to stay on when his hand-picked successor flew to Italy to inform him of the decision.

''Lee made a major effort to try and change (Greenwald's) mind,'' a Chrysler source told the News.

Published speculation focused on Chrysler Executive Vice President Robert Miller Jr. and Robert Lutz, president of the company's Chrysler Motors unit, as likely successors.

But there also were indications the No. 3 automaker might not replace Greenwald but merely distribute his duties to other executives.

Sources told the Detroit Free Press Greenwald may have grown tired of waiting for his shot at the top job. Iacocca's contract as chairman runs through the end of 1991, but he recently has indicated he does not know when he will leave.

Eugene Jennings, professor emeritus at Michigan State University and a veteran analyst of auto industry executive changes, said he believes a new emphasis on decentralizing authority at Chrysler may have threatened to deprive Greenwald of power.

Greenwald is the third top officer to leave the company in recent weeks.

Michael Hannes, vice president of international operations, resigned two weeks ago to become chairman and chief executive officer of Black and Decker. Treasurer Frederick Zuckerman stepped down last Friday.

Chrysler has been plagued recently by slipping sales and declining stock values.

A native of St. Louis, Mo., Greenwald is chairman of the ''Europe 1992'' subcommittee of the U.S. Chamber of Commerece internal policy committee. The committee is comprised of senior business executives who are responsible for tracking the European Community as it moves toward a single market by 1992.

He joined Ford after earning a B.A. in economics from Princeton. His career at Ford included a number of positions of increasing managerial responsibility in engineering, finance and in staff functions. He worked in Brazil and Venezuela with that automaker.

Greenwald also is a member of the Princeton Club of Detroit and the Chief Executives Organization and is a director of Honeywell Inc., the American Chamber of Commerce, the Economic club of Deroit, the Detroit United Foundation, the Detroit Renaissance and the Motor Vehicle Manufactureres Association.

MANILA (MAY 31) UPI - The Asian Development Bank said Thursday it has agreed to provide Sri Lanka a $74.3 million loan and three technical assistance grants totaling $1.78 million to expand the country's power system.

An ADB statement said it also had approved a loan of $5 million and a direct equity investment of $1.4 million to build a synthetic fibers plant at an industrial estate near Dhaka.

The loan and grants to Sri Lanka will help bring electricity to 1,000 new villages through the construction of transmission and distribution lines and substations, the statement said.

The ADB said the loan will be drawn from the bank's concessional lending window and is repayable in 40 years with an annual service charge of 1 percent. The three technical assistance grants will be financed from the Japan Special Fund.

The loan to Bangladesh will be provided to Kader Synthetic Fibers Limited and will be used to build a factory outside Dhaka. When completed, the

project will produce more than 3,400 tons annually of polyester filament yarn for sale in the country.

OAKLAND, CA (MAY 31) UPI - The writer of a mysterious letter signed ''The Lord's Avenger'' claimed responsibility for last week's car explosion that injured two leaders of the militant environmental activist group Earth First!, it was reported Thursday.

The letter, sent to the Ukiah office of the Santa Rosa Press Democrat's Mendocino County bureau, also claimed responsibility for a May 9 bombing that caused minor damage to a Cloverdale lumber mill.

The three-page, single-space typed document, sprinkled with biblical references and containing specific details of the bombings, was turned over to the FBI on Wednesday. The FBI refused to comment on the letter's authenticity. It said it would analyze the evidence.

''I built with these Hands the bomb that I placed in the car of Judi Bari '' the letter began. It claimed grievances against Bari for her opposition to anti-abortionists and logging.

It also threatened participants in the planned ''Redwood Summer'' timber protests that the two injured Earth First! members were involved in organizing.

''Now all who would come to the forests and worship trees like gilded Idols have been Warned. They have seen the Fate that awaits them,'' the letter said.

It was addressed to reporter Mike Geniella and postmarked Tuesday from the North Bay regional mail faciility in Petaluma. It could have been sent from anywhere from Sausalito to Eureka.

The Press Democrat reported on the letter in Thursday's editions but refused to release its full contents.

''It is our letter and some of the information we'd like to have to do some work on,'' the newspaper's executive editor, Bob Swofford, said.

Sonoma County sheriff's officials told the newspaper that the letter writer seemed to know undisclosed details about the bombing of the Louisiana-Pacific mill in Cloverdale. The writer said he planted the bomb outside the mill ''to bring infamy down on Judi Bari.''

Earth First! members Bari, 40, and Darryl Cherney, 33, were injured last

Thursday when a bomb exploded in their car in Oakland.

That night they were arrested by Oakland police on charges of possessing and transporting explosives on the theory the pipe bomb was being carried in the car and went off accidentally.

Both Bari and Cherney denied any illegal activity. Cherney said both he and Bari had received death threats because of their anti-logging actions and he said they were victims of an assassination attempt.

''The authenticity of this letter has not been verified,'' Cherney said. ''Until more facts are in, I really can't comment.''

On Tuesday the prosecution delayed filing formal charges against Bari and Cheney, saying that more time was needed to review the evidence. He is free and she remains hospitalized.

The pair was involved in a campaign to recruit college students to the North Coast for the Redwood Summer, a planned demonstration against the logging of redwoods.

Earth First! is a militant group based in Tucson, Ariz., whose members have chained themselves to trees and have been accused of being ''eco-guerillas'' who have hammered spikes into trees to ruin chainsaws. They have also been accused of plotting to knock down power lines, charges on which a co-founder is awaiting trial in Arizona.

JERUSALEM (MAY 31) UPI - Former Prime Minister Menachem Begin was released from Sha'arei Zedek Hospital Thursday after two weeks of treatment for pneumonia, a hospital spokeswoman said.

A smiling Begin, 76, flanked by his daughter Hasia Milo and longtime aide Yehiel Kadishei, thanked a group of hospital staff, patients and journalists for their good wishes before departing in a car, the spokeswoman said.

The reclusive Begin had received get-well cables from Israelis across the country during his treatment.

It was the second time in nine months Begin had been hospitalized. In August, he entered the hospital for seven days after complaining of fatigue and weakness.

Begin, who resigned from office in 1983, shared the 1978 Nobel Peace Prize with Egyptian President Anwar Sadat for their efforts in advancing the

peace process. A year later, Sadat and Begin signed a peace treaty between their two countries.

Since leaving office, Begin has confined himself to his Jerusalem apartment, rarely appearing in public.

(MAY 31) UPI - President and Mrs. Bush welcome Soviet President Gorbachev and his wife, Raisa, to the White House this morning on the first day of a four-day summit between the two world leaders.

Gorbachev arrived in Washington yesterday after a two-day visit to Canada. In welcoming remarks, Secretary of State Baker said- quote- ''We want to see continued movement toward toward democracy and openness in the Soviet Union.''

Bush and Gorbachev will meet for six hours today and tomorrow... and nine hours more in an all-day outing on Saturday at the presidential retreat in Camp David, Maryland. They'll hold a final meeting Sunday during breakfast.

There are NO immediate reports of injuries or damages this morning after a moderate earthquake rattled Mexico City. Mexican officials say the 20-second quake registered four-point-nine on the Richter scale.

NASA engineers at Cape Canaveral are swarming over the grounded shuttle Columbia today... trying to pinpoint a hydrogen fuel leak. The leak has held up the launch at least one week and may delay it more if major repairs are needed.

A national Democratic committee has decided that either New York or New Orleans will host the party's 1992 convention. The site selection panel made the recommendation yesterday to party chairman Ron Brown.

Officials in Nicaragua supervising the disarming of the Contra rebels say the disarming will NOT be completed by the proposed June 10th deadline. More than 12-thousandthousand Contras reportedly still have weapons.

#90151u0975 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - The National Labor Relations Board accused Greyhound Thursday of treating its striking workers unfairly and called a hearing to consider requiring the bus line to take back 9,300 strikers.

A six-page complaint issued by Milwaukee regional director Joseph Szabo said the violence-marred 13-week-old strike ''is and has been, at all times ... an unfair labor practices strike'' by the company. The union had filed its unfair labor practice allegation in Milwaukee.

Szabo's order takes the lengthy legal process initiated by the striking Amalgamated Council of Greyhound Local Unions a step further and adds additional pressure on the financially beleaguered company and its creditors.

Szabo noted that NLRB General Counsel Jerry Hunter is seeking an order that would require the company to offer strikers ''immediate and full reinstatement'' to their jobs and to ''discharge, if necessary, any and all replacements in order to provide work for such strikers'' as well as to give returning workers back pay.

Szabo ordered a hearing on the complaint and Hunter's request for a return-to-work order on Sept. 17 in Milwuakee.

On May 14, Hunter said he intended to seek an unfair labor practices complaint against Greyhound that would charge the company with failure to bargain in good faith by unilaterally implementing contract proposals, even though negotiations were not yet at an impasse. The proposals included granting replacement drivers the possibility of seniority over striking workers.

Under labor law, once Hunter's complaint was filed and in order to set in motion the ''back pay clock,'' the union had to make an unconditional offer to return to work. It took the action on May 22.

It is estimated that if the unfair labor practice complaint is upheld and

Greyhound is ordered to take back the striking workers it could cost the company up to $10 million a month in back pay costs between Mar. 2, when the strike began, and the date of settlement.

Following the union's offer to return to work, however, Greyhound officials said they had no intention of firing the estimated 4,000 replacement drivers it has hired.

In the complaint, the NLRB said Greyhound ''has interfered with, restrained and coerced and is interfering with, restraining and coercing employees in the exercise of rights guaranteed'' under labor law.

It said the company ''has failed and refused, and is failing and refusing, to bargain collectively and in good faith with representatives of its employees.''

The most recent negotiating session between the two sides was May 5, when the company called for a four-year wage freeze and the elimination of some 4,500 union jobs. Union officials called the contract offer an ''insult.''

#90151u0991 05/31/1990 ~United Press International
WASHINGTON (MAY 31) UPI - The Agriculture Department has quarantined an 81-square-mile section of Dade County, Fla., following the recent discovery of 19 Mediterranean fruit flies in the Miami area, it was announced Thursday.

The agricultural quarantine prohibits interstate shipment of fruits and vegetables from the restricted area unless they are certified by an Animal and Plant Health Inspection Service inspector.

Most of the Medflies were trapped within 2 miles of Miami International Airport in the communities of Miami Springs, Hialeah and Virginia Gardens. The quarantine area extends about 4.5 miles around the area where the Medflies were found.

The Mediterranean fruit fly is one of the world's most destructive insect pests. It attacks more than 200 types of fruits and vegetables and is especially damaging to citrus fruit.

James Glosser, head of the Inspection Service, said U.S. and Florida agricultural officials have stepped up efforts to trap any remaining Medflies. They also have used aerial applications of a malathion bait spray in the 16 square miles surrounding the area where the pests were found.

#90151u0999 05/31/1990 ~United Press International
NEW YORK (MAY 31) UPI - Stock prices headed slightly higher in moderate trading early Thursday, rebounding from opening weakness.

The Dow Jones industrial average, which rose 8.07 Wednesday to a new record high of 2878.56, was up 4.04 to 2882.59 after 11 a.m. EDT.

Advances led declines 626-551 among the 1,750 issues crossing the NYSE tape.

Volume amounted to about 55,000,000 shares after 11 a.m., compared with 69,070,000 in the same period Wednesday.

Analysts said a factor in the market's weakness at the opening was the decline in market leader International Business Machines Corp. IBM was down sharply in overseas trading on rumors that Hitachi will unveil in June a mainframe computer faster than IBM's rival model.

The stock opened lower in New York, ''but IBM's been a leader in the rally and when people saw that IBM didn't go down that much it was encouraging '' said Rodd Anderson, vice president of equity trading at Shearson Lehman Hutton Inc.

But Anderson said the upcoming unemployment figures for May are ''a question in a lot of people's minds.'' He said he expects trading to slow as the session wears on before the release of the report prior to the opening Friday.

Job growth is expected to have risen considerably in May, with non-farm payrolls up 253,000 and the jobless rate unchanged at 5.4 percent.

On the trading floor, Philip Morris was the most active issue, down 5/8 to 41 3/4.

Global Marine followed, down 1/8 to 5. Avery International was third, down 3/4 to 23 3/4.

IBM was fourth, down 1/2 to 120 1/4 after its rally Wednesday.

Among the other blue chips, AT&T rose 3/8 to 43 1/8, Procter & Gamble extended its rally, up 1 5/8 to 83 5/8 and Westinghouse was up 1 5/8 to 36 5/8 after announcing a buyback of up to 20 million shares, calling the current market price ''an attractive investment.''

Disney's rally also stretched into its second day, up 3 to 128 3/4. The stock surged $6 a share Wednesday after an analyst was said to have repeated his ''buy'' rating.

Prices were narrowly mixed in moderate trading on the American Stock Exchange.

Hasbro led the Amex issues, up 3/8 to 21 1/4.

-30- 2393

#90151u1011 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - The Food and Drug Administration approved Thursday a plan to provide AIDS patients who have no other treatment options wider access to the promising drug DDC.

Under the ''expanded access'' plan, dideoxycytidine, or DDC, will be distributed free to people with AIDS or AIDS-related complex who cannot take the two currently available drugs to attack the AIDS virus. Those drugs are AZT, the only fully approved AIDS-fighting drug, and DDI, an experimental drug already offered through an expanded access program.

''Everyone involved with finding treatments for AIDS recognizes the critical need to provide an option for those individuals who cannot tolerate the currently available treatments,'' said Dr. Waijen Soo of Hoffman-La Roche Inc., which makes DDC.

Hoffman-La Roche officials estimated up to 1,000 AIDS patients may qualify for the expanded DDC distribution program, scheduled to begin June 25. Patients will only be able to obtain the drug after their doctors contact the drug company.

Karen Kmetik, a spokewoman for Hoffman-La Roche in Nutley, N.J., emphasized the safety and effectiveness of DDC is still being tested. But she said preliminary results indicate the drug does not produce the severe anemia that is frequently seen in patients taking AZT, nor does it appear to cause the inflammation of the pancreas that has been associated with DDI.

Both DDC and DDI can trigger a nerve disorder that causes pain in the feet and hands. But Kmetik said that problem seems to have been reduced for DDC since researchers cut the dose they were giving patients.

The free distribution plan will run simultaneously with traditional, more closely monitored tests required for FDA drug approval. Patients in the expanded access program will be monitored for severe side effects and for some signs of drug efficacy, Kmetik said.

Since traditional testing started last summer, Hoffman-La Roche has enlisted about 500 of the 600 AIDS patients it needs for a trial comparing DDC with AZT, Kmetik said.

Enrollment has been much lower in a test to compare the effectiveness of DDC with AZT in AIDS patients who have received AZT for at least one year - only 50 patients have signed up and another 270 are needed, the spokeswoman said.

Hoffman-La Roche does not expect the new free distribution plan to have an major effect on the traditional drug tests, Kmetik said.

The maker of DDI, Bristol-Myers Squibb Co. of New York, which pioneered the expanded access program, has encountered controversy since it started the effort last fall.

In March, fears were raised that the program might be endangering patients because 290 of 8,000 patients in the expanded access plan had died, compared with two of 700 patients in traditional tests. But AIDS researchers blamed the disparity on most patients in the expanded access plan being sicker than those taking part in traditional tests.

Earlier this month, the government officially proposed a policy change that would establish a ''parallel track'' system for testing AIDS drugs.

Under the plan, which is not yet final, some experimental drugs would be provided to AIDS drugs who have no other treatment options but who cannot take part in traditional drug tests for medical or travel reasons. A second track would consist of more strictly monitored tests.

''This is in the spirit of parallel track,'' Kmetik said of the DDC distribution plan.

The phone number for information on the DDC distribution plan is 1-800-DDC-21-HIV.

#90151u1032 05/31/1990 ~United Press International

NAIROBI, KENYA (MAY 31) UPI - Rebels in southern Sudan Thursday appealed for international aid to avoid famine and disease among victims of powerful earthquakes that shook the region last week.

In a radio broadcast monitored in Nairobi, the Sudanese People's Liberation Army said at least 100,000 people were left homeless along both banks of the river Nile about 750 miles south of Khartoum after four spectacular earthquakes flattened their shanty and mud-hut homes and damaged crops.

Their estimate of the homeless was 200,000 fewer than that of the Sudanese government, which has also appealed for international help. The quakes, one of which measured 7.5 on the Richter scale, killed at least 31 people May 24-26.

The SPLA has been fighting successive Khartoum governments for control of the south since 1983.

''The topsoil sank, the bottom (of the river) came to the surface and new water streams were created on the river Nile,'' the SPLA radio broadcast said of the tremors.

It said there was a grave danger of malarial outbreaks and other diseases in the makeshift riverside camps of the victims.

''We appeal to international organizations to provide emergency relief aid such as sorghum and groundnuts,'' the radio said.

The SPLA said the towns worst affected were those in a belt stretching 60 miles north of the regional capital Juba, which lies 770 miles south of Khartoum. Two of these towns, Mongalla and Gemeiza, are currently in rebel hands.

The government holds Terakeka, 60 miles from Juba, where the May 24 earthquake was centered. Terakeka, a riverside town, was completely flattened, the government said Tuesday.

-30- 1859

#90151u1046 05/31/1990 ~United Press International

(MAY 31) UPI - Heavy rains and hail battered the southern Plains Thursday, taunting Texas with more flooding as thunderstorms soaked Arkansas and Louisiana, and floodwaters washed through storm-ravaged southern Ohio.

The National Weather Service said rain flooded roads and bridges south of Dallas early Thursday, while several tornadoes accompanied by large hail and heavy rain caused light damage in northeast Texas late Wednesday.

''We have some bridges that've gone under,'' Inetta Flanner of the Johnson County Sheriff's office said Thursday. A vehicle was partially submerged in the northeast Texas town of Venus, but the driver escaped, Flanner said.

A flash flood warning was posted Thursday in Ellis County, south of Dallas where officials reported nearly all roads in the community of Red Oak were covered with water.

The Federal Emergency Management Agency boosted to 52 the number of counties eligible for state and federal aid programs because of spring storms and flood damage in Texas. The additions are Callahan, Hamilton, Jack, Navarro, Red River and Shackleford.

Scattered showers and thunderstorms were reported in northeast Texas and parts of Arkansas and Louisiana, some producing up to 5 inches of rain. The driving rains caused flash flooding near New Orleans.

Ohio Gov. Richard Celeste declared a state of emergency in four southeast counties and said he would ask Washington for a federal disaster declaration because of extensive flooding in Perry, Hocking, Athens and Lawrence counties, where flooding has forced more than 1,000 people to flee their homes.

In Hocking County, where high water rushed through Rockbridge and Murray City, officials said the flooding was the worst in more than two decades.

''The water was the highest since 1968,'' Hocking County Commissioner Bob Daubenmeier said Wednesday. ''The flash flooding in Murray City sent six and seven feet of water through the houses. There's a tremendous amount of damage in Murray City, but people are working their way back into their homes.''

''Going up and down the main roads it just looks like a big lake,'' said Estel James, who works at a gas station in Piketon, Ohio.

Flood warnings were posted early Thursday along the flood-swelled Scioto and Hocking rivers in central Ohio, the NWS reported.

The water was receding in the Scioto River in Pike County, the Hocking River in Athens County and the Wills Creek in Guernsey County but they remained above flood stage by mid-day.

Ross County authorities were still searching for the body of a girl swept away by the bloated Paint Creek late Tuesday. Searchers found the body of her friend Thursday.

Elsewhere in the region, Wisconsin, Illinois and Michigan had clear skies, with overnight temperatures in the 40s and 50s.

A high-pressure system weakened over the South as thunderstorms dampened the Mississippi Valley and cloudy skies blanketed Alabama and Georgia.

Florida had some cloudiness but was clearing as a high-pressure system pushed in from the Atlantic. Early morning temperatures ranged from 60 in Knoxville, Tenn., to 67 in Charleston, S.C., and 79 in Miami.

The mid-Atlantic region was generally clear and cool overnight with frost in some areas. Temperatures ranged from the 30s in Pennsylvania to the 40s in Delaware. West Virginia had frost in the northern mountains and Greenbrier Valley, while Maryland had lows ranging between 35 and 45.

The last of the rain clouds and strong winds accompanying a low-pressure system moved out of New England and on to Nova Scotia, leaving the Northeast with clear skies and crisp temperatures early Thursday.

Cloudless skies were reported from Providence, R.I., to Burlington, Vt., and the far northern reaches of Maine. Temperatures in the six-state region ranged from a low of 40 in Lebanon, New Hampshire, to a high of 53 in Boston.

Sunshine returned Thursday to much of the West Coast as the last storm of two weeks of unsually late and heavy rain moved away, leaving behind up to 10 inches of snow in the Sierra Nevada mountains.

Wind gusts to 90 mph buffeted western Nevada overnight, knocking out power hampering traffic and dumping snow on the high country in the Reno-Carson City area. The Highway Patrol reported chains or snow tires were required early Thursday on Mount Rose, Donner Summit and Carson Pass as more than 6 inches of snow fell in the Tahoe Basin.

HARTFORD, CT (MAY 31) UPI - Former Sen. Lowell Weicker, R-Conn., selected Hartford Corporation Counsel Eunice S. Groark as his running mate Thursday for his independent bid for governor.

Speculation had focused on Groark, a Republican who ran unsuccessfully for mayor of Hartford in 1985 and served two terms on the Hartford Common Council. Weicker made the announcement at a news conference at the state

Capitol.

Groark served as campaign manager for Republican Roger Eddy in 1986 when he lost the Senate race to incumbent Democrat Christopher Dodd. ''She could run the state with her left hand if she had to,'' Eddy said. ''She's a very competent woman.''

Weicker announced his candidacy March 2. He served in the Senate for 18 years and has been the overwhelming leader in at least three major polls conducted since he entered the race.

#90151u1067 05/31/1990 ~United Press International

RANGOON, BURMA (MAY 31) UPI - The leader of the opposition party that soundly defeated Burma's military regime in weekend elections said Thursday the transfer of power to a civilian government remains up in the air.

Acting General Secretary U Chit Khaing, of the National League for Democracy, told a news conference it was not known when or how the civilians would assume power and claimed the intentions of the military-led government are not clear.

But he said results of Sunday's democratic elections - in which the NLD won 388 seats in the 485-seat National Assembly - indicate a majority of the country's rank-and-file soldiers voted to oust the repressive military regime.

Gen. Saw Maung, the junta leader, indicated in his first public comment since the elections the military will remain responsible for law and order and the basic needs of the people even after handing over power to an elected government.

''No matter what the outcome, it is essential that (armed) services personnel do not personalize the victory of the party they like and the defeat of the party which they do not like,'' he said in a speech broadcast late Wednesday.

The speech highlighted the military leader's fear of internal dissension in the military since election results indicated large numbers of lower-ranking soldiers voted for the NLD.

Support for the opposition may make it more difficult for hard-line army leaders to continue their 28-year domination of Burma, analysts said.

The speech was also notable for its refusal to acknowledge the NLD victory which a government spokesmen earlier admitted was evident even though it

was based on unofficial returns.

Khaing said Maw's speech was ''unclear'' and ''ambiguous'' regarding the transfer of power to the civilians.

''But now that the NLD enjoys the solid support of the people, I am sure the State Law and Order Restoration Council (through which the military rules) will come to treat the party with respect,'' he said.

He said the NLD had not met with the council to discuss the creation of the new government or the release from prison of NLD President U Tin and other party leaders.

The current regime, which gained power after crushing a pro-democracy movement in 1988, agreed to hold elections in the Asian nation of 38 million as a public relations gambit but tried to thwart the opposition by arresting its leaders and controlling political demonstrations.

Khaing said the NLD planned to immediately begin drafting a new constitution to take before the new Parliament.

''We have ready three or four alternative drafts of a constitution and these will be considered by the party Central Executive Committee at its meeting on Friday,'' he said.

Hundreds of NLD supporters gathered Thursday outside party headquarters in Rangoon to cheer as a stream of ambassadors, led by U.S. Ambassador Burton Levin, arrived to congratulate party leaders.

''The elected deputies of the NLD hereby promise to work steadfastly for the early emergence of a strong, peaceful, and prosperous union of Burma '' the party said in a statement. ''We hope to receive the same massive support of the people in implementing our policies and programs that we received during the elections.''

#90151u1077 05/31/1990 ~United Press International

JACKSON, Miss. (MAY 31) UPI - The Federal Energy Regulatory Commission has agreed to determine whether the operator of the $3.5 billion Grand Gulf nuclear power plant is charging its sister companies too much for electricity.

State Public Service Commissioner Nielsen Cochran said Thursday no hearing date has been set for the case, which will first go before an administrative law judge in Washington. The judge's decision will then be reviewed by the three FERC commissioners.

State Assistant Attorney General Frank Spencer said the FERC could have easily denied the hearing request. ''In setting a hearing, they're saying they think that their rates may not be just,'' he said.

Cochran has said if the state wins its case, System Energy Resources Inc. could be forced to refund $10 million to customers of Mississippi Power & Light Co. SERI operates the plant near Port Gibson.

The attorney general's office, joined by Arkansas and Louisiana, filed a complaint with FERC in February claiming the cost of energy from the plant should be reduced by $33 million.

The complaint alleged the plant's earnings are excessive and are based on a 14 percent rate of return on capital investments. The federal benchmark rate of return on equity for utilities is 11.75 percent, officials said.

At the time, Spencer said bond interest rates have fallen and stock prices have risen since the 14 percent rate was set in 1987.

System Energy and MP&L are among subsidiaries of New Orleans-based Entergy Corp. Other subsidiaries are Louisiana Power & Light Co., Arkansas Power & Light Co. and New Orleans Public Service Inc.

ST. CLOUD, MN (MAY 31) UPI - A man with no permanent address was being held Thursday in the Stearns County Jail on charges of threatening the life of Soviet President Mikhail Gorbachev.

Authorities said a suspect, later identified as David Allan Dalbeck, called police headquarters Tuesday, identified himself, and threatened the lives of Gorbachev, police and Secret Service people.

Dalbeck, 30, was arrested Wednesday afternoon.

He was expected to be arraigned Thursday or Friday on charges of making terroristic threats, a felony. If convicted, Dalbeck could face a five-year prison term.

Gorbachev is scheduled to visit Minnesota Sunday.

#90151u1091 05/31/1990 ~United Press International
(MAY 31) UPI - Presidents Bush and Gorbachev formally open nearly four days of summit talks today with a White House ceremony. The two leaders are expected to hold several hours of discussions on a wide range of issues, including German reunification and arms control. President and Mrs. Bush are hosting a dinner for the Gorbachevs tonight.

Three Chinese dissidents disappeared today shortly before they were scheduled to read an open letter to the government appealing for the release of political prisoners. The three had planned to meet reporters at the home of one dissident in Beijing. But when the reporters arrived, the three had vanished.

A P-L-O faction is claiming responsibility for yesterday's attempted terrorist attack off the Israeli shores of Tel Aviv. Israeli soldiers thwarted the attack and killed four Arab guerrillas. The Palestine Liberation Front says the attack was meant to avenge the slaying of seven Arab workers 11 days ago.

More than 80 aftershocks rumbled through Romania today as authorities began to assess the damage from the country's worst earthquake in 13 years. One aftershock registered five-point-nine on the Richter scale. At least nine people were killed and 300 others injured in yesterday's quake.

U-N officials say about 500 Nicaraguan rebels surrendered their weapons yesterday in the largest one-day disarmament since the process began more than one month ago. Contra leaders signed an agreement with President Chamorro, pledging to disarm at least 500 troops a day.

#90151u1109 05/31/1990 ~United Press International

(MAY 31) UPI - Two Soviet cosmonauts say that man would be flying to Mars today if the United States and Soviet Union had NOT hindered progress with the secretive space race of the 1960's. The two cosmonauts are visiting Boston to attend the opening of a Soviet space exhibit.

The government has opened 15 indictments against reputed underworld figures in New York City. Among those charged is Vincent ''The Chin'' Gigante, the alleged head of the Genovese crime family. The defendants are charged with rigging bids since 1978 for 142-Million dollars in city contracts.

Police in Port Chester, New York, say they'll be making an arrest today in the grisly slaying of four young children. The youngsters were found stabbed to death in their Westchester County apartment yesterday. The children's mother also was found at the scene with blood on her neck. She is hospitalized.

Heavy rains and hail pelted the southern Plains early this morning, bringing more flood warnings to already-soaked parts of Texas. Some areas in Arkansas and Louisiana got five inches of rain. In the Midwest, Ohio Governor Richard Celeste declared a state of emergency in four southeast counties because of heavy flooding.

Raisa Gorbachev is sharing the summit limelight with her husband. During their visit to Canada, the camera-friendly Mrs. Gorbachev petted a three-foot snake and unexpectedly visited a children's dinosaur display because the kids told her it was the museum's best exhibit. Today the Gorbachevs will host a lunch for 70 Americans described as intellectuals.

#90151u1120 05/31/1990 ~United Press International

ATLANTA (MAY 31) UPI - Laws prohibiting minors from buying or possessing cigarettes are rarely enforced despite government warnings that 90 percent of smokers start the habit before they are 21, federal health officials said Thursday.

''To reach the goal of a smoke-free society by the year 2000, children and adolescents must be prevented from initiating the use of tobacco,'' the

U.S. Centers for Disease Control said in a weekly report on health issues. ''Recent national surveys on adult tobacco use, however, indicate that 90 percent of all new smokers now begin smoking before age 21.''

Enforcement of state laws to prevent minors from smoking is a ''potentially effective public health strategy'' but the statutes are largely ignored, the federal health agency said.

A Health and Human Services' Office of the Inspector General survey of state laws restricting sale of tobacco to minors completed in May concluded there is ''minimal enforcement of the laws,'' the CDC said.

''Only five states could provide data on the citations for violations of minors' access laws,'' the report said. ''In 1989, 32 vendor machines violations were cited, even though an estimated 1 billion cigarette packs are sold each year in the United States to persons under 18 years of age.''

Though enforcement of the statutes is rare, 44 states and the District of Columbia have laws requiring a minimum age for the purchase of tobacco, the CDC said. Kentucky, Louisiana, Missouri, Montana, New Mexico and Wyoming do not.

The legal age for buying cigarettes is 18 in 36 states, 17 in four states, 19 in three states and 16 in Virginia and the District of Columbia, the CDC report said.

Health and Human Services Secretary Louis Sullivan has recommended banning cigarette vending machines, creating a licensing system for cigarettes similar to that used to control the sale of alcohol and setting the minimum age for tobacco purchase in all states at 19.

''The proposed model legislation is intended to make the laws more enforceable and could be enacted at the state or local level,'' the CDC report said.

Successful enforcement programs, incorporating some of the recommendations already have been instituted in Minneapolis, Marquette County, Mich., King County, Wash., and Solano County, Calif, the CDC report said.

The programs include requiring revocation of business licenses as a penalty for violating minor access laws, establishment of civil penalties for violators, vending machine restrictions and ''sting'' operations to catch violators.

#90151u1125 05/31/1990 ~United Press International

MOSCOW (MAY 31) UPI - Conservative deputies bitterly criticized Boris

Yeltsin on Thursday for his aggressive stance toward the Soviet government with one lawmaker saying the new Russian president ''should not begin by confronting the central government.''

Legislators also accused Yeltsin of political favoritism and complained about the public airing of his personal differences with Soviet President Mikhail Gorbachev.

Yeltsin's election Tuesday as chairman of the Russian Congress of People's Deputies gave him a powerful post from which to challenge Gorbachev.

On his second full day in the post, the renegade communist came under fire from legislators angered by his comments at a news conference Wednesday evening.

Yeltsin, who gained the giant Russian republic's effective presidency by just a four-vote margin after a weeklong parliamentary election struggle, had called for Prime Minister Nikolai Ryzhkov's resignation and said the powers of the Soviet Union's 15 republics should be put ahead of the national government's authority.

Outlining a vision of a loose Soviet federation that could render Gorbachev's central government largely irrelevant, Yeltsin called for ''inverting the pyramid'' of Soviet politics.

After the new Russian legislature convened Thursday, Ivan Galushko, a deputy from the Soviet Far East, drew loud applause when he urged Yeltsin ''to refrain from hasty pronouncements on questions that are within the competence of the Congress or the Supreme Soviet,'' the permanent parliament to be chosen from within the larger body's ranks.

Conservative lawmakers were again angered several hours into the session when Yeltsin, the presiding officer, allowed the reading of a draft statement expressing the Congress' opposition to the economic-reform plan introduced last week by the Soviet government.

The draft statement declared ''a firm determination to oppose any attempts to carry out any economic transformations on (Russian) republican territory that lead to a reduction in the living standards'' of its citizens.

Vladimir Petrov, a legislator from the Altai Mountain city of Gorno-Altaysk in southern Siberia, said, ''(Yeltsin) should not begin by confronting the central government.''

The conservatives also accused Yeltsin of favoring his allies in his Democratic Russia bloc of radical deputies in drawing up a list of candidates for the legislature's top officers to serve under him.

Lawmaker Alexander Nazarchuk said Yeltsin ''is in a hurry to pay due to the Democratic Russia group that helped him get elected to the post'' of president.

The flury of criticism forced Yeltsin to the podium to defend himself in the Congress, which is almost evenly divided between conservatives and liberals.

''I am bound to protect the interests of all the people of the Russian federation, not of a separate group, party or social organization,'' Yeltsin said. ''This means that I am no longer a Democratic Russia member and therefore not its hostage.''

Galushko criticized both Gorbachev and Yeltsin, whose recent testy exchanges, he said, showed ''a desire to put the country's internal matters up for international discussion.''

Yeltsin said he hopes to have a ''relevant talk'' with Gorbachev, who actively campaigned against his election as Russian president, when the Soviet leader returns from his summit visit to the United States.

#90151u1135 05/31/1990 ~United Press International

JERUSALEM (MAY 31) UPI - Prominent Palestinians who have been on a hunger strike for nearly two weeks said Thursday an aborted sea attack against Israel showed Arabs have reached the ''limit of endurance'' because of the lagging peace process.

Israeli leaders seized upon the infiltration, in which four guerrillas were killed and 12 captured Wednesday off the Tel Aviv coast, as proof the Palestine Liberation Organization has not given up terrorism. The Palestine Liberation Front faction led by Mohammed Zaidan Abbas, known as Abul Abbas, claimed responsibility.

An editorial in the Ha'aretz newspaper said the failed attack on the Jewish holiday of Shavuot showed continued PLO involvement in terrorism, but added that government officials should not rely on ''daring declarations'' or stubborn policies.

''Of all the conclusions that (acting Prime Minister Yitzhak) Shamir and (Foreign Minister Moshe) Arens made of what happened yesterday one is certainly mistaken,'' Ha'aretz said. ''An obstinate position on the realization of the dream of a greater Israel will certainly not help in that war.

''What is more, the latter works as a red flag and as we know in war not

every battle ends in victory,'' the editorial said.

The attempted attack, originating from Libya, provided Israel with more evidence to support its stand against negotiating with the PLO and its opposition to the U.S-PLO dialogue.

For Palestinian nationalists in the Israeli-occupied territories, whose cause gained momentum after the slaying of seven Arab workers by an Israeli civilian May 20, the attack made the ground beneath their feet more unsteady.

Several prominent Palestinians, while avoiding direct condemnation of the infiltration, said Thursday the Abul Abbas operation was ill-timed. They said they feared it would damage their attempts to arrange Israeli-Palestinian talks.

''If I was the one who was taking decisions, I wouldn't take this operation now,'' said Faisal Husseini, who looked tired and considerably thinner than when he began a hunger strike May 20 after the killings of the seven Palestinian workers.

More than 35 Palestinians from the West Bank, East Jerusalem and Gaza are on a hunger strike demanding U.N. observers for the Israeli-occupied territories. In sweltering heat, most of the hunger strikers lounge outside the International Red Cross offices in East Jerusalem on mattresses beneath a giant canvas tarpaulin. They confine themselves to water and a special protein-rich milk mixture.

''Unless there is international intervention, unless Israel's repressive policies are put an end to, we are likely to enter into a cycle of violence, that will lead to more bloodshed, that will lead to a situation in which it will no longer be possible to reach peace between the two peoples,'' said Sari Nusseibeh, an Oxford-educated university lecturer.

Nusseibeh, who entered his 12th day on the hunger strike Thursday, described the current period in Israeli-Palestinian relations as ''combustible.'' Palestinians are ''standing at the limit of endurance and no longer is it possible to go with self-restraint as we've been doing for the last 2 1/2 years.''

The U.S. request to expel Abul Abbas from the PLO was not the most sensible way to proceed with attempts at a dialogue between Israelis and Palestinians, Nusseibeh said.

''If you want to go by that measure, then you might as well expel every Palestinian from the territories because in every Palestinian there is burning anger and every Palestinian today is a potential Abul Abbas,'' Nusseibeh said. ''The point is that you have to bring the two sides

together to negotiate.''

#90151u1157 05/31/1990 ~United Press International
CAPE CANAVERAL, FL (MAY 31) UPI - Engineers found a leak in a small hydrogen line Thursday that may have been responsible for delaying the shuttle Columbia's launch, raising the possibility of another takeoff try as early as next week, sources said.

But officials said it was too early to say whether a ''fix'' was at hand and that additional testing was required. Even so, shuttle engineer Henry Pohl at the Johnson Space Center in Houston said he was optimistic.

''It looks to us like it would explain everything we saw the other night '' Pohl said by telephone. ''But they still have to ... get quantitative measurements so we can determine how bad it is.''

NASA engineers worked through Wednesday and into Thursday searching for the source of a hydrogen leak during fuel loading Tuesday that forced agency managers to stop the shuttle's countdown to launch on a 10-day

astronomy mission.

Because of the nature of the leak, engineers suspected trouble with a 17-inch hydrogen fuel line fitting where the big propellant line enters the belly of the shuttle from its external tank. But tests overnight did not locate any leaks in that area.

As the morning wore on, however, engineers began looking into other areas and officials said a leak was found in a small hydrogen line used to sense fuel pressure.

The 2-foot-long, quarter-inch-wide ''sensing line,'' a flexible hose, was replaced about two weeks ago for an unrelated reason.

''They got to that line that they had changed and they got indications of leakage,'' said an official who requested anonymity. ''They don't know if it's through the line or the connection. But they believe pretty strongly it's in the connection.''

He said engineers planned to tighten the connector and then retest the line for leakage. If the leak does not reappear, NASA could be able to retarget Columbia's launch for the middle of next week, although no firm decisions had been made.

If that does not solve the problem, and if NASA is unable to duplicate the original leak, agency engineers would have little choice but to roll Columbia back to its hangar for repairs, a move that would delay liftoff three weeks or more.

Columbia's seven-member crew flew back to the Johnson Space Center in Houston Wednesday to await word on how long the 36th shuttle flight will be delayed. No decisions on a course of action were expected until after the leak was pinpointed.

Engineers at launch pad 39A, meanwhile, planned to drain hydrogen and oxygen from Columbia's on-board fuel tanks Thursday afternoon and to recharge the refrigerant supply of an X-ray telescope in the shuttle's payload bay.

Engineers were fueling the shuttle for a launch attempt at 12:38 a.m. EDT Wednesday when multiple internal and external alarms went off, indicating highlevels of hydrogen gas in and around the ship's engine compartment.

In a normal fueling, engineers would expect hydrogen levels of about 500 parts per million. In Columbia's case, the hydrogen concentration was at 2,875 parts per million and climbing when fueling was stopped with the tank about 5 percent full.

The minimum safe concentration level is 10,000 parts per million. At 40,000 parts per million, hydrogen will begin burning in a pure oxygen environment but the shuttle's engine compartment is pressurized with inert nitrogen during fuel loading and there was never any danger of a fire or explosion.

Sensors outside the shuttle, near where the main hydrogen line enters the orbiter, detected levels higher than 40,000 parts per million on several occasions, but officials said the shuttle was not in any danger.

Rolling the shuttle back to the Vehicle Assembly Building would delay launch three weeks or so, officials said, and disrupt NASA's flight schedule.

Compounding the agency's problems, both VAB shuttle stalls are occupied by boosters and tanks scheduled for use by the shuttle Atlantis in July and Columbia in September.

To make room for Columbia, engineers likely would move Atlantis's completed booster and tank set out to launch pad 39B, minus Atlantis, and then fix Columbia.

Columbia skipper Vance Brand, 59, co-pilot Guy Gardner, 42, John ''Mike'' Lounge, 43, Robert Parker, 53, Jeffrey Hoffman, 45, and civilian astronomers Ronald Parise, 39, and Samuel Durrance, 46, plan to spend 10 days in orbit to study high-energy astronomical targets.

The four-telescope ''Astro-1'' observatory aboard Columbia originally was scheduled for launch May 17, but the flight was delayed two weeks because of work to replace a faulty cooling system valve.

#90151u1165 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - Following is the text of President Bush's welcoming remarks to Soviet President Mikhail Gorbachev before the start of the summit Thursday:

Friends and distinguished guests, welcome to all of you, especially our guest from the Soviet Union.

It is my great honor to welcome to the White House the president of the Soviet Union, Mikhail Gorbachev.

Mr. president, just over a year ago I said that the United States wanted to move beyond containment in its relations with the Soviet Union, toward a new era, an era of enduring cooperation.

When we last met in Malta we agreed to accelerate our efforts on a full range of issues. Today differences remain, of course, but in the short six months since the Malta summit we have made encouraging progress and I want this summit to take us further still, and I know that that is your view as well, Mr. President.

We have seen a world of change this past year, and now on the horizon we see what just one short year ago seemed a distant dream, a continent truly divided East and West, has begun to heal with the dawn of self-determination and democracy.

In Germany where the wall once stood, a nation moves toward unity, and peace, and freedom, and in the other nations of the most heavily militarized continent on Earth, at last we see the long era of confrontation giving way to the prospect of enduring cooperation in a Europe whole and free.

Mr. President, you deserve great credit for your part in these transforming events. I salute you, as well, for the process of change you've brought to your own country.

As we begin this summit, let me stress that I believe we can work together at this historic moment to further the process of building a new Europe, one in which every nation's security is strengthened and no nation is threatened.

Around the world, we need to strengthen our cooperation in solving regional conflicts and building peace and stability. In Nicaragua, for example, we've shown that we can work together to promote peaceful change. In Angola, our support for an early resolution of that country's tragic conflict is a resolution acceptable to the Angolan people, is now paying off.

So let us expand this new spirit of cooperation, not merely to resolve disputes between us, but to build a solid foundation for peace, prosperity and stability around the world.

In that same spirit, Mr. President, let me quote the words of one of your nation's great minds, one of the world's great men in this or any age, Andrei Sakharov. Fourteen years ago, he wrote, ''I am convinced that guaranteed political and civil rights for people the world over are also guarantees of international security, economic and social progress.''

Sakharov knew that lasting peace and progress are inseparable from freedom that nations will only be fully safe when all people are fully free. And we in the United States applaud the new course the Soviet Union has chosen.

We see the spirited debate in the Congress of People's Deputies, in the

Soviet press, among the Soviet people. We know about the difficult economic reforms that are necessary to breathe new vigor into the Soviet economy, and as I've said many times before, we want to see perestroika succeed.

Mr. President, I firmly believe, as you have said, that there is no turning back from the path you have chosen.

Since our meeting in Malta, we have reached agreements in important areas, each one proof that when mutual respect prevails, progress is possible. But the agreements we've reached cannot cause us to lose sight of some of the differences that remain. Lithuania is one such issue.

We believe that good faith dialogue between the Soviet leaders and representatives of the Baltic peoples is the proper approach and we hope to see that process go forward.

Over the next four days we're not going to solve all of the world's problems, we won't resolve all of the outstanding issues that divide us, but we can and will take significant steps toward a new relationship.

This summit will be a working summit in the strictest sense of the term, one where we mark the real progress we've made by signing new agreements and where we address the differences that divide us in a spirit of candor, in an open and honest search for common ground. In a larger sense, though, the success of this summit depends not on the agreements we will sign, but on our efforts to lay the groundwork for overcoming decades of division and discord, to build a world of peace in freedom.

#90151u1171 05/31/1990 ~United Press International

LOS ANGELES (MAY 31) UPI - Astronaut Gordon Cooper's elderly father-in-law, who was missing for nearly 12 hours, was found safe early Thursday, police said.

William Taylor, 82, was found in good condition by Long Beach police about 12:30 a.m., Los Angeles Police Detective Bill Bumpus said.

Taylor's son-in-law, astronaut Gordon Cooper, reported him missing Wednesday afternoon.

Police said Taylor, who had been seen driving a gray 1965 Cadillac in the downtown area about 1 a.m. Wednesday, was on his way to Cooper's house from his home in Sedona, Ariz.

He had called Cooper from a downtown telephone but did not show up at Cooper's Encino home.

''They got a phone call from him saying he was at that corner and he was going on to the San Fernando Valley where Cooper lives,'' Sgt. Charles Meter said. ''Then he didn't show up.''

Meter said Taylor was suffering from senility and ''may have gotten confused.''

Police were contacted about Taylor's disappearance Wednesday afternoon and a missing person bulletin was sent to various police agencies.

Bumpus said Cooper contacted Los Angelese police early Thursday saying his father had been found by Long Beach police.

Cooper could not be reached for comment.

Cooper, 63, orbited the Earth in a Mercury capsule in May 1963 and spent eight days aboard a Gemini capsule in August 1965. He resigned from NASA in 1970.

#90151u1179 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - The government unveiled stronger rules on the handling of veal calves Thursday to combat the continuing problem of drug residues in the calves and said it was concerned by residues in culled dairy cows.

However, a Food Safety and Inspection Service official, during a review of last year's tests of slaughter livestock and poultry, said the results, for the most part, ''are good news.''

''Residue rates are the lowest in years,'' said assistant deputy administrator Richard Carnevale. ''Only 0.3 percent of the 41,505 samples tested during our domestic routine monitoring program last year showed illegal levels of residues. The rate has been below 1 percent for several years.''

About 121 million head of cattle, hogs and sheep were slaughtered last year, along with 5.6 billion fowl. The inspection service took a took of 428,000 samples from the animals and tested for 120 chemicals and compounds, such as synthetic growth hormones, drug residues and pesticides.

Carnevale said excessive levels of sulfamethazine and antibiotics accounted for 38 of the 40 violations found during routine random testing of veal calves. Follow-up tests ''reinforced that antibiotics and sulfa compounds are a continuing problem in 'bob veal' calves,'' Carnevale said.

Bob veal calves are those less than three weeks old or weighing less than 150 pounds.

''Effective today, bob veal calves will not be accepted for slaughter under a new certificiation program - which involves less intensive testing - without a full complement of signed statements from producers and other 'custodians' of bob veal calves,'' Carnevale said.

The program requires each person who handles the calves to certify the animal never were treated with specific drugs or if they were treated that they were withheld from slaughter long enough for residues to fall to safe levels. The penalty for false statements is a fine up to $250,000 and a prison term of up to five years.

Veal is a relatively small part of the U.S. meat supply. Last year, farmers produced 344 million pounds of veal, compared to the U.S. total of 61.4 billion pounds.

Carnevale said a special test program last summer and early this year ''found high levesl of sulfa residues in cull dairy cows.''

''The study also inidicated that gentamicin is being used frequently in food-producing animals. A potent antibiotic, gentamicin is not permitted for use with cattle,'' Carnevale said.

Dairy producers have been urged to better control the use of the drugs in cull animals.

''We are very encouraged with the quality assurance program the (National Milk Producers Federation) is implementing,'' he said.

The Food and Drug Administration is considering whether to change its rules on use and residue limits for sulfamethazine. The inspection service said the incidence of sulfa violations in swine dropped to 1.1 percent in 1989, compared to 3.8 percent in 1987.

Violative residues occur infrequently in poultry. The inspection service said only 10 residue violations were found from 9,463 poultry samples taken last year during routine testing.

LIMA, PERU (MAY 31) UPI - Three people suspected of being leftist terrorists attacked the door guard at the Lima office of United Press International Thursday morning, apparently in an unsuccessful attempt to enter the bureau.

The attackers robbed the guard of his firearm, and aimed their revolvers at him, demanding to know where the news agency was located.

Though a wall directory showed the UPI offices were in the building, the floor was not marked, and the attackers beat the guard until he would say the agency floor.

The guard's screams apparently frightened the attackers, who fled the building with the stolen gun instead of attempting to enter the UPI office.

In the past four years, the UPI Lima bureau has been attacked three times by presumed rebel commandos who forced personnel to transmit political messages over the wire.

#90151u1209 05/31/1990 ~United Press International

(MAY 31) UPI - Soviet President Gorbachev arrives at the White House this morning for the start of four days of talks with President Bush... discussions that could lead to substantial progress on arms control. Gorbachev said yesterday the summit is important as a celebration of progress toward an agreement this year on cuts in strategic nuclear arsenals.

But two other major issues loom over the summit- the strategic alignment of a united Germany and Moscow's dealings with its independence-minded republics. The Soviet economic blockade of Lithuania appears to be blocking a U-S-Soviet trade agreement, which is strongly desired by Moscow. The two leaders are expected to sign pacts on cultural relations and the environment.

In Beijing, three dissidents failed to appear at a news conference where they were to read an open letter calling on China's leaders to free political prisoners. U-P-I obtained a copy of the document, titled ''Open Letter to China's Leaders.'' It appealed for the release of the activists and other people detained after the army crackdown at Tiananmen Square.

The New York Times says city transit officials have passed new guidelines that call for all panhandlers to be tossed out of the subway system. The guidelines follow a federal appeals court decision earlier this month that upheld a Transit Authority ban on begging in the subways. The appeals court said begging is NOT a constitutionally protected form of speech.

#90151u1216 05/31/1990 ~United Press International

BEIJING (MAY 31) UPI - Beijing officals ordered vendors to stop selling tobacco Thursday to help some of the nation's 300 million smokers observe

World No Smoking Day, but few nicotine addicts appeared to be inconvenienced by the one-day ban.

Chinese officials say they are increasingly worried about the mounting social costs of smoking and the danger it poses for young people - despite the staggering revenues tobacco generates for the state.

Yet despite the daylong prohibition on tobacco sales in Beijing, cigarettes were peddled openly and without question at the street stalls and storefronts where smokers typically stock up.

Only in select state-owned outlets like the Beijing Friendship Store were clerks refusing to sell tobacco.

''Sure I bought cigarettes today, no problem. No one said anything to me about a ban,'' said one of three chain-smoking Chinese diners at a restaurant.

''We Chinese are really heavy smokers,'' he said between puffs.

Government statistics show that Chinese are among the world's heaviest smokers.

Senior leader Deng Xiaoping long touted the healthful properties of his favorite Panda brand cigarettes, although at age 85 he reportedly has cut down and perhaps has quit.

Recent studies show that 34 percent of Chinese 15-years-old and up are regular smokers, but the rate is vastly higher among men - 61 percent - than among women, of whom only 7 percent smoke.

Most alarming is the steady rise in smoking among teenage boys, especially in China's cities, officials said. The rate of smoking among Beijing middle school boys has reached 36 percent, they said.

The great majority of Chinese smokers, about 72 percent, say they took up the habit between the ages of 15 and 24. Scientists report that people who begin smoking as teenagers have a greater risk of developing lung cancer than those who begin later in life.

Nearly 80 percent of China's lung cancer cases are attributed to smoking, the state-run People's Daily said recently. Officials warn that if current trends continue, 50 million of all Chinese now under 20 will eventually die of tobacco-related illnesses.

Yet China's $5 billion tobacco industry remains a crucial segment of the nation's struggling economy, its 8 percent growth last year having outpaced the 2 percent overall rise in smoking.

In 1989, China's 10 million tobacco farmers produced 1.6 trillion cigarettes - 300 for every person on Earth - mostly in the poor southern provinces of Yunnan and Guizhou.

The World Health Organization inaugurated World No Smoking Day in 1988 on the 40th anniversary of its founding, and has made the fight against smoking one of its highest priorities.

#90151u1231 05/31/1990 ~United Press International

(MAY 31) UPI - The National Weather Service says rain flooded roads and bridges south of Dallas early today... while several tornadoes accompanied by large hail and heavy rain caused light damage in northeast Texas late yesterday. Scattered showers and thunderstorms were reported in northeast Texas and parts of Arkansas and Louisiana today... some producing up to five inches of rain.

NASA engineers are examining the shuttle Columbia today to find a hydrogen fuel leak that has delayed the ship's mission by at least one week... and maybe more. Columbia was grounded Tuesday when sensors detected a large hydrogen leak in the shuttle's engine compartment during fuel loading. The discovery of the leak forced cancellation of yesterday's scheduled liftoff.

The prosecution rebuttal in the war crimes trial of U-S autoworker John Demjanjuk began today in Jerusalem. Demjanjuk was convicted in April 1988 of war crimes. He was sentenced to death for his alleged role as a guard at the Nazi death camp of Treblinka, where 850-thousand people, mostly Jews, were slaughtered. Demjanjuk insists he's a victim of mistaken identity.

The Archbishop of Canterbury, Robert Runcie, says the Anglican church is preparing for the year 2000 when women will be priests and minorities will compose two-thirds of its membership. The ordination of women is one of the most debated issues in the nearly 80-Million-member Anglican church. Runcie made his remarks to U-P-I in Argentina, where he's on a four-day visit.

#90151u1241 05/31/1990 ~United Press International

TEHRAN, IRAN (MAY 31) UPI - Iran held a second round of talks with European Community representatives on improving relations between the two sides, a diplomatic source said Thursday, but there was no official word on what progress was made.

A diplomatic source said Director General Hossein Musavian met the Italian

ambassador and the charges d'affaires of Ireland and France at the Iranian Foreign Ministry on Wednesday.

Details of the discussions were not disclosed but the source said the meeting was a follow-up to talks two weeks ago in Dublin, where Musavian met repesentatives of France, Ireland and Italy, the past, present and future holders of the rotating EC presidency.

The talks held at Dublin Castle May 16 were aimed at improving Iran's relations with the EC, which were severely strained when Iranian spiritual leader Ayatollah Ruhollah Khomeini issued a death decree against Salman Rushdie, the British writer, for a book perceived as blasphemous to Islam.

Iran's clergy have not lifted the death decree since Khomeini's death but on May 27 Tehran appointed an ambassador to the EC, establishing full diplomatic ties with the Community.

The diplomatic source in Tehran said Wednesday's discussions covered a whole range of subjects.

''Listening to each other's positions, all sides need to come to terms with what solutions are practical,'' the source said.

''The EC has made its position clear,'' he said. ''It demands respects for human rights and international norms and of course a definite solution to the Salman Rushdie affair.''

Khomeini pronounced a death sentence on Rushdie Feb. 14, 1989 for writing the novel ''The Satanic Verses, ''which many Moslems consider blasphemous. In March, the Tehran government broke ties with London over the dispute.

Relations remain severed and in Dublin Musavian refused to meet British officials who had hoped to see him.

Over the past few days, reports in the Iranian media have indicated that a resumption of ties with Britain is not imminent. Rushdie is believed to be in hiding somewhere in England.

At a press conference Tuesday, Parliament Speaker Mehdi Karubi said the Iranian legislature still demands an apology from Britain for supporting Rushdie.

''Unfortunately, we still witness a hostile approach by the British government'' to the subject of resuming relations with Iran, Karubi told reporters.

''One British court recently issued a ruling blocking further prosecution of Salman Rushdie,'' he said.

#90151u1248 05/31/1990 ~United Press International

ROME (MAY 31) UPI - So often, one word comes to mind when organizers of a major international sports event discuss security.

''Munich ...,'' said Luca di Montezemolo, general director of the 1990 Italian World Cup Organizing Committee, before his voice trailed off.

''No one wants another Munich,'' said Scott LeTellier, head of the 1994 U.S. World Cup organizers.

Since Palestinians massacred 11 Israeli athletes at the 1972 Munich Olympics, security has taken on paramount significance in international sports.

No longer must organizers and law enforcement officials just guard against petty crime. Now they face the possibility of terrorist attacks and riots.

For soccer's World Cup, which runs from June 8 to July 8 in 12 Italian cities, the Italian government plans to deploy 45,000 security officers.

''I'd be crazy if I said I wasn't worried,'' said Italian Interior Minister Antonio Gava. ''We must take into consideration all dangers and organize ourselves to avoid them. We have done that and we'll continue to do it.''

Senator Giancarlo Ruffino, Gava's undersecretary, said the increasingly friendly relations between East and West were a good sign for the World Cup.

He also said intelligence reports refuted earlier suggestions that Palestinian terrorist leader Abu Nidal intended to disrupt the tournament, possibly targeting British fans who will attend games on the island of Sardinia.

Italian security has been in contact with police from all 24 nations that will send teams to the tournament.

Under a law enacted last year, Italy can bar or deport foreigners with records of soccer violence. Police will concentrate on controlling English rowdies who go to games to wreak havoc.

Britain's Scotland Yard has supplied the Italians with photos and dossiers of 100 notorious hooligans, plus an additional list of some 1,000 potential troublemakers.

Customs agents and police will monitor offenders in Sardinia and Genoa, where many English and Dutch fans will ferry to the island to watch their teams.

The British government also is seeking a ban on alcohol sales on ferries to Sardinia and a prohibition in the Cagliari area on game days. The prefects of the 12 cities staging games have the power to prohibit alcohol sales, and Gava has told them to do so if necessary.

Attempts also will be made to place Dutch and English fans on separate ferries to Sardinia, and segregate them at stadiums by using numbered seating.

It is the first time all seats will be numbered at a World Cup. Numbered seating is common in the United States, but in Europe and Latin America, where stadiums are old, standing room is still common.

Keeping rival fans apart during first-round games will be fairly easy because World Cup officials know who is playing where.

Once the tournament moves past the first round, however, separating rival fans becomes more difficult because no one knows which teams will advance.

''This is a problem that can't be solved,'' Montezemolo said. ''It is mathematically impossible to know where the teams will go. We are talking about something like 2.6 million tickets. You must understand that it is completely impossible to control this dimension, especially on an international level.''

But Gava is committed to trying.

''We must prepare to keep apart rival fans as they move from place to place, and in the stadiums, even in the later rounds of the World Cup,'' Gava said.

At least a dozen cameras will be posted in each stadium to monitor crowds.

''This undoubtedly represents a great deterrent to violence inside the stadiums, even if we know that the problem of violence and security is not confined to them,'' Gava said.

Cordons will be set up outside all stadiums so police can search fans for alcohol, projectiles, fireworks and weapons. No alcohol will be sold at games and soft drinks will be served in plastic containers.

''We'll have the eyes of the world upon us during the World Cup, so nothing bad must happen,'' said Vincenzo Parisi, the chief of police in Rome.

Montezemolo is keeping his fingers crossed.

''Our success depends on things we can't control,'' he said. ''I'm not afraid of anything. Better, I'm afraid of nothing and I'm afraid of everything.''

#90151u1278 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - Raisa Gorbachev had a great visit Thursday with first lady Barbara Bush and quickly made friends with the family's English springer spaniel, Millie.

After the arrival of Mikhail and Raisa Gorbacev at the White House, the two women and the spouses of several diplomats took a tour of the family quarters, including the Lincoln Suite, President Bush's private study and the Queen's Room. They were served tea, coffee and pastries, said Anna Perez, the first lady's spokeswoman.

Perez quoted Mrs. Bush as saying that ''Mrs. Gorbachev and Millie bonded. It was a great visit, renewing our old friendhip. I'm looking forward to the rest of the week.''

Perez said that Mrs. Bush found her guest ''very knowledgeable, very warm.''

During the 35-minute gathering, Millie sat on Mrs. Gorbachev's feet and followed her about the house. Perez quoted Mrs. Bush as saying the family pet ''quivered when Mrs. Gorbachev spoke to her.''

(MAY 31) UPI - WORLD CUP BY THE NUMBERS

12 Italian host cities.

24 teams.

52 games between June 8-July 8.

22 players on each team.

528 total players.

41 referees and linesmen.

102 teams who participated in qualifying.

312 qualifying games.

732 goals scored in qualifying rounds.

45,000 law enforcement officials.

58 first-aid stations in the 12 stadiums.

111 doctors in 12 stadiums.

135 nurses in 12 stadiums.

677 stretchers in 12 stadiums.

89 ambulances to serve 12 stadiums.

7,000-plus media members accredited.

10,998 seats for written press in 12 stadiums.

7,864 telephones in the press boxes.

1,240 press seats for photographers.

1,440 places on fields for photographers.

4,935 press seats for TV and radio reporters.

1,038 TV screens in press centers and press rooms.

2,046 telephones in press centers and press rooms.

165 telex machines in press centers and press rooms.

152 fax machines in press centers and press rooms.

10 million sheets of paper on reserve.

582,730 seating capacity for 12 stadiums.

2.6 million tickets available.

20 billion-26 billion TV viewers expected worldwide.

147 networks to carry games.

118 nations in 5 continents to televise games.

#90151u1292 05/31/1990 ~United Press International

NEW YORK (MAY 31) UPI - A youth pleaded guilty Thursday to assaulting a male jogger during the two-hour Central Park ''wilding'' rampage that ended with the brutal rape and beating of a female jogger.

Justice Thomas Galligan sentenced Michael Briscoe, 18, who was not indicted for attacking the woman jogger, to one year in prison.

At the same time, he was sentenced to a concurrent one-year term for a drug charge stemming from the sale of angel dust. He was arrested in the drug case while free on bail in the April 19, 1989, Central Park rampage.

The guilty plea came just two weeks before the rape and attempted murder trial of three other youths indicted for attacking the woman investment banker.

Briscoe pleaded guilty to assaulting David Lewis, 31, a banker who was jogging near the reservoir.

A charge of first-degree riot was dismissed.

His attorney, Joseph Klempner, said prosecutors tried to turn Briscoe into a state's witness but he will not testify against his co-defendants.

''There was a brief inquiry from the prosecution as to whether or not he was interested and my response was that he had no interest,'' said Klempner, who replaced Briscoe's original lawyer, Alton Maddox, whose law license was suspended by an appeals court.

''He's not going to cooperate. There is no deal here. There is nothing going on under the surface,'' Klempner said.

Klempner said Briscoe entered the guilty plea because ''it was a deal that he could not have turned down.''

Briscoe faced a maximum penalty of up to seven years in prison on the assault charge. He faced an additional seven years on the charge of fifth-degree criminal sale of a controlled substance.

Briscoe has been jailed at the adolescent wing at Rikers Island since his arrest March 4 for selling a small amount of the drug PCP to an undercover officer near his home in Harlem.

Lewis and another male jogger, John Loughlin, 41, were beaten during the crime spree that culminated in the beating and gang rape of the 29-year-old woman. After crushing her skull with a pipe, the youths left her for dead in a muddy gully.

She has had a miraculous recovery and has returned to work at Salomon Brothers, where she earned a promotion earlier this year.

Jury selection is scheduled to begin June 13 in the trial of three youths indicted for attacking the male joggers and the female jogger. They are Raymond Santana, 15, Antron McCray, 16, and Yusef Salaam, 16.

WASHINGTON (MAY 31) UPI - The National Labor Relations Board accused Greyhound Thursday of treating its striking workers unfairly and called a hearing to consider requiring the bus line to take back 9,300 strikers.

A six-page complaint issued by Milwaukee regional director Joseph Szabo said the violence-marred 13-week-old strike ''is and has been, at all times ... an unfair labor practices strike'' by the company. The union had filed its unfair labor practice allegation in Milwaukee.

Szabo's order takes the lengthy legal process initiated by the striking Amalgamated Council of Greyhound Local Unions a step further and adds additional pressure on the financially beleaguered company and its creditors.

Szabo noted that NLRB general counsel Jerry Hunter is seeking an order that would require the company to offer strikers ''immediate and full reinstatement'' to their jobs and to ''discharge, if necessary, any and all replacements in order to provide work for such strikers'' as well as to give returning workers back pay.

Szabo ordered a hearing on the complaint and Hunter's request for a return-to-work order on Sept. 17 in Milwuakee.

In Dallas, Greyhound spokesman George Gravley said the whole issue rests on a narrow legal question of whether the two sides were at an impasse on March 1, the eve of the strike. If it is determined at the hearing there was an impasse, then Greyhound will not be required to take the strikers back, he said.

''Our position is that during the last week of negotiations prior to the strike, we had reached what we thought was an agreement with the union leadership,'' Gravley said. ''But at the last minute, they made additional

demands which we tried to meet, but the union rejected our proposals.''

Because the union did not ask for more time and decided to strike, ''There can be no doubt about an impasse existing,'' he said.

Gravley said the Sept. 17 hearing, with sworn testimony and cross-examination will provide the componay a forum where ''there is no doubt that we will prevail.''

On May 14, Hunter said he intended to seek an unfair labor practices complaint against Greyhound that would charge the company with failure to bargain in good faith by unilaterally implementing contract proposals, even though negotiations were not yet at an impasse. The proposals included granting replacement drivers the possibility of seniority over striking workers.

Under labor law, once Hunter's complaint was filed and in order to set in motion the ''back pay clock,'' the union had to make an unconditional offer to return to work. It took the action on May 22.

It is estimated that if the unfair labor practice complaint is upheld and Greyhound is ordered to take back the striking workers it could cost the company up to $10 million a month in back pay costs between March 2, when the strike began, and the date of settlement.

Following the union's offer to return to work, however, Greyhound officials said they had no intention of firing the estimated 4,000 replacement drivers it has hired.

In the complaint, the NLRB said Greyhound ''has interfered with, restrained and coerced and is interfering with, restraining and coercing employees in the exercise of rights guaranteed'' under labor law.

It said the company ''has failed and refused, and is failing and refusing, to bargain collectively and in good faith with representatives of its employees.''

The most recent negotiating session between the two sides was May 5, when the company called for a four-year wage freeze and the elimination of some 4,500 union jobs. Union officials called the contract offer an ''insult.''

#90151u1326 05/31/1990 ~United Press International

COLUMBIA, SC (MAY 31) UPI - A federal bankruptcy judge Thursday approved the sale of PTL's lucrative satellite network for $52 million to a Jewish-born evangelist who became a born-again Christian.

Evangelist Morris Cerullo, once a guest on imprisoned television preacher Jim Bakker's PTL show, did not appear at a 3 1/2-hour in U.S. Bankruptcy Court but his lawyer threatened to drop an offer to buy all PTL assets unless the sale was approved immediately.

''It is our hope as a Christian organization to come back and achieve what the Bakkers failed to do,'' attorney Timothy Treadwell told Judge Thurmond Bishop, who disregarded several other offers from parties who were not interested in buying all of PTL's assets.

The judge agreed time was of the essence in the sale of PTL.

''I think this court has to place a big premium on time,'' said Bishop. ''This court is of the belief we've got something firm in hand in the Cerullo offer.''

Cerullo put $7 million in an escrow account for the purchase of the network and signed a contract Wednesday to buy all the assets of bankrupt, scandal-scarred PTL, including its hotels, television studios, satellite network, 2,200 acres of prime real estate and waterslide.

PTL trustee Dennis Shedd had previously endorsed a $6.45 million offer from Oklahoma evangelist Oral Roberts for the network, but when Cerullo offered $52 for the entire package, Shedd recommended Cerullo's offer to the judge.

Cerullo, 58, has said he was raised in an Orthodox Jewish orphanage in New Jersey but later became a born-again Christian. He began what charismatics call a ''healing ministry'' in 1956.

Cerullo, head of Worldwide Evangelism Inc., in San Diego, is just one of a series of prospective purchasers who have offered megabucks for PTL's Christian retreat straddling the North Carolina-South Carolina border.

The ministry was taken into bankruptcy court three years ago by Moral Majority founder Jerry Falwell, who promised to take care of Bakker's evangelical enterprise while he put to rest a scandal over his one-time fling with former church secretary Jessica Hahn.

Instead Falwell took it into bankruptcy court to keep Bakker from ever returning to PTL, then left the ministry himself in a dispute with the bankruptcy judge after Falwell's aides had searched Bakker's office and turned over what they found to the Justice Department, which convened a grand jury.

Bakker was convicted last year of fraud and conspiracy stemming from the way he raised and spent money at PTL. He is serving a 45-year term at the Federal Medical Center in Rochester, Minn.

He was not available for comment on the latest offer for PTL but has said in the past no hostile effort to take it over would be successful because in the cornerstone of every building is imbedded the biblical admonition, ''No sword raise against you shall prosper.''

To date, about a dozen offers have been made to purchase the property, but none of the prospective buyers has had the money to do so, including Bakker himself who bid more than $65 million based on money he thought he would be able to borrow from a broker who turned out to be a convicted con artist.

Brad Leggett, a lawyer who represents PTL, said the offer from Cerullo was enticing because he plans to use the property as a religious retreat, the purpose for which it was built.

''Quite frankly, that perhaps makes the situation more attractive,'' said Leggett. ''However, the opportunity to get some money to the creditors is extremely important to the trustee.''

#90151u1342 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - Scientists reported Thursday they have found a quicker and more precise way to make laboratory monkeys develop an AIDS-like illness, an advance that promises to speed creation of AIDS drugs and vaccines.

A team from the New England Regional Primate Research Center in Southborough, Mass., and the California Regional Primate Research Center in Davis said it has produced what appears to be an important new animal model for studying acquired immune deficiency syndrome.

The team, headed by Ronald Desrosiers of the Harvard-affiliated New England center, infected 11 rhesus monkeys with laboratory-produced duplicates of one strain of a virus similar to the human AIDS virus called simian immunodeficiency virus or SIV. The duplicates, called clones, were genetically identical and therefore should act in the same manner.

Within a year, about half of the monkeys infected with the SIV clones had died of an immunodeficiency disease almost identical to AIDS in humans - and monkeys that failed to mount a strong immune response after initial infection died even quicker, in less than six months.

Monkeys infected with uncloned SIV, which varies considerably in its genetic makeup, usually die of AIDS-like disease within one to three years after infection.

''For laboratory applications, it would be highly desirable to have a reproducible system in which close to 100 percent of inoculated animals die within six months of infection. It should be possible (using SIV clones) to achieve this goal by selecting susceptible animals or by other subtle manipulations,'' the researchers wrote in a study published in the journal Science.

In addition to opening the way for a ''quicker turnover'' of monkey tests looking at potential AIDS drugs and vaccines, Desrosiers said the new animal model should also help fill in gaps in the scientific understanding of the progression of AIDS-like diseases in the body. Currently, most of what is known about the AIDS virus comes from studies of human cells grown in the test-tube.

One important feature of the latest work is that the SIV clone produced fatal disease in both young and adult monkeys. A major obstacle in developing strategies to treat children with AIDS has been the lack of knowledge about how AIDS progresses in children as compared with adults.

#90151u1347 05/31/1990 ~United Press International

LONDON (MAY 31) UPI - Stock prices staged a late recovery Thursday on the London International stock exchange, helped by developments in the breweries sector and Wall Street's performance.

The blue-chip Financial Times 100-stock index, which has risen about 80.0 points in the past several days, including 50.6 points on Wednesday, closed off 1.1 points at 2,345.1. The narrower top 30 industrial average eased 2.4 points to 1,855.0.

An estimated 466 million shares compared with 556 million shares chnaging hands on Wednesday.

Dealers said that an early bout of profit-taking took about 10 points off the closely watched Financial Times Index, but some late buying spurred by Wall Street's performance helped boost prices from their lows.

Analysts noting the volume said much of the day's activity was centered on Guinness PLC, following an announcement that LVMH will raise its stake and buy an additional 6.8 percent of the brewer at considerably above the current market value.

The French company said it was offering to pay as much as $13.20 a share for up to 59.4 million shares in Guinness, lifting LVMH's holdings to 24.1 percent.

Guinness in a press statement said it welcomed the confidence in which

LVMH has show by this increased investment and ''looks forward to further benefits from the continuing commercial cooperation between both companies in worldwide markets.''

More than 32 million shares changed hands in Guinness as the stock climbed 43 cents to $12.30.

Elsewhere in breweries, Bass climbed 22 cents to $17.36 in anticipation of a favorable presentation next Wednesday.

In the electricals sector, Thorn EMI added 11 cents to $11.72 after reporting better-than-expected results.

Tate and Lyle added 11 cents to $4.97 amid speculation the Food and Drug Administration may approve its new sweetener.

Elsewhere in Europe, in Frankfurt, stock prices on the Frankfurt Stock Exchange closeds slightly higher in light trading.

The closely watched German Stock Index, which slipped 2.20 points Wednesday, was added 4.27 points to 1,844.81.

Analysts said there was limited investor interest in the market, in part due to the impending holiday weekend.

West German markets will be closed on Monday, June 4, for the Pentecost holiday.

ST. PAUL, MN (MAY 31) UPI - Polar adventurer Will Steger and his expedition team have been invited to the Kremlin by Soviet leader Mikhail Gorbachev.

The meeting will take place June 15.

Steger, of Ely, Minn., said Thursday Gorbachev wants to hear first-hand about the trans-Antarctica trip and its message of international cooperation and promoting the preservation of the continent.

The six-member 1990 trans-Antarctica expedition team finished its 3,741 mile dogsled traverse of Antarctica March 3 at the Soviet base of Mirnyy. The Soviet government provided significant logistical support to the seven-month expedition.

''On our part, we look forward to the opportunity to thank Mr. Gorbachev and the Soviet people for their support of this expedition and to

encourage their dedicated work toward preserving the future of Antarctica '' Steger said.

''Mr. Gorbachev has, along with the other leaders we have already met, recognized that it is this very kind of citizen diplomacy, the example of ordinary people working together against great odds, which is the promise of the world's future.''

The Kremlin visit will end the eight-country tour undertaken by the trans-Antarctica team.

WASHINGTON (MAY 31) UPI - Teams of volunteers from the United States and Soviet Union will join in a non-profit, private effort similiar to the Peace Corps to offer medical, environmental and agricultural help to developing nations, organizers said Thursday.

The effort, called ''Operation USA/USSR,'' will be privately funded and is the first private U.S.-Soviet joint venture volunteer organization, said Richard Walden, founder of Operation USA, a Los Angeles relief agency.

The project is co-sponsored by Operation USA, the Soviet Academy of Sciences' Institute for the Study of the USA and Canada and the non-governmental Soviet Peace Committee.

Walden credited Soviet Foreign Ministry spokesman Gennady Gerasimov for the idea of creating a Peace Corps-like group to offer relief to the developing nations of the world.

''I would never have imagined that my off-the-cuff remarks would have such practical dimensions,'' Gerasimov said at a news conference.

Gerasimov said the effort is evidence of ''citizen diplomacy,'' and shows a willingness of the Soviet Union to work with the United States.

''We want to be open to the world,'' he said.

Gerasimov also said former Soviet officials were mistaken in their derision of the Peace Corps during the early 1960s. ''We criticized the Peace Corps as some kind of sinister organization, which was a mistake.''

Armand Hammer, chairman of Occidental Petroleum Corp. and a longtime friend of the Soviet Union, said he has contributed $25,000 to the U.S.-Soviet volunteer corps.

Hammer, 92, said the volunteer corps ''is another step in improved

relations between the Soviet Union and the West.''

The organization's first effort will involve 10 teams of doctors, who will work with victims of the 1985 earthquake in Mexico. Each team will include two doctors from the United States, Soviet Union and Mexico.

Volunteers from the United States will be selected from personnel at the University of California, Los Angeles Medical Center.

The year-long effort is slated to begin this summer in the village of Lerma, the home of thousands of the quake's victims. The group's second project, tentatively scheduled for the following summer, involves cleaning a toxic waste site near Mexico City.

Walden said future teams will be sent to Bangladesh, India, Sri Lanka, Mozambique and the Philippines.

#90151u1390 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - Bob Kunst of Miami said Thursday he faxed a letter to the Soviet Embassy inviting Mikhail Gorbachev to join him for a discussion on the AIDS crisis.

Kunst, who heads a group called Cure AIDS Now, said he had not heard back from the Soviet president but still had not ruled out such an unlikely meeting sometime during Gorbachev's summit with President Bush.

''Anything is possible,'' Kunst said.

Others among the small band of protesters gathered Thursday in Lafayette Square across from the White House shared Kunst's attitude and hoped their messages would be heard by the two most powerful leaders in the world.

About 100 protesters convened in the park, where they were outnumbered by the office workers eating lunch and tourists making snapshots.

Some demonstrators preached about human rights in the Soviet Union; some discussed democracy in Vietnam; others focused on the AIDS crisis.

A handful of religious groups gathered to offer unsolicited advice to the Soviet and American leaders.

Michail Makarenko, 59, who described himself as a former Soviet political prisoner who has lived in Washington for eight years, clutched a sign that read ''USSR out of Lithuania.'' It featured a picture of Gorbachev with a line drawn across his head.

Makarenko, who demanded an end to any U.S. assistance to Gorbachev, was joined by a man named Vladimir Gerasimov, who described himself as a Soviet citizen and wore a gas mask to protest alleged use of nerve gas against Gorbachev's domestic political foes.

Kunst said he wants the United States and Soviet Union jointly to spend $18 billion to find a cure for acquired immune deficiency syndrome.

''Every second they waste, somebody becomes infected. Every minute they waste, somebody dies,'' Kunst said. ''The blood is on their hands.''

A four-member rock group from Moscow called ''Gaza'' played for about a dozen listeners, hoping to raise money to buy clean hypodermic needles to combat AIDS in the Soviet Union.

Three dozen members of the New Testament Church carried an array of signs, one saying, ''Both communist bloc and democratic rule are Satan's deception.'' Group spokeswoman Jeannie Weston, Los Angeles, said of the summit: ''We think it's useless, just men plotting in vain before God.''

Not everyone was critical of Gorbachev. Peggy Bie, 59, Belleair Beach, Fla., said she supports him ''wholeheartedly.''

''I think it's the best thing that's happened to the world since I've been born,'' Bie said.

Amid the protesters, street performer Nefertiti Smallwood Armstrong juggled, rode a unicycle and balanced a spinning hubcap on her face, as her 3-year-old daughter, Cleopatra, watched.

''It looks like a regular day to me, except for a couple of protesters,'' Armstrong said.

(MAY 31) UPI - Authorities in Gabon are ruling out foul play in last week's death of an opposition leader that sparked a week of riots in the central African nation. French and Gabonese officials say an autopsy concluded that the opposition leader died of a heart attack... and that syringe marks found on his body were due to a treatment for diabetics. The government has NOT allowed the politician's funeral... fearing it might spark further riots.

China's state-run media reports that security officials executed 20 criminals in an effort to ''guarantee the safety of the Asian games.'' The reports say among those executed was a man accused of arson during China's crackdown on pro-democracy protests last year. Two Beijing newspapers say 11 executions were carried out yesterday in the capital and nine people were put to death during the last week in a southern province.

A man paroled in the rape and mutilation of a 15-year-old year girl will appear in court today in Plant City, Florida, on a charge of stealing a 10-dollar disposable camera. An assistant state attorney says he will try to get Lawrence Singleton the maximum 60-day jail sentence if he is convicted of the misdemeanor. Singleton was released from a California prison in 1987 after serving more than eight years in prison for the brutal attack 10 years earlier.

#90151u1413 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - Lower house prices and a higher family income increased home buyers' purchasing power in April, the National Association of Realtors said Thursday.

The NAR's housing affordability index, which measures the ability of a typical family to purchase a median-priced resale home, was 104.6 in April, up from 103.9 in March.

At 104.6, the index shows that a family earning the national median income of $34,032 in April had 104.6 percent of the income needed to qualify for conventional financing covering 80 percent of a home priced at $95,300, the median existing-home price for that month.

Half the existing single-family homes sell for more than the median price and half sell for less. Similarly, half the families earn more than the median income and half earn less.

The April index was up nearly 1 percentage point due to a lower median home price and an increase in family income, but rising mortgage rates, a component of the purchasing power measurement, cut into that gain, the NAR said.

The interest rate used to compute the index rose to 10.15 percent in April from 10.07 percent in March, and the median home price dropped to $95,300 from $96,300. Meanwhile, the median family income rose $108 to $34,032 from $33,924, while the income needed to qualify for a loan on the typical home dropped $96 from $32,640 to $32,544.

#90151u1440 05/31/1990 ~United Press International

QUEBEC (MAY 31) UPI - The Quebec Nordiques, who finished with the worst record in the NHL this season, Thursday dismissed Coach Michel Bergeron.

Dave Chambers, a former assistant coach with the Minnesota North Stars, is expected to be named the replacement in the next few days.

Quebec General Manager Pierre Page, who left as North Stars coach to join the Nordiques May 4, went to great lengths at a news conference not to blame Bergeron for the team's 12-61-7 record. Page also refused to characterize the move as a firing.

''Michel Bergeron was not fired,'' he said. ''We assigned him to a new function. He has a long-term contract. We're taking care of him. We're looking after him.''

Page said the Nordiques have offered Bergeron a job involving promotion and possible radio and television work.

The general manager refused to confirm reports that Chambers, his former assistant with Minnesota, will be the new coach. Page did say the new coach would be named within the next few days.

Jean Perron, former Nordiques and Montreal Canadiens coach, said Chambers had the job on his radio show Wednesday.

Chambers told the Toronto Sun he has been approached by the Nordiques, but declined further comment. North Stars President Lou Nanne has said Quebec could talk to Chambers only if it meant a promotion.

There is speculation Page could take on the coaching duties himself, and that Chambers will be one of two assistant general managers. At the time he was hired, Page said his first priority would be to find two assistants one adminstrator and one hockey man. There is also the fear that an English-speaking coach would be unwelcome in the French-speaking city.

''Italian, German, French, English, Czech, Russian, you just want to win, don't you,'' Page said. ''You want to be successful. You want people to come here and learn the language. I think if you want to be successful, you have to think the unthinkable.''

Chambers, 49, coached at Toronto's York University for eight seasons, and also coached Canada's gold-medal team at the World Junior Championships in Moscow in 1987-88 before joining the North Stars.

Bergeron had coached the team from 1980-87 and returned last season after spending two years with the New York Rangers.

#90151u1447 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - The Securities and Exchange Commission filed a civil action Thursday, accusing eight people of insider trading in the 1987 acquisition of Modulaire Industries by Waste Management Inc.

The SEC complaint, filed at the United States District Court for the Northern District of California, charges that Joseph Behar, Modulaire's former chairman and chief executive officer, and Adrienne Wailes, wife of Modulair President David Wailes, passed confidential information to friends and relatives on the Waste Management deal.

Those charged with receiving the information, and using it to buy Modulaire stock, include: Donald Carter; Dorothy Carter; Deborah Castellucci; Mary Alice Graves; Christopher Scott; Jon Treder, and Charles

Devenport Wailes.

The defendents have all settled with the SEC by agreeing to return profits and pay penalties totaling more than $330,000.

The SEC, as a standard practice, files a civil suit even though settlement has been reached. No additional litigation is expected, according to Curt Mueller, an attorney for the San Francisco law firm Cooley, Godward, Castro, Huddleson & Tatum, which is representing Behar.

The SEC case is based on an April 1987 offer by Oak Brook, Ill.-based Waste Management offer to buy Modulaire, a San Francisco company that sells, rents, and services relocatable modular structures.

SEC officials charge that Adrienne Wailes, briefed by her husband on the deal May 8 - three days before it was publicly announced - quickly called friends and relatives to tell them to buy Modulaire stock.

Those telephoned then proceeded to buy a total of 16,500 shares, although Charles Devenport Wailes and Christopher Scott both canceled their orders before settlement.

Separately, Behar allegedly told Deborah Castellucci about the deal several days before it was announced. Castellucci allegedly used the information to buy 5,400 shares of Modulaire stock.

When the transaction was announced May 11, 1987, Modulaire stock shot up to more than $15 from $7 in heavy trading, which allegedly gave the defendants $102,000 in profits.

Those profits, however, must be disgorged, according to the settlement negotiated with the SEC.

SOFIA, BULGARIA (MAY 31) UPI - A bomb blew up the telephone of Prime Minister Andrei Loukanov last fall in what he described as a ''warning'' by the hard-line communist government, a published report said Thursday.

The incident occurred in October 1989, a month before longtime authoritarian leader Todor Zhivkov was thrown from power and four months before Loukanov, a communist reformer, was named prime minister.

''We are not thumping our chests but every one of us lived under extremely difficult circumstances,'' Loukanov told the Sofia newspaper Uchitelsko Delo in an interview published Thursday.

''We consciously put in jeopardy both ourselves as well as our families,'' he was quoted as saying.

Loukanov's revelation comes three months after President Peter Mladenov, another reform advocate who helped orchestrate the coup against Zhivkov, revealed his life was threatened last summer by the dictator's henchmen.

In the interview, the prime minister said his private telephone was rigged up to explode on a day when he was not at home.

''This wasn't an assault but a warning, that everyone should know his place and should not show so much of his character, but keep quiet,'' Loukanov said.

He said the incident illustrated that it was unfair to link opposition parties and reform communists such as himself with the old authoritarian regime.

He was referring to the fiercely anti-communist rhetoric of democratic opposition groups seeking to drive Loukanov's Bulgarian Socialist Party out of power in elections June 10 and 17, the country's first democratic polls in more than 40 years.

Zhivkov was arrested shortly after the bloodless coup in November and awaits trial on charges of fraud.

#90151u1481 05/31/1990 ~United Press International

RICHMOND, VA (MAY 31) UPI - Robert E. Lee's last words have been repeated by Southern school children for years, but a Duke University physician said Thursday Lee's final call to "strike the tent" was the invention of a historian bent on embellishing the Confederate general's legend.

Dr. Marvin Rozear, a Duke University Medical Center neurologist, used an overlooked account by the general's deathbed physicians to make a modern diagnosis of Lee's ailment and determined Lee never said a word in his final days.

In an article published in the journal of the Virginia Historical Society, Rozear takes aim at the account of Lee's death written by William Preston Johnston four years after Lee's 1870 demise and repeated by later historians.

Johnston said Lee's final words were "Tell (Gen. A.P.) Hill he must come up" and "Strike the tent." But Johnston didn't write about those words until others who were with Lee at his death, including his family, were dead.

After finding the physicians' account, Rozear and some colleagues were able to make the first modern diagnosis of Lee's last days. The conclusion: Lee suffered a stroke Sept. 28, 1870, that affected his cingulate gyri, a part of the brain critical to emotion and memory functions and the part where lobotomies are performed.

The stroke left Lee alert but without spontaniety or willingness to speak. It also canceled out Lee's cough reflex, which made him unable to keep his breathing passage clear of fluids and liquids by coughing.

Rozear believes Lee's wife and daughter probably viewed the lack of coughing as a good sign and forced food and medicine down his throat. Much of it ended up in his lungs, resulting in the infection and pneumonia that killed him on Oct. 12, 1870.

Lee slipped into a coma Oct. 11 and would not have been able to speak on his deathbed, Rozear said. And considering neither the physicians nor Lee's daughter Mildred ever mentioned the "strike the tent" line, he concluded the last words legend is simply "garbage," Rozear said in a telephone interview from Durham, N.C.

Rozear said he was reading a book on Lee and when "I read the account of Lee's stroke and death, the explanation just seemed to be improbable. There had to be more to the story than that, especially that the physicians never left a record. It just seemed impossible."

He met archivist Erin Foley, who became a co-author of the article. "I told her I just knew that these doctors had a diary published somewhere and dared her to find it. She called me back in just a day or two and said 'I've found it."'

After Foley found the report of two former Confederate surgeons, R.L. Madison and Howard Barton, in a 1870 edition of the obscure Richmond and Louisville Medical Journal, Rozear turned to his collection of antique medical texts to decipher vague medical terms no longer used. The surgeons for instance, believed Lee was suffering from "passive congestion of the brain."

Rozear, a graduate of Robert E. Lee High School in Jacksonville, Fla., said like many Southern school children, he was taught the tale of Lee's last words.

He also was taught about Confederate Gen. Thomas "Stonewall" Jackson's last words - "Let us cross over the river and rest under the shade of the trees" - and Rozear is skeptical about those words as well.

"I've been looking at Jackson's wounding, final illness, and demise,"

Rozear said. "It's been written that he died of blood clots from his amputated arm. That's probably not true. He probably had pneumonia as well."

Why the skepticism about who said what last? "In a medically sick old guy who is struggling to stay alive, speeches just don't occur. They mostly say something like 'Give me something for pain.' 'Turn me over.' 'It hurts.' You just don't hear lofty speeches from people dying this way, when they are sick, and chemically toxic," he said.

"I've been watching people die for 25 years like that and they don't make speeches. Now when someone is going to the gallows, the Nathan Hale stuff, that's different. But when you have a fever, are sick and toxic, you just don't make speeches."

"Strike the tent" was a term used when his Army of Northern Virginia was breaking camp to go into battle.

#90151u1483 05/31/1990 ~United Press International

GDANSK, Poland (MAY 31) UPI - Solidarity founder Lech Walesa Thursday told representatives of the railway workers who suspended their strike this week that the government will try to meet their wage demands.

"This government will not harass anybody," Walesa said.

"This government will fulfill all demands but within its possibilities," he said. "If it does not meet the demands, then it cannot be called our government."

The railway workers telephoned Walesa from across Poland and he answered their questions during the news conference which took place in the Baltic seaport of Gdansk.

Walesa's statement on the wage demands contrasted with the statement by Labor Minister Jacek Kuron in Warsaw who said the authorities would not discuss the financial issues with the railway workers.

''It is a misunderstanding to think that the government will give an answer on the wage issue,'' Kuron said, and stressed the strikers will not be paid for the duration of the protest.

The contrasting statements by Walesa and Kuron put in doubt the agreement reached between the strikers and the union leader.

Walesa has not spoken to the government on how to solve the wage conflict by the June 13 deadline.

''I have said that I would protest together with you'' if the demands have not been met, Walesa said. ''But I think there will not be such need to do it.''

The strike began with a hunger protest on May 10 by 45 workers in the northern city of Slupsk followed by a one-week job walkout by about 1,000 railway workers in northwestern Poland demanding an 85-percent wage increase.

It was the biggest protest since the formation of the Solidarity government nine months ago.

Prime Minister Tadeusz Mazowiecki said the government could not afford to the strikers' demands, but later Deputy Prime Minister Leszek Balcerowicz has said austerity measures - a wage freeze and price hikes by 140 percent - will be eased following the assessment of the economy.

The government's major success in the first five months of 1990 has been a drop in inflation and revival of private trade. As a result, more goods became available in shops.

#90151u1485 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - The Treasury Department recommended Thursday government-sponsored enterprises, such as Fannie Mae - the Federal National Mortgage Association - build loan loss reserves and qualify for top credit ratings.

''The thrift crisis has clearly demonstrated the extraordinary cost that can result'' if sound financial practices are ignored, the Treasury said in a study ordered by Congress in the wake of the savings industry collapse.

The study said the crisis ''focused attention on other areas in which the United States may be exposed to financial risk,'' such as the enterprises that are chartered by the government but privately owned.

The Treasury recommended Fannie Mae and the others shore up their capital positions, and be required by law to qualify for the highest rating available, such as triple-A, from leading credit rating services such as Standard & Poor's Corp.

''Should (an enterprise) be rated below triple-A, it would be required to submit, and adhere to, an acceptable business plan describing the actions it plans to take to achieve a triple-A rating within five years ... or lose its ties to the federal government,'' the Treasury said.

The study also called for full disclosure of the government's financial support of each enterprise, and expressed some concern about federal oversight of the enterprises.

In addition to Fannie Mae, which is among America's largest corporations and provides a secondary market for residential mortgages, the other enterprises covered in the Treasury study are:

-Freddie Mac, the Federal Home Loan Mortgage Corp., which also provides a secondary market for residential mortgages.

-The Federal Home Loan Bank System, which provides liquidity for the savings industry.

-Farm Credit Banks.

-Banks for Cooperatives, which finance operations of farmers cooperatives.

-Farm Credit System Financial Assiatmce Corp., which provides capital to institutions of the Farm Credit System that are experiencing serious financial problems.

-Farmer Mac, the Federal Agricultural Mortgage Association, which deals in the secondary marketing of agricultural mortgages.

-Sallie Mae, Student Loan Marketing Association, which provides a secondary market for student loans guaranteed by the federal government.

-Connie Lee, the College Construction Loan Insurance Association, which insures bonds and loans to finance the construction and renovation of college buildings and facilities.

#90151u1502 05/31/1990 ~United Press International

SRINAGAR, INDIA (MAY 31) UPI - Hundreds of thousands of mourners, many firing automatic weapons in the air, crowded a sprawling prayer ground Thursday to mark the death of the assassinated chief Kashmiri Moslem cleric.

Troops and paramilitary forces remained out of sight throughout the five-hour ceremony despite the presence of masked and armed militants who delivered fiery speeches advocating separation from India.

''We are out to get rid of Indian occupation of our state and then to establish an Islamic Republic of Kashmir,'' a spokesman for the Jammu and Kashmir Liberation Front told the estimated 300,000 mourners.

Some 400 other militants near the speakers platform fired hundreds of shots into the air throughout the ceremony for Moulvi Mohammed Farooq, the chief Kashmiri Moslem cleric who was assassinated May 21 by unknown gunmen.

Many in the crowd clutched black mourning flags or raised banners of the Front and other militant groups that have been waging a violent campaign aimed at achieving independence for Indian Kashmir.

Virtually all of the region's 4 million Moslem Kashmiris believe separation from India is necessary because of a perception that their collective interests have been consistently ignored by successive Hindu-dominated New Delhi administrations.

They also complain that India reneged on a promise to hold a plebiscite so Kashmiris could decide if they wanted to remain a part of India or join neighboring Pakistan. A number of militant groups advocate independence.

The movement had been simmering for about two years, but erupted into a popular uprising in mid-January after security forces opened fire on demonstrators, killing at least 35 people.

Since then, more than 400 people have died, many of them demonstrators shot by security forces.

On May 21, at least 65 people were killed when security forces fired on thousands of mourners carrying the body of Farooq, who was assassinated earlier that day.

A memorial ceremony for Farooq had been planned for Wednesday, but was cancelled because the Jammu and Kashmir state government refused to lift the curfew in parts of the city, fearing violent demonstrations.

But on Thursday authorities relaxed the curfew throughout for 12 hours beginning at 7 a.m. and some 300,000 people gathered at the Eid Gah prayer ground on the outskirts of Srinagar, 400 miles north of New Delhi.

Omar Farooq, the 16-year-old son of the assassinated chief cleric who will inherit his father's title of moulvi, or priest, spoke to the crowd for about five minutes. Speaking in Urdu, Farooq urged President Bush and and President Gorbachev to discuss the Kashmir issue during their upcoming summit.

''We salute our martyrs,'' said Farooq, dressed in a black coat and white trousers. ''Our sacrifices shall bear fruit and we shall achieve freedom from India, God willing.''

#90151u1527 05/31/1990 ~United Press International
(MAY 31) UPI - The historic summit between President Bush and Soviet President Gorbachev is under way at the White House. Bush welcomed the Kremlin leader on the south lawn of the White House today, saying he wanted to work with Gorbachev in building ''a new Europe'' in which ''NO nation is threatened.''

Gorbachev also was gracious and upbeat in his opening comments, saying the United States and Soviet Union are building a ''greater stability.'' The Soviet leader also said he came to Washington to ''do serious work.'' The four-day summit is expected to include progress on arms control and debate on a unified Germany and the independence-minded Baltic states.

Officials across Romania are assessing the damage from a strong earthquake yesterday, even as more than 80 after-shocks rumbled through the area. One jolt that measured five-point-nine on the Richter Scale roused Millions of people from their sleep and damaged buildings in Bucharest that survived the initial quake. At least 12 people were killed in that quake.

NASA says engineers are NOT done looking, but have so far been unable to find a leak in a hydrogen fuel line fitting aboard the shuttle Columbia. A space agency spokesman says that if the check proves fruitless, the already-delayed flight may be delayed three weeks or more as the ship undergoes major repairs.

The government blames weak demand for cars and planes for a plunge in factory orders last month. The Commerce Department estimates that orders dropped five and one-half-BILLION dollars last month, while inventories edged up one-tenth of one percent, or 500-Million dollars. Total orders hit 235-point-six-BILLION dollars.

The official Soviet news agency Tass reports that Soviet Prime Minister Nikolai Ryzhkov was slightly hurt in a car accident involving his limousine and a military troop bus. The report says one of the soldiers aboard the bus and one of the people traveling with Ryzhkov also were injured. Tass says all the injuries were minor and Ryzhkov worked at his Kremlin office today.

#90151u1532 05/31/1990 ~United Press International
MOSCOW (MAY 31) UPI - Soviet officers kept their heads in the sand while subordinates watched amateur pilot Mathais Rust fly through some of the world's most heavily guarded airspace from Finland to Red Square, a newspaper said Thursday.

The weekly Sobesednik supplement to the Komsomolskaya Pravda newspaper of

the Young Communist League blamed incompetence and indecisiveness by top generals for allowing the flight that proved a major embarrassment for the Soviet military.

On May 28, 1987, Rust, then 19, piloted a small rented Cessna across the Soviet border from Finland and across 500 miles of Soviet territory. He buzzed Red Square before landing next to the Kremlin - chatting calmly with startled tourists until he was arrested.

The Soviet defense minister and his deputy in charge of air defenses lost their jobs in the aftermath of the flight, and two lower-ranking officers were sentenced to prison for dereliction of duty.

But Sobesednik, in the most extensive Soviet account to date of the incident, said the generals directly responsible for the comedy of errors that allowed the flight were still in high posts.

The newspaper said Rust's plane was first spotted on Soviet radar screens when it was over the Gulf of Finland. The radar operators told their superiors and the information was passed up the chain of command.

''The generals had to make the decision to cut short the flight,'' the newspaper said. ''But they did not do it. Why?''

The newspaper suggested that the generals were afraid to take any action because of the 1983 incident in which Soviet gunners shot down a Korean Air Lines jetliner, killing 269 people.

''Maybe the accident with the South Korean Boeing (747) influenced the final decisions of the generals,'' Sobesednik said. ''They were afraid to hurry and inform the leaders. But the Cessna flew for six hours.''

At one point in the flight, while a general identified only by his last name Kromin was passing on a report to Maj. Gen. Melnikov at central headquarters, Melnikov suggested the object being followed on radar was a flock of birds, the newspaper said.

''I said, 'let it be birds,''' Kromin said, according to the newspaper. ''I did not give the command to force it down.''

The conversation apparently occurred after a MiG pilot was sent up and reported spotting the plane.

The Soviet pilot testified at an investigation he could have shot down the intruder or forced the plane to land, but he was not ordered to do so.

When Kromin officially passed on the report of a plane flying toward Moscow to the central anti-aircraft defenses, he identified the target as

a Soviet sport plane that had not filed a flight path.

''Maj. Gen. S. Melnikov, who was on duty in the central headquarters, wanted to inform the chief commander, but lingered and then forgot,'' the newspaper said. ''When the target was near Moscow, Melnikov ordered it taken off the reports to central headquarters.

''This gave the Cessna a green light to Red Square,'' the paper said.

The Sobesednik story was illustrated with a cartoon of an ostrich dressed in a general's uniform - its head in the sand and an arm pointing at a bird.

The caption reads: ''The air situation didn't cause any concern at the moment for me.''

Convicted at a Moscow trial of malicious hooliganism, illegal entry into the country and violation of flight regulations, Rust was held nearly 11 months in Moscow's Lefortovo Prison until his abrupt release on Aug. 3, 1988.

NEW YORK (MAY 31) UPI - The stock market was slightly higher late Thursday in moderate trading, having barely budged since recovering from opening weakness tied to a drop in market leader International Business Machines Corp.

The Dow Jones industrial average, which rose 8.07 Wednesday to a new record high of 2878.56, was up 3.56 to 2882.12 at 3 p.m. EDT.

Advances led declines 781-640 among the 1,965 issues crossing the New York Stock Exchange tape. Volume at 3 p.m. amounted to about 137,000,000 shares compared with 164,590,000 in the same period Wednesday.

Prices were mixed in active trading of American Stock Exchange issues.

Analysts said a factor in the market's weakness at the opening was the decline in IBM, which was down sharply in overseas trading on rumors that next month Hitachi would unveil a mainframe computer faster than IBM's version.

Hitachi has scheduled a press conference for Wednesday, when it said it would provide ''details on significant additions and enhancements to its line of mainframe computers.''

IBM also opened lower in New York, ''but IBM's been a leader in the rally and when people saw that IBM didn't go down that much it was encouraging '' said Rodd Anderson, vice president of equity trading at Shearson Lehman Hutton Inc.

The bellwether issue was down slightly in afternoon trading.

But Anderson said the upcoming unemployment figures for May are ''a question in a lot of people's minds.'' He said he expects trading to slow as the session wears on in anticipation of the report's release prior to the opening Friday.

Job growth is expected to have risen considerably in May, with non-farm payrolls up 253,000 and the jobless rate unchanged at 5.4 percent.

On the trading floor as of 3 p.m. EDT, Philip Morris was the most active issue, down slightly.

Global Marine followed, higher. Moore was third, up moderately.

IBM was also active, slightly lower.

Among the other blue chips, AT&T rose, Procter & Gamble extended its rally after Morgan Stanley was said to repeat its ''buy'' recommendation on the

stock and Westinghouse was up sharply after announcing a buyback of up to 20 million shares, calling the current market price ''an attractive investment.''

Elsewhere, Disney's rally stretched into a second day. The stock surged $6 a share Wednesday after an analyst was said to have repeated his ''buy'' rating.

Imperial Oil Ltd. Class A led the Amex issues, off slightly.

#90151u1575 05/31/1990 ~United Press International

LOS ANGELES (MAY 31) UPI - A girl who attended the McMartin Pre-School testified Thursday that former teacher Raymond Buckey molested her, threatened to harm her parents if she told them of the sex abuse and slaughtered a rabbit in front of her.

The girl, now 13, is the third and final child to testify at Buckey's retrial that he molested them at the now-defunct nursery in Manhattan Beach.

Prosecutors allege that the girl was 3 or 4 years old when Buckey molested her between November 1979 and June 1981.

Buckey, 32, has steadfastly maintained his innocence. His attorney, Danny Davis, has long argued that the ''victims'' were manipulated by social

workers into falsely believing they had been molested.

Under questioning from Deputy District Attorney Pam Ferrero, the girl testified that Buckey molested her while playing a naked sex game called ''Horsey.''

On several occasions during her testimony, the girl replied, ''I don't remember,'' when asked for details of the molestations, such as how many times Buckey allegedly assaulted her.

''More than once, but I don't remember exactly how many,'' she said.

''He told me not to tell or my parents would be hurt,'' she testified.

The girl also testified that, on at least one occasion, Buckey slaughtered a rabbit in front of her with a pair of scissors. Prosecutors contend Buckey killed animals in front of his alleged victims to scare them into silence.

Davis will cross-examine the girl later Thursday.

Buckey is being retried on eight molestation charges for sexually abusing three girls at the pre-school from 1979 until 1983.

Buckey and his mother, Peggy McMartin Buckey, 63, were acquitted Jan. 18 of 52 other molestation counts at the first trial in the case. Jurors deadlocked on the eight counts on which Buckey is being retried.

The first trial, which involved the alleged molestations of 11 children, lasted nearly three years and cost more than $13 million, making it the longest, costliest criminal trial in U.S. history.

The retrial, now in its second month, is expected to last less than a year.

When first filed in 1984, the case was also the largest sex abuse case in U.S. history. However, scores of charges and five co-defendants were dismissed prior to the first trial on grounds of insufficient evidence.

NEW YORK (MAY 31) UPI - Former Philippines first lady Imelda Marcos collapsed at her racketeering trial Thursday and was carried from the courtroom on a stretcher.

Marcos, 60, wearing an oxygen mask, her face pale and eyes closed, was loaded into an ambulance and taken to New York Hospital where she was listed in stable condition while being examined in the emergency room by specialists in digestive disorders.

Dr. David Case, Marcos's personal physician, said she had suffered stomach pains and had vomited blood clots. He said her illness was not related to her high blood pressure.

''She is ... being evaluated in the emergency room by the gastroenterology staff.'' he said. ''At the present time she is in stable condition, is alert and doing well.''

It was the third time Marcos, who suffers from high blood pressure, has collapsed in court since her lengthy trial began April 3.

''She was choking on her own blood and bleeding from the mouth,'' said Marcos's longtime attorney, John Bartko, just after she collapsed.

Marcos is being tried on charges that she and her late husband, former Philippine president Ferdinand Marcos, conspired to buy New York real estate, art and jewelry with $222 million stolen from their homeland.

When she arrived at the courthouse Thursday, Marcos told a reporter that she felt sick to her stomach.

After she was taken to the hospital, a court clerk said she was worried about Marcos's ''particularly gray'' appearance, and had advised the courthouse nurse to stay at her post and not go to noon mass at a nearby Catholic Church.

Dressed in her customary black of mourning for her husband, Marcos had been sitting at the witness table listening to her trial lawyer, Gerry Spence, question an associate of her co-defendant, former Saudi arms dealer Adnan Khashoggi.

When Assistant U.S. Attorney Charles LaBella began his questioning about 11:40 a.m., Marcos suddenly slumped over, her face flat on the table, as spectators gasped.

Bartko said when Marcos collapsed, she murmured, ''No, no, no.'' Asked what she meant, he replied, ''She wanted the trial to go on - she didn't want this to happen to her.''

Two doctors among the spectators rushed up to the fallen Marcos, as well as a few of her supporters. The doctors called for a stretcher and Marcos was carried out as U.S. District Judge John Keenan cleared the courtroom. Later, he recessed the trial until Tuesday.

''She made a sound. I looked over, and she put a hand to her face and she fell forward, bleeding from the mouth and vomiting,'' said Khashoggi's lawyer, James Linn.

An obviously upset Khashoggi said, ''She bleeded.''

Marcos broke down in tears April 26 during testimony and had to be escorted from the courtroom and treated for high blood pressure.

Since then, she has worn a blood pressure monitor. On May 8, she again collapsed in tears when a witness testified about her daughter receiving secret funds.

#90151u1606 05/31/1990 ~United Press International

PARIS (MAY 31) UPI - Arantxa Sanchez-Vicario, the defending women's champion, was knocked out in the second round of the French Open Thursday, opening a path to the semifinals for Jennifer Capriati.

Sanchez-Vicario saw her service broken 10 times in falling to Mercedes Paz her doubles partner and close friend, 7-5, 3-6, 6-1.

No. 2 seed Monica Seles had a scare before extending her winning streak to 27 matches with a 4-6, 6-4, 6-4 squeaker over Canadian Helen Kelesi. Seles a 16-year-old Yugoslavian, did not lose a set in the 26 previous victories.

Capriati, the 14-year-old terror of the circuit, required merely 41 minutes to crush Cammy MacGregor, 6-1, 6-0. A professional of only two months and unseeded in Paris, Capriati will meet 12th seed Judith Wiesner in the third round.

But with Sanchez-Vicario removed from her quarter of the draw, she has a good chance of earning a semifinal date with Seles in her first Grand Slam championship.

MacGregor managed only nine points in the second set, and Capriati said she enjoyed the short stand in the sun.

''I'm grateful I don't have to have a tough match, and I'm happy because I know I played well,'' said the Floridian, who now has an 18-4 match record as a pro.

''I think I have a good chance (of winning the tournament) if I play well. I'll try to win.''

The quick dismissal of Sanchez-Vicario marks the earliest exit by a defending French women's champion, and the first time one has lost before the round of 16.

''What can you do,'' asked Sanchez-Vicario, the No. 3 seed. ''I didn't

play my best. She played very well. That is tennis. Sometimes you lose and sometimes you win. She played better than I did.''

There were 18 service breaks in a match that lasted 2 hours, 22 minutes.

''It was a dream for me to play on Center Court today and to beat the champion of last year,'' said Paz, a 23-year-old Argentine ranked No. 39 in the world.

At the end of the match, Paz embraced her rival and kissed her on the cheek.

''When I walked on the court I tried not to think she is a doubles partner and a friend,'' Paz said. ''I tried to remember that we are professionals and we are putting on a show. I try to play against myself.

''At the end I was a little upset for her because I could see how she felt about losing in the second round after having won here last year, but at the same time I'm happy that I was the one who beat her.''

Sanchez-Vicario, then 17, became the youngest French champion in 1989 when she upset Steffi Graf in the final.

The loss by the Spaniard followed the trend set among the men, where top seeds Stefan Edberg and Boris Becker both were upset in the first round.

Paz and Sanchez-Vicario, who have won three doubles titles this year, engaged in a long struggle under a warm sun.

The opening set required 74 minutes and included nine service breaks. Sanchez-Vicario, ranked fourth in the world, took control of the second set as she raced to a 5-1 lead, but she fell behind 4-0 in the final set and couldn't recover.

Since the beginning of the year Paz has lost 20 pounds on a strict training regimen.

''The special diet was to run,'' she said. ''I've been running very much.''

After dropping her fist set since February, Seles broke service in the seventh game of the second and third sets. She employed a drop shot to great effectiveness against Kelesi, an occasional doubles partner.

''I was just lucky I pulled out this match today,'' said Seles, ranked No. 2 in the world behind Graf. ''I think the whole match for me was dangerous. It was one of those days when nothing was going for me, except my serve.''

No. 5 Aaron Krickstein was an easy 6-3, 6-4, 7-5 winner over French qualifier Stephane Grenier, and commented on his improved chances following the losses of Edberg and Becker.

''A lot of guys in the locker room think they have a chance to win,'' he said. ''Anyone who gets to the quarterfinals has a realistic shot. That's the key, to get to the quarters without playing too many long matches.''

The men lost their sixth seeded player when No. 12 Juan Aguilera was ousted by Thierry Champion of France 3-6, 6-3, 6-3, 6-2, and Raffaella Reggi, the 14th women's seed, lost to Australian Kirrily Sharpe, a 17-year-old qualifier, 6-4, 6-2.

No. 4 Andres Gomez and No. 7 Thomas Muster both won in straight sets, while No. 10 Martin Jaite, who dropped two tie-breakers, and No. 14 Magnus Gustafsson won in five sets.

Paul Haarhuis, the Dutchman who upset John McEnroe in the second round of the 1989 U.S. Open, edged Jim Pugh in a 61-game marathon that went 4 hours 48 minutes, and Yugoslav Goran Ivanisevic, the conqueror of Boris Becker, defeated Anders Jarryd in straight sets.

Other second-round winners among the women included No. 6 Manuela Maleeva, No. 7 Mary Joe Fernandez, No. 10 Natalia Zvereva and No. 16 Laura Gildemeister.

WASHINGTON (MAY 31) UPI - Yields for 52-week T-bills fell to 7.65 percent at Thursday's monthly auction, the lowest since 7.42 percent Feb. 13, the Treasury Department said.

At the last auction May 3, the Treasury Department sold the bills at an 8.05 percent discount rate.

The government said it sold about $10 billion worth of the 52-week bills at Thursday's auction, and the average investment rate was 8.24 percent at a price of $9,226.50 per $10,000 face value.

#90151u1609 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - On a sun-blessed morning, President Bush welcomed Mikhail Gorbachev to the White House Thursday, using the monuments to the intellectual and military heroes of the American revolution as a backdrop.

The Soviet leader, soaking up the full panoply of protocol under azure skies, responded with thanks and smiles.

Not a mention was made of the roar of jetliners climbing away from nearby National Airport that periodically stiffled the rhetoric or of the giant tarp that spilled off the White House roof and across the Truman balcony - evidence of the continuing restoration of the president's house.

As a result, the elaborate welcoming ceremony on the White House south lawn was turned around, so the television cameras showed the leaders with their backs to the Washington Monument and Jefferson Memorial.

Water in the large fountain played quietly in the breeze as a 21-gun salute sounded. Full-dressed military units stood for the cursory inspection of the two heads of state.

Bush and Gorbachev stood together on a red-carpeted stage as some 4,000 VIPs looked on. Each spoke of his aspirations, not only for the four-day summit, but also for the future.

''At last we see the long era of confrontation giving way to cooperation '' Bush said.

Gorbachev said, ''The trenches of the Cold War are disappearing. The fog of prejudice, mistrust and animosity is vanishing.''

The crowd included members of the diplomatic corps, lawmakers, administration officials, friends, followers and hangers-on. Among them was Marion Barry, the mayor of the District of Columbia, who faces trial next Monday on cocaine charges.

While the leaders set their sights on a new relationship in a post-Cold War world, hundreds of people across the street demonstrated and sang for peace.

''Don't cross the yellow tape,'' barked a policeman, one of an army of law enforcement officers providing heavy security for the events.

The welcoming ceremony for Gorbachev included the two national anthems by the 49-member Navy Band and a performance by a Revolutionary War-era Fife and Drum Corps.

''My only disappointment,'' said Sen. John Warner, R-Va., ''is that when Gorbachev walked past the Fife and Drum Corps, they didn't play 'The World Turned Upside Down''' - the tune played when the English Gen. Cornwallis surrendered to George Washington's Continental army, marking the end of the American revolution.

When Bush and Gorbachev went to the Oval Office to begin their talks, reporters and cameramen piled in for a picture-taking session. Bush explained his rule against fielding questions on such occasion, but told Gorbachev he was free to speak.

Gorbachev said he would abide by Bush's rules.

''You'll be sorry,'' a reporter told Gorbachev. ''No you won't,'' Bush assured his Soviet guest.

First lady Barbara Bush escorted Raisa Gorbachev to the upstairs sitting room for tea and a review of their planned visit Friday to Wellesley College near Boston.

In the first report from the distaff front, Anna Perez, Mrs. Bush's press secretary, said after the tea, ''It was a great visit. ... They are looking forward to the rest of the week.''

As the presidents and first ladies talked, rock 'n' roll music blared across the street from the White House in grassy Lafayette Square.

''Rock not Rockets,'' read the message on the black shirts of the rag-tag musicians from the Soviet Union, who are visiting the United States as part of an international exchange program.

Also in the park were chanting Japanese Buddhists, a group demanding that funds from the ''peace dividend'' go to AIDS research, and a grizzly-faced man holding a sign reading: ''USSR out of Lithuania.''

#90151u1632 05/31/1990 ~United Press International

LIMA, PERU (MAY 31) UPI - Military helicopters fanned out Thursday to aid remote cities in the Amazon basin destroyed or damaged by an earthquake that killed an estimated 200 people and injured more than 1,500.

A Civil Defense Institute spokesman, Ciro Ugarte, said ''everything seems to indicate that approximately 200 persons died'' in the 48-second temblor Tuesday that was followed by at least 60 aftershocks Wednesday and Thursday.

He said another 75 persons have been reported missing, over 1,500 injured, and 2,000 left homeless.

Ugarte said the number of casualties could rise significantly as rescuers using military helicopters reached the remote villages in the quake zone and got more complete reports of casualties.

The total number of persons suffering property damage of some kind was estimated by the Civil Defense Institute to be 15,000.

Health Minister Paul Caro said that both Peruvian air force and private planes left Lima for the Amazon basin cities of Moyobamba, Rioja, Rodriguez de Mendoza and Tarapoto carrying tons of medicine, food, blankets, clothes and tents.

The 45-second temblor measuring 5.8 on the Richter Scale devastated dozens of villages.

Health officials have reported many of the most seriously injured victims were evacuated to Lima.

The Seismological Institute of Peru said that at least 60 aftershocks Wednesday and Thursday followed the the initial earthquake.

Gen. Jorge Ferreyros, chief of the Civil Defense Institute, Wednesday said that almost all the homes in Rioja and Mayobamba were destroyed, and the roof of the Mayobamba cathedral caved in.

Ugarte said that Civil Defense flew in a mobile hospital to Moyobamba, the capital of the Amazon San Martin department and the city hardest hit by the quake.

According to the Geophysical Institute, the epicenter of the 48-second quake late Tuesday was located just 15 miles southeast of Moyobamba.

Witnesses said the earthquake could be felt as far away as 500 miles, shaking buildings in the northern coastal cities of Trujillo, Chepen, Pacasmayo, Chiclayo and Piura.

On May 31, 1970 a quake killed 70,000 people in central Peru. A mountain of rocks and dirt to buried all of the estimated 25,000 inhabitants of the Andean city of Yungay.

An earthquake registering 5.0 on the Richter Scale can cause considerable damage and a 6.0 quake can cause severe damage. Each increase of 1.0 on the scale means the ground motion is 10 times greater.

Ferreyros said rescue organizers appealed to Health Ministry doctors, who ended a one-month strike to aid the relief effort.

Antonio Mestanza, prefect of the department of Amazonas, said in a radio interview that ''the quake damaged 90 percent of the homes'' in Rodriguez de Mendoza, which has a population of 4,000 people.

He said he has received ''reports that the town of Achabamba has totally

disappeared, as well as Limabamba, Chirimoto, and others.''

#90151u1649 05/31/1990 ~United Press International
LAS VEGAS, NV (MAY 31) UPI - Circus Circus Enterprises Inc. received final state approval Thursday to open the $290 million, 4,032-room Excalibur hotel-casino on the Las Vegas ''Strip'' June 19.

The Nevada Gaming Commission unanimously approved a license covering what will be the largest gaming resort in the world.

John O'Reilly, the commission's chairman, predicted the Excalibur would prove the sword is mightier than the Taj - a reference to, respectively, the sword used by King Arthur and Donald Trump's recently opened Taj Mahal hotel-casino in Atlantic City.

Circus Circus officials told the state that the company has enough projected cash flow over the next three to four years to eliminate all corporate debt if they choose to do so.

Company officials said last year that corporate cash flow covered interest payments and debt repayments by five times, against an industry average of two times. Circus Circus owns casinos in Las Vegas, Laughlin and Reno.

Excalibur, built on 90 acres, will measure 2.5 million square feet, includingfour 28-story towers and a casino with 2,657 slot machines and 92 table games. There will be 4,400 employees at the property.

In granting the license, the state approved Richard Banis as chairman of the board, president and treasurer, William Paulos as vice president and general manager and William Martin as secretary.

Banis told the commission the Excalibur would be ''an entertainment mega-store. It will cater to middle America - the mainstream tourist.''

The resort is built around a medieval motif, with nearly round-the-clockentertainment involving jousting, a half-dozen theme restaurants and two shows a night based a story line of King Arthur's court.

The Circus Circus Enterprises gambling application for the Excalibur was granted with virtually no questions by state regulators. The entire presentation was completed in less than 30 minutes.

#90151u1671 05/31/1990 ~United Press International

CHICAGO (MAY 31) UPI - Grain futures were mixed and soybeans closed higher Thursday on the Chicago Board of Trade.

Soybeans received some support from an early rally, although traders said reports of progress in fieldwork by farmers helped to keep some pressure on prices.

Weather reports were interpreted in different ways by traders. More rain forecast for the near future offset reports of drier weather over the next 30 days.

Corn ended lower on commission house liquidation. Traders were reportedly nervous after a sharp price break on Wednesday. Also keeping prices down were reports of farmers getting back to planting as less rain fell recently in the Midwest.

Wheat ended higher, but was pressured near the end of the day by commercial and investment fund selling. Also pressuring the market were reports that Jordan's request for bonus wheat exports had been rejected.

Traders said reports that the winter wheat crop would survive the wet spring also helped to kept a lid on prices.

At the close, corn was off 2 to off 1 1/2, soybeans off 3 to off 1 3/4, wheat off 4 to up 1 1/2 and oats up 1 to up 2 cents.

#90151u1688 05/31/1990 ~United Press International

(MAY 31) UPI - President Bush says he and Soviet President Gorbachev are ''NOT going to solve all of the world's problems'' during their four-day summit now under way at the White House. But Bush says he views the talks as what he called ''an open and honest search for common ground.'' At an opening ceremony on the South Lawn of the White House, both leaders expressed great hope for the talks, which may lead to major strides on cutting the number of long-range nuclear weapons.

After the brief welcome, Bush and Gorbachev left for their first Oval Office negotiating session. The two are expected to talk about major differences between the super-powers, including the military role of a united Germany and independence moves in the Baltic states.

A poll of European Community residents shows that support for German unification has waned since the fall of the Berlin Wall. Countries showing the largest drop in support were the Netherlands, down 17 percent, to 59 percent... France, down 14 percent, at 66 percent... Luxembourg, down 11 percent, to 52 percent, and Belgium down 10 percent, to 61 percent. An analyst says the numbers show the ''euphoria has ceased and everybody now

sees the difficulties associated with German unification.''

The National Labor Relations Board says Greyhound has NOT been bargaining with its striking workers in good faith and has been treating them unfairly. The N-L-R-B will hold a hearing in September to consider a request to force the bus line to take back 93-hundred strikers. The financially troubled company has said it will NOT fire the estimated four-thousand drivers it hired to replace workers who went on strike 13 weeks ago.

#90151u1700 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - Machine tool orders plunged 31.7 percent in April from March, a trade group reported Thursday.

The American Machine Tool Distributors Association said that metal-cutting tool orders fell 31.4 percent in April from March and that metal-forming tool orders dropped 34.7 percent.

The AMTDA's indexes measure U.S. machine tool consumption and reflect both

domestic and foreign sources of machine tools.

A possible explanation for the April decline ''may be that the buying cycles of machine tool-consuming industries have undergone a similar monthly downturn,'' Robert A. Gale, AMTDA's president, said. ''For the most part, these cycles are normally in different phases of activity.''

Gale claimed that April's convergence in both indexes ''should not raise a great degree of concern.

''As evidenced from order activity during the first quarter of the year, a downturn trend has not been established for certain.''

#90151u1701 05/31/1990 ~United Press International

NEW YORK (MAY 31) UPI - Kuwait and the United Arab Emirates are failing to abide by a month-old agreement of the OPEC cartel to cut excess oil output that has created the current world glut and depressed prices, U.S. industry sources said Thursday.

Saudi Arabia has trimmed its daily crude-oil production nearly 600,000 barrels and is currently close to its 5.4 million barrel-a-day quota set by the 13-nation Organization of Petroleum Exporting Countries, the sources said.

The Saudis have long insisted they have 24.4 percent of total OPEC output and the question is how long they will continue to show restraint while the other two members are pumping all out.

''That is the question. If they decide to change, the impact could be pretty dramatic,'' said a source with a major oil company that closely monitors OPEC.

On the United Arab Emirates, he said, ''We don't see any evidence of any significant reduction for May. It's still producing around 2.1 million barrels a day,'' said the source who commented on condition of remaining unidentified.

The UAE had promised to cut daily output in the May 3 agreement of the OPEC emergency Geneva meeting by 200,000 barrels from May through July when the cartel will hold its regular semiannual conference.

On the Kuwaitis, ''we don't see any real reduction. They're holding at 1.7 million barrels daily.'' Kuwait agreed May 3 to cut back to its 1.5 million barrel-a-day quota from May through July.

The three - Saudi Arabia, Kuwait and the UAE - are key to controlling

output and prices of the OPEC cartel, which pumps more than a third of the world's crude oil.

OPEC attempts to support higher consumer prices for gasoline and other petroleum products by limiting its output and assigning quotas to members.

The current world glut of crude oil that has driven prices downward became apparent in early April as Kuwait and the UAE ignored OPEC quotas and Saudi Arabia raised production to maintain its percentage share.

OPEC had set a target price of $18 a barrel as the average for seven Mideast crudes.

The oil-company source placed the average currently at $15.45 a barrel, close to its 1990 low of $15 a barrel. It had risen as high as $20 a barrel in January.

Cristina Haus, a New York consultant who monitors OPEC, assessed the average OPEC price for the month of May slightly below $16 a barrel.

The May 3 emergency meeting of cartel oil ministers agreed to cut OPEC daily output by 1.4 million barrels to around the 22 million-barrel ceiling the cartel set in November.

But, the oil company source said April output had averaged near 24 million barrels a day rather than 23.4 million barrels.

With the Saudi reduction, ''we're calling May at 23.4 million barrels daily, nothing like the 1.4 million-barrel reduction and 22 million-barrel output figures they were shooting for,'' the source said.

Through last week, Haus estimated OPEC May output at 23.3 million barrels daily. Cambridge Energy Associates, Cambridge, Mass. estimated output last week between 23.1 and 23.4 million barrels a day.

June output could decline from this level depending largely on what Kuwait and the UAE do.

The source said UAE June output ''will probably come down a bit. We understand there are indications for making some cuts in June. Conceivably this could be 200,000 barrels a day.'' He said the reduction might be related to planned oilfield maintenance.

Haus said, ''I've heard from (British and Japanese) producing partners (of the UAE) that they've been given firm instructions to cut back in June.''

She said, ''May was a transitional month. No one thought OPEC would reduce output by 1.4 million barrels in May.''

The analyst expressed skepticism that Kuwait would get down to its 1.5 million barrel quota. ''Kuwait has made and broken promises in the past. I don't think this time will be any exception.''

Kuwaiti crude production is difficult to track, Haus said, because much of it is delivered to refineries it owns in Europe. ''Only a small amount is sold directly to customers.''

There also was some skepticism that OPEC would be able to limit production sufficiently to bring about higher oil prices much before year's end.

''Our view is that you're going to have to see the onset of the heating oil season before crude-oil prices begin to move up,'' said Tom Burns, Chevron Corp.'s top economist.

#90151u1715 05/31/1990 ~United Press International

(MAY 31) UPI - Romania is reeling after a powerful earthquake yesterday and more than 80 after-shocks that rumbled across the region today. A powerful jolt registering five-point-nine on the Richter scale awakened Millions of Romanians today, damaging several buildings that survived yesterday's quake, which killed 12. The Soviet news agency Tass reports today that an after-shock rocked Moldavia, where three people reportedly were killed and 180 injured in the initial tremor.

The scandal-ridden and bankrupt P-T-L empire may soon be in new hands. A U-S Bankruptcy Court judge in Columbia, South Carolina, is considering a 52-Million-dollar bid by California evangelist Morris Cerullo. The preacher who was born Jewish and became a born-again Christian wants to buy all of P-T-L's assets... including hotels, T-V studios and a satellite network.

The Soviet news agency Tass reports that the Soviet Union launched a high-tech modular addition to the orbiting Mir space station from the Baikonur cosmodrome in central Asia. The Soviets have dubbed the module ''the micro-factory in orbit.'' It's carrying advanced equipment for producing crystals and performing other experiments in conditions of near-zero gravity.

#90151u1740 05/31/1990 ~United Press International

HOLLYWOOD (MAY 31) UPI - Jackie Mason hit the comeback trail hard in the premiere of his Broadway-bound show, excoriating New York Mayor David Dinkins and reviving a year-old controversy that tagged the comedian a racist.

''For two years on Broadway I said 'schwartzes' and I got a Tony award,'' Mason told a sell-out crowd at the Henry Fonda Theatre during the opening

moments of Wednesday night's premiere of ''Jackie Mason Brand New.''

''Then I say it during the (New York) campaign for mayor and everybody gets mad. It's not a pejorative term. Jews just call blacks 'schwartzes' and that's it,'' Mason said.

Mason was forced to resign as mayoral candidate Rudolph Giuliani's honorary campaign manager in 1989 after he referred to blacks in an interview as ''schwartzes,'' a Yiddish term blacks consider derogatory.

He had been on the campaign trail with Giuliani trying to round up Jewish votes. Dinkins won the election, becoming New York's first black mayor.

Soon after the incident, Mason's highly touted new television sitcom, ''Chicken Soup,'' was canceled by ABC due to low ratings. He has since been working on his new act and sharpening his comedic spears.

''Personally I happen to be crazy about Dinkins. He doesn't pay taxes, that's his business,'' Mason said in his trademark Brooklyn Yiddish accent. ''He (Dinkins) didn't pay taxes for four years and he became mayor. Just think, if he hadn't paid for 10 years he'd be president.''

Dinkins filed for tax extensions four years in a row in the early 1970s, finally paying all back taxes with penalties several years later.

The digs at New York's mayor were typical of Mason's brand of comedy, which earned his one-man Broadway show ''The World According to Me'' a Tony Award in 1988.

He spares no one, hitting especially hard at politicians.

''(Washington) Mayor Barry swore he'd get drugs off the street. He just never said he he wouldn't put them in his own house,'' Mason quipped.

''George Bush. So far he's only been firm on one thing: broccoli.''

''America, the only country in the world where you can burn the flag but you can't tear the tag off a mattress.''

''Dan Quayle. Nobody ever knows where he is. I finally found out. He's in the witness protection program.''

Mixing quirky, insane political humor with surreal imitations of people ranging from Walter Cronkite to Marla Maples, Mason has put together a show sure to be a hit on Broadway.

The opening night audience, which included Kirk and Michael Douglas and Steve Allen, gave the comedian a standing ovation.

Topical yet unpredictable, Mason's comedy is razor sharp. He leaps and rampages around the stage with incredible agility. Following a bizarre, jerky imitation of Frank Sinatra, he flowed smoothly into a monologue about trendy foods such as sushi.

''People say you have to develop a taste for these things. My sister-in-law, she's in the family. I have to develop a taste for her. Food either you like or you don't,'' he joked.

#90151u1769 05/31/1990 ~United Press International

BUCHAREST, ROMANIA (MAY 31) UPI - More than 100 aftershocks, one registering 5.9 on the Richter scale, rattled buildings and nerves in

three countries Thursday as the death toll climbed to 13 in the region's worst earthquake in 13 years.

More than 24 hours after Wednesday's deadly temblor, authorities in Romania, Bulgaria and the Soviet republic of Moldavia continued to survey damage and search for additional bodies.

The Soviet news agency Tass said about 1,000 dwellings, 82 schools and day-care centers and 36 medical establishments were damaged in Moldavia alone. Four people were killed and more than 600 others injured, including 30 who were hospitalized, it said.

Registering between 6.5 and 7.5 on the Richter scale, the quake was felt as far away as Leningrad and Istanbul. In Romania, it added to the turbulent atmosphere resulting from the bitterly fought election campaign earlier in the month.

A powerful aftershock at 3:18 a.m. Thursday shook millions of people from their sleep in Romania, Bulgaria and Soviet Moldavia, and damaged a number of buildings that survived the initial quake nearly 14 hours earlier, authorities said.

''The aftershock in the (early morning) of May 31 caused, besides panic, much material damage in Vrancea County,'' the quake's epicenter, the official Rompres news agency said.

It said the jolt, measuring 5.9 on the Richter scale, severely damaged the city hall, a theater, a medical clinic and a 60-unit apartment building in the city of Foscani, Vrancea County.

A quake of 6.0 on the Richter scale is capable of causing severe damage while a magnitude of 7.0 describes a major quake, capable of widespread, heavy damage.

There were no reports of additional casualties resulting from the aftershocks Thursday.

In all, more than 100 aftershocks have been registered since the initial quake at 1:40 p.m. Wednesday, the worst since a 1977 temblor killed about 1,500 people in the same region.

Eight of the dead were Romanians, including a Bucharest resident who was crushed by a falling chimney and another who died when a ceiling collapsed officials said. About 260 Romanians were reported injured.

The Bulgarian news agency BTA said a woman suffered a heart attack and died during the quake and 38 other people were injured in towns and villages near the Romanian bordder.

Hospital officials in Bucharest said at least 90 people were hurt in the Romanian capital alone. They said panic was to blame for many of the injuries, citing numerous cases of people jumping from windows and balconies.

One of the first to volunteer aid to Romanian victims was the Hungarian government, which dispatched a military attache to Bucharest to offer the assistance of the Hungarian army. Relations between the two government were strained earlier this year following clashes between ethnic Hungarians and Romanian nationalists in Romania's western province of Transylvania.

Romanian seismologists said the epicenter of the quake and aftershocks was near the Vrancea County town of Buzau, about 110 miles northeast of Bucharest.

Seismologists in the United States and Britain measured Wednesday's temblor at between 6.5 and 7.5 on the Richter scale.

#90151u1774 05/31/1990 ~United Press International

LOS ANGELES (MAY 31) UPI - The $5 million fund out of which Charles H. Keating Jr. pays his lawyers will be empty within two months and may force his principal law firm to withdraw from working on his defense, one of his attorneys said Thursday.

''We don't know what we're going to do when the money runs out,'' said Keating attorney James I. Ham, a partner at Quinn, Kully & Morrow of Los Angeles. ''There's no way that this firm can afford to defend these cases for free.''

The firm has done $500,000 in work on cases involving Keating for which it has not been reimbursed, Ham said.

The cases involve last year's failure of Lincoln Savings and Loan, of Irvine, Calif., and the bankruptcy of parent American Continental Corp. The cost to the government to bail out Lincoln is expected to top $2 billion.

Keating faces a $1.1 billion racketeering suit filed by the government and a suit from American Continental bondholders, who own as much as $250 million in now-worthless bonds. Ham estimated that the cases will cost more than $30 million to defend if they go to trial.

Lincoln and American Continental purchased liability policies from several insurers, Ham said, but there is substantial disagreement over how much

each insurer should pay.

So far, Reliance Insurance Co. has paid the $5 million for Keating's defense, but Keating's attorneys believe it should pay more. Reliance officials were not available for comment.

Keating was able two weeks ago to obtain an order from a federal judge to force National Union Fire Insurance Co. of Pittsburgh to pay, but the company is appealing the order.

Ham said his law firm and Keating were to file a lawsuit Thursday in Los Angeles Superior Court against another insurer, H.S. Weavers, alleging bad faith and breach of contract and seeking more than $500,000 in damages. The London-based insurance syndicate, Ham said, has not paid on the policy which covers the racketeering suit.

#90151u1786 05/31/1990 ~United Press International

PARIS (MAY 31) UPI - The United States and the European Economic Community failed to resolve a spat over agricultural subsidies Thursday, raising the possibility that multilateral trade talks may end in failure.

U.S. officials had hoped the annual ministerial meeting of the 24-member Organization for Economic Cooperation and Development would nudge forward the deadlocked Uruguay Round of trade negotiations scheduled to end in Geneva next December.

''We cannot take the risk of a failure of the Uruguay Round, which would put the entire multinational trading system in peril,'' British Secretary of State Francis Maude said after the OECD meeting.

U.S. Treasury Secretary Nicholas Brady, who led the American delegation to the talks, said it was better that the differences be ''openly and clearly expressed now'' rather than at the last minute.

A communique issued by the ministers reflected the disagreement by stating the positions of the two sides.

The United States wants its European trading partners to make specific commitments to reduce agricultural export and domestic support subsidies and to liberalize access to markets for agricultural products.

The major European countries are strongly against ending all subsidies on grounds that such a step would bankrupt millions of small farmers. They have proposed a system that would reduce overall subsidies but at the same time increase aid to some agricultural products.

Political analysts said the failure to break the agricultural deadlock in Paris means the July summit between the world's seven richest nations is the last opportunity to create the political climate that could lead to an agreement in Geneva later this year. Trade ministers have scheduled another round of talks in July.

The Uruguay Round of talks within the General Agreement on Tarriffs and Trade, or GATT, include agriculture and services for the first time.

U.S. Trade Representative Carla Hills told reporters in Paris that the European position was not acceptable to the United States or to most of the other 105 countries that are taking part in the GATT talks.

''Agriculture is the key to the success of the GATT negotiations,'' Hills added.

The 12-member European Economic Community spent almost $9 billion in 1988 to help cereal, beef and milk product exports.

The statement also issued a warning about the risk of a return to inflation and called on member countries to reduce budget deficits, increase savings, and promote stability in the foreign exchange markets.

GATT, headquartered in Geneva, was established in 1947 to help remove trade barriers. The current round of talks began in Uruguayan resort of Punta del Este in 1986, but the negotiations have been deadlocked for the past year.

The OECD statement said it expected three percent growth among its members this year compared with 3.6 percent in 1989 and said inflation would remain stable at 4.3 percent.

In a departure from past practice, however, the statement avoided specific policy recommendations to individual countries.

The trade issue largely overshadowed discussion of the rapidly evolving situation in Eastern Europe, with the communique saying only that OECD countries will extend all possible aid to help Eastern Europe's transformation to a market economy.

Yugoslavia formally presented its candidacy to join the organization, saying two-thirds of its trade is carried out with OECD members. Several East European countries, especially Hungary and Czechoslovakia, are also expected to present their candidacies for membership in the near future.

The EC countries argued that the OECD ministerial meeting was not the place to discuss the trade issue and charged that the United States was trying to bypass normal negotiating channels in order to gain an advantage.

The opinion was echoed by Japanese Foreign Affairs Minister Taro Nakayama, who said he was ''deeply worried'' by what he called growing protectionism in world trade, adding that the OECD was not the place to discuss GATT matters.

#90151u1792 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - While some parts of the nation have been suffering from years of drought, water appears too plentiful in at least six states, the U.S. Geological Survey reported Thursday.

Record high water levels were recorded in May in at least 14 streams in Iowa, Illinois, Oklahoma, Arkansas and Texas and eight reservoirs in Texas officials said.

''Flooding and high stream flows are expected in spring months, but widespread flooding like this is unusual,'' said Thomas Ross at the U.S. Geological Survey National Center in Reston, Va.

''This year, all-time high flows have been measured on at least 14 streams

since late April and there could be more if rainy weather continues,'' he said in a statement.

Flooding and record-high water levels have occurred primarily in the Red, Arkansas, Trinity and Brazos river basins in Oklahoma, Texas, and Arkansas and in the Wabash and Kaskaskia river basins in Illinois, officials said.

In addition, such conditions have occurred in the Perry Creek basin in Iowa and record-high reservoir levels have been measured in the Trinity, Brazos and Colorado river basins in Texas, they said.

At the same time, however, states such as California, North Dakota and Florida are experiencing continued drought conditions.

California is in its fourth year of drought, with the central coast and central Sierras experiencing the driest four-year period on record, Ross said.

Northern California and the southern Sierras are experiencing the second driest period on record after the drought of 1928 through 1937, Ross said.

Precipitation has been 27 percent to 63 percent below average since Oct. 1 1989, and reservoir levels range are between 13 percent and 67 percent below normal, forcing most urban areas to impose water-use restriction.

In addition, North Dakota's drought of 1988 is continuing, with most major reservoirs in that state being significantly lower than last year.

The Lake Sakakawea reservoir for example is nearly 71 percent below the average for the end of April and all tributaries to the Missouri River are about 25 percent below normal.

Drought continues to persist in southwest Florida, where rainfall has been below normal for more than two years, Ross said. Mandatory water-use restrictions are in effect in half of southwest Florida, where groundwater levels have dropped to all-time record lows.

#90151u1796 05/31/1990 ~United Press International

NEW YORK (MAY 31) UPI - Prices were narrowly mixed at the close of the New York Stock Exchange Thursday in moderate trading as the blue chips lost their slight gains late in the session.

The Dow Jones industrial average, which rose 8.07 Wednesday to a new record high of 2878.56, eased 1.89 to 2876.66, according to an unofficial tally.

Advances led declines 781-672 among the 1,999 issues crossing the NYSE tape at 4 p.m. EDT. Volume amounted to about 167,000,000 shares, compared with 199,540,000 traded Wednesday.

Prices were slightly higher in active trading of American Stock Exchange issues.

The market was slightly higher for most of the day after recovering from opening weakness tied to a drop in market leader International Business Machines Corp.

IBM was down sharply in overseas trading on rumors that next month Hitachi would unveil a mainframe computer faster than IBM's version.

Hitachi has scheduled a press conference for Wednesday, when it said it would provide ''details on significant additions and enhancements to its line of mainframe computers.''

IBM also opened lower in New York, ''but IBM's been a leader in the rally and when people saw that IBM didn't go down that much it was encouraging '' said Rodd Anderson, vice president of equity trading at Shearson Lehman Hutton Inc. The bellwether issue closed lower.

But Anderson said the upcoming unemployment figures for May are ''a question in a lot of people's minds.'' Prices turned mixed late in the day in anticipation of that data, set for release prior to the opening Friday.

Job growth is expected to have risen considerably in May, with non-farm payrolls up 253,000 and the jobless rate unchanged at 5.4 percent.

On the trading floor as of 3 p.m. EDT, Philip Morris was the most active issue, down slightly.

Global Marine followed, higher. Moore was third, up moderately.

IBM was also active, slightly lower.

Among the other blue chips, AT&T rose, Procter & Gamble extended its rally after Morgan Stanley was said to repeat its ''buy'' recommendation on the stock and Westinghouse was up sharply after announcing a buyback of up to 20 million shares, calling the current market price ''an attractive investment.''

Elsewhere, Disney's rally stretched into a second day. The stock surged $6 a share Wednesday after an analyst was said to have repeated his ''buy'' rating.

Imperial Oil Ltd. Class A led the Amex issues, off slightly.

#90151u1800 05/31/1990 ~United Press International

CAPE CANAVERAL, FL (MAY 31) UPI - A NASA Delta 2 rocket carrying an international $273 million X-ray telescope was primed Thursday for blastoff Friday to photograph high-energy radiation blasted away by the most violent objects in the universe.

The Air Force Delta 2 rocket was scheduled for liftoff from the Cape Canaveral Air Force Station at 5:35 p.m. EDT Friday. The only question mark Thursday was the weather, with forecasters calling for a 40 percent chance of thick clouds, rain and thunderstorms that could delay the launch.

The ''ROSAT'' satellite is a joint venture between West Germany, Britain and the United States, which supplied an $18 million instrument and the $63 million Delta 2 rocket. The West German contribution was $170 million while Britain chipped in $35 million for one of three instruments on board.

The total cost of the project through launch was $336 million, with the United States committed to spending $5 million a year on data analysis. While the price tag is high, scientists say the results will be worth it.

Once in orbit, the solar-powered observatory will map the sky in an unprecedented search for X-ray sources, focusing on more than 1,400 targets of interest. The mission represents the most ambitious X-ray astronomy effort ever mounted and scientists say the results should revolutionize knowledge of the universe.

''ROSAT's power is as an imaging telescope,'' said NASA program scientist Alan Bunner. ''It has the capability to produce beautiful images with unprecedented resolution. It will be ... the fodder scientists will use for years to come to identify targets for detailed study.''

The results will complement the visible light studies of the Hubble Space Telescope and the investigations that will be carried out when the shuttle Columbia blasts off carrying a $150 million set of four telescopes devoted to ultraviolet and X-ray astronomy.

The X-ray telescope aboard Columbia is actually a spectrograph, which measures the intensity of radiation. It does not take photographs like ROSAT.

''X-ray astronomy must be done in space because X-rays don't penetrate the atmosphere,'' Bunner said at an earlier briefing. ''This is a completely space-borne science, a relatively young science, and one that has added enormously to our understanding of the universe.''

Gamma rays, X-rays and ultraviolet radiation from deep space cannot penetrate Earth's atmosphere and until recently, knowledge about the universe was limited to studies in the visible light, infrared and radio regions of the electromagnetic spectrum.

ROSAT was scheduled to be fired into an orbit tilted 53 degrees to the equator at an altitude of 360 miles. With its solar panels pointed constantly at the sun, the satellite's telescope will be able to survey the entire sky every six months.

The first science data from the satellite is expected to be radioed back to Earth a few days after ROSAT reaches orbit and engineers activate and check out its systems.

Bunner said X-ray astronomy is important because it allows scientists to study ''processes that are going on in the universe that are occurring at very high energies and very high temperatures, temperatures on the order of 1 million to 100 million degrees.

''So we're talking about the sites for the release of enormous amounts of energy,'' he said.

X-ray emissions also can indirectly provide evidence for the existence of as-yet-undetected objects such as black holes, thought to be the collapsed remnants of massive stars with such intense gravity that not even light can escape.

While such objects are invisible by definition, dust and debris sucked into a black hole would be accelerated by the titanic gravity of the

collapsed star, causing extreme heating and the emission of X-rays that could be detected from Earth orbit.

#90151u1802 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - Soviet President Mikhail Gorbachev provided a deeply personal view of his country's halting march toward change Thursday and asked for understanding instead of pressure as he tries to ''figure out how to proceed.''

''I would like to invite you to cooperate. ... We have been using this word for decades, but now is the time to empower it with genuine meaning '' Gorbachev told a gathering of American entertainers, business leaders and academics invited to dine on caviar and other delicacies at the Soviet Embassy.

After touching on topics ranging from an economy struggling to shift to a free market approach to a backhanded reference to the sensitive trouble of the dissident Baltic republics, Gorbachev offered a champagne toast:

''Let us be together and understand each other.''

The Soviet president is being pressured at home from his political left for faster movement of his ''peristroika'' program of economic and political reforms and on the right to move more carefully.

''We'll figure out how to proceed in our country. We haven't yet done that but the main thing has been done. Having understood our country, our history, we have come to the conclusion that we cannot proceed as we have been doing all along,'' he said.

Now, the sometimes animated president declared, the search for answers is on.

But he also cautioned that the Soviet Union cannot simply make a radical shift toward the Western economic model. Speaking through an interpreter to guests ranging from actors Gregory Peck and Jane Fonda to former Secretary of State Henry Kissinger and pianist Van Cliburn, Gorbachev said things are not the same in the Soviet Union as in the West.

''It will be done our way. Otherwise, if we mechanically adopt somebody else's model, this will not work,'' he said. ''We know this quite well.''

To illustrate his point, Gorbachev said that during his morning session with Bush an American participant - not Bush - ''told me ... you know with a market economy you cannot be half pregnant.''

Gorbachev said he replied, ''At the same time before a child is born you need nine months, and with a market economy it's the same.''

''We'll move toward market with the greatest difficulty. ... For the Americans it's all simple, the talk about the market, the credit, the stock markets. All the instruments and all the infrastructure for the markets.

''We have absolutely nothing, nothing for the markets. We have to establish the infrastructure,'' he said.

Gorbachev said he told Bush that while some say the United States should pressure Moscow ''because it's enfeebled now,'' the instability is not a sign of weakness but of the ''fundamental nature'' of the changes being wrought by perestroika.

''We are changing our political system. We are working to develop a new economic system,'' he said.

''The only thing to decide is ... how rapid our progress should be, and what would be its modalities,'' he said.

Gorbachev said the Soviet Union is ''experiencing a crucial period of time. Like never before, we want to be understood right now. We would not like to see panic in our country because of very deep and profound changes.''

Making remarks that he described as a briefing ''on what is going on in the Soviet Union, Gorbachev occasionally addressed guests such economist John Kenneth Galbraith and science fiction writer Isaac Asimov by name.

Change in the Soviet Union, said Gorbachev, cannot come quickly.

''Let's not hurry, because such changes do not happen overnight. Because only in Lithuania, they can overnight decide a question about seceding from the Soviet Union, and after that they are at a loss what to do, and we are at a loss what to do. That is one way of proceeding. That is one approach. But there is another one which is more right, it is more humane '' he said.

(Note: The following is a dispatch from the Soviet news agency Tass that was distributed within the Soviet Union and published in Izvestia and other newspapers. The translated version, which received no additional editing, is being run on the wires of United Press International by agreement with Tass to present a Soviet account of the summit between Presidents Mikhail Gorbachev and George Bush. - UPI/Washington.)

IT IS TIME TO TAKE A FURTHER STEP

WASHINGTON (MAY 31) TASS - The capital of the United States of America has welcomed the Soviet President Mikhail Gorbachev who arrived here on Wednesday, in the second half of the day, on a state visit.

This hospitality is reflected in rich color symbolism - abundance in flags. They adorn not only the White House and its environs but the facades of other buildings involved in the program of the state visit, hotels accommodating a journalist army of 5,000 who who came from 60 countries to cover the Soviet-American summit.

For several days on end, all U.S. news agencies and television companies have invariably opened their broadcasts with the heading ''summit.'' This voluminous English word, identical to the Russian word-combination ''a meeting at the top,'' means for Americans expectation, an expectation of better times, a hope for a good tomorrow.

According to Washington papers, 73 percent of Americans during a public opinion poll said ''yes'' to the policies of the Soviet leader.

Among the participants in these polls there were certainly people who would not be against hampering the successful course of the dialogue, against advising that the U.S. president make use of internal difficulties in the Soviet Union and the developmemnts in Eastern Europe to dictate his conditions to the USSR during the talks.

But most Americans are impressed by George Bush's stand on major issues included in the agenda of the summit. They believe that by joint effort, a good start has been made for the dialogue, which started between the USSR and the USA in Geneva five years before, which means that a further step should be taken.

At Andrews Air Base at 7 p.m. Washington time, the ''IL-62 M'' airliner

lands on a concrete strip and taxies up to a light pavilion, adorned with state flags of the USSR and the USA. At the bottom of the stairway, Mikhail Gorbachev and his wife are met by the U.S. Secretary of State James Baker and his wife, by the U.S. Ambassador to the USSR Jack Matlock, by the ambassador of the USSR to the USA Alexander Bessmertnykh and other officials. The U.S sscretary of state and the president come up to the microphones.

Addressing the guest, James Baker said:

Mr. president, Mrs. Gorbachev,

On behalf of President and Mrs. Bush and the American people I am glad to greet you in Washington. Mr. President, the whole world is looking at you and President Bush. Together we are bearing the responsibility for putting an end not only to Cold War but to the conflicts preceeding it.

To bring about this objective we must see a united Germany and a reconciled Europe. We must lessen the threat of war by maintaining control over nuclear, chemical and conventional arms, as well as through solving regional conflicts. We also want to see a further advance on the road to democracy and glasnost in the Soviet Union.

#90151u1897 05/31/1990 ~United Press International

(MAY 31) UPI - President Bush and Soviet President Gorbachev have concluded their first round of meetings at the White House. Gorbachev left the White House for lunch at the Soviet Embassy.

As the first meeting of the four-day summit began, Bush and Gorbachev agreed NOT to take questions from reporters as the pair moved from the South Lawn of the White House to the Oval Office. Reporters and camera crews squeezed inside the Oval Office for a closer look, as the leaders took their places.

While Bush and Gorbachev were in the Oval Office, Soviet Foreign Minister Eduard Shevardnadze and Secretary of State Baker held separate talks.

Boris Yeltsin, the political maverick elected two days ago as president of the Russian republic, received a tongue-lashing today. Conservative deputies harshly criticized Yeltsin for his aggressive stands. One lawmaker lectured him NOT to begin by ''confronting the central government.'' Yeltsin also was taken to task for publicly airing his differences with Soviet President Gorbachev.

The Agriculture Department is quarantining an 81-square-mile section of Dade County, Florida, after discovering 19 Mediterranean fruit flies in the Miami area. The quarantine prohibits interstate shipments of fruits and vegetables from the restricted area, unless they are certified by an inspector. The Mediterranean fruit fly is one of the world's most destructive insect pests.

Prominent Palestinians in the midst of a nearly two-week hunger strike in Israel say Arabs are reaching the ''limit of endurance.'' The more than 35 Palestinians are going without food to press demands for U-N observers in the occupied territories. One of the strikers, an Oxford-educated university lecturer, describes current Israeli-Palestinian relations as ''combustible.''

#90151u1901 05/31/1990 ~United Press International

DETROIT (MAY 31) UPI - The future of Chrysler Corp., which has solid leadership and is poised to emerge ''roaring'' from the present slump in the American automobile market, was never a factor in his decision to leave the company, Gerald Greenwald said Thursday.

Greenwald, 54, who had been the heir-apparent to Chrysler Chairman Lee Iacocca, told reporters his leaving as vice chairman does not portend more trouble for the No. 3 automaker and should not diminish confidence in the company.

He will lead employee efforts to buy United Airlines and would become the carrier's chief executive officer if a deal is completed.

''I am as convinced as I ever have been that Chrysler is today a strong company and, going through a period where no one is making money in North

America, is positioning itself to go through this period and come out roaring,'' he said.

Chrysler stock, he said, is paying a dividend yield of around 7 percent ''which begins to look like a bond.''

Greenwald said he puts little faith in the projections of ''trend-liners'' for a diminished American auto industry with fewer players. The same people, he said, predicted doom in 1974.

Chrysler's pool of leaders in their 40s and 50s, he said, is one of the biggest strengths of the company, which went to the brink of bankruptcy in 1979.

''My biggest regret is leaving this management team that I helped to build '' he said. ''In a lot of ways most management teams haven't, we've been through a lot of wars together.''

While he sees further closings of older auto plants, Greenwald said he believes the North American industry will thrive to the extent of expanding exports, even to Asia.

The current overcapacity problem may be resolved in the way Europe overcame it in the 1980s, Greenwald said.

''The only recent experience you can look at is Europe,'' he said. ''In the mid-80s, virtually no European company was making money. ... They had 30 percent overcapacity. What cured that? They did it the easy way - increased the market by 30 percent. Now everybody is making terrific money in the European markets.''

Greenwald said he was first approached about taking on the top UAL Corp. post about six weeks ago but told the United employee unions, ''I'm flattered but I'm happy where I am.''

But he said the offer kept getting better ''in terms of corporate governance,'' including a promise that a board of independent directors would be appointed if the unions succeed in acquiring United.

''I saw it as a matter related to financing, an important link to financing,'' he said.

Asked what he would do if he failed to line up the $4.4 billion financing needed for a buyout to move forward, Greenwald quoted former United Auto Workers Union President Douglas Fraser as saying, ''I'll jump off that bridge when I get to it.''

Greenwald said that he never wanted to influence Iacocca's own timetable

for retirement and that uncertainty over when he might become Chrysler's CEO was never a factor in his leaving.

''Lee is 65. I'm 54,'' he said. ''At some time in the future I am convinced that it was going to happen.''

#90151u1911 05/31/1990 ~United Press International

(MAY 31) UPI - Heavy rains threatened to bring more flooding to Texas today, as thunderstorms soaked Arkansas and Louisiana. Federal officials raised to 52 the number of Texas counties eligible for disaster aide for flood-ravaged citizens. Rain left some Dallas roads and bridges under water early today, and several tornadoes caused minor damage in northeast Texas last night. Scattered showers and thunderstorms also were reported in parts of Louisiana and Arkansas.

An art museum in Sarasota, Florida, will soon bear more than just the names of John Ringling and his wife, Mable. The museum grounds apparently will be serving as a burial ground for members of the famous circus family. A state appeals court today approved a lower court ruling allowing the burials. A family dispute was holding up the transfer of bodies.

The Food and Drug Administration has approved a plan to give greater options to AIDS patients. The plan calls for the promising drug D-D-C to be distributed free to people with AIDS or AIDS-related complex who canNOT take two other drugs... A-Z-T and D-D-I... that are available to attack the AIDS virus. Officials estimate that as many as one-thousand AIDS patients may qualify for the expanded distribution program for the new drug.

#90151u1915 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - Amy Dimak, 13, of Seattle knew that a fabric of spun rayon is spelled ''fibranne,'' earning her Thursday the title of best speller in the 63rd National Spelling Bee.

The annual contest came down to a face-off between Amy and Eric Enders, 13 of El Paso, Texas, who incorrectly spelled the word ''douanier,'' which is French for ''customs officer.''

Amy beat out 225 other contestants in the two-day spelling bee.

Complex names for a hut and a magician stumped a few young spellers Thursday, but 65 of 155 contestants managed to prevail in the opening round of the finals.

The road to the title of best speller has been arduous, with a record 226 youngsters age 9 to 14 beginning the competition Wednesday and 155 earning the right to continue to the more difficult final rounds Thursday.

Five of the first 10 finalists could not spell such words as ''goondie'' or ''theurgist.''

Angela Greaves, 14, Lafayette, La., was stumped by ''goondie,'' which is a name for an aboriginal hut. She spelled it as ''ghundi.'' Matthew Snider, 14, Hicksville, Ohio, was tripped up by ''theurgist'' (a magician), which he spelled as ''thyergist.''

The preliminary rounds used words culled from practice lists, but the finals were more challenging for the youngsters because the words were picked at random from a dictionary.

''It's much harder,'' said Kelly Postlethwait, 11, Jane Lew, W.Va. ''It's also a long, boring wait while other kids are spelling.'' She earned the right to proceed in the finals by correctly spelling ''emolument,'' meaning payment received from work.

But Max Chen-Yee Soong, 12, of Andover, Mass., who blew the spelling of ''minacious,'' meaning threatening - he spelled it ''menacious'' - thought some of the finalists got words that were too easy.

''Come on - 'rendezvous'? he said with a voice hinting of envy. ''It made me very mad. That's too easy for this round.''

Other words that threw contestants included ''pergameneous'' (resembling parchment), spelled as ''pergimenious''; ''salaam'' (salutation), spelled as ''salam''; ''sayonara'' (Japanese for goodbye), spelled as ''scianara''; ''zwinger'' (a fortress), spelled as ''svinger''; and ''serotinal'' (late summer), spelled as ''cerotinal.''

The winner receives $5,000. The second-place finisher wins $4,000, third-place gets $2,500 and fourth-place takes home $1,000.

The participants come from 47 states, the District of Columbia, Guam, Mexico, Puerto Rico, the Virgin Islands and overseas Department of Defense schools.

Success in the bee depends, in part, on how much time youngsters study words, their background in Latin or other foreign languages or just plain luck or innate ability.

For instance, Greaves said her daily drill in the last several weeks involved one hour of quizzing by her mother or sister. J. Herschel Jeffrey 12, of Chesapeake, Ohio, said he studied words one hour every two days.

For contestants who apparently have never heard of a word they must spell, they seem to try any angle available to master the spelling by asking for the word's root, definition, use in a sentence and another, but more precise, pronunciation.

Words that tripped up contestants in Wednesday's preliminary rounds included cerography (art of wax figures), spelled as ceraugraphy; guignolet (French liqueur), spelled as guignelet; piloncillo (unrefined sugar), spelled as pieloncio; and ichthyism (poisoning by fish) spelled as icthyism.

The contestants have handled the competition with grace and maturity, especially in defeat. In years past, occasionally nerves have caused vomiting, crying spells and exclamations of disappointment.

NEW YORK (MAY 31) UPI - Assets of the nation's 502 money market mutual funds increased $128.3 million to $381.54 billion for the week ended Wednesday, the Washington-based Investment Company Institute reported Thursday.

The institute said broker-dealer fund assets increased $481.4 million to $159.62 billion, assets of general purpose funds decreased $231.2 million to $129.25 billion and institutional fund assets decreased $121.9 million to $92.68 billion.

The Investment Company Institute, a national association of the American investment company industry, reports the assets of money market funds to the Federal Reserve Board each week.

The Donoghue Organization, of Holliston, Mass., said Wednesday average seven-day simple yields were unchanged at 7.68 percent, and 30-day simple yields also were unchanged at 7.68 percent. The average maturity of fund portfolios was 43 days, down from 44 days.

The Bank Rate Monitor, of North Palm Beach, Fla., gave average rates as follows: money market deposit accounts, 6.03 percent, down from 6.04; Super-Now accounts, 4.99 percent, unchanged; six-month certificates of deposit, 7.75 percent, unchanged; one-year CDs, 7.90 percent, down from 7.91; 2 1/2-year CDs, 7.91 percent, down from 7.92; and five-year CDs, 7.98 percent, up from 7.94.

The average rate for a one-year, adjustable-rate mortgage was 8.54 percent down from 8.57.

The average rate on a 15-year, fixed-rate mortgage fell in the latest week to 9.95 percent from 10.01, while the average rate for a 30-year, fixed-rate mortgage was 10.13, down from 10.22 percent.

The average rate for a four-year automobile loan was unchanged at 12.29 percent.

WASHINGTON (MAY 31) UPI - The fate of a landmark trade agreement between the United States and Soviet Union remained clouded Thursday as President Bush and Soviet leader Mikhail Gorbachev began a four-day superpower summit.

The pact, which has been completed, would give the Soviet Union the lowest available tariffs in the United States, making Soviet goods more attractive to U.S. consumers.

It also would lead to the removal of long-standing restrictions making Soviets eligible for U.S. credit and guarantee programs provided by the Export-Import Bank and the Overseas Private Investment Corp.

In return, the U.S. won concessions on taxes and investments to aid U.S. businesses trading with the Soviets, software copyright protection and a promise by the Soviets to begin repaying $674 million in debt from the lend-lease program of World War II.

The agreement would help Gorbachev boost the sagging Soviet economy and is viewed by trade experts as being more important to the Soviets that to their U.S. counterparts.

The agreement's fate has been clouded by the Soviet Union's economic sanctions to thwart Lithuania's bid for independence and the Soviet Union's failure to pass a law easing emigration restrictions.

The 1974 Trade Act requires a number of conditions be met before a country is granted most-favored-nation trading status. Among the requirements is the Jackson-Vanick amendment that demands nations allow the free emigration of citizens.

White House spokesman Marlin Fitzwater told reporters the pact was discussed during a morning meeting between Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze.

''At this point it is still impossible to predict the outcome,'' Fitzwater said.

Soviet Foreign Ministry spokesman Gennady Gerasimov said the agreement is ''there ready for signing.'' He, too, could not say whether the Soviets will leave Washington without signing the pact.

''I'm not sure it will be signed because there is a linkage here with the American side not wanting to sign it,'' Gerasimov said.

There is plenty of room for improvement in U.S.-Soviet trade. Last year, trade between the two countries totaled about $5.6 billion, up from $3.5 billion the year before, but still a mere fraction of U.S. trade with

other nations.

A U.S. trade official said the two leaders are likely to discuss the pact during their meetings Friday.

But Georgi Arbatov, a Gorbachev adviser, said on the NBC ''Today'' program that the U.S. position ''looks not very logical here, full of double standards.''

Trade experts have echoed a similar sentiment in light of the recent renewing of China's status as a most favored trading partner.

''I think it is not good if we have ended the Cold War, we should end also the economic part of this Cold War or economic warfare,'' Arbatov said. ''All the real obstacles have been removed. Americans are free to act. Maybe this is just a concession to the right wingers, I don't know.''

John Sununu, White House chief of staff, said on the same program that he does not think the favorable trading status will be granted to the Soviet Union without Soviet passage of the emgration law and an easing of sanctions against Lithuania.

''The Soviets know they have to pass an emigration law for us to move in that direction,'' he said.

Arbatov said the Soviets will not consider the summit a failure if they leave without inking the trade pact.

''We will live without it but I think it would be much better for you and us if there will be signatures,'' he said.

     #90151u1993 05/31/1990 ~United Press International
ATLANTA (MAY 31) UPI - Nearly 40 percent more measles cases have been reported so far this year than in 1989, when a total of 17,850 recorded cases represented a whopping 423 percent jump over the year before, health officials said Thursday.

The national Centers for Disease Control said that in the first 20 weeks of 1990 a preliminary total of 7,653 measles cases were reported - a 39.6 percent increase over the 5,484 cases listed for the same period in 1989.

Although the 1990 total is high, the CDC said it is likely an underestimate.

''Reports from high-incidence areas, such as Dallas and Los Angeles, indicate that two to three times more cases have occurred than have been officially reported through local and state health departments to CDC,'' the report said.

Cases were reported from 49 states and the District of Columbia, the CDC said in releasing its latest statistics on the resurgence of a childhood disease that once was close to being eradicated in this country.

The preliminary total of 17,850 measles cases for last year compared with just 3,411 for 1988 and was the highest for any year since 1978. The overall incidence rate in 1989 was 7.3 cases per 100,000 population - more than five times the rate of 1.4 per 100,000 for 1988.

Along with the big jump in cases, the CDC reported more measles-related deaths - 41 in 1989, the largest number of fatalities from measles in 19 years. So far this year there have been 35 suspected measles-associated deaths, most of them in unvaccinated preschool children, the CDC said.

''At least 88 measles outbreaks are known to be occurring in 25 states,'' the CDC reported. ''These outbreaks involve preschool-aged children, school-aged children, college students and other groups, such as migrant farm workers and Amish populations.''

The largest epidemic is occurring in Dallas, where an estimated 2,900 confirmed and suspected cases have been reported, primarily among unvaccinated preschool children.

''Outbreaks among preschool-aged children are also continuing in Chicago, Los Angeles and Milwaukee,'' the CDC said.

Health officials attribute the measles outbreaks to the large number of unvaccinated preschool children in inner city areas and in some cases to vaccine failure.

The CDC, departing from its longstanding recommendation of one measles vaccination, now recommends a second dose of vaccine for people at high risk of measles, including new entrants to schools and colleges.

#90151u2020 05/31/1990 ~United Press International
WASHINGTON (MAY 31) UPI - President Bush and Mikhail Gorbachev will sign an agreement on the broad principles of a strategic arms pact, but spokesmen said Thursday a last minute push by negotiators was not enough to seal a deal.

There will be other arms control agreements signed Friday by President Bush and President Gorbachev, including a partial ban on chemical weapons, and new rules limiting and verifying underground nuclear tests.

But White House spokesman Marlin Fitzwater said that the two leaders will not have a completed Strategic Arms Reduction Treaty to sign during this encounter, although they will issue a joint statement laying out the basic ingredients of a long-range nuclear arms pact.

Fitzwater said, ''There is a strong feeling that they will be able to have a statement on the major elements of START, and, of course, the follow-on discussions.''

Fitzwater said both sides anticipate signing a START treaty before the end of the year.

There will be other arms control agreements signed Friday by Bush and President Gorbachev, including a partial ban on chemical weapons, and new rules limiting and verifying underground nuclear tests.

At their Dec. 2-3 Malta summit both leaders expressed the hope that a START treaty would be ready for signing by the time of this meeting.

In February, after a ministerial level meeting, both sides expressed confidence that the strategic arms treaty could be ready at this summit.

But in April, U.S. officials noted a slowing down on the Soviet side, and even Soviet reversal of agreements which had already been nailed down.

Some U.S. officials attributed the slowdown to a resurgent conservative movement within the Soviet military establishment. Others said another reason was that Gorbachev was distracted by his economic and political difficulties and was unable to devote the required time and energy to giving the negotiations a policy push.

Soviet Foreign Minister Eduard Shevardnadaze suggested a different reason in April, saying that the newly assertive Supreme Soviet would scrutinize a treaty very closely, just as the U.S. Congres does, and therefore Soviet negotiators had to come up with a treaty text that could be defended in the parliamentary debate.

Fitzwater also said that the two leaders will not have any major agreement on reducing conventional forces in Europe, despite progress made on that in earlier ministerial level talks in Washington and Moscow.

A conventional forces reduction in Europe is directly linked to an agreement between East and West on the future military status of a united Germany. Fitzwater said he did not expect there to be a conclusion at this

summit on the debate about whether a united Germany should be a military member of NATO.

The United States considers Germany's continued membership in NATO to be a non-negotiable necessity. Gorbachev is adamantly opposed to that.

The two sides are expected to have separate statements on the conventional forces reductions.

While the two leaders met in the Oval Office, Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze met in a different room, going over the agreements to be signed Friday.

At the State Department, teams led by U.S. Undersecretary of State Reginald Bartholomew and Soviet deputy Foreign Minister Viktor Karpov met again Thursday, trying to nail down agreement on a START treaty.

But U.S. officials said that the details were too numerous to clear up in the time remaining. Both sides will express the hope in the statement Friday that a treaty can be signed later this year.

The two leaders, in their 2 hours and 15 minutes alone in the Oval Office did not dwell on specific arms control issues, according to the U.S. and Soviet spokesmen. Bush and Gorbachev had what was described as a ''broad, conceptual'' discussion about where East-West relations are now, and where they expect them to be in the future.

NEW YORK (MAY 31) UPI - The dollar rose dramatically against major currencies in New York trading Thursday, driven by anticipation of a positive employment report and political troubles for the West German mark.

In late New York trading, the dollar was changing hands at 1.6965 marks, up from 1.6830 late Wednesday. The dollar was quoted at 152.05 yen, up from 151.32 late the previous day.

Other dollar rates: 1.4285 Swiss francs, up from 1.4220; 5.7225 French francs, up from 5.6750; and 1,248 Italian lire, up from 1,238. The British pound eased to $1.6785 against $1.6950.

Analysts said the dollar was boosted in part by expectations a U.S. Labor Department report to be released Friday would show employment growth picked up considerably in May.

"It's been a pretty wild day," said Mark Morris of National Westminster Bank PLC. "We didn't expect to see the dollar go up as much as it did. Most of it has to do with the (employment) data."

Non-farm payrolls were expected to show an increase of 200,000 to 250,000 jobs. April's figures showed non-farm payrolls growing by 64,000.

"The numbers in April were really disappointing," Morris said. "We're hearing numbers better that that tomorrow, and that's the kind of news that bolsters the dollar up."

Bob Hatcher of Barclays Bank PLC in New York said the dollar benefited Thursday from problems Soviet leader Mikhail Gorbachev is facing at home and troubles a currency treaty may face in getting through West Germany's parliament.

Analysts said, however, that the dollar was unable to break the psychological level of 1.70 marks Thursday. "If (the employment) numbers are very good, I think we will break that level," Morris said. "Otherwise, we might see people taking some profits and see it dip a little bit."

After Friday's employment data, there will be little economic news to move the market next week, Hatcher noted.

"It really is political factors which seem to be the motivating factors right now," Hatcher said. "We're going to see whippy, volatile trading as people interpret political developments and statements day by day."

In Europe, the dollar closed higher against the major European currencies, strengthened by the superpower summit and helped by a weaker West German mark. Gold was down.

In London, the pound closed nearly two cents lower against the stronger U.S. unit at $1.6770 from $1.6940 Wednesday.

Dealers said the pound grew weaker with market disappointment over Chancellor of the Exchequer John Major's announcement that British inflation was still too high for the pound to fully enter the European Monetary System. Britain's entry to the system's exchange rate mechanism

is expected to bring down interest rates and reduce pressure on the pound.

The dollar rose both in Frankfurt, closing at 1.6945 deutsche marks against 1.6820 at Wednesday's close, and in Zurich, finishing at 1.4255 Swiss francs against 1.4125.

The dollar rose in Paris, Brussels and Milan from the previous day's close to 5.7040 French francs against 5.6380, 34.82 Belgian francs against 34.52 and 1,248.50 Italian lire against 1,229.80.

Analysts in London also said dealers were squaring their dollar positions ahead of Friday's U.S. unemployment figures.

Earlier in Tokyo, the dollar ended higher against the yen as currency dealers bought dollars ahead of the superpower summit and the release on the May U.S. employment report.

Expectation of possible progress on disarmament talks in the U.S.-Soviet summit meeting spurred purchases of the dollar, analysts said. The dollar closed at 151.75 yen, up from 150.75 Wednesday.

Republic National Bank in New York closed cash gold at $364.25 an ounce, unchanged from the previous day. The New York Commodity Exchange settled June spot contract gold at $364.30 an ounce, up from $364.10.

In Zurich, gold closed lower at $363.50 an ounce from $366.50 Wednesday. Gold also was down in London, to $363.75 an ounce from $366.50.

Republic closed cash silver at $5.095 an ounce, up from $5.055. Comex June spot silver ended at $5.074 an ounce, up from $5.047. Zurich silver dropped to $5.10 an ounce from $5.15. London silver also dropped, to $5.07 an ounce from $5.16.

(MAY 31) UPI - President Bush and Soviet President Gorbachev spent a little less than two hours talking in the Oval Office today in their first formal session of their second summit. Gorbachev then headed to the Soviet Embassy for lunch. Gorbachev will return to the White House for another meeting this afternoon.

During a welcoming ceremony on the South Lawn of the White House, the Kremlin leader said the world may be witnessing ''the advent of an irreversible period of peace.'' Gorbachev says he arrived in the United States with the impressions still fresh in his mind of Soviet celebrations of the 45th anniversary of the victory over Nazism.

A Minnesota man is being held on charges of threatening the life of Soviet President Gorbachev. Police say the suspect is being held in the Stearns County Jail and will be arraigned on the felony charge today or tomorrow. Gorbachev is scheduled to visit Minnesota on Sunday.

Former Phillipine first lady Imelda Marcos is hospitalized in New York after collapsing at her racketeering trial today. An attorney says the 60-year-old Marcos was ''choking from her own blood and bleeding from the mouth.'' Marcos, who has high blood pressure, has collapsed once before in court.

Officials at Cape Canaveral say engineers found a leak in a hydrogen line that may have caused yesterday's delay in launching the shuttle Columbia. But NASA says it's still too soon to say whether the leak can be fixed quickly. If so, sources say another launch try could come as early as next week.

NEW YORK (MAY 31) UPI - The Federal Reserve Board said Thursday that the

basic U.S. money supply, narrowly defined under the name of M1, rose $4.0 billion in the latest reporting week, while the broader aggregates M2 and M3 decreased.

M2 fell $300 million and M3 fell $1.0 billion.

M1, which is made up of cash, checking accounts and NOW accounts - money that is available for immediate spending - rose to a seasonally adjusted average of $807.1 billion in the week ended May 21 from a revised $803.1 billion the week before.

Over the latest 13 weeks, M1 averaged $805.8 billion, a 5.2 percent rate of increase from the previous 13 weeks, the Fed reported.

The broader measure of money, M2, averaged an estimated $3,266.1 billion in the latest week, down from a revised $3,266.4 billion. M2 includes M1, plus passbook savings, small time deposits, including money market deposit accounts, consumer money market mutual funds and certain other short-term assets.

M3, which includes M2 plus large time deposits, repurchase agreements longer than one day at banks and thrifts, and institutional money market funds, averaged $4,062.9 billion in the latest week, off from a revised $4,063.9 billion, the Fed said.

#90151u2098 05/31/1990 ~United Press International

NEW YORK (MAY 31) UPI - Stocks closed narrowly mixed in quiet trading Thursday after a late dip by the Dow industrials before the May employment report early Friday. Volume was moderate.

The Dow Jones industrial average, which rose 8.07 Wednesday to a new record high of 2878.56, eased 1.90 to close at 2876.66.

Among broader market gauges, the New York Stock Exchange composite index rose 0.19 to 196.94 and the Standard & Poor's 500-stock index rose 0.37 to close at 361.23, yet another record high. The price of an average share rose three cents.

Advances led declines 788-673 among the 2,007 issues crossing the NYSE tape. Big Board volume totaled 165,690,000 shares, compared with 199,540,000 shares traded Wednesday.

Prices opened lower, pressured by weakness in bellwether International Business Machines Corp. after rumors that Hitachi, at its press conference Wednesday, would unveil a mainframe computer faster than IBM's version. At the press conference Hitachi said it would provide "details on significant

additions and enhancements to its line of mainframe computers."

IBM was lower in overseas trading and opened lower on the Big Board. But when the stock held its ground investors were encouraged. Big Blue and the market recovered with stocks modestly higher most of the day and IBM little changed.

Big Blue ended lower but analysts were not too disturbed about its pullback after what has been quite a rally. "People who had bought IBM were taking some profits but if this market is for real they'll come in and buy it and move it back up," Tills said.

Late in the day the blue chips lost their slight gains and closed a bit lower as well. Analysts blamed the slight drop on profit taking before the job data and also on a general lack of interest.

"People were protecting the gains they're gotten but I think too the market just got tired at the end of the day and sold off because of a lack of interest," said Dale Tills, manager of institutional equity trading at Charles Schwab & Co. in San Francisco. "All in all it was just a quiet day."

Tills said the job report is expected to be fairly bullish. "If the rate is unchanged at 5.4 percent and 225,000 new jobs were created people will say that's okay and leave everything status quo. If the numbers are more bullish, they could send the market to 2900 quickly." Job growth is expected to have risen considerably in May, with non-farm payrolls up 253,000 and the jobless rate unchanged at 5.4 percent.

On the trading floor, Philip Morris was the most active issue, down 3/8 to 42 1/8. L.A. Gear followed, sinking 4 3/8 to 39 1/4. The stock has been under pressure in recent sessions. Global Marine was third, up 1/4 to 5 3/8. IBM was fourth, down 7/8 to 120.

Among the other blue chips, AT&T rose 3/8 to 43 1/8. Westinghouse rose 1 3/8 to 36 3/8 after announcing a buyback of up to 20 million shares, calling the current market price "an attractive investment." Eastman Kodak fell 7/8 to 40 1/4, General Motors lost 3/4 to 48 5/8 and USX fell 1/2 to 33 5/8.

Elsewhere, Tonka crumbled, losing three to 7 1/8 after saying late Wednesday it expects a significant loss for the second quarter on lower sales. It also reportedly said the loss could result in violations of some aspects of its bank loan agreement.

But Disney rallied 3 1/4 to 129, surging for the second straight day. The stock bolted $6 a share Wednesday after an analyst was said to have repeated his "buy" rating.

And UAL jumped 4 3/4 to 155 5/8 after news that Chrysler Vice Chairman Gerald Greenwald, the designated successor to Chairman Lee Iacocca, resigned to lead the employee effort to buy the parent of United Air Lines. He called United "very strong and healthy" and said he was confident of arranging the $4.4 billion financing needed for the buyout.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 199,769,640 shares, compared with 248,222,940 shares traded Wednesday.

Prices closed slightly higher in active trading on the American Stock Exchange. The Amex Market Value index rose 0.15 to close at 363.06. The price of an average share was unchanged. Advances led declines 299-271 among the 836 issues traded. Composite volume totaled 17,815,030 shares, up from 18,886,100 traded Wednesday. Imperial Oil Ltd. Class A led the Amex issues, off one to 48 3/4.

The National Association of Securities Dealers composite index rose 0.20 to close at 458.97.

(MAY 31) UPI - More than 80 after-shocks have rumbled through Romania since a deadly earthquake yesterday. The quake killed at least 12 people and injured hundreds in Romania, Bulgaria and the Soviet Union. One after-shock today hit five-point-nine on the Richter scale and severely damaged buildings in Romania.

The Commerce Department today reported factory orders down two-point-three percent for the month of April. Most of the drop is due to a four-point-three percent decline in orders for durable goods, which was caused by a large drop in transportation equipment orders. Inventories in April went up one-tenth of one percent.

The National Labor Relations Board today charged Greyhound with unfair labor practices. The N-L-R-B said Greyhound is refusing to bargain collectively and is blocking its employees from rights guaranteed under labor law. The board's attorney is seeking to require the company to take back its striking workers with back pay.

An American who hid a Soviet sailor who jumped ship in Oregon says the sailor has been given permission to stay in the United States for at least six months. The 28-year-old seaman fled his vessel last Friday in Astoria and will apply for U-S citizenship. He left his wife and three-year-old son in a Soviet port town.

The World Health Organization today called for steering children away from smoking as part of the third annual ''World No-Tobacco Day.'' The agency says it is NOT enough for kids to grow up with a choice between tobacco and health. The organization asks smokers to abstain from tobacco for one day as part of an effort aimed at kicking the habit for good.

NEW YORK (MAY 31) UPI - Toyota Motor Corp. and Chubu Electric Power Co. said Thursday they will jointly develop a battery-powered van capable of moving fast enough to serve as an escort car at races.

Foot races, that is.

The multi-purpose van, with a maximum speed of 53 miles per hour, will be available for rental to various events, such as marathons, the companies said.

Toyota and Chubu said they plan to produce three such vans to promote the use of electric vehicles due to growing environmental concern and a demand for efficient energy use.

Two of the vans will be used for evaluation at Toyota, the companies said.

Toyota has been commissioned by Chubu to develop and manufacture the van, while the power company will handle rentals, they said.

Production is scheduled to be completed at the end of the year. Delivery is expected at the end of January 1991, and rental to the general public should begin in mid-February of next year, the company said.

The van will run on a nickel-cadmium battery and will hold up to four passengers.

#90151u2286 05/31/1990 ~United Press International

NEW YORK (MAY 31) UPI - A federal judge Thursday quashed a subpoena for television reporter Diane Sawyer that would have required her to testify at Imelda Marcos's racketeering and conspiracy trial about a 1986 interview she had with the former Philippine first lady.

U.S. District Judge John Keenan announced his decision before Marcos's trial resumed Thursday and Marcos collapsed with an apparent stomach ailment, forcing an abrupt recess in the proceedings.

Keenan said he would consider reinstating the subpoena only if Marcos were to testify.

Lawyers for CBS News Tuesday tried to quash the subpoena by offering instead to have a news division employee appear in her place.

Marcos is being tried on charges that she and her late husband, former Philippine President Ferdinand Marcos, conspired to buy New York real estate, art and jewelry with $222 million stolen from their homeland.

Prosecutors wanted Sawyer to verify a CBS News broadcast interview she conducted with Marcos, a portion of which the government wants to introduce as evidence.

CBS lawyer Helen Gold offered to present a news division employee to testify to the accuracy and fairness of the Marcos interview.

In the segment, Mrs. Marcos denies that the signature ''Jane Ryan,'' retrieved from secret Swiss bank accounts allegedly owned by the Marcoses, is hers.

Sawyer now co-anchors the weekly ABC News program ''Prime Time Live.''

#90151u2305 05/31/1990 ~United Press International
NEW YORK (MAY 31) UPI - Another devastating ''epidemic'' has been identified in New York City since the invasion of crack - an increasing number of babies being born underweight, a study showed Thursday.

Paralleling the rise of the crack epidemic, the number of underweight babies born in the city began climbing in 1984, reversing a decline begun more than two decades ago, said a study published in the American Journal of Public Health.

The increase was most dramatic among black infants, but more underweight

births were also reported among whites, said Theodore Joyce, a research associate at the National Bureau of Economic Research and author of the study.

Low-weight births can mean learning disabilities and emotional problems for many babies, often with serious health problems after birth and later in life. Underweight babies, those under 5.5 pounds, are 40 times more likely to die in infancy.

The average monthly percentage of low-weight births among black infants in New York rose from 10.1 percent to 12.9 percent between 1984 and 1988. From 1968 through 1984, the rate had fallen from 13.9 percent to 10.1 percent.

Joyce speculated that cuts in federal funding to prenatal care programs, soaring rates of sexaully transmitted diseases, homelessness and especially drugs like crack were behind the trend.

''If crack is fueling this epidemic, then this is going to be a problem in other cities and they are going to have to deal with it as well,'' he said.

''Given the present rate of increase, the rate of low birthweight among (New York) blacks in 1990 will exceeed the rate that existed 22 years earlier,'' added Joyce, who is also an economist in the Health Care Administration Department at Baruch College.

In spite of the heightened health risks, the study did not find increased death rates among New York babies, probably thanks to the city's advanced neonatal care facilities, Joyce said.

The estimated cost of caring of New York's additional low-weight babies in their first year of life was more than $22 million in 1986, Joyce said, noting intensive care units for newborns are among the most expensive hospital services.

#90151u2306 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - President Bush paid glowing tribute to Soviet President Mikhail Gorbachev at a White House state dinner in his honor Thursday night, toasting the ''growing friendship'' between the two countries and ''the prospect of progress and lasting peace.''

In remarks readied for delivery to the mix of familiar Washington faces and celebrities invited to celebrate the close of the first day of official summit business, Bush also hailed the path Gorbachev has embarked on in the Soviet Union, adding he was delighted ''to share 'bread and salt''' with Gorbachev and his wife, Raisa.

Raising his glass to lead the traditional honor, Bush said, ''Mr. President, you deserve great credit for the course you've chosen - for the political and economic reforms you've introduced - and for creating within the Soviet Union a commitment to change.

''We want to see perestroika succeed - we want to see this transition now underway in the Soviet Union maintain its momentum,'' Bush said. ''Mr. President, it is said that your country is 'the land of possibilities.' You have demonstrated the truth of that statement, and we've seen this past yeaer that ours is a world of possibilities.''

The dinner, the final formal event of the first day of the superpower summit, was set in the State Dining Room, where round tables filled the room covered with red tablecloths and set with white napkins.

Crystal bowls on mirror plateaus were filled with seasonal white peonies and red roses.

Among those receiving the coveted invitations were former Secretary of State Henry Kissinger, evangelist Billy Graham, and Neil Bush of Denver, the president's son whose dealings on a savings and loan board have been under investigation.

Other guests were Academy Award-winner Jessica Tandy and her husband, actor Hume Cronyn, as well as Morgan Freeman, Tandy's co-star in ''Driving Miss Daisy.''

In addition, Vice President Dan Quayle and his wife, Marilyn, several members of the Cabinet and the Democratic and Republican congressional leaders were invited.

And noting that Friday also holds a full schedule - with the expected signing of a series of agreements ''that signify the progress our two nations have made in forging a new relationship'' - Bush concluded his evening remarks with the toast:

''To our guests, President and Mrs. Gorbachev; to the growing friendship between the American and Soviet people; and to the possibilities now open to us - to the prospect of progress, and lasting peace.''

Others on the guest list included Dwayne Andreas, head of the Archer-Daniels-Midland Co., whose international grain trading firm does considerable business with the Soviets and who will be one of Gorbachev's hosts when he makes a seven-hour visit to Minneapolis on Sunday.

Among the members of the media invited were NBC-TV anchorman Tom Brokaw, Time magazine columnist Hugh Sidey, Arthur Ochs Sulzberger, Sr., chairman

of The New York Times, Donald Graham, publisher of the Washington Post, and Andrea Mitchell of NBC News, who came as a guest of Alan Greenspan, chairman of the Federal Reserve Board.

Gorbachev shunned the black-tie edict to wear a business suit, which protocol experts say is acceptable for leaders of the socialist state.

The main course was filet of beef, preceded by Maine lobster with corn sticks. The salad had a lemon and olive oil dressing and desert was a lime concotion topped with iced raspberries. Three wines from the White House cellars had been selected to complement the menu.

A musical program in the East Room featuring opera singer Frederica von Stade followed the dinner.

The two couples exchanged gifts, with Bush presenting Gorbachev with a rarer 1804 five-volume first edition biography of George Washington by Chief Justice John Marshall. Gorbachev gave Bush an antique painting of Russian birch trees.

Mrs. Bush gave Mrs. Gorbachev a gold and rhinestone Judith Leiber handbag and recieved an enameled samovar.

#90151u2309 05/31/1990 ~United Press International

ANCHORAGE, AK (MAY 31) UPI - A railroad fuel spill entered a wildlife refuge as state environmental officials complained Thursday that the cleanup was going too slowly and that workers were picking up too little of the 120,000-gallon spill.

Although beaver dammed-ponds contained most of the fuel, sheens flowed on a stream into Minto Flats Wildlife Refuge and threatened a variety of wildlife, said Al Ott, regional habitat supervisor for the Alaska Department of Fish and Game.

''We wish they were pumping faster than they are,'' said Pete McGee, cleanup coordinator for the Alaska Department of Environmental Conservation. ''We want the railroad to get moving.''

McGee suggested that the railroad appeared more interested in moving trains over the reopened tracks than in quickly cleaning up the spill.

He charged that the railroad interrupted cleanup work for hours at a time to avoid disrupting train traffic, which was back to normal Thursday after the Monday derailment.

Hundreds of tourists, who travel by train between Denali National Park and

Fairbanks, were herded onto buses while the railroad was shut down.

Nineteen cars in a 68-car fuel train left the track 40 miles south of Fairbanks in a roadless, swampy area and still lay broken and strewn about.

Powerful suction trucks known as supersuckers came by flat car to pump unspilled fuel from cars and to pump spilled fuel from the wetlands.

McGee said only 10,000 gallons of the diesel and jet fuel had been recovered. He said substantially more should have been recovered in three days and thats becoming impatient with the railroad.

Ott said, ''We'd like to see a spill like this cleaned up immediately.''

State comments began to echo sentiment expressed after last year's 11 million-gallon Exxon Valdez spill, when the oil industry did little to contain the oil in the first three days until high winds blew it out of control. That cleanup now is in its second year.

But this time, instead of private industry, the spiller was the state-owned Alaska Railroad, a quasi-independent entity that is not required to file spill contingency plans with the state like oil tanker operators, terminals and refineries must do.

Railroad spokeswoman Vivian Hamilton defended the railroad's response to the spill and its efforts to reopen the line to passenger and freight traffic.

Most of the spilled fuel went into two beaver ponds on either side of the tracks. Beaver dams contained most of the fuel, and state officials who criticized the railroad response praised the handiwork of the beavers. McGee said one beaver was spotted with oil on its fur.

But some fuel seeped out and sheens traveled 8 miles up Goldstream Creek into the Minto Flats Wildlife Refuge, a 500,000-acre wetlands inhabited by beavers, muskrat, river otters, fish and millions of nesting waterfowl, Ott said.

''This is certainly an environmentally sensitive area,'' McGee said.

McGee urged the railroad to pump up floating fuel as quickly as possible and ordered the railroad to submit an environmental restoration plan Monday.

Hamilton cacluated the damage and initial cleanup cost at $500,000. She said 300 feet of mainline track were replaced. She said the railroad was investigating the cause of the derailment of the southbound train delivering jet and diesel fuel from a refinery near Fairbanks to Anchorage.

#90151u2328 05/31/1990 ~United Press International
BOSTON (MAY 31) UPI - A Christian Scientist accused of manslaughter in the death of his young son testified Thursday that spritual healing is the cornerstone of his faith, but acknowledged he had turned to modern dentistry for a root canal.

David Twitchell and his wife, Ginger, are on trial in Suffolk County Superior Court in Boston, accused of causing their 2 1/2-year-old son Robyn's death through neglect.

The defense contends that the couple acted in accordance with their beliefs as Christian Scientists when they sought to heal the toddler through prayer instead of summoning a doctor. The child died on April 8, 1986, of a bowel obstruction.

On the witness stand Thursday, David Twitchell said, ''The core of this (religion) for us is that Christ Jesus healed constantly'' through prayer.

Twitchell, 34, acknowledged that he underwent a root canal but said he had refused prescribed painkillers after the procedure.

Twitchell broke down and wept Wednesday as he recalled how his son died in his arms, but he was calmer Thursday as he described his personal background and recounted the events after the boy's death.

Twitchell said he and his wife did not at first realize that they had become the target of a criminal investigation, although they discussed how they cared for their children and their religious beliefs with investigators from the Suffolk County district attorney's office.

''They wanted or needed to have a meeting with us to talk about our son's passing,'' Twitchell testified.

''The only ... specific I can remember right now about it was that person did say that we could bring an attorney with us, but that it wasn't necessary. There was an informal meeting, just to review some questions about Robyn's passing, so they could understand our religious beliefs or the death of our child.''

Asked if he realized this was the start of a criminal investigation, Twitchell replied, ''Criminal as in something like this - no.''

(MAY 31) UPI - The super-power summit is under way... P-T-L may have a new owner... Imelda Marcos collapses at her trial... and a Nevada prisoner wants to die tomorrow. Those stories and more, next from U-P-I.

Differences over Germany and the Baltic states may remain at the end of the summit that began today in Washington.

But both President Bush and Soviet President Gorbachev say their main goal is to change super-power relations for the better.

The two leaders held a slightly less than two-hour talk in the Oval Office before Gorbachev headed to the Soviet Embassy for lunch.

Gorbachev says he used the initial meeting to stress the need for more U-S-Soviet partnerships. Gorbachev says he told Bush that they should exchange views of how they would like to see each other's country.

The Kremlin leader says he has recently met with many of his countrymen... and that Soviets ''understand the importance of Soviet-U-S relations.'' Gorbachev says he believes that Americans and Soviets want the tragedies of the 20th century- in his words- ''those horrible wars,'' to remain in the past.

Gorbachev and Bush are holding a second meeting at the White House this afternoon, the first day of four days of talks.

While Mikhail Gorbachev spoke to President Bush, his wife was doing some relating of her own... and she didn't need a translator.

A spokeswoman for Barbara Bush says the first lady and Raisa Gorbachev visited over tea and pastries and that Mrs. Gorbachev quickly made friends with the first dog, Millie. The spokeswoman quotes Mrs. Bush as saying that- quoting now- ''Mrs. Gorbachev and Millie bonded.''

#90151u2380 05/31/1990 ~United Press International

(MAY 31) UPI - Greyhound says it will prevail when the National Labor Relations Board holds a hearing to determine if it has been dealing fairly with its workers.

The N-L-R-B today accused the bus line of unfair labor practices, saying the company has NOT been bargaining with its workers in good faith.

The N-L-R-B has called a September 17th hearing in Milwaukee to consider ordering Greyhound to take back 93-hundred strikers.

The complaint describes the violence-marred 13-week-old walkout as ''an

unfair labor practices strike.''

The board regional director says the financially beleaguered company may wind up having to re-hire its workers and re-imburse them back pay.

If the complaint is upheld, it could cost Greyhound as much as 10-Million dollars a month in back pay between March 2nd and the date of settlement.

The most recent bargaining session came early this month. At that time, Greyhound called for a four-year wage freeze and proposed eliminating more than half of its union jobs. Union officials termed the offer an ''insult.''

A convicted killer told a judge today that he does NOT want anyone to interfere with his execution in Nevada tomorrow.

But the U-S district judge in Reno scheduled an afternoon hearing, in case the federal public defender's office seeks a stay of execution.

Thomas ''Scrappydoo'' Baal is scheduled to receive a lethal injection just after midnight at the Nevada State Prison in Carson City.

Two years ago, Baal killed a Las Vegas shuttle bus driver by stabbing her eight times after she had given him a 20-dollar hand-out.

Court documents show Baal told the woman that he was sentencing her to death. He stole her car and purse with 120 dollars.

At the time of the killing, he was on parole from Hawaii for burglary and auto theft. Baal said he was on a marijuana and crack cocaine spree.

He has attempted suicide several times.

WELLESLEY, MA (MAY 31) UPI - Wellesley College seniors, who protested the choice of Barbara Bush as their commencement speaker, said they will urge her to work harder for women's rights when the first lady and Soviet counterpart Raisa Gorbachev visit the campus Friday.

''We think she should begin to focus on women's issues more publicly,'' graduating senior Ruth Potee said Thursday.

Potee said students had written a letter to Mrs. Bush, which would be distributed Friday at Wellesley's 112th commencement exercises.

Both first ladies were scheduled to address students for about six minutes

each before taking a quick tour of Boston and returning to Washington for a weekend of Soviet-American summit activities.

The letter urges Mrs. Bush to be more ''vocal'' in support of women's issues, including day care and reproductive rights, Potee said.

A member of Mrs. Bush's staff said she had seen a copy of the letter. She said it honors Mrs. Bush as commencement speaker and asks her to take ''a vocal stand'' on specific issues, such as day care.

School officials expected about 5,000 people to attend the graduation ceremonies under a white tent set up among 19th-century stone towers and brick quadrangles on Wellesley's grassy, 500-acre campus west of Boston.

Potee said the letter was written by Susana Cardenas and Peggy Reid, two of the students who co-authored a petition against the selection of Mrs. Bush as commencement speaker.

The petition, signed by 150 of 600 graduating seniors, described the first lady as an ''inappropriate'' choice to speak at the prestigious, all-female college because she is known primarily for her husband's achievements, not her own accomplishments.

Mrs. Bush later dismissed the protest as ''much ado about nothing'' and invited Mrs. Gorbachev to join her at Wellesley and visit Boston for the first time during their husbands' summit.

Mrs. Bush dropped out of Smith College in Northampton after her freshman year to marry George Bush. At a convocation last year, Smith awarded her an honorary doctorate, praising her for her volunteer work and efforts to stamp out illiteracy.

Potee, who signed the protest petition, described the letter as ''very upbeat.''

''We are saying that we are excited she is here. But we are also saying that as a woman in her position, she has the opportunity that people like you and I might not have to make a strong statement about women,'' she said.

Potee said that graduating seniors would wear purple arm bands during the commencement exercises to show their support of the letter.

The letter was addressed only to Mrs. Bush because, ''we decided that the women of the Soviet Union should make their own requests to Raisa,'' Potee said.

#90151u2402 05/31/1990 ~United Press International
(MAY 31) UPI - NASA engineers today found a leak in a small hydrogen fuel line for the shuttle Columbia at Cape Canaveral, Florida.

However, after extensive tests... officials said the leak did NOT appear large enough to have caused the ship's launch delay early yesterday.

More tests are scheduled to search for other problems in Columbia's main propulsion system. Officials said they could NOT rule out the possibility that the shuttle will have to be hauled back to its hangar for extensive repairs.

If that happens, the 10-day astronomy flight would be delayed three weeks or more.

Columbia is to carry a 150-Million-dollar collection of four telescopes into orbit to study X-rays and ultra-violet emissions coming from certain areas of space.

An attorney for a Jewish-born evangelist who became a born-again Christian says his client is hoping to achieve what he says Jim Bakker ''failed to do.''

The statement came today before a federal bankruptcy judge in Columbia, South Carolina... who approved the sale of P-T-L's satellite network.

Evangelist Morris Cerullo is shelling out 52-Million dollars for the lucrative network, saying he plans to buy the rest of P-T-L's assets later.

A trustee for the bankrupt ministry had previously endorsed an offer from evangelist Oral Roberts for the network. But the trustee changed his mind when Cerullo offered to buy the entire package.

The ministry was tossed into bankruptcy three years ago by Jerry Falwell.

The Moral Majority founder said he'd take care of P-T-L while Jim Bakker tried to settle a scandal over a sexual encounter with Jessica Hahn.

Instead, Falwell took P-T-L into bankruptcy to keep Bakker from returning, then left the ministry himself in a dispute with the bankruptcy judge.

#90151u2419 05/31/1990 ~United Press International
LOS ANGELES (MAY 31) UPI - A judge, citing a technicality, dismissed a lawsuit by a consumer group against Shiley Inc. and its parent, Pfizer Inc., makers of a defective heart valve that has resulted in nearly 250

deaths, lawyers said Thursday.

But the legal battle will not be abandoned and Public Citizen ''definitely will appeal,'' said Brian Wolfman, an attorney for the group.

The suit had sought a court order forcing Shiley and Pfizer to warn people who have had the heart valves implanted of signs that the valves are failing and spell out steps that should be taken in response.

About 86,000 people worldwide - half of them in the United States - have been implanted with the Shiley ''convexo-concave'' heart value, which was voluntarily withdrawn from the market in 1986.

As of January, 389 of the valves have fractured, leading to 248 deaths, according to Shiley. Congressional investigators estimate the number of fractures are as high as 955.

Public Citizen's lawsuit accused that Shiley and Pfizer of violating California law by engaging in ''unfair, deceptive, and fraudulent'' business practices.

In court papers, the consumer group contended that the makers of the heart valve withheld crucial information over the past decade by downplaying the valve's potential defects and by failing to tell valve users what to do if their valves fracture.

''If people know what to do, they can reduce the potential of death or serious injury,'' Wolfman said.

The suit had also asked that the heart valve makers pay the medical bills of people who want to consult with their doctors once they are told how to look for potentially failing valves. In addition, it sought to have the defendants pay for psychological counseling for patients trying to cope with the stress associated with the defective valves.

Superior Court Judge Ronald M. Sohigian dismissed the suit after a hearing Wednesday, which focused on whether it was properly filed in state court, or whether the regulation of medical devices is a ''federal issue'' that should be governed by the U.S. Food, Drug and Cosmetic Act.

Sohigian ruled for Shiley solely on procedural grounds, finding that the Food and Drug Administration - not the court - has the responsibility for warning Americans about defective medical devices, Wolfman said.

In a statement issued Thursday, Dr. Roger M. Sachs, Shiley's vice president and medical director, said, ''Our patient awareness efforts are directed toward physicians, who are in the best position to communicate with patients. ... We believed from the outset the lawsuit was totally

without merit.''

But Wolfman emphasized that the judge did not weigh the merits of the consumer claim, and that many patients have not been alerted of the possible health risk.

''We'd like to see Pfizer do this voluntarily, but we won't give up,'' he said. ''The evidence is overwhelming that when people know the problem, they know what to do to reduce their chance of death or serious injury.''

#90151u2422 05/31/1990 ~United Press International

(MAY 31) UPI - Some contestants in the National Spelling Bee said the wait while others answered was boring. Others complained that some of the words were too easy.

But the words were enough to whittle the field from 155 youngsters to 65 in the opening round of the 63rd annual Spelling Bee finals in Washington, D-C.

One 12-year-old missed the spelling of ''minacious,'' which means threatening. But he was angry about some of the other words, saying ''rendezvous'' is too easy for this round.

One of the stumpers was ''ghundi,'' a name for an aboriginal hut. It's spelled G-H-U-N-D-I.

Another was ''theurgist,'' a magician, which is spelled T-H-E-U-R-G-I-S-T.

The preliminary rounds used words culled from practice lists, but the finals were more challenging because they were picked at random from a dictionary.

The winner receives five-thousand dollars.

#90151u2462 05/31/1990 ~United Press International

MANAGUA, NICARAGUA (MAY 31) UPI - Gunmen believed to be members of a group led by a former National Guard officer shot and killed a Sandinista leader at his home, and police Thursday arrested three suspects, government officials said.

The attack drew protests from the opposition Sandinista Front and threatened to increase tension over the disarmament of Contra rebels in Nicaragua.

Ricardo Osejo Zeledon, who was defeated in February elections for a seat in the National Assembly, was gunned down Wednesday morning at his home by three masked men, Interior Ministry spokeswoman Jenny Sandoval said.

Police arrested three suspects Thursday, including Francisco Torres Briones, a member of the National Guard under former dictator Anastasio Somoza, Sandoval said.

She said Torres Briones was recently released from prison under pardons given to political prisoners by former Sandinista President Daniel Ortega.

A second suspect was identified as Julio Rosales Torres, and no name was given for the third.

''Osejo Zeledon's wife identified the three men as local members of the UNO (National Opposition Union), but we have no information on that,'' Sandoval said.

The UNO is the 14-party coalition headed by President Violeta Chamorro, who won Feb. 25 elections against the Sandinistas.

The slaying brought immediate outcry from Sandinistas, whose 1979 revolution overthrew Somoza and ousted the repressive National Guard.

''This terrorist action could provoke an escalation of revenge,'' the Sandinista newspaper Barricada said.

The attack comes at a time of tense anticipation among the population as the U.S.-backed Contra rebels, many of whom are former National Guardsmen, are in the process of setting down their arms and returning to civilian life.

International observers have said any military action by the Sandinista army or its supporters could hamper the peace process and provoke a return to the 9-year-old civil war.

Osejo Zeledon, a longtime Sandinista militant, was a rancher in the provincial capital of Matagalpa, 80 miles north of Managua. He founded the National Union of Farmers and Cattle Ranchers in the region.

His wife told police that the three gunmen entered their home about 2 a.m. Wednesday and mowed down Osejo Zeledon with machine-gun fire.

Late Wednesday, a commission of United Nations and Organization of American States officials completed an investigation into allegations by Contra leaders that at least 14 Contra irregular troops were killed last week by a Sandinista squadron.

After an extensive investigation, the commission concluded that the attack never occurred, and Sandinista officials called Thursday for a similar probe into the death of Osejo Zeledon.

About 500 Contras set down their weapons Wednesday in the largest disarmament in a single day since the process began shortly after Chamorro took office April 25.

Contra leaders agreed earlier Wednesday to disarm at least 500 troops a day until all of the estimated 15,000 rebels are completely disbanded, although observers doubted it could be carried out by June 10, as earlier agreed.

#90151u2482 05/31/1990 ~United Press International

CAPE CANAVERAL, FL (MAY 31) UPI - A shuttle-class Air Force Titan 4 rocket carrying a secret military satellite is scheduled for a predawn launch next week, sources said Thursday, on the booster's second flight in a year.

The 174-foot, $218 million rocket is believed to be scheduled for a sky-lighting liftoff from launch complex 41 at the Cape Canaveral Air Force Station around 2:30 a.m. EDT next Friday to ferry its classified cargo into orbit.

The launch date has changed several times over the past few weeks, sources have said, but the Air Force will not discuss classified Titan 4 launches or provide any information about the payloads such rockets carry.

Second only to NASA's space shuttle in sheer power, the first Titan 4 rocket blasted off from pad 41 at 9:18 a.m. June 14, 1989, nine months behind schedule because of a series of technical snags. The flight next week will mark the rocket's second mission.

Aviation Week & Space Technology magazine reported that the first Titan 4 successfully placed a $180 million Defense Support Program - DSP - satellite into orbit, despite problems with the movement of a second-stage engine nozzle during the climb to space.

The identity of the payload atop the Titan 4 scheduled for liftoff next week is classified, although it may be another DSP satellite.

Built by Martin Marietta Space Launch Systems of Denver, the Titan 4 is made up of two 112-foot solid-fuel boosters and a two-stage liquid-fueled ''core'' vehicle.

It is the most powerful unmanned rocket in the Air Force inventory,

capable of placing satellites weighing up to 10,000 pounds into the high orbits favored by strategic reconnaissance satellites.

Even before the Jan. 28, 1986, Challenger disaster that grounded the shuttle program for 32 months, the Air Force ordered 10 Titan 4s from Martin Marietta.

After the shuttle accident, another 13 were ordered for a total contract value of $5.1 billion and an average cost per vehicle of $218 million. The Pentagon then pressed ahead with plans to buy another 20 Titan 4s with options for six more, resulting in a fleet of 49 rockets.

By 1995, up to nine Titan 4s will be launched a year from launch complex 41 at the Cape Canaveral Air Force Station adjacent to the Kennedy Space Center in Florida, or from Vandenberg Air Force Base, Calif., where payloads weighing up to 32,000 pounds can be launched into low-Earth polar orbits.

''The Titan 4 program is one of the cornerstones of our national security strategy to rebuild assured access to space,'' former Air Force Secretary Edward ''Pete'' Aldridge said before the first Titan 4 launch. ''This booster represents the new workhorse of space launchers for our nation.''

#90151u2500 05/31/1990 ~United Press International

FORT WORTH, TX (MAY 31) UPI - Shots fired from a passing car Thursday injured two children jogging in a physical education class at an elementary school playground, police said.

The car sped away, but three suspects were arrested 45 minutes later near the Sunrise Elementary School in southeastern Fort Worth, police spokesman Doug Clarke said.

A motive in the shooting had not been established, Clarke said.

A .22-caliber pistol and many shell casings were found inside the car with the three suspects, the police spokesman said. The suspects, identified only as two 16-year-olds and a 15-year-old, were taken to the police juvenile division at the Tarrant County Jail.

Police said the suspects drove up to the school about 10:30 a.m., and one pointed the pistol out of an open window and fored on students running laps in a physical education class.

Two fourth-graders, Elton Evans, 10, and Crystal Dillon, 9, were injured, Evans in the right leg and Dillon in the right buttock. Both were in good condition at Cook Children's Medical Center, spokeswoman Robin Worthington

said.

#90151u2517 05/31/1990 ~United Press International

WASHINGTON (JUNE 1) UPI - A sharp spurt in hog prices, which carried the average hog price to its second-highest level on record, was a key factor in the 2 percent rise in the farm price index in May, the government said Thursday.

The index is the government's measure of the prices paid to farmers for their crops and produce. The index stood at 154 in May, 5 points higher than in May 1989.

''Increases in the prices of hogs, corn, hay, broilers and lettuce were partially offset by lower prices for eggs, onions, milk and cattle,'' the Agriculture Department said in summarizing price developments in the past month.

The all-hog price was the second highest of record, exceeded only by the $62.10 per 100 pounds average achieved in August 1986, the agency said.

Hog prices averaged $60.50 per 100 pounds in May, up $6.70 from April and were $18.90 higher than one year earlier. Barrow and gilt prices were up $7 while sows were up $2.90 for the month.

Broiler chicken prices rose 2 cents a pound to average 32.9 cents in May but were 9.4 cents a pound lower than in May 1989.

Corn, at an average price of $2.66 a bushel, was up 15 cents from April and sorghum was up 21 cents to average $4.10 per 100 pounds. Hay prices were up $9.40 to average $101 per ton.

Milk prices, which reached record-high levels last fall and winter, were down 20 cents per hundredweight from April to average $13.20 in May. Nonetheless, milk prices were 90 cents higher than May 1989.

Egg prices averaged 51.2 cents a dozen, down 13 cents from April but only 2.9 cents less than the preceding May.

Beef cattle sold for an average of $70.30 per 100 pounds in May, down 30 cents from April.

The May index reading of 154 compared to 150 in March and 151 in April.

#90151u2540 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - Sights, sounds and silliness from the superpower summit:

FAN CLUB?: After the icy relations between Raisa Gorbachev and Nancy Reagan, one topic of speculation is how Barbara Bush will get along with the Soviet leader's wife. Based on early reports, Mrs. G is on her way to being a hit. Millie, the first family's English springer spaniel, met Mrs. Gorbachev during a tour of the White House family quarters and Mrs. Bush reported they ''bonded.'' Millie followed Mrs. Gorbachev around, sat on her feet during tea and ''quivered when Mrs. Gorbachev spoke to her.''

SMALL SCREEN: Mikhail Gorbachev has heard cheers and jeers around the world, including at home in Moscow, but it's unlikely he ever heard the chant that rose outside the Soviet Embassy Wednesday night. Growing restless as they waited for the Soviet leader's arrival, groups on opposite sides of the four-lane road listened to chants from small bands of Armenians and Lithuanians, then decided it was time to act. Mimicking a TV beer commercial, one group hollered, ''Tastes great!'' The other side yelled back, ''Less filling!''

BIG SCREEN: Jessica Tandy and Morgan Freeman, stars of the movie ''Driving Miss Daisy,'' were invited to the White House state dinner Thursday, which dovetails nicely with the list of films the Soviet Embassy reportedly asked to have delivered in time for Gorbachev's visit. In addition to ''Driving Miss Daisy,'' the titles on hand included ''Gremlins 2, The New Batch,'' Oliver Stone's ''Born on the Fourth of July,'' Woody Allen's ''Crimes and Misdemeanors,'' ''Steel Magnolias'' and ''Look Who's Talking.''

FIRST ACCORD: Within minutes of sitting down in the Oval Office, George Bush and Mikhail Gorbachev found common ground - they refused to answer questions from reporters. Bush explained his rule against fielding questions at picture-taking sessions. He told Gorbachev that he was free to do so, though. The Kremlin leader declined, telling scribes, ''I think this is our first agreement.''

BACK FROM THE USSR: A rag-tag group of rock 'n' roll musicians, straight from the U.S.S.R., played on Thursday - across the street from the White House in Lafayette Square. As Bush and Gorbachev began their talks, the group strummed guitars and belted out songs. Their message, as written on their black T-shirts: ''Rock not rockets.''

JUST SAY NO TO OAT BRAN: While Mikhail Gorbachev has gone a long way to dispell the baggy-brown-suit image of Kremlin leaders, his culinary tastes apparently still run to the traditional fare of the Russian aristocracy. At a luncheon at the 1909 Beaux Arts mansion on 16th Street that serves as the Soviet Embassy, the bill of fare included caviar, turkey, salmon and chicken. At the state dinner at the White House, President Bush revealed

his taste as well - roast beef, preceded by Maine lobster.

GROWTH INDUSTRY: The number of translators required for a superpower summit has grown expontentially since World War II, when the rule was one interpreter per side. This time, the State Department has 22 translators at work, most of them chattering away unseen and unheard by the general public. The Soviets have almost that many with the Gorbachev team, including some bilingual Soviet diplomats posted to Washington, who have been pressed into service.

MIKHAIL WHO?: The prospect of seeing Mikhail Gorbachev was not a priority for everyone. As people waited near 15th and K streets for the Soviet leader's motorcade to pass by Thursday afternoon following the second Bush-Gorbachev meeting, a woman was overheard telling her toddler, who was riding in a stroller: ''You're going to see Gorbachev whether you want to or not.''

TOUGH CROWD: At the Soviet Embassy Thursday night, a panhandler worked the crowd hoping to catch a glimpse of Gorbachev. Holding a paper cup, the man approached the onlookers and said, ''Excuse me. Got some change?'' He didn't get much money from the crowd of about 100.

-30- 4227

#90151u2542 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - Soviet leader Mikhail Gorbachev, saying ''I feel really at home,'' popped out of his armored limousine Thursday and pressed the flesh with a cheering rush-hour throng lining the street as he left the White House.

''It's on my camera! I've got a whole roll of him,'' gushed Charlena Grimes, a visitor from Pullman, Wash. ''How can you have chills when it's so hot? My knees are weak! I've got to call my father - he's 82 years old!''

Police in patrol cars leading the long motorcade to the Soviet Embassy jammed on their brakes and screeched in reverse when Gorbachev's jet black Zil limousine halted at the corner of 15th Street and Pennsylvania Avenues at the height of the evening rush hour.

Through his interpreter, Gorbachev said, ''Looking at the Americans, I feel really at home. I feel that your people and people everywhere want the good life.

''People want to be confident of their tomorrows. They want to protect what best they have ... they want dignity and the rest is not too important. Good luck.''

Helmeted officers on motorcycles, Secret Service agents and visibly stunned Soviet body guards struggled in vain to hold back the crowd at the major intersection across from the U.S. Treasury.

''It was a pretty dramatic moment,'' said Bill Johnson, a portfolio manager who works nearby. ''He turned the corner with the window down. It only took a few seconds for him to pop out of the limousine and he made a beeline to the corner.''

''He basically said he had a big mission, a big agenda, and a lot of things to get done,'' Johnson said. ''I was having a hard time standing upright. People were pushing from behind.''

There was no doubt Gorbachev was a long way from the Soviet Union, where a series of domestic problems are threatening his presidency, and a crowd of Muscovites might resemble a mob more than a pep rally.

''I guess he needs some adoration because he's not getting it in his own country,'' said Lynn Maher, a California resident in town as a coach for the national spelling bee.

Many people ran two blocks to get a glimpse of the Soviet leader, some leaping from their cars stopped nearby.

''He cleared the police away and was very friendly,'' said Lucy Mucherman, 33, a White House worker on her way to meet friends at a nearby tavern. ''He wanted to meet the Americans.''

''He didn't say anything in English,'' added Chris Goodwin, 22, of Bethesda, Md.

But it didn't matter.

The usually tired stream of workers, heading home after spending a brilliant spring day at the office, burst into appaluse and many cheered, ''Gorby! Gorby!'' and howled, ''Woooo!''

''I'm so shocked I can hardly talk!'' giggled H.A. Ryaciotaki-Boussalis, a professor of engineering from California State University at Los Angeles.

After shaking hands at one corner, the beaming Gorbachev, flanked by his entourage including the also-smiling Soviet Foreign Minister Eduard Shevardnadze, crossed 15th Street to press more flesh.

''He saw everybody waving and he couldn't resist,'' said Mark Braswell, a government lawyer who works nearby. ''He was just working the crowd like a politician.''

One person in the throng kept yelling about El Salvador and there was a shout of ''Free South Africa.'' But the Soviet leader paid no attention.

Gorbachev ''said the Soviet Union wanted to improve relations with the United States,'' reported Peter Ghavami of Washington, who said he shook Gorbachev's hand. ''I was mightily impressed.''

The foray into the crowd was not a first for the Soviet leader. During his December 1987 visit to Washington, he stopped his limousine on posh Connecticut Avenue and dived into a midday crowd of stunned pedestrians.

#90151u2576 05/31/1990 ~United Press International

OLYMPIA, WA (MAY 31) UPI - The state Supreme Court has been asked to force a pair of major pharmaceutical companies to face strict liability for providing tainted medicine that caused a 10-year-old hemophiliac to contract AIDS.

Julia Langley, an attorney for Jeremy Rogers of Seattle, said Thursday Miles Laboratories and Baxter Healthcare Corp. knew they were taking chances by paying people for plasma used in the coagulant medicine taken by the youth.

She argued that a more contaminant-free source of plasma could have been obtained from donated blood rather than the purchased blood.

''They knew it was a risk, they took the risk and now they've got to pay for it,'' Langley said of the pharmaceutical giants. The coagulant in question was produced between 1981 and 1985, when blood and plasma were not tested for AIDS.

The high court has already limited liability of non-profit blood banks that depend entirely on volunteers. However, the possibility of strict liability under state law for profit-making companies that pay for blood and plasma has not yet been dealt with directly by the court.

The case was referred to the state court by U.S. District Judge Carolyn Dimmick, who ruled last December that state law did not appear to impose strict liability on the pharmaceutical companies.

Dimmick then changed her opinion and remanded the case to the state court shortly after the decision on non-profit blood banks was handed down.

Langley said studies indicate between 60 and 95 percent of the hemophiliacs who used the plasma-based coagulant medicine before AIDS testing was available will eventually test positive for HIV, the virus that causes AIDS.

She said AIDS was found in only one-half of 1 percent of the blood donated during the same period.

The figures were disputed by Richard Berkman, attorney for Baxter Healthcare, who said research has shown that some 30 percent of those who used coagulant medicine before AIDS tests were available could come down with the deadly disease.

Berkman said before coagulant medicine was available, most hemophiliacs died before the age of 12.

Langley criticized the pharmaceutical companies for ''pooling'' plasma from several sources in the production of medicine. She said one AIDS-infected unit of plasma could contaminate an entire batch of medicine.

She also argued that using donated plasma, rather than plasma from paid sources, would have been better because there would have been no economic incentive involved.

Berkman and Geoffrey Smith, attorney for Miles Laboratories, said there was not enough donated plasma available to fill the needs of the nation's 3,000 hempohiliacs for coagulant medicine.

They also said that because of the limited market for the product, imposition of large verdicts based on strict liability could mean an end to production of the coagulant.

''Massive jury awards would make the product unaffordable, if not unavailable,'' Smith said.

Berkman told the court earlier the coagulant market in the United States is about $100 million a year.

#90151u2590 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - Pursuing ''common ground'' and ''an irreversible period of peace,'' George Bush and Mikhail Gorbachev moved toward a meeting of the minds on German unification Thursday in a dynamic start to a four-day superpower summit.

The first day of talks intended to mark the end of the Cold War produced a

glimmer of accommodation on Germany and continued friction over Lithuania as the two grappled with the complications of a transformed post-war order.

It was a day dominated by personal chemistry and closer ties, the tone set by Bush when at the outset of their talks he invited Gorbachev to join in ''an open and honest search for common ground'' on the differences between them.

''Over the next four days, we're not going to solve all of the world's problems,'' Bush said. ''We won't resolve all of the outstanding issues that divide us, but we can and will take significant steps toward a new relationship.''

Gorbachev, beleaguered by problems at home, displayed an undiminished knack for high-profile politics and public relations by beating Bush to the punch in commenting on their talks and leaping from his limousine to greet homebound office workers at rush hour.

On the substantive side, Bush and Gorbachev indicated in separate news conferences that their first four hours of talks had raised hopes of progress in overcoming Soviet objections to seeing a unified Germany remain in NATO.

Gorbachev said he and the American leader had agreed that Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze should meet to wrestle with the issue - effectively moving Germany off the leaders' summit agenda.

Because the ministers have been told to work further on the issue, ''I think that means that something has emerged that requires such discussion.''

''I believe and the president has agreed that this exchange of views now requires that our foreign ministers have a more in-depth discussion of these issues. ... We have instructed the ministers to have that discussion '' he said.

''I think it is not here where the German question will be resolved,'' the Soviet leader added as he stood on the White House driveway.

Speaking to reporters in the Rose Garden soon after Gorbachev's appearance Bush said the impetus had come from Gorbachev. He refused to offer any details, but said: ''I took some heart from that. I was encouraged by that.''

''Our position has been stated and restated and we'll see where we go,'' Bush said. ''But I think the important point is we could talk very frankly no rancor there, and let's hope some of the differences have been

narrowed.''

White House spokesman Marlin Fitzwater characterized the discussion of the German issue, rooted in painful Soviet memories of losses in two world wars, as passionate and said the two tossed the matter to Baker and Shevardnadze with uncertain prospects for a breakthrough.

Fitzwater said the discussion on Germany yielded ''new understandings'' that could produce a formula ''to meld'' U.S. and Soviet concerns, but not by the end of the summit.

''Positions were not changed basically, but they laid the ground for working together and this is very, very important,'' said Soviet government spokesman Arkady Maslennikov. ''It's a long, difficult road to agreement,'' he added.

In recent weeks, discussion of a security equation on Germany have included such variables as future troop levels, timetables, NATO strategy and the role of the 35-nation Conference on Security and Cooperation in Europe.

Totally non-negotiable to the U.S. side, with backing from West German Chancellor Helmut Kohl, has been the ultimate goal of seeing Germany remain a full military member of NATO.

There was a persistent conciliatory tone throughout the day, starting when Bush welcomed Gorbachev at the White House.

Since their storm-tossed talks in Malta in December, Bush told Gorbachev the two sides have ''made encouraging progress,'' to be evidenced Friday by a flow of pre-arranged agreements.

''I want this summit to take us further still,'' Bush added, ''and I know that that is your view as well, Mr. President.''

Before a scheduled 15 hours of meetings over four days, including an informal, walk-in-the-woods Saturday at Camp David, Bush and Gorbachev laid out subtle markers and lofty expectations for a summit intended to mark the end of the Cold War.

The centerpiece will be the signing of formal accords on the destruction of chemical weapons, limits on nuclear testing and agreement on the major elements of a treaty to reduce the size of their strategic nuclear arsenals.

The lesser agreements to be signed Friday cover such issues as maritime boundaries, ocean studies, civil aviation, cultural exchanges, weapons proliferation and cooperation on customs, nuclear power and the

environment.

The summit will fall short of the goal set in Malta for completion of a formal strategic arms reduction treaty. That is now expected for later this year, along with conclusion of a pact on conventional forces in Europe.

U.S. and Soviet officials were able to report no breakthroughs in efforts to resolve definitional and other technical problems in the talks on conventional forces, but they said Bush and Gorbachev will try to inject new impetus into the negotiations in a joint statement Friday.

#90151u2597 05/31/1990 ~United Press International

COLLEGE STATION, TX (MAY 31) UPI - Researchers said Thursday that 278 billion barrels of oil unrecoverable by primary methods can be tapped through more sophisticated enhanced recovery techniques.

Scientists at the Texas A&M University said Texas is among those states offering the greatest potential for enhanced oil recovery. These methods accounted for 8 percent of the total U.S. oil production last year but the scientists say more study in this area is needed.

''Enhanced oil recovery today is using sophisticated technology never before used,'' said Mark Walsh, who studies the new technology under a grant from the university's Center for Energy and Mineral Resources.

EOR is used to find the oil that remains after primary methods have been used. Conventional EOR uses thermal, chemical or gas methods to change properties of oil or its reservoir to ease extraction.

One reason current EOR methods have not gained wide acceptance is because of their high cost.

The Texas Railroad Commission, which regulates the state's energy sector, says special tax cuts passed recently have helped create 100 new EOR drilling projects. The commission estimates that in the next 10 years, the projects could produce an additional 7 billion barrels or oil, worth about $140 billion at today's prices.

''EOR is one of the most important things we can do for Texas because we're exhausting traditional sources of oil,'' said Feenan Jennings, the center's director. ''We need to have EOR technology available because ultimately it's going to be our future in recovering petroleum.''

To improve EOR technology, the center is using a computer program to analyze miscible flooding, a common variation of water flooding, using

carbon dioxide to expand oil volume. The technique also increases reservoir pressure to push out the remaining oil.

Walsh said although miscible flooding has been used for years, there is little data to explain why carbon dioxide works in some reservoirs while it is less effective in others.

The center has also sponsored two studies using digital image microgeometry and nuclear magnetic resonance imaging to gain a better understanding of deep underground oil reservoirs, an area where little data is now available.

#90151u2608 05/31/1990 ~United Press International

WASHINGTON (MAY 31) UPI - Moments after Soviet President Mikhail Gorbachev held his second impromptu meeting with reporters within two hours Thursday, President Bush decided he wanted to talk about the summit, too.

Journalists were summoned to the Rose Garden so Bush could present his own assessment of the first two rounds of talks. Like Gorbachev, he said their discussions had gone well, although differences remained.

At the close of his remarks, Bush was asked if he decided to come out of the Oval Office so he could get some of the media exposure Gorbachev had been enjoying.

''I knew you'd want a debriefing,'' said Bush, standing before a battery of television cameras and microphones.

Laughing aloud, he said, ''You know how I am jealous about air time. One of my driving factors: 'Be sure you are on for 30-seconds.' You know how I am.''

Earlier Thursday, Gorbachev talked with reporters on the White House driveway both before and after holding his second meeting of the day with Bush.

On the way back to the Soviet Embassy, the Kremlin leader hopped out his limousine to shake hands with Washingtonians - and get even more air time.

In addition to his televised arrival at the White House, Gorbachev also delivered remarks at a luncheon at the Soviet Embassy.

#90151u2734 05/31/1990 ~United Press International

(MAY 31) UPI - Soviet President Gorbachev returned to the White House

this afternoon to resume meeting with President Bush. Their four-day summit is to be highlighted by signing agreements to destroy chemical weapons, limit nuclear testing and agree on the main points of a treaty to reduce nuclear arsenals. But talk at the summit may be dominated by Soviet opposition to the U-S hope for a unified Germany becoming part of NATO.

Three Eastern European countries are continuing to feel the effects of the area's worst earthquake in 13 years. More than 100 after-shocks rattled buildings and nerves today in Romania, Bulgaria and the Soviet republic of Moldavia. Authorities say the death toll from yesterday's deadly tremor has climbed to 13, with hundreds more injured.

The death toll from another earthquake also climbed today. Rescue officials in Peru say about 200 people died and more than 15-hundred others were injured in Tuesday's 48-second quake. At least 60 after-shocks were felt yesterday and today. But the casualty count could climb further as rescuers reach remote villages in the Amazon basin quake zone.

Snipers opened fire today on a bus in Karachi, Pakistan, killing 15 people as part of violent protests that left a total of 30 people dead in southeastern Sind province. The violence is a response to an incident in which government security forces opened fire on a crowd of ethnic women protesters on Sunday, killing an estimated 70 people. Prime Minister Benazir Bhutto canceled a foreign trip because of the crisis.

An Ohio mother says she doesn't know if it's something she did, or if her children are ''just good kids.'' But Jane Bitkowski says the main thing is ''they're all each other's best friends.'' The Bitkowski triplets will graduate first, third and ninth in their Painsville Harvey High School class on Monday. And, all three have earned scholarships that will help them go to college.

(JUNE 1) UPI - SPORTS TRANSACTIONS

BASEBALL

Cincinnati - Activated infielder Mariano Duncan from the 15-day disabled list.

San Francisco - Moved outfielder Kevin Bass from the 15 to 60-day disabled list; Designated pitcher Greg Booker for assignment with Phoenix of the Pacific Coast League (AAA).

COLLEGE

Clarkson - Named Jeanne Johnston women's basketball coach.

Lake Superior State - Fired hockey coach Frank Anzalone and named Jeff Jackson his replacement.

NCAA - Placed Clemson football program on 1-year probation for major rules violations.

Niagara - Named Bob Mackinnon Jr. assistant men's basketball coach.

North Carolina-Wilmington - Named Sherri A. Tynes women's basketball coach.

Texas A&M - Announced retirement of track coach Charlie Thomas.

Tufts - Named Ralph Ferrigno men's soccer coach.

Xavier (New Orleans) - Fired Athletic Director and men's basketball coach Denny Alexander.

FOOTBALL

New England - Re-signed quarterback Steve Grogan to a 2-year contract.

FOOTBALL

New Orleans - Signed quarterback Dave Wilson to a one-year contract.

British Columbia (CFL) - Announced retirement of linebacker Kevin Konar.

Ottawa (CFL) - Signed Defensive Back Ian Patterson to a two-year contract; Traded offensive lineman Brian Hutching to the Calgary Stampeders for a third round pick in the 1991 draft.

HOCKEY

Hartford - Signed defenseman Cam Brauer to a multi-year contract.

Quebec - Dismissed Coach Michel Bergeron.

TRACK

The Atheltics Congress - Suspended Nigerian triple jumper Joseph Taiwo for three months for failing a drug test.

#90151u3001 05/31/1990 ~United Press International

(MAY 31) UPI - Soviet President Gorbachev seized the early initiative in

the summit today in Washington, D-C... with a direct appeal for ''cooperation'' between the United States and the Soviet Union. He said the search is on in his country for answers to the problems accompanying rapid change. He added that while the superpowers have frequently pledged to cooperate in the past- quoting here- ''Now is the time to empower it with genuine meaning.''

President Bush pledged today to ''take new steps toward a new relationship'' with the Soviets. Bush and Gorbachev acknowledged their differences about German re-unification and the situation in the Soviet Baltic republics. But the two men still are expected to sign several landmark arms-control agreements tomorrow. Then it's off to Camp David for ''a walk in the woods'' on Saturday.

Imelda Marcos was admitted to a hospital today after collapsing at her racketeering trial in New York City. Her personal doctor said the former Philippines first lady had suffered stomach pains and vomited blood. He said her illness was NOT related to her high blood pressure, and said she was in stable condition, alert and doing well. A hospital spokeswoman said Marcos will undergo testing of the digestive system.

A few years ago, health officials believed measles might soon be eliminated. But the national Centers for Disease Control in Atlanta report that the United States is registering an alarmingly large increase in cases of measles for the second straight year. Last year, the number jumped more than 400 percent above the 1988 level. In the first 20 weeks of this year, cases are again up- almost 40 percent- with more than 75-hundred cases confirmed.

-30- 1887

#90151u3046 05/31/1990 ~United Press International

(MAY 31) UPI - NASA engineers are still examining the shuttle Columbia in search of the leak that caused yesterday's scheduled launch to be scrapped. They found a small hole in a hydrogen fuel line today, but they do NOT believe it could have caused the major leakage noticed during fueling on Tuesday. NASA has still NOT ruled out the drastic measure of hauling Columbia back to the hangar- a step that could delay the mission for a month.

The U-S Geological Survey says much of the United States is experiencing either flood or drought. An agency report today shows record high river levels were recorded in May in Iowa, Illinois, Oklahoma, Arkansas and Texas. Officials say the widespread flooding is UNusual. At the same time, states such as California, North Dakota and Florida are experiencing continued drought conditions.

A prosecutor in Akron, Ohio, has ruled that a facsimile transmission

canNOT serve as a legal document. Summit County Prosecutor Lynn Slaby ruled this week that faxes are copies and canNOT be legally used as substitutes for original documents. The news release on the fax ruling was faxed to the media.

A convicted rapist whose release from prison sparked protests was ordered today to stand trial in Plant City, Florida, for allegedly trying to steal a 10-dollar camera. Lawrence Singleton was released from prison in California in 1987 after serving eight years for raping a teen-age girl, hacking her arms off and leaving her for dead. The anti-crime group Guardian Angels called for a maximum 60-day sentence for Singleton's alleged theft.

-30- 1751

#90151u3273 05/31/1990 ~United Press International

(MAY 31) UPI - An unidentified individual going by the name ''The Lord's Avenger'' has claimed responsibility for last week's Oakland, California, car-bombing that injured two leaders of the militant Earth First! environmental group. The claim came in a three-page, typed letter sent to an office of the Santa Rosa Press Democrat. The letter has been turned over to the F-B-I.

Solidarity founder Lech Walesa today said the Polish government will try to meet the demands of railway workers who suspended their strike this week. Walesa spoke to the workers by telephone from Gdansk. Despite offering assurances to the former strikers, Walesa has NOT spoken to the government about how to solve the wage conflict by a June 13th deadline. Poland's labor minister said authorities would NOT discuss money with the workers.

Alaska officials are complaining that a railroad company is moving too slowly to clean up a fuel spill that entered a wildlife refuge today. The 120-thousand gallon spill occurred Monday when 19 train cars derailed in a swampy area between Fairbanks and Anchorage. One state official charged that the railroad stopped cleanup for hours at a time to avoid disrupting train traffic. Some of the oil today seeped into the Minto Flats Wildlife Refuge.

Two summers spent studying French spelled victory today for 13-year-old Amy Dimak in the 63rd National Spelling Bee. Dimak edged 13-year-old finalist Eric Enders today in Washington, D-C, by correctly spelling ''douanier''- French for ''customs officer''- and ''fibranne,'' a fabric of spun rayon. Dimak is an ''A'' student from Seattle.

-30- 1786

#90151u3436 05/31/1990 ~United Press International

(MAY 31) UPI - The Bush-Gorbachev summit opens on a note of possible accommodation... Moldavia defies Moscow and recognizes Lithuania... and the death toll from the Romanian earthquake rises. Those and other stories next, from U-P-I.

Presidents Bush and Gorbachev are agreeing to disagree as their four-day summit proceeds in the nation's capital.

The welcoming ceremony for the Soviet leader on the White House lawn was upbeat, in spite of the intrusion of two potentially divisive issues- German re-unification and the situation in the Baltic Republics.

By the end of the first of four days of meetings, obstacles to a productive summit appeared to be diminishing. As Gorbachev left the White House this evening to return to the Soviet Embassy, where he was to dress for an official state dinner, he announced that the two leaders had effectively taken Germany off the agenda by assigning it to their subordinates, Secretary of State Baker and his Soviet counterpart, Eduard Shevardnadze.

Gorbachev said... ''Something has emerged that requires such discussion,'' but he was quick to add... ''It is NOT here where the German question will be resolved.''

What that left was two leaders pledging to seek ''common ground'' through ''cooperation.''

It was Gorbachev who sounded that note, in asking the United States for time and consideration as the Soviets work through their painful process of social and economic reforms. Gorbachev said the two superpowers have been pledging to cooperate for decades, but that- in his words- ''now is the time to empower it with genuine meaning.''

-30- 1778

#90151u3444 05/31/1990 ~United Press International

(MAY 31) UPI - Lithuania got much-needed support from the Soviet republic of Moldavia today, while President Gorbachev was in Washington, D-C, attending the superpower summit.

The Moldavian Parliament granted official recognition to Lithuania as an independent republic- over the objections of the Kremlin.

It was the first time a Soviet republic that has NOT claimed independence has recognized Lithuania. Both Latvia and Estonia have recognized Lithuania, but all three Baltic republics have claimed independence- to varying degrees.

Official Soviet policy is to blockade Lithuania until it rescinds its declaration of independence. Lithuania has sought support from other republics- especially in the form of supplies.

While Moldavia's recognition today bolsters Lithuania's position, it does NOT mean supplies will soon be flowing. The Kremlin still controls railroads and all other forms of transportation, and a Lithuanian official- while greeting the Moldavian recognition- admitted today... ''At this point, it's more of a symbolic gesture.''

-30- 1229

#90151u3469 05/31/1990 ~United Press International

(MAY 31) UPI - NASA engineers have NOT succeeded in finding the fuel leak that forced postponement of yesterday's scheduled launch of the shuttle Columbia.

They found a small hole in a hydrogen fuel line today, but they DON'T believe it could have been responsible for the dramatic leakage that occurred during fueling Tuesday for the planned 10-day mission.

Engineers now are looking at more drastic measures to detect the leak. One idea is to pump liquid hydrogen into Columbia's external tank to simulate fueling conditions. That test will likely take place next week if engineers do NOT find the leak sooner, and it would push the launch back about two weeks.

But NASA officials have NOT ruled out the possibility that Columbia will have to return to the hangar for repairs. That would delay the mission up to a month and would jeopardize NASA's proposed nine-mission 1990 shuttle schedule.

The death toll is now 13 in three eastern European countries as workers dig out from the rubble left by a powerful earthquake.

100 aftershocks followed yesterday's quake, which measured up to seven-point-five on the Richter scale and killed people in Romania, Bulgaria and the Soviet republic of Moldavia.

Soviet reports say about one-thousand houses, 82 schools and day-care centers, and 36 medical establishments were damaged in Moldavia alone.

A powerful aftershock this morning shook Millions of people from their sleep in all three countries.

In Peru, aircraft are flying in emergency supplies to remote cities devestated by an earthquake in the Amazon basin.

Some 200 people died and more than 15-hundred were injured by the 48-second quake that struck Tuesday.

-30- 1866

#90151u3494 05/31/1990 ~United Press International

(MAY 31) UPI - Nicaraguans are getting some help in their battle against triple-digit inflation.

The first 60-Million dollars of a long-stalled 300-Million-dollar U-S aid package arrived today in Nicaragua. A U-S official signed the check at a news conference with President Violeta Chamorro .

The money comes on the same day an indpendent economist reported that inflation in the Central American country hit 130 percent for the month of May.

The head of Nicaragua's Central Bank says inflation will remain high until his economic recovery plan takes effect, and until a new monetary unit is circulated in July.

Meanwhile, government officials say gunmen believed led by a former National Guard officer shot and killed a Sandinista leader at his home in Matagalpa yesterday. Police arrested three suspects.

-30- 974

#90151u3510 05/31/1990 ~United Press International

(MAY 31) UPI - Imelda Marcos is out of court and in a hospital after suffering from stomach pains and vomiting blood following her collapse at her racketeering trial today.

Marcos is facing federal charges that she and her husband, the late Philippine President Ferdinand Marcos, conspired to buy New York real estate, art and jewelry with 222-Million dollars stolen from Philippine government coffers.

The 60-year-old Imelda Marcos is reported in stable condition at New York Hospital-Cornell Medical Center after collapsing at the defense table today.

Doctors say she's suffering from a severe inflammation of the stomach lining and will be hospitalized for ''several days.'' They say her condition is NOT life-threatening.

In the trial itself, U-S District Judge John Keene ruled today that former C-B-S News correspondent Diane Sawyer will NOT have to testify in the case- unless Marcos herself takes the stand. Prosecutors had sought

Sawyer's testimony in connection with a 1986 interview of the former Philippine first lady.

-30- 1207

#90151u3588 05/31/1990 ~United Press International

(MAY 31) UPI - Today's opening session of the Washington superpower summit featured Presidents Bush and Gorbachev hailing the possibility of securing a safer post-Cold War world.

The two leaders appear to face rough spots in the next three days of talks which promise to include frank discussions on Lithuania's bid for independence. Gorbachev says he thinks the issue of German unity will be discussed at the ministerial level.

Bush carried a pleasant demeanor into tonight's formal state dinner honoring the arrival of his Soviet counterpart. Bush praised Gorbachev for the course he has chosen for the Soviet Union and toasted the ''growing friendship'' between the two countries.

Gorbachev's difficulties at home continue to mount, even as he seeks a more solid relationship with the United States. Today, the lawmaking body of Soviet Moldavia granted recognition to Lithuania, despite Moscow's attempts to isolate the Baltic republic.

More than 100 aftershocks rattled the nerves of people in Romania, Bulgaria and Moldavia one day after a massive earthquake shook the region. The death toll from yesterday's quake, which measured up to seven-point-five on the Richter scale, has climbed to 13.

There appears to be movement in the nearly three-month-old Greyhound strike. Sources say the unions representing bus line workers are looking into a possible employee buyout of the company.

That word comes as the Labor Department confirms that Labor Secretary Elizabeth Dole met with the head of Greyhound and will meet next week with union leaders.

-30- 1741

#90151u3683 05/31/1990 ~United Press International

(MAY 31) UPI - Presidents Bush and Gorbachev closed the first full day of their four-day summit with an official state dinner at the White House. Bush toasted the ''growing friendship'' between the two nations and said- quoting now- ''We want to see perestroika succeed.'' Although it was a black-tie affair, Gorbachev wore a business suit instead of a tuxedo. Protocol experts say such behavior is suitable for the leader of a socialist state.

Earlier today, Gorbachev told reporters he and Bush agreed to toss the question of German membership in NATO over to the U-S Secretary of State and Soviet Foreign Minister Shevardnadze for more study. That appeared to remove the issue from the main summit agenda, but that's apparently all it means. Bush said later he was ''encouraged'' by Gorbachev's statement on Germany, but there is NO evidence of any give in the Soviets' opposition to German membership in NATO.

Doctors at Georgia's Atlanta Hospital say they've found that in treating a patient for an AIDS-related cancer, they appear to have cured him of the AIDS virus altogether. The doctors used a blood-heating procedure, and while they say prolonged heat exposure may ''inhibit'' AIDS, they're NOT yet touting it as a cure for the disease. They have, however, called for additional studies.

The situation in Liberia has deteriorated to the degree that the State Department tonight urged all Americans to leave the war-torn Western African nation. Washington has ordered all NON-essential U-S government workers and the dependents of all government personnel to immediately leave Liberia. A half-dozen Navy ships from the Sixth Fleet have been sent to assume positions off the Liberian coast to assist, if needed, in the evacuation.

-30- 1927

#90151u3688 05/31/1990 ~United Press International

(MAY 31) UPI - Sources say unions representing striking Greyhound workers have hired a financial adviser to explore a possible employee buyout of the bus line. Also, Greyhound management was charged by the National Labor Relations Board with UNfair labor practices. The Labor Department also confirms Labor Secretary Elizabeth Dole met with Greyhound chairman Fred Curry yesterday and wants to meet with union leaders next week.

The United States and the European Economic Community deadlocked in talks about agricultural subsidies today in Paris. The failure dims U-S hopes that the meeting of the E-C's Organization for Economic Cooperation and Development would advance stalled trade negotiations in Geneva. The United States wants Europe to reduce agricultural subsidies, but European countries say that would bankrupt Millions of small farmers.

Police in Fort Lauderdale, Florida, say a licensed practical nurse was arrested today and charged with slashing the intravenous tubes of seven hospital patients during the weekend. The Broward County sheriff says Kevin Kloss confessed, saying he was angry because the hospital had taken disciplinary action against him. NONE of the patients was injured, but Kloss faces a possible 30-year prison sentence for tampering with a product with the intent to cause bodily harm.

#90152b0013 06/01/1990 ~Business Wire
BOULDER, CO (JUNE 1) BUSINESS WIRE - Daisy Systems Corp. (OTC:DAZXC) Friday announced that certain of its bondholders filed a petition for involuntary bankruptcy in the U.S. Bankruptcy Court in Denver against it and its wholly owned subsidiary Daisy/Cadnetix Inc.

A company spokesperson said that DAZIX had been advised that this action was taken by the bondholders in an attempt to preserve certain legal rights which may have expired at midnight on May 30.

The company intends to continue operations in the normal course pending a resolution of the petition. The spokesperson said: ''We may seek to have the petition withdrawn, especially if our bondholders and secured creditor can reach a mutually satisfactory agreement going forward. We are hopeful that an agreement will be reached soon.''

DAZIX, the operating subsidiary of Daisy Systems Corp. of Boulder, Colo., designs, manufactures, markets and supports computer-aided engineering, design and manufacturing (CAE/CAD, CAM) systems used to automate the electronic design engineering process.

The company's products are used to design, simulate and lay out application-specific integrated circuits (ASICs), very large-scale integrated circuits (VLSIs) and printed circuit boards (PCBs). The company has a worldwide customer base covering a wide range of industries, including military/aerospace, computers, semiconductors, telecommunications and consumer electronics.

SUNNYVALE, CA (JUNE 1) BUSINESS WIRE - Four-year-old SOTA Technology Inc. has announced the appointment of Dennis S. Leonard as company president and chief operating officer. Mike Raghavan is the new vice president of marketing.

The appointments coincide with the resignation of the company founder and former president, Morris Lin, who plans to pursue other interests.

Leonard was appointed president after a brief tenure as a consultant to the company. He brings to SOTA 16 years of experience in various senior-level, national and international, marketing and sales positions.

Most notably, he headed the sales, marketing and business development activities of Mountain View-based Cromemco Inc. between 1979 and 1985. He has since been associated with Tall Tree Systems, AVR Systems and Allied Telesis.

Raghavan joins SOTA Technology from Western Digital, where he was marketing manager. For the past seven years, he has also held product management and marketing positions with NEC, Hitachi and National Semiconductor.

SOTA Technology Inc. manufactures and markets PC enhancement and graphics products. The company currently employs 35 people at its Sunnyvale headquarters.

#90152b0021 06/01/1990 ~Business Wire

ORINDA, CA (JUNE 1) BUSINESS WIRE - WordTech Systems Inc., the only supplier of both interpreters and compilers for the dBASE language, Friday announced the availability of the WordTech R&R Relational Report Writer.

Under an OEM agreement with Concentric Data Systems Inc., WordTech will now include the popular R&R Relational Report Writer with WordTech's dBXL Diamond Release, version 1.3R database system.

R&R is a powerful, band-oriented report writing tool that complements the dBXL database manager. The OEM agreement between WordTech Systems and Concentric allows WordTech to sell the R&R Relational Report Writer and the R&R Code Generator to its customers for added functionality.

David Miller, president of WordTech, commented, "Report writing is the most important feature needed by database users in organizations, and the R&R Relational Report Writer is a market-proven product. By combining it with dBXL we now provide a complete solution for dBXL users."

According to John Henderson, president of Concentric Data, "We are very excited about the OEM agreement with WordTech because it makes R&R automatically available to all dBXL users." Concentric will continue to

market its products separately in addition to the OEM agreement with WordTech.

WordTech R&R helps users create all types of reports without any knowledge of programming. Calculations, including subtotals and totals, can be easily performed. Records can be sorted and grouped in any order. Many features also make it easy to improve the appearance of reports. All of these capabilities are available through Lotus-like menus, and WYSIWYG screen painting capabilities.

The R&R Relational Report Writer includes an unlimited-use run-time so that numerous copies of the report can be used in addition to the single interactive user license that comes with dBXL 1.3R. WordTech is also including the R&R Code Generator with its Quicksilver 1.3R compiler. The Code Generator creates dBXL and Quicksilver program code that can be included in applications.

WordTech is including the R&R Relational Report Writer at no additional charge, so dBXL Diamond version 1.3R can be purchased for $249 retail. The R&R Code Generator is also included with Quicksilver Diamond version 1.3R at no additional charge, leaving its retail price at $599. The R&R products are available now from WordTech. For more information, call WordTech Systems.

WordTech Systems is a leading supplier of fully dBASE compatible database management systems, and the only company that provides both interpreters and compilers for the dBASE language. WordTech products offer users an integrated applications development environment and also provide migration paths to UNIX and SQL environments.

SCOTTSDALE, AZ (JUNE 1) BUSINESS WIRE - Slate Corp. Friday announced the addition of Robert M. Frankston to the Slate design team working on pen-based software applications.

Frankston joins Slate from Lotus Development Corp., Cambridge, Mass., where he was most recently a systems architect working with the Notes groupware product team.

Frankston, along with Dan Bricklin, a Slate co-founder and vice president, created the first spreadsheet package for the personal computer, VisiCalc.

While at Lotus, Frankston focused much of his attention on product

connectivity and communication system issues. In addition to his work with the Lotus Notes product, he also created Lotus Express, the personal computer electronic mail solution using MCI mail.

Prior to joining Lotus in 1985, Frankston co-founded Software Arts with Bricklin in 1979. At Software Arts the two developed VisiCalc, the first business productivity software package for the personal computer.

Prior to Software Arts, Frankston was associated with Interactive Data Corp. for 13 years in a variety of technical roles at the systems software and development tools level.

Frankston received Bachelor of Science degrees from the Massachusetts Institute of Technology (M.I.T.) in both Math and Computer Science in 1970. In 1974, he received his Masters and Engineers degrees in Computer Science from M.I.T.

Slate also announced a personal investment from Mitchell Kapor, founder of Lotus and currently president of ON Technology Inc.

Slate Corp. was founded in January 1990 to develop software applications products for pen-based computers. The company is headquartered at 15035 North 73rd Street, Scottsdale, AZ 85260. The telephone number is 602/443-7322.

SAN LUIS OBISPO, CA (JUNE 1) BUSINESS WIRE - Effective immediately, Parse Inc. announces the selection of Mulvania & Associates as its agency of record for public relations, advertising, and promotion.

Appointed by Parse President Ray Ball, Fran Mulvania, principal of Mulvania & Associates, will spearhead all programs for public relations and advertising including all press activities, national advertising campaigns, trade show activity and industry conferences. Handling creative services on the account is Robert M. Verrilli, art director for the agency with Elizabeth D. Etheridge as account executive.

Parse, founded in 1986, with corporate headquarters in San Luis Obispo and product development-and-support offices in Hudson, Mass., produces diagnostic software for use with Digital Equipment Corp.'s line of VAX

computer systems, VAX-compatible subsystems and peripheral devices. In addition, Parse also develops diagnostics for the Data General MV family of computer systems (MV 4000 through MV20000).

Mulvania & Associates, established in 1984 in Orange County, is a full-service public relations, advertising and marketing agency with over 12 years of experience in the high-technology industry.

For further information, please contact Ray Ball, president, Parse, 6360 Orcutt Rd., San Luis Obispo, Calif. 93401, telephone: (805) 544-8588, fax: (805) 541-0792; or contact Fran Mulvania, president, Mulvania & Associates 19742 MacArthur Blvd., Irvine, Calif. 92715, telephone: (714) 474-8098, fax: (714) 474-0540.

SAN JOSE, CA (JUNE 1) BUSINESS WIRE - Pacific Western Bank (AMEX:PWB) has earned the highest possible rating, ''Super Premier Performing Bank,'' and has been classified ''A-Quality'' by ''The Findley Reports,'' announced Phillip Boyce, the Bank's chairman and chief executive officer.

''The Findley Reports is a respected California financial institution newsletter which annually rates the performance of California's banks and savings and loans.

''We are pleased to receive the recognition for our growth and performance from such a prestigious publication as ''The Findley Reports.'' This rating clearly demonstrates the success we have achieved from our ability to improve overall profitability.

Our achievements have resulted from programs designed to strengthen the quality of the loan portfolio and deposits, reduce operating expenses and provide competitive income-producing financial services, among others,'' commented Boyce.

The newsletter rates the banking institution on a number of performance factors, including liquidity, equity capital adequacy, asset structure and composition, loan portfolio quality, deposit quality and strength, interest income, non-interest costs, return on equity, management and director stability and performance consistency.

Headquartered in San Jose, Pacific Western Bank is one of two major independent banks in Northern California. The bank has $1.2 billion in assets and operates 26 branches in Santa Clara, Santa Cruz and Monterey

Counties.

Pacific Western Bank is a subsidiary of Pacific Western Bancshares Inc., a bank holding company also based in San Jose. Through its other subsidiaries, the company offers trust and asset management services, and financially oriented data processing and software development services.

SEATTLE (JUNE 1) BUSINESS WIRE - Effective July 2, Mexicana Airlines will introduce thrice-weekly non-stop flights from Seattle to Los Cabos, Mexico.

To celebrate this new service, Mexicana Airlines is offering a special introductory round-trip fare of $293.

(Subject to government approval. Saturday departures slightly higher. Introductory fare valid July 1 through July 31.)

Nestled at the very tip of Baja California, a breathtaking desert landscape and dry climate make Los Cabos quite distinct from other Mexican resorts. In addition to the world's finest sport fishing, Los Cabos attracts sun worshippers and beachcombers to the miles of unspoiled sandy shores.

Only Mexicana Airlines can fly you non-stop to Los Cabos, where you can enjoy an average temperature of 75 degrees and 362 days of sunshine per year.

Mexicana flight 983 will depart Seattle every Monday and Saturday at 8:45 a.m., arriving in Los Cabos at 12:50 p.m. Mexicana flight 981 will depart Seattle every Friday at 8:45 a.m., arriving in Los Cabos at 12:50 p.m.

Returning to Seattle, Mexicana flight 982 departs Los Cabos at 2:45 p.m., arriving in Seattle at 6:20 p.m. every Monday and Saturday, and flight 980 departs Los Cabos every Friday at 2:25 p.m., arriving in Seattle at 6:20 p.m.

While in flight, passengers will be pampered by Mexicana's exclusive Golden Aztec Service, which includes a choice of entrees, complimentary French champagne and red wine, open bar serving complimentary cocktails, and personalized attention from Mexicana's hospitable flight attendants.

So come fly the new Mexicana Airlines and discover why for 69 years of proud and perfected service, Mexicana is a fleet apart from all the rest. It is the best.

For reservations or additional information, call your travel agent or Mexicana Airlines, 800/531-7921.

PALO ALTO, CA (JUNE 1) BUSINESS WIRE - One of Santa Clara county's largest full-service advertising agencies has been created with the joining of two medium-sized firms.

The new entity is Graff Sherman Advertising Inc. In a joint announcement, Lloyd L. Graff and Donald J. Sherman have announced the merger of their firms effective June 1, 1990.

Graff Advertising Inc., located in Palo Alto, has for nine years been primarily a business-to-business agency noted for its creative work in print advertising and collateral materials. Donald J. Sherman & Associates Inc., a 10-year-old firm, has served primarily consumer clients and has gained a reputation for its stong media buying capabilities.

With an estimated $12-million in capitalizing billings, Graff Sherman Advertising Inc. will be among the five largest agencies in Santa Clara County, according to recent estimates (San Jose Business Journal). Graff's 1990 billings are estimated at $7 million and Sherman's at $5 million.

''We expect a real synergistic effect from this merger,'' commented Graff, ''our new agency will be capable of serving the needs of almost any size advertiser in virtually every industry.''

Graff will become president and chief executive officer of GSA with Sherman serving as executive vice president. ''We expect to retain all present employees in both firms,'' commented Sherman. The firm will have headquarters at Graff's present location, 1900 Embarcadero Road, Palo Alto.

Graff Sherman Advertising will be one of the only nine full-service agencies in Santa Clara County who are members of American Association of

Advertising Agencies. AAAA sets the standards for America's advertising. Nationally, the organization has accepted only about 750 of the more than 10,000 agencies in the United States.

SAN FRANCISCO (JUNE 1) BUSINESS WIRE - Petrini Stores will begin accepting bank automated teller machine (ATM) cards that have an Interlink or Explore symbol on them.

The electronic payment link is a result of a special agreement through Market Wholesale Grocery, a division of Provigo Corp., and Wells Fargo Bank's On-Line Debit Service.

''We are pleased with this joint agreement for it allows us to offer today's sophisticated customer a state-of-the-art payment method, which compliments the level of services Petrini's wishes to provide,'' according to Claude Savard, executive vice president of Provigo Corp.

Customers can use their ATM cards at Petrini's new locations in Castro Valley, which opened in May, and at its Sunnyvale, Calif. location, which is scheduled to open in June. The remaining Petrini's locations are scheduled to begin accepting ATM cards from June through September.

Market Wholesale is a leading distributor of wholesale grocery products and services to more than 1,500 independent grocers. Currently, Wells Fargo is processing ATM purchasing transactions for four of Market Wholesale's Cost Less Foods, and through this effort, Market Wholesale and Wells Fargo can co-market On Line Debit Service to all of these independent grocers.

Wells Fargo Bank is the largest provider of On-Line debit services in the nation, and specifically focuses on the electronic payment needs of the supermarket industry.

EVERETT, WA (JUNE 1) BUSINESS WIRE - Following a regularly scheduled meeting of the John Fluke Mfg. Co. Inc.'s (ASE:FKM) board of directors, John M. Fluke, chairman of the board, has announced the election of John

D. Durbin to the board.

Durbin's early experience progressed from technical sales into management in his first position with Cummins Engine Co. in the '60s, then to president and owner of Cummins Northwest Diesel Inc., through the '70s. From 1982 through 1988 Durbin was chairman and owner of a group of four companies involved in sales and service of heavy duty trucks and heavy construction equipment in Washington and Alaska.

''John Durbin's current role as chairman and president of Hostar International Inc. and general partner of John Durbin & Assciates, as well as his wide range of corporate board affiliations, will bring a very pertinent background in industrial distribution and manufacturing experience to the board,'' said John Fluke.

A the same meeting, the company's board of directors declared the company's sixth consecutive quarterly cash dividend. The dividend will be 8 cents per share to stockholders of record as of June 29, 1990, to be paid on or before July 20, 1990.

John Fluke Mfg. Co. Inc. is a leading supplier of electronic instrumentation and services that improve the productivity o technical users engaged in researc, service, design, manufacturing and calibration. Fluke focuses on customers who are manufacturers and users of electronic and electrical equipment in defense and aerospace, government agencies, computers and peripherals, electronic instrumentation, communications, utilities, automotive, and consumer elecronics.

Founded in 1948 and headquartered in Everett, Fluke employs more than 2,300 people and had sales of $247.8 million in its most recent fiscal year, ended Sept. 29, 1989.

PHOENIX (JUNE 1) BUSINESS WIRE - Three-Five Systems Inc. (NASDAQ:TFSY), has developed the TFBL1XXX LED backlight series to provide a bright, cost effective light sources for LCD panel, annunciator, and keyboard illumination.

Simply designed, the backlight consists of a printed circuit board populated with LED die using chip-on-board technology.

A plastic reflector and special diffused overlay complete the low profile package which is 0.225'' thick. Available colors include low current, ultra-bright AlGaAs red, high efficiency red, yellow, green, and orange.

Bi-color red/green backlights are also available to indicate a condition change. Typical brightness ranges from 35 FL for high efficiency red to 130 FL for ultra-bright AlGaAs red.

Standard LED backlights are designed to complement three popular LCD panel sizes; one and two row by 16 character dot matrix displays; 3 1/2 0.5 '' digits; and six 1'' digits. LED backlights are easily customized to meet specific size, color, and brightness requirements.

LED backlights operate from a simple 5.0Vdc power supply eliminating bulky and expensive inverters required for EL backlights. Operating and storage temperature range of -40 degrees C to +85 degrees C allows operation in harsh environments. Extremely long life of 100,000+ hours makes them ideally suited for displays being operated 24 hours a day in low ambient light, or when backlight replacement in field units is difficult or impossible.

Photographs and additional technical information regarding the LED backlights are available from Peggy Farmer, telephone: 602/496-0035, fax: 602/496-0168.

Three-Five Systems Inc. is a leading international manufacturer and distributor of optoelectronics and display systems. The company maintains its worldwide headquarters in Phoenix, European headquarters in Swindon, England, and manufacturing and assembly facilities in Manila, the Philippines.

With a recent acquisition/merger, an East Coast design center, sales offices and limited manufacturing in Connecticut have been added to the company's U.S. facilities.

Three-Five has developed the application specific integrated display (ASID) program to implement custom front panel display systems, combining LCD panels, chip-on-board LED die and silicon drivers, and keyboard elements. Standard products include LED and LCD displays with on-board drivers, visible and infrared LED components, keypads, switches, and keyboards.

#90152b0109 06/01/1990 ~Business Wire

LINCOLN, RI (JUNE 1) BUSINESS WIRE - The Rhode Island Public Utilities Commission (PUC) has authorized a 3.2 percent increase in rates for Blackstone Valley Electric Co. (BVE).

The new rates represent a $3.6 million increase in the company's total revenues.

Today's increase is the first upward adjustment in BVE's base rates in more than three years. During that period, the cost of living (CPI) has gone up by 13.1 percent.

BVE had filed a request for an increase with the PUC last November, seeking an additional $4.9 million in revenues. Subsequently, BVE initiated a reduction in their request to $4.7 million. The lower settlement agreement of $3.6 million, which has been approved by the commission, was accepted by BVE in order to obtain earlier relief from its poor financial condition.

David H. Gulvin, president of BVE attributed the company's need for the increase to lower sales of electricity, caused by a combination of the economic downturn that has hit northern Rhode Island and the mild weather this past winter.

The PUC authorized an across-the-board increase for BVE customers, except those on the company's special Rate 5 (residential heads of household receiving Supplemental Security Income from the Social Security Administration).

The monthly bill of an average BVE residential customer using 500 kilowatthours of electricity per month will increase $1.63, from $50.51 to $52.14, effective today.

''I would like to point out that, even with this sorely needed increase in our base rates, the cost of electricity for a BVE customer remains lower than it was as recently as last October, and well below what it was in 1984,'' Gulvin said. ''We will continue to do all we can to keep the cost of our service as low as possible.''

BVE periodically adjusts its prices to accurately reflect the cost of fuel used to generate electricity. Fuel costs have declined since October, and an adjustment formerly applied to the cost of converting a generating station from oil to coal has been eliminated. BVE provides electric service to about 83,000 customers in northern Rhode Island. It is one of three retail electric utility subsidiaries of Eastern Utilities Associates an investor-owned holding company.

#90152b0113 06/01/1990 ~Business Wire

NEW YORK (JUNE 1) BUSINESS WIRE - Molten Metal Technology Inc. (''MMT''), a 70 percent owned subsidiary of H&H Venture Capital Inc., which is a 100 percent owned subsidiary of Harris & Harris Group Inc., voted Friday to restructure its management, board of directors and capitalization.

MMT also received today a preliminary written proposal regarding a joint-venture arrangement with a major corporation with which it has had discussions.

MMT is also engaged in preliminary discussions with other corporations. There can be no assurance that any commercial arrangements will result from this proposal or from these discussions.

In the restructuring, William M. Haney, who has been serving as a director of MMT, has assumed the additional duties of chairman and chief executive officer. Charles E. Harris, C. Richard Childress and Barbara M. Page, the officers of Harris & Harris Group Inc. who have served as officers and directors of MMT, have resigned from their positions with MMT. The on-going directors of MMT in additional to Haney are John T. Preston and Christopher J. Nagel.

In the recapitalization, H&H Venture Capital has received a cash dividend from MMT as a return of capital and has agreed to sell a protion of its shares in MMT to William M. Haney and John T. Preston.

The net result is that H&H Venture Capital will own a 24 percent fully diluted interest in MMT at a cost of $49,000. H&H Venture Capital has also agreed to loan $200,000 to MMT for two years at an annual rate of interest of 8.75 percent. Following the recapitalization, H&H Venture Capital will have a total of $249,000 invested in MMT, vs. its original investment of $1 million.

The purpose of the restructuring is to place MMT into the management of the three members of the shareholder group best equipped to execute the licensing and joint venture strategy that MMT has determined to pursue in order to commercialize its patented technology. The realignment of shareholdings reflects the on-going responsibilities being assumed by Haney, Preston and Nagel.

SAN JOSE, CA (JUNE 1) BUSINESS WIRE - ARIX Corp. (NASDAQ:ARIX) Friday announced a plan to downsize its ARIX Computer Corp. subsidiary as part of its ongoing business transition plan.

The plan is designed to decrease headquarters overhead, and includes a reduction in staff and consolidation of certain executive functions.

Michael Fallon, one of the ARIX founders, will rejoin the company to serve ARIX Computer Corp. as vice president of operations, which will include both engineering and manufacturing. Eugene Manno will assume the position of president of ARIX Computer Corp. while continuing to serve as chairman and chief executive officer of ARIX Corp.

Accordingly the company has accepted the resignations of Robert G. Bartizal, president and chief operating officer of ARIX Computer Corp.; and David Hansen, vice president of manufacturing, effective June 2, 1990.

There will be a general reduction in the staff of ARIX Computer Corp. of approximately 84 of its 327 employees, effective 60 days from this date in accordance with the company's policy of long-term notice to affected employees.

The company formulated a diversification plan in the fall of 1988, which has been accelerated recently in the wake of lost revenues from Unisys.

ARIX Computer Corp., a subsidiary of ARIX Corp., manufactures and markets a UNIX-based symmetric multiprocessing minicomputer for application in multiuser commercial environments. ARIX Computers are marketed worldwide indirectly through VARs, OEMs, systems integrators, distributors and directly to select large end-users. To date the company has an installed base of more than 6,000 systems.

ARIX Corp. is the Delaware holding company for Arix Computer Corp., San Jose, Calif.; IMIX Inc., an image management company in Reston, Va.; and Edgcore Technology in Phoenix, Ariz.

#90152b0142 06/01/1990 ~Business Wire

SAN JOSE, CA (JUNE 1) BUSINESS WIRE - ARIX Corp.(NASDAQ:ARIX) Friday announced the appointment of Michael Fallon, 48, as vice president of operations.

Fallon was an original founder of ARIX, formerly Arete, in 1982. During his five year tenure Fallon led the engineering team that pioneered the tightly coupled multiprocessor architecture at the foundation of the ARIX product line.

He now rejoins the company assuming the post of vice president of operations, which was recently expanded to include both engineering and manufacturing.

Fallon, whose career spans twenty years in technology start-up environments, was also a co-founder of ONYX systems. Initially Fallon was director of engineering and was responsible for that company's design of one of the first UNIX-based microcomputer business system.

He was subsequently promoted to vice president of operations with responsibility for all manufacturing and engineering.

Prior to rejoining ARIX, Fallon was employed by Glenwood Management, a venture capital firm which specializes in seed and early round funding of technical ventures, with responsibility for reviewing business plans, interviewing principals, and providing technical assistance to portfolio companies.

''In its early years, ARIX announced six new systems in six years, while sustaining an extremely high rate of growth. ARIX still has all the right ingredients, plus it now has a sizable installed base. It's time to start leveraging these,'' said Fallon.

ARIX Computer Corp., a subsidiary of ARIX Corp., manufactures and markets a UNIX-based symmetric multi-processing minicomputer for application in multi-user commercial environments. ARIX Computers are marketed worldwide indirectly through VARs, OEMs, systems integrators, distributors and directly to select large endusers.

To date the company has an installed base of more than 6,000 systems.

#90152b0184 06/01/1990 ~Business Wire

SALT LAKE CITY (JUNE 1) BUSINESS WIRE - S.N.L. Financial Corp. (NASDAQ:SNLFA) Friday announced financial results for the three months ended March 31, 1990.

Revenues for the period rose to $6,673,000, as compared to revenues of $5,833,000 for March 31, 1990. Revenues increased as a result of increased premium from the life insurance operations which is a combination of improved persistency on existing insurance contracts and new insurance contract writings in the funeral plan division. The cemetery and mortuary revenues increased as a result of the acquisition in July 1989, of a Phoenix funeral chapel, which caused an increase of $134,000 in revenue that would not have been included in March 1989.

Net earnings from operations were $276,000, or 10 cents a share, as compared to an operating loss after investment losses of $60,000, or 3 cents per share for the period ended March 31, 1989. During the first quarter of 1989, S.N.L. Financial Corp. experienced a loss due to the premature retirement of a bond. This resulted in an investment loss of $472,000, compared to the first quarter of 1990, which did not have an extraordinary loss of this nature.

The company implemented SFAS, No. 96 ''Accounting for Income Taxes'' in the first quarter of 1989 which resulted in a cumulative effect of accounting change in March 1989 of $465,000, resulting in net earnings of $404,000 for the period ended March 31, 1989, or 14 cents per share as compared to March 31, 1990 of $276,000, or 10 cents per share.

WAREHAM, MA (JUNE 1) BUSINESS WIRE - Tons of Toys Inc. (NASDAQ:TONS), which operates 21 toys supermarkets in Maine, Massachusetts, New Hampshire New York, Rhode Island and Vermont under the name ''Toys 'N Toys,'' Friday announced that the disclosure statement to its plan of reorganization has been approved by the United States Bankruptcy Court.

The disclosure statement was approved after the company reached an agreement with the Creditors' Committee regarding the amount to be paid to creditors. As a result, the Creditor's Committee has recommended that creditors vote in favor of the plan. The committee will also be

withdrawing its motion to convert the case to Chapter 7. A hearing to confirm the plan has been scheduled for June 28, 1990.

In addition, the company announced that it has received notification that Merchants West Inc., the company's proposed merger partner, which operates 33 toy stores in California, Nevada and Washington, has recieved a commitment letter from a commercial lender increasing Merchants West's credit facility by $2,000,000. This commitment would fulfill one of the major requirements for funding the plan.

CITY OF INDUSTRY, CA (JUNE 1) BUSINESS WIRE - Applied Solar Energy Corp. (NASDAQ:SOLR) Friday reported net sales of $9.7 million for the three months ended April 28, 1990, a quarterly record for the company and a 77 percent increase over the net sales of $5.5 million for the comparable three months ended April 29, 1989.

Net earnings for the quarter were $246,000 which includes an extraordinary item of $95,000 due to income tax benefits of net operating loss carryforwards. This compares with a net loss for the like period in 1989 of $742,000 which includes a loss from discontinued operations of $158,000.

For the six months ended April 28, 1990, net sales were $17.4 million, again a record for the company. This compares with net sales of $11.0 million for the six month period which ended April 29, 1989. Net earnings for the six months ended April 28, 1990 is $499,000 which includes an extraordinary item of $193,000 due to income tax benefit of net operating loss carryforwards.

This compares with a net loss of $1,412,000 for the like period of 1989 which includes a loss from discontinued operations of $370,000.

Gerard McLarnon, president and chief executive officer noted that profitability was achieved while spending an additional $877,000 in the first six months on laser research and development in their Advanced Optoelectronic business unit.

The company continues to make significant achievements in the development of its large-scale capability for the production of high-power ''quantum well'' lasers. McLarnon added that third-quarter performance is anticipated to be adversely impacted by customer-delayed release of certain silicon solar cell and laser product orders.

In addition, the company plans to continue its investment in its Advanced Optoelectronic business unit.

Backlog at the end of the quarter was $20.4 million, up from the $17.2 million at the end of the second fiscal quarter of 1989. McLarnon noted that the backlog will approximately double in size upon final negotiations on a contract for gallium arsenide on germanium solar cells.

Applied Solar has two major business units, one producing gallium arsenide and silicon solar cells which convert sunlight directly into electrical power, for the space and defense industry and the second business unit, operating under the name Advanced Optoelectronics, is responsible for the development and sale of photosensor devices and laser subassemblies. These products are used in multiple consumer, medical, defense and industrial applications.

LOS ANGELES (JUNE 1) BUSINESS WIRE - The American Film Institute (AFI) Friday announced a long-term relationship with Apple Computer Inc. (NASDAQ: AAPL) intended to introduce and integrate computer technology into the film and television community.

One of the key elements of this relationship will be the creation of the AFI/Apple Computer Center for Film and Videomakers. In support of this new alliance, Apple will donate over $1 million in Macintosh equipment to AFI.

The AFI/Apple Computer Center for Film and Videomakers, to be inaugurated in the fall of 1990, will be dedicated to solving the creative and technical challenges in film and television production through the application of computer technology. Access to the center will be available to screenwriters, directors, producers, production designers, editors and all members of the filmmaking community.

It is anticipated that introducing computer technology into the filmmaking process will streamline the production process and be especially helpful to the independent film and video community.

"In their respective industries, both AFI and Apple are widely recognized as being leaders in innovations," stated John Sculley, chairman and chief executive officer of Apple Computer. "The relationship between AFI and Apple will expand the role of Macintosh in the creative community and will offer the opportunity to explore and create in new and different ways.

"AFI's history with and commitment to the television and film community, combined with the breadth and power of Macintosh technology, will provide the tools and information necessary to assist and inspire the visual artists of today and tomorrow."

Announcing the new relationship, AFI Director Jean Firstenberg explained: "Training tomorrow's filmmakers is one of the institute's principal responsibilities. Filmmaking is grounded in a rich tradition of combining creative vision and technical invention.

"The institute is dedicated to providing the resources of the future for filmmakers so that they continue to challenge the elements of current technology. The AFI/Apple Center can play a significant role in supporting the synergy of art and science and promoting growth in the creative realm of film, television and video."

The AFI/Apple Computer Center, expected to be fully operational by the end of this year, will feature a variety of Macintosh systems and will be available for demonstrations, training, conferences and research and development.

LONG BEACH, CA (JUNE 1) BUSINESS WIRE - Travel-minded senior citizens who enjoy a relaxing weekend getaway that does not involve a long driving distance or high costs will appreciate the ''Senior Sunday'' package offered by the Long Beach Airport Marriott.

The Senior Sunday package includes a spacious, comfortable guest room and complimentary twilight dinner-for-two in the charming Cafe Terrace Restaurant -- all for the special rate of $49. The Senior Sunday rate is valid per room, per night, based on space availability.

The resort-like atmosphere of the Long Beach Airport Marriott Hotel offers tastefully decorated guest rooms featuring remote-control television, clock-radios, HBO and other cable channels. For fitness or relaxation, guests can enjoy the indoor/outdoor pools, fully equipped exercise room, saunas and hydrotherapy pool.

Included in the Senior Sunday package is a twilight dinner-for-two in the Cafe Terrace Restaurant served from 5 p.m. to 7 p.m. The June menu includes a choice of roast turkey, one-half roast chicken, broiled snapper or halibut steak.

Open and airy, the restaurant is accentuated by a sparkling fountain and overlooks the beautifully landscaped pool area. After dinner, guests will delight to the comfort and intimate setting of the Lobby Lounge. With its comfortable couches and overstuffed chairs, the Lobby Bar is the ideal setting for enjoying a good book, card game or quiet conversation.

For sightseeing and recreation, the hotel is conveniently located near the Spruce Goose and Queen Mary, Long Beach Museum of Art, several shopping centers and many fine theatre events and cultural events. In addition, the hotel is adjacent to the Skylinks Golf Course, a 72-par rated 18-hole golf course.

The Senior Sunday package offers a $114 savings over a comparable weekend-stay at the hotel. For reservations or more information on the Senior Sunday package please call the hotel at 213/425-5210. Guests will be asked to present their AARP card upon check-in.

The Long Beach Airport Marriott is located at 4700 Plaza Dr. off the 405 freeway at Lakewood Boulevard and Spring Street, just two minutes from the Long Beach Airport.

#90152b0236 06/01/1990 ~Business Wire

SAN FRANCISCO (JUNE 1) BUSINESS WIRE - Like a traffic cop at a busy intersection, Pacific Bell's Television Operating Center will be routing TV pictures of Soviet President Mikhail Gorbachev's Bay Area visit to local, national and international television stations.

As with many major TV news events that happen in the state, such as the 1984 Los Angeles Olympic Games, Pope John Paul II's California visit, and last October's Bay Area earthquake, Pacific Bell, California's telephone utility, plays a major yet little known role in transmitting video signals from remote locations to television stations.

''The TV news crews shoot the pictures and we send those pictures through our telephone network back to their studios,'' said Jim Hickey, broadcast supervisor for Pacific Bell.

For Gorbachev's tour of Stanford University on Monday, Pacific Bell has set up microwave transmitters around campus, including two on the roof of Stanford's Memorial Auditorium. A specially equipped electronic news gathering truck will boost the TV pictures and relay them to the Stanford media center at Maples Pavilion.

From there the signals will travel over video cable to Pacific Bell's Palo Alto central office. Fiber optic lasers will shoot the signals to the company's TV center in San Francisco, which will act as a hub, rerouting video to receiving TV stations.

Video shot by designated TV stations at specific locations will be available to other stations as ''pool'' footage, which Pacific Bell will help route to stations around the world.

Gorbachev's visit comes at a particularly busy time for Pacific Bell's San Francisco TV center, which will be installing, breaking down, transporting and reinstalling equipment for three major event in as many days -- a KRON (local NBC affiliate) telethon on Sunday, Gorbachev's Sunday evening arrival and Monday activities, and statewide TV coverage of California's primary elections on Tuesday.

''Most of the time we know at least a few months in advance that our services will be needed for a major event,'' said Connie Hernandez, manager of broadcast services for Pacific Bell. ''But Mr. Gorbachev's visit to California was only confirmed a couple of weeks ago so we're still getting calls from TV and radio stations for special circuits and audio lines to transmit stories.''

As many as 5,000 journalists are expected to descend on the Bay Area over the weekend to cover the event. Only a select few will be allowed to accompany the Gorbachev entourage from location to location. Most reporters will cover the story via live TV pictures that Pacific Bell will transmit directly into the press rooms at Stanford University and the Fairmont Hotel in San Francisco.

Hickey says Pacific Bell will have a crew of 20 specially trained TV operations experts working throughout the weekend to make sure the world get a chance to view the Kremlin leader's historic visit to the Bay Area.

Pacific Bell is a subsidiary of Pacific Telesis Group, a diversified worldwide telecommunications corporation based in San Francisco.

DENVER (JUNE 1) BUSINESS WIRE - Oxford Consolidated Inc. (NASDAQ:OXCI), a Denver based oil and gas company, announced Friday that it had purchased a total of 181,500 shares of its common stock, or 23 percent of the total outstanding common stock from two Hallwood-Quinoco affiliated partnerships and another shareholder.

Oxford paid a total of $821,000 for the stock.

Oxford also announced that it had entered into an agreement with Great Horn Inc., a New York based diversified energy company, to acquire Great Horn's 5,650,000 shares of common stock of Denver based Premier Resources Ltd. (Boston:PRL.B). This share purchase equals approximately 51 percent of the outstanding Premier common.

Oxford also acquired certain options on additional shares of Premier stock. Oxford agreed to pay $2,260,000, 40 cents per share, for the Premier stock and agreed to contingent payments depending upon the performance of certain Premier non-producing properties.

The consideration for the options on Premier stock consists of a 30 month option to acquire 50,000 shares of Oxford stock at prices between $10.50 and $12. Closing of this transaction is expected to take place before July 1, 1990.

This acquisition is consistent with Oxford's objective of acquiring interests in properties and companies with high quality reserves and attractive cash flow. Premier owns reserves totalling 11 Bcf of gas and 670,000 barrels of oil located in the United States and Canada.

Oxford Consolidated Inc. is an independent oil and gas production and exploration company headquartered in Denver. Oxford's major properties are located in Wyoming, Colorado, Kansas, Louisiana, California and

Michigan.

ANAHEIM, CA (JUNE 2) BUSINESS WIRE - Certron Corp. (NASDAQ:CRTN) Friday announced sales for the second quarter ended April 30 were $4,299,000.

A loss was sustained in the amount of $748,000. Sales for the second quarter ended April 30, 1989 were $8,224,000. The profit for the quarter was $188,000. For the six months ended April 30, 1990 sales were $9,765,000 and net loss was $795,000, as compared to $15,471,000 and $188,000 of sales and net earnings for the six months ended April 30, 1989.

The loss for the quarter ended April 30, included an addition to the reserve for bad debt of $372,000 to cover the amount owing to Certron Corp. by Ames Department Stores. Ames filed for corporate reorganization under Chapter 11 of the Federal Bankruptcy Code on April 25.

The general softening of the economy has caused a decrease in video cassettes during the current year. Contract manufacturing sales were similarly off from second quarter of last year.

Certron Corp. manufactures and distributes audio recording tapes, distributes video cassettes and floppy disks to the consumer market and in its Mexicali, Mexico, facility manufactures and assembles products for other companies.

PHOENIX (JUNE 1) BUSINESS WIRE - BankAmerica Corporation tonight announced that it has acquired the retail network of Western Savings and Loan Association from the Resolution Trust Corporation (RTC) and will begin operating it immediately as Bank of America Arizona.

Western Savings has 61 Arizona branches, primarily in Maricopa County, and one branch in Salt Lake City, Utah. It is estimated to have the third largest share of retail transaction accounts among financial institutions in Maricopa County, with approximately a 12 percent market share.

Services to Western Savings' customers will continue without interruption and Bank of America Arizona will assume all of Western's deposits, totalling approximately $3.5 billion. The Resolution Trust Corporation accepted a bid from Bank of America Arizona of $81 million for these deposits. In addition to the deposits, Bank of America Arizona will initially acquire about $1 billion in consumer and residential mortgage loans from Western Savings, and approximately $2.5 billion in cash and cash equivalents. It has the option to return those loans that do not meet certain criteria to the RTC. The bank is not acquiring Western's subsidiaries.

BankAmerica said that the transaction will result in the purchase of deposit accounts and performing consumer and residential real estate loans of Western Savings. The RTC will be retaining commercial real estate loans, other types of commercial loans and any asset that is not performing. In essence, said BankAmerica, it will be acquiring the best of Western's deposits and loans.

BankAmerica also announced the appointment of David Weymouth, 42, as president of Bank of America Arizona. Weymouth recently joined BankAmerica from ABQ Bank, Federal Savings Bank, in Albuquerque, New Mexico, where he was president and chief executive officer.

BankAmerica Corporation is the nation's third largest bank holding company and, in 1989, posted record earnings of $1.1 billion. BankAmerica has one of the highest equity capital ratios of the ten largest U.S. banking companies. As of the end of the first quarter, 1990, BankAmerica had assets of $101 billion, deposits of $82 billion, and loans of $78 billion.

#90152b0380 06/01/1990 ~Business Wire

REDMOND, WA (JUNE 1) BUSINESS WIRE - Nintendo of America Inc. announced Thursday that it filed a lawsuit in U.S. District Court in San Francisco against Lewis Galoob Toys Inc. of South San Francisco, for copyright infringement.

The suit claims a new Galoob product called Game Genie, which is designed for play with a Nintendo (R) home video game system, creates ''derivative'' works of Nintendo copyrighted video games, in violation of U.S. law.

Galoob's Game Genie is connected to a Nintendo video game cartridge and inserted into a Nintendo home video game hardware unit. When operated, Game Genie changes certain essential features of a Nintendo video game.

For example, in Nintendo's popular ''Super Mario Bros.'' (R) video game, Game Genie can be used to alter the main character's (Super Mario's) speed or cause him to float through the air to avoid obstacles originally programmed into the game.

The number of ''lives'' a player can lose before the game ends can be made indefinite and the player can skip entire levels of game play and take shortcuts to progressively more difficult ''worlds,'' or game levels, which a player must enter in order to complete the game. Nintendo said that Game Genie can be connected to other Nintendo and Nintendo licensee games and used to alter and affect the play of these games as well.

Nintendo executives first learned of Game Genie when Galoob issued a media release on May 8, announcing the product. Nintendo's lawyers immediately put Galoob on notice of its claim of copyright infringement; Galoob responded by filing a lawsuit for ''declaratory relief'' against Nintendo in U.S. District Court in San Francisco on May 17. Galoob's declaratory relief suit seeks a court order that Game Genie does not infringe Nintendo copyrights.

After Galoob filed its lawsuit, it agreed to demonstrate Game Genie to Nintendo executives. The company said that Galoob had expressed interest in obtaining a license from Nintendo to market Game Genie under the Nintendo ''Quality Assurance Seal'' licensing program. The company said that it had advised Galoob executives on Thursday, May 31, of its decision not to enter into a license with Galoob and of its decision to file suit in U.S. District Court in San Francisco.

According to Howard Lincoln, Nintendo's senior vice president, Game Genie represents a serious threat to many valuable Nintendo copyrighted video games.

The Redmond-based company is the headquarters for the company's marketing operations in North America, and is a subsidiary of the world's largest

manufacturer and marketer of video games, Nintendo Co., Ltd.

#90152b0610 06/01/1990 ~Business Wire

EAST HANOVER, NJ (JUNE 1) BUSINESS WIRE - The Ultimate Corp. (NYSE:ULT) and its subsidiary Ultimate Data System (UDS) in Wilton, Conn., have installed a $5.8 million fault-tolerant Sequoia Series 300 computer system that will eventually support more than 2,000 simultaneous users for Newport News, Va.-based Ferguson Enterprises Inc.

Ferguson is the United States' largest supplier of plumbing, heating and industrial supplies. The installation, which automates virtually every aspect of Ferguson's multilocation plumbing distribution business, is the largest Sequoia system ever installed and the largest centralized Pick system in the world.

Ferguson's Ultimate-supplied Sequoia Series 300 replaces and consolidates the operations of seven Ultimate computer systems in regional data centers throughout the Southeast and Midwest.

Ferguson Enterprises Inc., a division of Wolseley plc of the United Kingdom, is the largest wholesale plumbing distributor in the United States, with operations in 19 states and the District of Columbia, with revenues in excess of $600 million.

Ferguson installed its first Ultimate-supplied systems in 1984. Since the initial installation, Ferguson has installed 10 additional Ultimate systems and these are now being consolidated into one centralized location in Virginia to achieve better control of management information, more timely reports, greater accurancy of business transactions, improved customer service and increased productivity.

The Sequoia Series 300, Model 364, is a multiprocessor system that provides fault-tolerant on-line transaction processing (OLTP) capabilities. The Series 300 is noted for its consistent high-performance superior on-line expansion capacity and an architecture that is readily adaptable to change. The system provides Ferguson with both a Pick and UNIX operating environment.

According to Jay Walther, National Acounts Manager for UDS, the Sequoia system installed at Ferguson incorporates 16 Motorola MC68030 processors

in a single tightly coupled fault-tolerant computer with 512 MB of memory and 17.3 gigabytes of mirrored disk.

UDS is a leading supplier of integrated software and computer systems solutions to wholesale electrical and plumbing and industrial distributors. Its products include SHIMS (Supply House Information System) installed and used by over 450 wholesalers in North America.

SHIMS is written for Pick and Pick-like operating environments and provides such diverse and important functions as quotations, order entry, billing, purchasing, inventory control and accounting functions for the plumbing, heating, electrical and industrial supply markets.

Ultimate provides business solutions to companies of all sizes by integrating system-level software and applications software on hardware platforms from premier computer vendors such as Bull HN, Hewlett-Packard, IBM and Sequoia.

The firm also provides education, training, consulting and field-maintenance services to customers across a wide range of vertical markets. In addition to its domestic operations, Ultimate has subsidiaries in the United Kingdom, Canada, France and Australia.

CUPERTINO, CA (JUNE 1) BUSINESS WIRE - Symantec Corp. (NASDAQ:SYMC) Friday announced the appointment of Robert P. Lee as executive vice president, products.

Lee will manage Symantec's independent product group organizations with profit/loss responsibility for all Symantec products, technology and corporate marketing.

Lee joins Symantec from Shared Medical Systems (NASDAQ:SMED), a Malvern, Penn., hospital information systems vendor, and from an 11-year career with IBM Corp.

Shared Medical Systems (SMS) is the leading vendor of hospital information systems with 1989 revenues of $390 million and 4,000 employees, worldwide.

Most recently, Lee was senior vice president, technical affairs, at SMS

corporate headquarters with management responsibility for all product definition and development, and responsibility for over 1,000 people.

In addition, while at SMS, Lee managed one of the largest revenue-producing data centers in the United States. Lee is credited with creating a coherent strategy for the SMS product portfolio and strengthening relationships with major customers. He managed the on-time and on-quality delivery of major new SMS product lines.

Prior to SMS, Lee spent 11 years at IBM Corp. where he managed software development efforts for various divisions. Lee left IBM in 1988 as business area manager, office systems, where he had worldwide system management responsibility for current and future IBM office systems products (leading to the announcement of OfficeVision). In this position he worked extensively with IBM customers and other IBM operating units.

Lee holds a Ph.D. in computer science from the University of California at Los Angeles.

Symantec is a leading international software company which provides award-winning application and system software products for IBM PC and Apple Macintosh computer users. Founded in 1982, Symantec is a public company traded on the NASDAQ National Market System. The company is based in Cupertino.

SAN JOSE, CA (JUNE 1) BUSINESS WIRE - Helios Systems Inc. has recently introduced 8MB, 16MB, 32MB and 64MB expansion memory boards for Sun Microsystem's SPARCstation 330.

The board's design provides the most flexible and economical way to enhance the speed and performance of SPARCstation software operations.

Competitively priced, volume shipments are available immediately direct from Helios, as well as from manufacturers' representatives and distributors worldwide.

Helios products are assembled in-house using state-of-the-art manufacturing technology, including stringent burn-in and test procedures. Each product also comes with a 30-day money back guarantee and lifetime

warranty. The boards are 100 percent Sun-compatible and are user installable.

The MS330 series is a 3U, special double-height form factor board organized into two main memory banks. Each bank is further subdivided into two in-line memory blocks and populated with Helios 1MB and 4MB SIMMs. Each block contains 4 SIMMs or 36 DRAMs, providing 32 data bits and four parity bits. Parity generation and detection is performed by the CPU board.

Page mode SOJ dynamic memory chips are used in the Helios SIMMs and have an access time of 100ns or less.

Helios Systems, a division of Piiceon Inc., is a fully integrated manufacturing, test and design company, owned by Dynatech Corp. (NASDAQ:DYTC). Founded in 1986, Helios Systems is a major supplier in workstation compatible memory and storage products, a full-line, third-party manufacturer of SIMMs, VME memory boards and SCSI storage devices.

Helios also offers custom memory boards for non-Sun platform vendors, OEMs and VARs. For more information, contact: Helios Systems Inc., 1996 Lundy Ave., San Jose, Calif. 95131. Telephone 408/432-0292; Fax 408/943-1309.

BOCA RATON, FL (JUNE 1) BUSINESS WIRE - Hemodynamics Inc. (NASDAQ:HMDY) and its subsidiary Myo-Tech Corp. (NASDAQ:MYOT) Friday announce unaudited results for the first quarter ended March 31.

On a consolidated basis (i.e. including Myo-Tech), Hemodynamics' results included approximately $477,889 in sales for the three months ended March 31, 1990 and a net loss for the quarter of approximately $429,629 as compared to $1,028,714 in sales, and net loss of $692,532 for the comparable quarter in 1989.

With respect to Myo-Tech, results for the first quarter ended March 31, 1990 included $117,444 in sales and net loss of $280,792 as compared to $237,484 in sales and net loss of $295,191 for the comparable quarter in 1989.

Eugene Brown, chairman of both companies, stated that while sales were down for the quarter, the Profit Improvement Program that was instituted in late 1989 resulted in a reduction of selling and administrative

expenses of $683,000 for the quarter compared to the prior year. Of this saving, $150,700 was applicable to Myo-Tech Corp.

Brown, at the direction of the board of directors is continuing to meet with several merger candidates.

#90152b0634 06/01/1990 ~Business Wire

WEST PATERSON, NJ (JUNE 1) BUSINESS WIRE - Prospect Park Financial Corp. (NASDAQ:PPSA) Friday announced that it expects to record an additional charge in the fourth quarter of fiscal 1990, ended April 30.

The charge will primarily reflect further write-downs of the value of certain real estate ventures involving wholly-owned subsidiaries of Prospect Park Savings Bank, as well as increases in the bank's reserves for possible real estate losses. The company recognized related charges of $20.0 million (before taxes) for the nine months ended Jan. 31, 1990, and has announced plans for the gradual phase-out of the operations of its real estate development subsidiaries.

The bank's ability to continue to comply with applicable regulatory requirements would depend to a large extent on the level of the charge and the reserves established, and the resulting effect on the company's results of operations for fiscal 1990. At Jan. 31, 1990, the bank had tangible and core capital, as defined, of $40.4 million or 6.9 percent of adjusted total assets, compared with respective requirements of 1.5 percent and 3.0 percent.

Risk-based capital was $44.7 million or 8.8 percent of risk-weighted assets, compared to a 6.4 percent requirement. However, as of July 1, 1990 the bank will be required to deduct from its regulatory capital 10 percent of the aggregate amount of investments in and extensions of credit to subsidiaries and joint ventures thereof engaged in real estate development activities, which amounted to $8.4 million at Jan. 31, 1990. Accordingly, the company believes that it is likely that it will not meet its risk-based capital requirement on or prior to July 1, 1990. In the event that a bank does not meet any one of its regulatory capital requirements, it would be required to file a capital plan with the Office of Thrift Supervision (OTS).

Frignoca also announced that the bank has received a supervisory directive from the New York District of the OTS which, among other things, limits the growth of the Bank during any fiscal quarter. In addition, the bank generally may not enter into, invest in, commit to or purchase:

construction loans (with the exception of construction loans up to $500,000 on primary residential properties); acquisition, development and construction loans or projects; or joint venture agreements. The bank has requested permission to exempt construction loans to facilitate the sale of properties owned by the bank or its affiliates in accordance with its divestiture plan, subject to specified underwriting standards and other requirements. Frignoca indicated that the New York District of the OTS is currently considering this request.

Prospect Park Financial Corp. is the holding company for Prospect Park Savings Bank, SLA. Founded in 1926, the Bank operates seven full-service branches in northern New Jersey.

TUSTIN, CA (JUNE 1) BUSINESS WIRE - CMS Enhancements Inc. (NYSE:CME) Friday announced an O.E.M. agreement with Symantec Corp. (NASDAQ:SYMC) to include Symantec Utilities for Macintosh (SUM II) with the Platinum Series internal and external SCSI hard-disk subsystems.

The Platinum Series of hard-disk subsystems includes internal and external models which provide an effective mass-storage solution for single users as well as the most sophisticated networking environments. The disk subsystems range in capacity from 20Mbytes to 1Gbyte and offer access times as fast as 26.5ms and reliability ratings of up to 100,000 hours MTBF.

Symantec's SUM II is a comprehensive set of disk utilities that perform crashed-disk and deleted-file recovery, back-up, disk optimization and data security. Beginning June 1, 1990, SUM II will ship with all CMS models of the Platinum Series, from 20 Mbytes to 1Gbyte.

Symantec is a leading international software company which provides award-winning application and system-software products for IBM-PC and Apple-Macintosh-computer users. Founded in 1982, Symantec is based in Cupertino.

CMS Enhancements, a leading supplier of Apple-compatible hard-disk subsystems, is a $200 million company producing data storage devices and accessories for computers manufactured by Apple, IBM, Compaq, Digital Equipment Corp., NEC, Toshiba, Tandy, AT&T, Sun Microsystems, Commodore,

AST and others.

The firm, with headquarters in Southern California, ships more than 50,000 hard-disk and tape- backup drives per month to 1,500 dealers and distributors in 61 nations.

LOS ANGELES (JUNE 1) BUSINESS WIRE - Carolco Pictures Inc. (NYSE:CRC) announced Friday that an agreement has been signed whereby Pioneer LDCA Inc., an indirect wholly owned subsidiary of Pioneer Electronic Corp., will purchase from Carolco a new series C convertible preferred stock for a total purchase price of $60 million.

The preferred stock will be convertible into common stock of Carolco Pictures Inc. at a price of $18.50 per share. The preferred stock will pay a yearly dividend of 5 percent until the time of conversion.

Pioneer LDCA will also purchase a warrant entitling Pioneer to purchase 300,000 Carolco shares at a price of $18.50 per share. The announcement was made by Carolco Chairman Mario Kassar.

The agreement includes granting to Pioneer LDCA rights of first refusal to worldwide rights to Carolco titles on laser disk format. Pioneer LDCA will own approximately a 10 percent stake in Carolco and will appoint two representatives to join Carolco's board of directors.

Carolco also announced that an agreement has been signed whereby Pioneer LDC Inc., a separate subsidiary of Pioneer Electronic Corp., will license all Japanese rights to a group of upcoming theatrial titles from Carolco. The titles include: ''Terminator II,'' ''The Doors,'' ''LA Story,'' ''Dead Reckoning,'' ''Universal Soldier,'' ''Gale Force,'' ''Blood Moon,'' ''Dangerous Passion'' and ''Two-Fisted Tales.''

''The Doors'' and ''LA Story'' are currently completing principal photography. ''Terminator II'' and ''Dead Reckoning'' are both in pre-production and scheduled to begin principal photography in the fall. ''Gale Force'' and ''Universal Soldier'' will begin principal photography in early 1991. ''Blood Moon'' and ''Dangerous Passion'' have completed filming, while ''Two-Fisted Tales'' is currently in production.

Carolco Pictures is the leading independent producer of major motion pictures and Pioneer LDCA is the leading disc distributor in the United

States. Pioneer Electronic Corp. is the world's leader in laserdisk hardware and software manufacturing and distributing.

For more information contact Thomas K. Levine, vice president/corporate development, Carolco Pictures Inc., 8800 Sunset Blvd., Los Angeles, Calif. 90069.

NEW YORK (JUNE 1) BUSINESS WIRE - Bowne & Co. Inc. (ASE:BNE) announced Firday that Jeff Chipman has been named president of Bowne's Canadian operations.

Chipman's appointment is effective immediately. He replaces Rudolf Steinmetz who is retiring after 33 years of service with Bowne and Plow & Watters, a company Bowne acquired in 1984.

Chipman is moving to Bowne of Canada from Abitibi-Price Inc. where he was a corporate vice president. In making the announcement Richard H. Koontz president and CEO of Bowne & Co. Inc., said ''Jeff's extensive background in both marketing and operations will be valuable to us as we continue our ongoing efforts to further expand our financial and commercial printing business in Canada.'' Chipman added, ''Bowne of Canada has a reputation for solid performance and I look forward to the challenge of continuing this strong showing in the future.''

Bowne of Canada currently operates commercial and financial printing facilities coast-to-coast with offices in Toronto, Montreal, Vancouver and Calgary. Chipman will be located in Toronto where he currently resides with his wife.

Headquartered in New York with 33 offices in the United States and Canada, as well as affiliates around the world, Bowne & Co. Inc. today handles more of the world's financial printing than any other company. Its Canadian operations also compete strongly in Canadian commercial printing markets.

Bowne serves attorneys, investment bankers, corporate officers and government officials by meeting their document building and communications needs worldwide. These documents include registration statements, proxy materials, prospectuses, tax-exempt bond offering circulars, tender offers private placements and reports to stockholders.

FORT WASHINGTON, PA (JUNE 1) BUSINESS WIRE - Greenwich Pharmaceuticals Inc., through its wholly-owned subsidiary Greenwich Pharmaceuticals International Inc., announced Friday that it has entered into a license and developement agreement for amiprilose HC1 with Kissei Pharmaceutical Co. Ltd.

Under the terms of this agreement, Greenwich granted to Kissei the exclusive right to develop and commercialize amiprilose HC1 in all dosage forms and for all indications in Japan and Southeast Asia, excluding the People's Republic of China and the Republic of China. In exchange for these rights, Greenwich will receive from Kissei royalty payments on all sales of amiprilose HC1.

The agreement also provides for a technology transfer fee of approximately $6 million consisting of an initial payment worth over $3 million and two additional payments based upon the completion of specific product development milestones.

Additionally, Kissei has agreed to purchase for $3 million dollars, units of Greenwich common stock with each unit consisting of one unregistered share of Greenwich common stock and one warrant to purchase one share of unregistered Greenwich common stock. These funds will be directed toward the design, synthesis and development of new carbohydrate compounds.

Kissei, located in Matsumoto, Japan, is a publicly-held pharmaceutical company dedicated to the discovery, development and commercialization of a broad range of pharmaceuticals. Kissei currently markets ethical pharmaceutical products including drugs to treat inflammatory diseases, asthma, allergies, gastrointestinal and cardiovascular diseases.

In 1989, Kissei had total sales of approximately $160 million and was ranked as the 5th most profitable pharmaceutical company in terms of ordinary income to sales among the listed pharmaceutical companies in Japan.

Amiprilose HC1 is currently being developed by Greenwich as an oral treatment for rheumatoid arthritis and as an oral and topical treatment for psoriasis. Greenwich has granted to Syntex Corp. the co-exclusive right (together with Greenwich) to manufacture and sell amiprilose HC1 for the treatment of rheumatoid arthritis in the United States. Greenwich has

also granted to Syntex exclusive marketing rights to amiprilose HC1 in Canada, Mexico, the Bahamas, Australia, New Zealand and Brazil.

Greenwich is a development stage company in business to identify, develop and market synthetic carbohydrate drugs for the treatment of chronic inflammatory diseases.

#90152b0657 06/01/1990 ~Business Wire

OAKLAND, NJ (JUNE 1) BUSINESS WIRE - Diagnostic/Retrieval Systems Inc. (ASE:DRS.A, DRS.B) Friday reported a net loss and lower revenues for the fourth quarter and fiscal year ended March 31, 1990.

The net loss for fiscal 1990 amounted to $(8,393,000), or $(1.49) per share, compared with net earnings of $3,995,000, or 71 cents per share, for fiscal 1989. Revenues fell to $57,468,000, an 18-percent decrease from revenues of $70,357,000 posted last year.

The net loss for the fourth quarter was $(2,612,000), or (47 cents) per share, compared with net earnings of $904,000, or 16 cents per share, for the last quarter of fiscal 1989. Revenues were $19,442,000, down slightly from revenues of $19,454,000 for the same three-month period in the previous year.

Backlog at March 31, 1990, was approximately $42 million, as compared with backlog of approximately $61 million at the same time a year ago. The 31-percent decline in backlog was due mainly to delays experienced in the receipt of program funding. Shortly after the close of the year, DRS received additional contract awards amounting to $14 million.

The decrease in revenues for the year primarily was due to reduced shipments of signal-processing and recording systems in addition to U.S. Government procurement delays associated with the Advanced Video Processor (AVP) program.

The net loss for the year was attributable mostly to lower revenues and significant increases in costs and expenses arising during the period.

The company recorded charges of approximately $12.9 million for the year, including $3.5 million occurring during the fourth quarter. These charges were attributable primarily to cost overruns as a result of unanticipated technical problems and subsequent delays on the AVP program during the year as well as to unabsorbed overhead and general and administrative expenses associated with supporting the AVP program.

These charges were incurred because the production order, originally scheduled to be received by the company on Sept. 1, 1989, has not yet been released by the U.S. Navy.

The AVP program was awarded to DRS in 1987. For this program, the company is developing advanced display workstations for frontline U.S. Navy surface ships engaged in antisubmarine warfare.

Diagnostic/Retrieval Systems designs and manufactures special-purpose computer and display systems, as well as recording, trainer and optical systems for military and industrial applications.

PUEBLO WEST, CO (JUNE 1) BUSINESS WIRE - Nona Morelli's II Inc. (NASDAQ:NONA), announced Friday that it has agreed to double the monthly volume of its private labeling sauce production for Brand Mark International.

The agreement with Brand Mark International now calls for average monthly private label production of between 2,500 to 3,000 cases of sauce, up from 1,000 cases a month. This equates to an additional $300,000 to $400,000 in yearly revenue and is expected to open up an additional 25 states where the product will be distributed.

Nona Morelli is a manufacturer and marketer of fresh pack pasta and pasta sauces under its own brand as well as private labels, and the company recently introduced a line of microwaveable pasta and sauces packaged in individual portions.

Dwight Erickson, president of Minneapolis-based Brand Mark, said that, ''Nona Morelli has been one of our primary suppliers for our Ryko Premium brand. We feel that Nona produces a quality product and we are pleased to increase our needs as our company brands grow in popularity.''

Brand Mark International is a supplier of branded and private labelled ethnically-based fresh food products to outlets in 25 states.

BASKING RIDGE, NJ (JUNE 1) BUSINESS WIRE - James A. Skidmore Jr., chairman and CEO of Science Management Corp. has named Edward D. Williams to the position of managing director of the Business Information Systems Division.

Prior to this position, he was a senior consultant to the chairman of Science Management Corp.

Williams is responsible for the development and growth of the company's programming consulting business (SMC - Business Information Systems Division) located in the New York/New Jersey Metropolitan area.

Previously, Williams was vice president of operations at Chantico Publishing and vice president of MIS and chief information officer at Blue Cross/Blue Shield of New Jersey.

In addition, he spent 17 years as vice president and chief information officer at American Broadcasting Companies, New York City. His 30 years of

diversified management and management consultant experience, includes Western Union, Union Carbide Corp., Cresap, McCormick and Paget, General Electric Co., and Republic Aviation Corp.

Williams participated on various data processing committees for the United States Navy (Civilian Advisor), the National Industrial Traffic League and the American Association of Railroads.

He also participated as a speaker in data processing for AAR, AMA, IBM, SPA, and several other data processing organizations. He has served as the ABC representative to the New Jersey Chamber of Commerce, as well as a member of the advisory board of the YWCA (TWIN) and the Profit Oriented Systems Planning Board. Williams is listed in several data processing directories, in ''Who's Who in the East,'' and ''Who's Who in Finance and Industry.''

Williams served in the U.S. Army from 1948 to 1952. He received many service decorations, including the Silver Star with oak leaf cluster, Bronze Star with V, and Purple Heart with two oak leaf clusters.

Williams is a graduate of Hofstra University where he majored in industrial management and pursued an MBA at Fairleigh Dickinson University.

LOS ANGELES (JUNE 1) BUSINESS WIRE - The board of directors of First Interstate Bancorp (NYSE:I) have declared a quarterly cash dividend on the company's common stock, $2 par value.

A quarterly cash dividend of 75 cents per share on the company's common stock is payable June 29, 1990, to stockholders of record on June 10, 1990. This action means that the record date will precede the beginning of the pricing period for the company's Dividend Reinvestment and Stock Purchase Plan. The pricing period for the second quarter begins on June 11, 1990.

The board will act on the dividends for the Series A Preferred Stock and the Adjustable Rate Cumulative Preferred Stock, Series B, at its regularly scheduled board meeting on June 11.

The June dividend payment, totaling $45 million, will be paid to nearly 40,000 shareholders of record who hold First Interstate's 59.9 million common shares outstanding. On an annual basis, the common dividend equals $3 a share. This is the 128th consecutive quarterly dividend paid by the Los Angeles-based multistate banking and financial services company since it began operations in 1958.

First Interstate provides the largest geographical coverage of any retail and business banking system in the United States. Including licensees, First Interstate Banks operate nearly 1,200 full-service offices in 21 states. These offices serve 5 million households in more than 650 communities, including seven of the 10 fastest- growing metropolitan markets. Other offices serve U.S. and international customers in 19

countries.

SUNNYVALE, Calif. (JUNE 1) BUSINESS WIRE - Kalok Corp., a rapidly growing manufacturer of low cost, high reliability, 3.5-inch Winchester disk drives, announced Friday that it has closed the first round of a $24 million financing package.

The package includes equity obtained from four international investment and/or industrial firms: Mitsubishi Mining and Cement Co. Ltd. (MMCC), Tokyo; Sunwestern Investment Group, Dallas; Techno-Venture U.S.A. Inc., a wholly owned subsidiary of Techno-Venture Co. Ltd., Tokyo; and Tokyo Venture Capital, Tokyo. The dollar breakdown by participants is undisclosed.

''This financing allows us to continue executing our aggressive growth strategy by boosting production to over 100,000 drives per month to meet customer demand,'' stated Wayne Lockhart, president of Kalok. ''Also, we are now positioned to penetrate the Japanese market.''

Lockhart said that ''Kalok and MMCC will form a joint venture, KALOK-JAPAN LTD., with an office based in Tokyo. The joint venture will allow Kalok to mount a sales and marketing effort in Japan in addition to starting an international purchasing office.

Kalok Japan will be under the direction of Dr. Richard Emori, a well-known international expert in small scale modeling and a professor emeritus of Tokyo's Seikei University. Dr. Emori, who has significant business and technical liaisons with the technology, finance and business communities, has been appointed president.''

The financing will also allow the newly formed joint venture to pursue other business opportunities under the direction of Emori.

The four investing companies include:

-- Mitsubishi Mining and Cement Company Ltd., Tokyo, a $1.2 billion diversified company. The company's business include electronics, bioceramics and cement, as well as other interests in natural resources. MMCC recently announced that they have agreed in principle to a merger with Mitsubishi Metals, Tokyo, to form a company with combined yearly revenues of over $6.5 billion.

Sunwestern Investment Group is a venture capital and small business investment consortium headquartered in Dallas. Sunwestern concentrates investments in computers, peripherals, components and software, as well as consumer media and broadcasting, and certain consumer products. The company currently has over $135 million under management.

Techno-Venture U.S.A. Inc. is a venture capital subsidiary of Techno-Venture Co. Ltd., Tokyo, which has been serving as an international bridge for venture activities by providing financial and other assistance of corporate partnering, joint venture and M&A transactions.

Established in 1952, the company is headed by Dr. Yaichi Ayukawa, a life member of MIT Corp. and Visiting Committees and an innovative investor. It has ties with several U.S. venture capital firms. The company has approximately $110 million under management and has invested in more than 200 emerging technology companies, of which the majority have been U.S. companies.

Tokyo Venture Capital, Tokyo, is a venture capital investment company which belongs to The Dai-Ichi Kangyo Bank Ltd. group, and has a history of over 16 years. Tokyo Venture Capital Co. Ltd. is one of the most famous and leading venture capital firms in Japan with nearly $500 million under management by way of investments and loans.

Kalok Corp. manufactures the Kalok Octagon family of 3.5-inch hard disk drives with capacities from 20MB to 85MB. Through efforts of its highly experienced design team, Kalok has achieved a major breakthrough in disk drive design which results in significantly higher reliability and much lower cost.

Kalok's proprietary design eliminates over half the mechanical parts used in conventional 3.5-inch disk drives. The Octagon I series features 20MB, 30MB and 40MB capacities and 33ms. average seek times. Second generation Octagon II models feature 40MB, and 85MB capacities and 25ms. seek times. All Octagon drives have extended operating temperature ranges, from 10 degrees C. to 55 degrees C. Kalok's products are sold through OEM and distribution channels.

Kalok Corp. currently produces drives at its facility in the Philippines as well as in South Korea, and maintains technical support centers in the Far East, Europe and the United States.

The company is located at 1289 Anvilwood Ave., Sunnyvale, Calif. 94089.

#90152b0670 06/01/1990 ~Business Wire

MOORPARK, CA (JUNE 1) BUSINESS WIRE - Tandon Corp. (NASDAQ:TCOR) announced in Europe Friday a major breakthrough in 486 technology and price performance with the introduction of its 486-sl computer.

The company said that the addition of this fully IBM-compatible, entry-level 25 MHz product to its family of high-performance workstations is already in production, with shipments having commenced in Europe this week.

A representative configuration, complete with 110 megabyte hard disk drive is priced at under $5,000, close to half the price of comparable 486 computers available in Europe.

This breakthrough has been achieved by the use of Tandon Corp.'s ''MIAT'' chip set which has integrated memory mamangement functions, thereby enabling the product to be manufactured in a slimline form. This chip set allows for a flexible definition of ''cacheability'' and ''shadowing,'' thus considerably increasing system performance.

In addition, Tandon's proprietary circuitry known as ''PowerPoster'' enhances the throughput of the 486 system. It accepts 32 bit writes from the processor at zero wait states, thereby freeing up the processor to execute other instructions, while also supporting pipeline writes to the MIAT chip set. The ''PowerPoster'' technology has a considerable cost advantage over conventional ''cacheing'' used by other manufacturers.

S.L. Tandon, chairman, president and chief executive officer, said: ''We feel this product complements Tandon Corp.'s 486/25 MHz and 486/33 MHz desktop and Tower versions.

''The 486/25 was recently acknowledged as one of the fastest workstations available and with this new system Tandon will continue to establish itself as a major player in the high-end workstation market.''

Tandon further noted, ''In the last few quarters the continued growth in the sales of our high-end products has made an increasing contribution to the improvement in the company's profitability.''

The product is expected to be introduced in the U.S. market in the third quarter of this year.

Tandon, founded in 1976, is a multinational company involved in research and development, manufacture and marketing of IBM-compatible laptop and desktop personal computer systems and subsystems.

Ranked one of the leading business PC suppliers in Western Europe, Tandon

is a publicly held company traded in the over-the-counter market (National Market System) under the NASDAQ symbol ''TCOR.'' Tandon has headquarters in Moorpark.

CORAL GABLES, FL (JUNE 1) BUSINESS WIRE - BLOC Development Corp. (NASDAQ:BDEV) and Centel Federal Systems Inc., Reston, Va., Friday announced that they have entered into definitive corporate licensing and reseller agreements to relating to BLOC's F3 Forms Automation System.

As part of the agreements, Centel Federal will use the F3 System internally and resell it as stand-alone products and as part of its Integrated Image and Information Management (I3M) product group to both government and commercial customers.

BLOC will market Centel Federal's I3M products in non-government markets.

The F3 System is a professional high-end software product for complete business forms composition and processing. I3M provides a way to capture, manipulate and store data, text and images. The I3M system's capabilites

include multi-usage windowing, full-text applications, fax output and information distribution via electronic communication.

''We are pleased to be entering into a relationship with such an experienced federal integrator,'' said Frank Millman, BLOC's chairman and CEO.

''Inititally, BLOC's F3 Forms Automation System is slated to be marketed by large specialized systems integrators and forms manufacturers. Consequently, systems integrators like Centel Federal are an important link to the market,'' Millman continued.

Centel Federal, based in Reston, provides computer and telecommunciations-base systems integration and professional services to federal government agencies. The company has more than 20 years of experience in the federal technology marketplace.

Based in Coral Gables, BLOC develops, publishes and markets business, personal productivity and information management software products for the IBM PC, PS/2, IBM compatible and Apple Macintosh markets.

VANCOUVER, BRITISH COLUMBIA (JUNE 1) BUSINESS WIRE - The common stock of Bunker Hill Mining Co. Inc. began trading on May 29, 1990 in the NASDAQ market, Jack W. Kendrick, president and chief executive officer announced.

Bunker Hill Mining, whose trading symbol is ''BNKRF,'' is engaged in the mining and extraction of zinc, lead and silver. The company's operations are conducted through its wholly-owned subsidiary, Bunker Hill Mining Co. (United States) Inc., located at Kellogg, Idaho, owner and operator of the historic Bunker Hill mine and Crescent mine.

Kendrick noted that Bunker Hill Mining's entry into the NASDAQ market provides brokers and others with immediate access to the best bid and asked prices and other information about the company's shares throughout the trading day. Those prices are available over more than 150,000 electronic terminals in brokers' offices throughout the United States and the free world.

Trading data are also distributed widely through wire services for selective dissemination by newspapers and radio and television stations.

In addition to increased market visibility, NASDAQ gives Bunker Hill Mining Co. Inc. the advantage of multiple market makers that compete to offer the best bid and asked prices, as opposed to a single specialist on the floor of a stock exchange.

LOS ANGELES (JUNE 1) BUSINESS WIRE - ''Effective July 3, 1990, Mexicana Airlines will begin thrice-weekly flights from Orlando (Fla.) to Cancun with continuing service to Mexico City,'' announced Eduardo Ruiz, senior vice president for the carrier's U.S. and Canada operations.

''Orlando will become Mexicana's 14th U.S. gateway and the third in Florida. The Mexican Caribbean, specifically Cancun, is fast becoming the number one destination for leisure travel in Mexico. Mexicana's new service to Cancun will provide greater accessibility for Floridians to visit Mexico's magical destination,'' added Ruiz.

A special introductory fare of only $149 round-trip from Orlando to Cancun is being offered by Mexicana until July 31. (Subject to government approval.)

While in flight, passengers will enjoy Mexicana's exclusive Golden Aztec Service, which includes a choice of entrees, complimentary French champagne and red wine, open bar serving complimentary domestic brand cocktails, and personalized attention from Mexicana's flight attendants.

Combining the best of both the Caribbean and Mexico, Cancun has an ideal climate (240 days a year of total sunshine), clear turquoise waters, miles of unspoiled white powder sand beaches, posh hotels, excellent shopping and world-renowned snorkeling. Cancun is also the gateway to the richest archaelogical region in the western hemisphere.

Mexicana flight 326 departs Orlando at 4:50 p.m. and arrives in Cancun at 4:40 p.m. If Mexico City is your final destination, flight 326 arrives at 7:26 p.m.

Mexicana flight 327 departs Mexico City at 9:15 a.m. and arrives in Cancun at 11:10 a.m., departs Cancun at 11:55 a.m. and arrives in Orlando at 3:40 p.m.

Mexicana flights 326 and 327 operate on Tuesdays, Thursdays and Saturdays.

For reservations or additional information, call your travel agent or Mexicana at 800/531-7921.

MILPITAS, CA (JUNE 1) BUSINESS WIRE - LSI Logic Corp. said Friday its Headland Technology affiliate has signed an agreement to supply Hewlett-Packard (Canada) Ltd. with up to $20 million of advanced video graphics boards for use in HP Vectra PCs.

Designed by Headland, the boards will be manufactured in Canada by LSI Logic Corp. of Canada Inc.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 94,000 employees and had revenues of $11.9 billion in its 1989 fiscal year.

Headland Technology, with headquarters in Fremont, Calif., manufactures graphics boards and logic chip sets used in IBM-compatible personal computers. LSI Logic Canada is a publicly held company with headquarters

in Calgary, Canada. Both are members of the LSI Logic Corp. family of companies. LSI Logic Corp., with revenues of $547 million in 1989, has nearly 4,000 employees.

The company manufactures ASICs, RISC microprocessors, digital signal processing circuits, chip sets and graphics boards at factories in the United States, Japan, Europe and Canada.

PORTLAND, ME (JUNE 1) BUSINESS WIRE - UNUM Life Insurance Co. has acquired the individual disability insurance division of Constellation Assurance Co. of Toronto, Canada, for an undisclosed amount.

The division employs 60 people and is headquartered in Toronto with eight branch offices throughout Canada. Gordon N. Tyndall, current head of the division, will continue to manage operations.

The name, UNUM CANADA, currently used for marketing UNUM's existing accident and health insurance, and group disability insurance in Canada, also will be used for the newly acquired individual disability operation. UNUM Life Insurance Co., formerly Union Mutual Life Insurance Co., began doing business in Canada in 1868.

UNUM CANADA's individual disability operation offers non-cancellable and guaranteed renewable disability plans, distributed through brokers and sponsored relationships with life insurance companies. Disability insurance replaces a portion of a person's income lost due to disability.

''The division's established market relationships and UNUM's extensive disability knowledge will combine to benefit our Canadian customers with superior product accessibility and quality,'' said Richard B. Dalbeck, executive vice president of UNUM's individual disability operations.

Tyndall added, ''UNUM is recognized as a leading disability insurance underwriter. We look forward to joining UNUM and working toward continued growth and expansion.''

UNUM Life Insurance Co. is a subsidiary of UNUM Corp. (NYSE:UNM), a specialty insurance holding company with assets of $8.5 billion. Based in Portland, UNUM is the leading provider of disability insurance in the United States and also markets retirement income and long term care products.

LISBON, IA (JUNE 1) BUSINESS WIRE - BioTechnica Agriculture Inc., a wholly owned subsidiary of BioTechnica International Inc. (NASDAQ: BIOT), has received approval from the United States Department of Agriculture (USDA) to field test genetically engineered corn plants at its corn breeding station near here.

"BioTechnica will be the first company to conduct a field test of corn plants modified through genetic engineering," according to Dr. David Glass vice president of government and regulatory affairs for BioTechnica.

The field test follows BioTechnica's announcement last January that company scientists were the first to demonstrate that corn plants possessing an introduced gene were stable, fertile, and capable of transmitting the gene to the next generation of plants.

The field test, which is scheduled to begin next week, is designed to study the growth of the transformed corn under field conditions, and to gather environmental data for use in future field tests.

"The corn plants in this test are modified to contain marker genes used to verify successful transformation and to track the inheritance of introduced genes," Dr. Glass said. "Future field tests will include corn containing commercially important modifications."

BioTechnica is developing corn, soybean, alfalfa and wheat plants, genetically altered for improvements such as interest resistance and enhanced yield or nutrition. The company has conducted several other field tests, including one last year with tobacco plants modified to contain a gene encoding high levels of the essential amino acid lysine. This gene is being introduced into corn to create high-lysine corn hybrids.

Headquartered in Overland Park, Kan., BioTechnica Agriculture is the commercial agircultural subsidiary of BioTechnica International. BioTechnica Agriculture owns five regional seed companies that eventually will market improved corn hybrids and other biotechnology products.

These companies are: McAllister Seed, Mt. Pleasant, Iowa; Horizon Seed, Lincoln, Neb.; L. Herried Seed, River Falls, Wis.; JM Schultz Seed, Dietrich, Ill.; and Donley Seed, Ashland, Ohio. Improved corn hybrids will also be marketed by Terra International, a major agricultural input supplier that has funded the company's corn research since 1986.

BioTechnica conducts its research at laboratories in Cambridge, Mass., and Minnetonka, Minn., as well as at nine field research and breeding stations including the Lisbon station.

PROVIDENCE, RI (JUNE 1) BUSINESS WIRE - Providence Gas Co., a subsidiary of Providence Energy Corp. (AMEX:PVY), has received final approval from the Rhode Island Division of Public Utilities and Carriers to purchase South County Gas Co., headquartered in Westerly, R.I.

The closing on the acquisition will be held in early June. Providence Gas will purchase South County's natural gas distribution assets for approximately $3 million, including the assumption of $2 million of debt and liabilities.

The proposed acquisition was announced on March 27, 1990. The Division approval calls for Providence Gas to lower the base rates of South County customers by three percent within 60 days of the closing. The change will lower the yearly bill of the average residential central heating customer by $18.50.

Once the purchase is finalized, South County Gas will be managed as a separate division of Providence Gas Co. Some administrative functions may be centralized, and gas supply planning and purchasing will be combined to allow South County customers to immediately benefit from Providence Gas Co.'s larger and more diverse gas supply function.

However, no changes in personnel or customer service procedures are planned for the foreseeable future.

Providence Gas Co. is Rhode Island's largest natural gas distribution company, serving more than 146,000 customers in 20 cities and towns. South County Gas Co. has 15 employees serving more than 3,600 customers in Westerly and Hopkinton, R.I. The company also has franchise rights in Charlestown and Richmond, R.I.

DALLAS (JUNE 1) BUSINESS WIRE - Super Club Retail Entertainment announced today the acquisition of Movies at Home, a 10-unit video retail chain which is headquartered in, and operates out of, the Kansas City metropolitan area.

Midwest Video, a used tape brokerage company, is also included in the

acquisition. The management team of Don Marchi and Peter Gencarelli, who together founded the businesses in 1984, will continue to run the day-to-day operations.

In making the announcement, Darrell Baldwin, chairman and CEO of Super Club Corporation, said, ''Movies at Home is attractive to us for many reasons. Their Kansas and Missouri locations--and plans for expansion--are compatible with Super Club's strategy for geographic concentration. Movies at Home's stores, which average 5,300 square feet, have a high-quality, upscale image that meets the criteria for further development of the super-store format. We are pleased to welcome Gencarelli and Marchi to our Super Club family, and feel that their valuable experience will contribute greatly to our company.''

The acqusition of Movies at Home brings the number of Super Club's retail outlets in the United States to over 400. Other retail subsidiaries include Alfalfa/Movietime, Record Bar/Tracks, Turtle's and Video Towne Entertainment. The parent company, Super Club, N.V., headquartered in Belgium, is the largest privately held video retailer in Europe.

NEW HAVEN, CT (JUNE 1) BUSINESS WIRE - Southern New England Telephone Friday announced that it will seek higher rates for the first time in eight years.

The company will be formally notifying the Department of Public Utility Control (DPUC), within the next several weeks, of its intent to file higher rates. The filing will be subject to public hearings before the DPUC and new approved rates won't be reflected in customers' bills until the beginning of next year.

''Our customers have enjoyed a long period of rate stability,'' said SNET Chairman and Chief Executive Officer Walter H. Monteith Jr. ''We have not raised customer rates for eight years. In fact, during that time, there have been rate decreases.

''Our employees have worked hard to control costs and stimulate revenues, but after eight years, we have reached the point where higher rates are now absolutely essential to continue to provide customers with good service,'' said Monteith.

Southern New England Telephone needs an additional $80 to $90 million, which would result in approximately an eight to nine percent increase in

annual revenues. The company's last rate request in 1982 was for $128 million, an 18 percent increase in annual revenues.

The company said that the Consumer Price Index (CPI) has increased 34 percent since 1982 compared to the eight to nine percent increase the company needs at this time. It noted that, over the past eight years, the cost of telephone poles has increased 21 percent, basic installation vans 37 percent and pay phones 55 percent.

At the present time, the company expects to propose an increase in basic residential and business rates in the range of 15 to 20 percent. A specific rate package will not be available until July.

Rates for some of our other services may also increase, stay the same or -- in some cases -- decrease depending on factors such as costs and market conditions. For example, the company will not ask for an increase in 10-cent coin telephone or directory assistance rates and will propose that in-state long distance service, currently priced well above rates for comparable in-state calls in nearby states, should be reduced.

The DPUC currently has scheduled public hearings for the summer and fall. The final schedule and procedures for these hearings will be determined by the DPUC.

PARK RIDGE, NJ (JUNE 1) BUSINESS WIRE - Construction spending for heavy equipment rentals in March and April increased 32 percent from last year for Hertz Equipment Rental Corp. (HERC), according to the company's president, Daniel Kaplan.

This announcement comes on the heels of Friday's report issued by the Commerce Department, which notes that construction spending fell by .7 percent for the month of April, continuing the trend of a .7 percent decrease in March.

Whereas the Commerce Department's report indicates a decline in expenditures in the building industry, the increase in HERC revenues supports the theory that businesses are continuing to spend money for rental equipment for non-residential construction.

The National Association of Home Builders (NAHB) reports similar declines in multi-family residential starts. According to the Economics Division of NAHB, the 1990 first quarter housing starts fell by 15.4 percent over the same period in 1989.

Kaplan commented that the disparity of various government reports detailing decreases in construction spending and housing starts -- and HERC's announcement of an increase in revenues -- indicates that there is a strong movement among non-governmental agencies to rent heavy equipment rather than purchase it.

Hertz Equipment Rental Corp., based in Park Ridge, is the largest supplier of rented and leased heavy equipment in the country. A fully diversified subsidiary of The Hertz Corp., HERC has a staff of approximately 1,700 employees and maintains close to 100 branches in more than 25 states and Europe, including the United Kingdom, France and Spain.

WAYNE, NJ (JUNE 1) BUSINESS WIRE - Christopher J. Rankin, a director of London-based P&O Containers Ltd. and chief executive officer of the North American Trades, Friday announced that Trans Freight Lines (TFL) -- P&O's U.S. subsidiary -- will formally be known in the United States as P&O Containers effective immediately.

The name change culminates a series of moves begun in 1988 to consolidate and streamline services and operations including documentation, billing and cargo tracking.

''We believe that the combined efforts of TFL and P&O Containers provides our customers with a uniquely comprehensive network of services that can deliver goods door-to-door in a timely and cost efficient manner,'' Rankin noted.

The affiliation between P&O Containers and Trans Freight Lines actually began three years ago, when P&O Containers purchased 50 percent of TFL.

At the time of the initial purchase agreement, Trans Freight Lines already had a network of 23 offices in the United States and a well-established reputation as an aggressive and innovative shipping line with over 14 years of experience.

P&O Containers is one of the largest and most technically advanced shipping lines in the world, with over 150 years of experience in ocean transportation.

P&O Containers moved more than 400,000 container loads of cargo last year over trade routes that serve more than 100 countries on five continents.

P&O Containers provides an extensive network of intermodal services that link North America and the Caribbean with Northern Europe, the Mediterranean, the Middle East, Africa, Asia.

HOUSTON (JUNE 1) BUSINESS WIRE - Team Inc. (AMEX:TMI) Friday announced the amendment of its $23.5 million credit facility with NCNB Texas National Bank.

The agreement, as amended, provides for a $35 million credit facility and contains terms more favorable to the company. The facility consists of a $25 million revolver due Oct. 31, 1991 which is renewable annually and may be converted to a term note payable over five years; a $7 million term note due June 30, 1994; and a $3 million real estate term note maturing Dec. 31, 1997.

Interest under the agreement is at the prime rate with a Libor and CD rate option applicable to the revolver. The agreement is unsecured with the exception of the real estate term note and contains less restrictive debt covenants.

Team's Chairman and President H. Wesley Hall stated, ''This gives the company added flexibility to fund Team's long-term growth.'' At Feb. 28, the close of its third quarter, the company had outstanding $9.6 million in long-term debt under its bank credit agreement.

Team Inc. provides repair, specialty and transportation services primarily

to industrial customers and privatized services to governmental entities. The company has 50 operating locations in 23 states and serves the international market through licensee agreements in 10 countries.

NEW YORK (JUNE 1) BUSINESS WIRE - Bell & Howell Ltd. of Toronto and Teletrak Advanced Technology Systems Inc. (OTC) have signed a three-year distribution agreement whereby Bell & Howell will market Teletrak's new Optical Data System in Canada.

Under the agreement, Bell & Howell has been given the rights to market and distribute Teletrak's proprietary software with a fully integrated PC-based system named Lasertrack. The new system will expand Bell & Howell's commitment to provide high quality advanced products in the Optical Data and Image Management Systems area.

''This agreement represents a key stage in Bell & Howell's new product direction to offer stand-alone and networked optical data systems, in addition to our microfilm-based Computer Assisted Retrieval (CAR) systems '' said Malcolm R. Cocks, National Marketing Manager for Bell & Howell's Canadian Document Management Products Division.

Added Richard L. Miller, president, Teletrak's Sales/Marketing Division, ''The Bell & Howell relationship clearly supports our mutual belief that there is a significant demand for optical data and image management in the North American marketplace.''

Lasertrack is a 386 PC-based Optical Disk System for archiving and indexing computer output print data. ASCII or EBCDIC data on standard 9-track 1600/6250 BPI tapes is transferred at high speed to 5-1/4'' WORM (write-once-read-many) digital optical disks. Lasertrack software creates indices based on typical reference criteria such as invoice number S.I.N., account number, name, supplier number and so on. Up to 750,000 data pages can be archived, indexed, stored and retrieved from one 5-1/4'' optical disk.

Teletrak is a software development company and system integrator specializing in optical data information storage and retrieval systems with prinicpal offices in New York, Atlanta, and San Francisco.

Bell & Howell Ltd., a leading supplier of Mailhandling Systems and Microfilm Storage and Retrieval Systems, has sales and service offices located throughout Canada. The company provides computer assisted

document management solutions for paper-based filing problems.

CHICAGO (JUNE 1) BUSINESS WIRE - Answering machine owners are no longer limited to touch-tone phones or beepers when calling home for messages.

Friday, AT&T (NYSE:T) introduced the first answering machines that responds to rotary phones and voice responses.

The answering machines also are the first to store up to four different outgoing messages. The two-line models are the first to answer calls on one line while taking a message on the other line.

When calling for messages from rotary or dial pulse phones, users enter

their security codes and retrieve messages by responding to prompts from the machine.

''Now, answering machine owners can get their messages from virtually any phone, anywhere in the world,'' said Rob Davis, AT&T product manager for answering systems.

''For example, people vacationing at a mountain cabin or a beach cottage with only a rotary telephone available won't have to jump in the car and drive to the nearest pay phone to get their messages,'' Davis said.

AT&T is introducing the answering machines, a two-line cordless telephone, six feature telephones and a caller identification unit at the Consumer Electronics Show, which starts Saturday. The products are available at AT&T Phone Centers and retail stores nationwide.

Two of AT&T's new answering machines are two-line models, designed for the growing number of households, home offices and small businesses with two telephone numbers.

AT&T's two-line models answer incoming calls on one line while simultaneously taking a message on the other line. The machine asks the second caller to wait to leave a message and then allows that caller to leave a message after the first caller is finished.

With the two-line machines, users can record four separate outgoing messages and then choose at different times which to use for answering each line.

AT&T's new two-line cordless phone features sound quality as good as AT&T's regular telephones. It works for up to seven days without recharging and has a speakerphone built into the base unit, allowing users to answer calls there when the handset is in another room.

The AT&T Call Display 64 is for use with caller identification services provided by local telephone companies. Users who subscribe to the local service can use the display to view the phone number of incoming calls. It also stores the phone numbers and times of the last 64 calls, whether they were answered or not.

NASHVILLE, TN (JUNE 1) BUSINESS WIRE - Edmund B. Fitzgerald, former chairman of the board of Northern Telecom Ltd., was honored Friday at a ceremony in Tokyo as the first non-Japanese to receive a special telecommunications achievement award.

The Minister of Post and Telecommunications, Takashi Fukaya, presented the citation for Fitzgerald's contributions to the development of the telecommunications industry and its impact on society.

In presenting the award, Fukaya said that Fitzgerald ''positively approached the Japanese telecommunications market and contributed greatly to the internationalization of that market.

''He also assisted in educating the global business community about the Japanese telecommunications market,'' said Fukaya, ''by proving that a 'good product' could enter the Japanese market.''

In 1986 Northern Telecom became the first and continues to be the leading non-Japanese supplier to the Japanese telephone network.

''Through Mr. Fitzgerald's efforts,'' added Fukaya, ''advanced telecom technology was introduced into Japan, which contributed greatly to the

further progress of the Japanese telecom industry.''

Telecom Weeks, June 1 through June 15, were established in Japan in 1985 on the occasion of the first year of telecom liberalization, which marked the decision by the Ministry to introduce new competition to the Japanese telecommunications market.

The Telecom Weeks are designed to promote the understanding of telecommunications by the Japanese public and the Ministry of Post and Telecommunications awards are held to commemorate this occasion.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems. Its revenues in 1989 were approximately $6.1 billion. Its common shares are listed on the Montreal, Toronto, Vancouver, New York, London and Tokyo stock exchanges.

NEW YORK (JUNE 1) BUSINESS WIRE - Salvatore G. Pastore, vice president of Quantum Chemical Corp. and president of the Suburban Propane/Petrolane Division has expressed a desire to retire having completed the successful integration of Petrolane following its purchase by Quantum and First Boston in 1989.

Pastore joined the accounting department of Suburban Propane in 1962. Following assignments in Suburban's eastern division as vice president, senior vice president and executive vice president, he was named president of the eastern division and assistant vice president of Suburban Propane in 1981.

He was appointed executive vice president of Suburban Propane Gas Corp. in 1985 and was named a vice president of Quantum and general manager of its Suburban Propane Division in 1986.

Pastore became president of Suburban Propane in 1988.

Effective June 1, Mark J. Anton has been appointed president of the Suburban/Petrolane Division. Anton, 64, recently retired as an executive vice president of Quantum Chemical Corp. and was until 1988 president of its Suburban Propane Division. He had been chairman of Suburban Propane Gas Corp. for 20 years prior to its acquisition by Quantum in 1983.

NEW ORLEANS (JUNE 1) BUSINESS WIRE - GTS Corp. (NASDAQ:GTSC) announced Friday that, as a result of a transaction completed yesterday, GTS has assumed the United States business operations of Teknica Inc. a privately held firm based in Houston.

Teknica Inc. is engaged in providing highly sophisticated seismic data processing services to the oil and gas exploration industry. In its most recently completed fiscal year, Teknica Inc. had revenues in excess of $3,000,000.

Edwin Generes, chief executive officer of GTS, commenting on the transaction said: ''The addition of Teknica's operations to our data processing business is an especially good fit. The type of sophisticated processing done by Teknica not only provides a new dimension to our basic business, but also enables GTS to provide even higher value-added to our integrated data bases.

''Although at this time it is difficult to forecast the exact effect Teknica's operations will have on GTS revenues, we expect there to be an immediate positive effect on GTS earnings,'' Generes continued.

GTS formed a wholly owned subsidiary, GTS/Teknica Inc. in which to carry on the business of Teknica Inc.

GTS Corp. provides seismic information and processing services to the oil and gas industry. GTS has offices in Houston, New Orleans, Oklahoma City Denver, Midland and Bakersfield, Calif.

SUNNYVALE, CA (JUNE 1) BUSINESS WIRE - Ikos Systems Inc. announced the filing of a registration statement with the Securities and Exchange Commission relating to its proposed initial public offering of 3.1 million shares of common stock.

Of the shares being offered, the company will sell 2.5 million shares, the selling stockholders will sell 544,103 shares, and the underwriters will sell 55,897 shares upon exercise of warrants purchased from certain of the selling stockholders.

It is currently anticipated that the initial public offering price will be

between $6.00 and $7.50 per share. The company will have 10,742,744 shares outstanding after the offering.

Alex. Brown and Sons Inc. and Montgomery Securities will co-manage the offering. A copy of the preliminary prospectus can be obtained from the offices of Alex. Brown and Sons Inc., 135 E. Baltimore St., Baltimore, Md. 21202, or Montgomery Securities, 600 Montgomery St., San Francisco, Calif. 94111. The company plans to use the proceeds of the offering for working capital and general corporate purposes.

Ikos develops, markets and supports high-performance hardware-assisted systems for simulation of application-specific integrated circuits (ASICs) and ASIC-based electronic systems.

The company's system can be integrated with a variety of electronic design automation (EDA) tools and workstations to design ASICs that can be produced by all major ASIC manufacturers.

ASIC simulation libraries have been developed using the company's proprietary library development tools for LSI Logic, VLSI Technology, Toshiba, NEC, NCR, Texas Instruments, Mitsubishi, Gould/AMI, and OKI, among others.

Ikos has recently concluded a joint marketing, joint development and OEM agreement with Mentor Graphics Corp., a leading supplier of EDA tools. The company's customers include AT&T, Eastman Kodak, Fujitsu, IBM, Mitsubishi, NEC, Tandem Computers, Texas Instruments, and Xerox.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction.

LONDON (JUNE 1) BUSINESS WIRE - British Gas (NYSE:BRG) is pleased to announce that The Rt. Hon. Peter Walker, member of Parliament, has

accepted an invitation to join the board of the company as a non-executive director, effective Friday.

Walker is the member of Parliament for Worcester and was, until recently, Secretary of State for Wales.

''We are very pleased indeed that Mr. Walker has agreed to join the board of British Gas,'' said Robert Evans, chairman and chief executive of British Gas.

''His wide background and experience as a business man and his remarkable knowledge and understanding of the international oil and gas markets will add considerable strength and expertise over a whole range of business issues.''

Walker earned a high reputation as a businessman when in the 1950s and 1960s he created an international insurance broking business, was involved in the creation of the first post-war unit trust and was on the board of a number of important public companies.

His political career has been equally dynamic. He entered Parliament in 1961 and became the youngest member of the Shadow Cabinet in 1965 and the youngest member of the Cabinet in 1970.

He has been a memeber of all the Conservative Cabinets since 1970. On two occasions, as Secretary of State for Trade and Industry in 1972 and as Secretary of State for Energy in 1983, he was responsible for the energy industries of the United Kingdom.

British Gas, headquartered in London, is the largest integrated gas company in the Western World and is primarily involved in the purchase, transmission, and sale of natural gas to domestic, industrial and commerical customers in Great Britian.

Important support activities to its marketing efforts include appliance trading and customer service to domestic gas customers.

British Gas is also active in the exploration for and production of hydrocarbons both offshore and onshore. Expertise developed in the gas business is offered for sale overseas through the British Gas International Consultancy Service. British Gas American Depositary Receipts are traded on the New York Stock Exchange. One ADR is equivalent to the ten ordinary shares.

CLEVELAND (JUNE 1) BUSINESS WIRE - Ameritrust Corp. announced today the formation of a Credit Policy and Risk Administration Group. The newly formed group is charged with implementation of corporation-wide risk policy. The group's initial emphasis will be in the areas of commercial and retail lending.

E. William Haffke, executive vice president of the corporation, leads the group whose functions include expanded credit control and compliance, corporate risk management, credit analysis, loan review and appraisal, portfolio acquisition and divestiture, loan documentation, and credit training.

Jerry V. Jarrett, chairman and CEO of Ameritrust Corp., commented, "This consolidation of the risk management functions will place our corporation in a strong position to deal with the changing dynamics of the banking industry.

"Today we are experiencing increased competition and greater risk as we innovate to meet that competitive challenge. Industry issues such as credit quality, deregulation and increased review by regulatory agencies affect our business decisions as never before.

"Bill Haffke brings an extensive legal background, a depth of organizational experience and an extensive knowledge of regulatory issues to his new position. His experience and problem solving skills will be critical to the success of the Group."

Haffke began his career at Ameritrust in 1976 as an attorney, and has held positions of increased responsibility in the areas of banking law and planning. He previously had responsibility for corporate development and administration. Prior to joining Ameritrust, he served as an attorney with Jones, Day, Reavis and Pogue. Ameritrust Corp. is a $10.7 billion multi-bank holding company headquartered in Cleveland.

ROCKY RIVER, OH (JUNE 1) BUSINESS WIRE - Sis Corp. yesterday withdrew its First Amended Joint Plan of Reorganization from the Bankruptcy Court's consideration because the financing necessary to fund the Plan could not not be obtained.

The Bankruptcy Court instructed the company to file a new plan within 45 days. Based on conversations with its present lenders and other interested parties, the company believes that the next plan to be filed will propose a sale of the assets of the company to various parties and will not provide any payment or other consideration to the shareholders of the company.

Until a sale of the assets occurs, the company intends to continue to operate its restaurants as presently authorized by the Bankruptcy Court. The company has been under protection of the Bankruptcy Court since Feb. 28, 1989, at which time it filed a voluntary petition for relief under Chapter 11 of the Bankruptcy Code.

MEMPHIS, TN (JUNE 1) BUSINESS WIRE - Memphis-based Union Planters Corp. Friday completed the acqisition of North Arkansas Bancshares Inc., marking the first out-of-state purchase of Arkansas banks.

North Arkansas Bancshares Inc., (NABS), is a multi-bank holding company headquartered in Jonesboro, Ark., with approximately $418 million in assets.

NABS's principal subsidiary is the $270 million Mercantile Bank with 10 locations in Jonesboro, Bay, Bono and Brookland, Ark. Terms of the agreement call for $237.00 per share in cash for 100 percent of the stock of NABS. The total value of the transaction is approximately $36 million. The merger was originally announced last October.

This acquisition brings the total assets of Union Planters Corp. to $4.4 billion and the total number of affiliate banks to 19.

HOPKINTON, MA (JUNE 1) BUSINESS WIRE - EMC Corp.'s Vice-chairman and co-founder Roger Marino will be resigning from his day-to-day activities effective June 15th.

Marino will, however, remain a director of the company, which he started with present Chairman and Chief Executive Officer Richard Egan in a small office in Newton, Mass., in August of 1979.

Marino cites a desire to spend more time with his wife and children,

including twin boys born earlier this year, for his decision.

''I am very proud of what we have achieved over the past 11 years,'' said Marino. ''We were able to break the $100 million revenue barrier after only seven years in business. Over the past 18 months we have recruited a top shelf senior management team in addition to which we have placed the company in a strong cash position and have virtually no debt.''

Marino added that: ''I will be spending some time with EMC in a consulting capacity over the next year as well as pursuing my first love, teaching.''

As the company grew from a supplier of Prime Computer compatible memory cards to an innovator of a broad range of storage systems for several computer platforms Marino filled many roles usually focusing on the sales and marketing aspects of the business. As Vice-chairman, Marino has been responsible for managing EMC's line of IBM mainframe compatible storage products. EMC and Storage Technology Corp. have recently signed a series of OEM agreements for these products.

EMC Corp. manufactures high performance central and expanded storage products and storage subsystems for IBM mainframe and midrange, DEC VAX, Hewlett Packard and Wang VS computer systems.

PORTLAND, ME (JUNE 1) BUSINESS WIRE - Maine Savings Bank, a subsidiary of The One Bancorp (NASDAQ:TONE), based in Portland, Friday announced agreements in principle for the sale of four Maine banking offices and the sale of portions of its consumer loans, Roy P. Hibyan, president and chief operating officer of Maine Savings, announced.

Definitive agreements on the office sales are expected within the next 45 days, and finalization of transactions is expected prior to year end. Terms of the agreements were not disclosed. All sales will require regulatory approvals.

''This is another step in the advancement of our regulatory capital plan '' Hibyan said. ''Completion of the transactions will reduce assets of Maine Savings Bank by approximately $125 million.'' At March 31, 1990, Maine Savings had total assets of $1.5 billion.

Maine Savings has agreed to the sale of its Brewer, Bucksport and North Windham offices to Peoples Heritage Bank and its South Paris office to Androscoggin Savings Bank. ''The decision to sell the North Windham

office arose out of negotiations on other branches,'' Hibyan said.

Its Brewer, Bucksport and South Paris offices were among nine offered for sale on January 11 (others offered at that time were Bangor Mall, Bangor Main Street, Orono, Old Town and Waterville). Negotiations for Camden and one other office continue.

Hibyan stated, ''In all the offices to be sold, current staff will continue. Banking office customers will want our people to stay, and the purchasing banks know the value of keeping staff with high service standards. We re pleased that these offices will be sold to well-established, Maine-based banks.'' Home Equity Lines Sold -- Servicing Remains With The One

In another transaction designed to advance its capital plan, Maine Savings sold over 1,200 loans, representing $22.6 million worth of home equity loans, to Key Bank of Maine. Terms of the sale were not disclosed. Bank officials emphasized that the servicing on those loans will remain with Maine Savings.

''What this means is that loan customers will continue to make payments to us, the terms of their credit agreements won't change, and we shall continue to handle any questions customers may have either now or later.'' Customers who have loans which are part of the sale will be notified by Maine Savings next week.

Maine Savings Bank is a state-chartered, FDIC-insured stock savings bank and currently has 29 banking offices throughout Maine.

The One Bancorp is a $2.3-billion, Maine-based bank holding company with FDIC-insured banking subsidiaries in Maine, Connecticut and Massachusetts.

BOSTON (JUNE 1) BUSINESS WIRE - BayBanks Inc., announced Friday that its subsidiary, BayBanks Middlesex, Burlington has received regulatory approval to assume the deposits and operate the offices of The Home National Bank of Milford, Mass.

The offices, which are in Milford, Franklin, Grafton, Hopkington, Medway and Uxbridge, will reopen next Monday June 4, as branches of BayBank Middlesex. Depositors of Home National automatically will become

depositors of BayBank Middlesex.

BayBank Middlesex will assume deposit accounts with an aggregate balance of about $440 million for which it has agreed to pay the Federal Deposit Insurance Corp. (FDIC) a purchase premium of $2 million. BayBank Middlesex will also purchase Home National's cash and securities. At its option, BayBank Middlesex may purchase other assets at a later date. As part of the transaction, the FDIC will retain Home National assets with a book value of about $380 million and will advance about $350 million in cash to BayBank Middlesex.

BayBank Middlesex had total assets of $4.1 billion and deposits of $3.6 billion on March 31, 1990 The bank's 96 branch offices and 132 fully automated facilities serve communities throughout Middlesex, Essex and Worcester counties.

BayBanks Inc. is a $9.8 billion commercial bank holding company with eight banks serving over 170 cities and towns in Massachusetts and Connecticut through an extensive distribution system of 224 full service offices and 309 fully automated banking facilities. The stock of BayBanks Inc. is traded over the counter through the NASDAQ National Market System under the symbol BBNK.

WASHINGTON (JUNE 1) COMTEX - The 8-K report filed at the SEC shows on April 23, 1990, Diagnostic Sciences Inc. and Brumar Industries Inc. signed a letter of intent to form an acquistion company for the purpose of acquiring two companies with which Brumar had previously held acquisition agreements. Under the agreement, Diagnostic will invest $500,000 in the venture in exchange for all preferred stock and 50.1% of all common stock of the new company. Brumar will hold the other 49.9%.

Under the agreement, 55% of all outstanding shares of the new company will be needed to approve any action by shareholders. Diagnostic's investment obligation is subject to either Brumar's or Diagnostic's obtaining financing in the amount of $3 million, unless the deadline is extended.

The agreement provides no assurance that the new company, to designated as a Diagnostic subsidiary, will succeed in acquiring the two prospective subsidiaries of that company.

Both Brumar and Diagnostic agree that they will at all times vote all of

their held shares for the election of Bruce Jagid and Martin Rasansky (officers of Brumar) and Gerry Angulo (an officer of Diagnostic) as the sole three directors of the new subsidiary and of the two prospective companies, should they be acquired.

Simultaneous with the closing of the purchase of the two prospective companies by the subsidiary, Diagnostic will issue warrants to Mr. Jagid and Mr. Rosansky, so that they might each purchase 1 million shares of Diagnostic common stock at a price of $0.50 per share at any time before Dec. 31, 1990. Further, so long as Mr. Jagid and Mr. Rosansky each own $100,000 in Diagnostic common stock or warrants, Diagnostic will use its "best reasonable efforts" to have them elected to the board of directors of Diagnostic.

#90152c0044 06/01/1990 ~Comtex
WASHINGTON (JUNE 1) COMTEX - The 8-K report filed at the SEC shows on May 11, 1990, 3CI Inc. dismissed the firm of Coopers & Lybrand as the company's independent public auditor, engaging in its stead the firm of

Norris and Wood, P.C., of Fort Collins, Colorado.

The decision for the change in public auditors was approved by both the board of directors and the audit committee of the company.

For the previous two years, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

There were, however, explanatory paragraphs present within Cooper & Lybrand's audit of the company's financial statements for the fiscal years ended March 31, 1989 and 1988. For 1989, they concerned changes in revenue recognition methods for maintanance and support fees, an uncertanty regarding the recoverability of capitalized software development costs, an uncertanty concerning a lawsuit and a Securities and Exchange Commission order of investigation, and a continued uncertanty as to 3CI's ability to continue as a going concern. For 1988, the statements contained a qualification about an uncertanty regarding a lawsuit.

For the previous two years, there were no disagreements between those former auditors and the company.

Also during the previous two years, 3CI did not consult with Norris and Wood on any matters related to its business, its audits or its corporate policies and practices.

-30- 361
#90152c0056 06/01/1990 ~Comtex
WASHINGTON (JUNE 1) COMTEX - The National Association of Securities Dealers launched a new service today designed to provide greater regulatory supervision and easier trading access for thousands of over-the-counter stocks which are not traded on its NASDAQ computerized trading system.

The inaugural OTC Bulletin Board service, an automated quotation system for thinly traded stocks, will allow, but not require, brokers to electronically enter firm bid and asked prices, non-firm quotes and unpriced indications of interest continuously throughout the day.

The NASD is responsible for regulating the over-the-counter stock market and the NASDAQ system. The 4,300 issues traded on NASDAQ are required to meet a minimum set of quantitative listing requirements which include maintaining total assets of $2 million and capital and surplus of $1 million. The NASD is presently awaiting Securities and Exchange Commission approval to boost its NASDAQ listing requirements to $4 million in total assets and $2 million in capital and surplus.

The NASD estimates there are an additional 47,000 securities which may be eligible to trade in the non-NASDAQ over-the-counter market. Of those, approximately 13,000 to 20,000 are listed on the pink sheets. The pink sheets, so named because of the color of paper they are printed on, are published daily by the National Quotation Bureau based in Jersey City, New Jersey. Many securities listed in the pink sheets have no pricing information and the National Quotation Bureau takes no responsibility that any prices quoted in the pink sheets will be honored.

There are key differences between the NASDAQ system and the new bulletin board service. The NASDAQ system requires firm bid and asked prices available on a real-time basis, with aggregate trades of market makers reported daily. NASDAQ National Market System securities, which are governed by stricter regulations than regular NASDAQ issues, are subject to last sale reporting and require all transactions to be reported within 90 seconds of execution.

The OTC Bulletin Board will provide brokers the ability to electronically enter and update price quotes on pink sheet firms throughout the day instead of once daily. The NASD believes this will help provide visibility, liquidity, investor interest and enhanced electronic surveillance for the thousands of over-the-counter stocks not traded on its NASDAQ system. In addition, it is also expected to boost the visibility of several hundred foreign issues listed on the pink sheets because they do not meet the stiffer disclosure requirements of NASDAQ and other exchanges.

"The bulletin board will provide greater efficiency," said Enno Hobbing, who heads the NASD's communications department. "Before you would have to be on the phone to three different brokers to find the best price for a pink sheet stock. With on-line access, this will make it much easier."

Hobbing added that 27 NASD broker-dealer members have already signed contracts to use the bulletin board.

WASHINGTON (JUNE 1) COMTEX - The 8-K report filed at the SEC shows on May

9, 1990, Digital Solutions Inc. acquired all issued and outstanding capital stock of Temp Staff Inc. of New Jersey. As compensation, Donald W. Kappauf and Constantine P. Margarites, the former owners of Temp Staff, received 233,333 and 100,000 authorised and unissued common shares of Digital Solutions, respectively. Further, 25,000 authorized and unissued shares of Digital were paid to Karl W. Dieckmann for services rendered related to the transaction. All of these new owners of Digital hold their shares for investment purposes only.

Temp Staff is principally engaged in the business of providing temporary and contract personnel to Central New Jersey businesses. With the transaction, Temp Staff became a wholly-owned subsidiary of Digital.

With the acquisition, Mr. Kappauf entered a two year employment contract with Digital, beginning May 9, 1990. Constantine Margarites entered into a two year employment contract with Temp Staff, serving as vice-president, commencing on that same date. Mr. Kappauf was on that date also elected president of Digital; he remains president of Temp Staff. Both Kappauf and Dieckmann were elected directors of Digital.

#90152c0086 06/01/1990 ~Comtex

WASHINGTON (JUNE 1) COMTEX - The registration statement filed at the NASD shows Photronics Inc. proposed to offer a secondary sale of 1.45 million shares of its common stock. Of that offering, 1.2 million shares are offered by the company, and the remaining 250,000 shares are being offered by selling shareholders. The last price quoted for that common stock on May 30, 1990 was $11.75 per share.

Proceeds from the proposed sale will be used to repay borrowings of a revolving credit agreement with Chemical Bank, of which $5.55 million was still outstanding as of April 30, 1990.

#90152c0087 06/01/1990 ~Comtex

WASHINGTON (JUNE 1) COMTEX - The registration statement filed at the NASD shows Command Security Corp. proposed to offer for initial public sale 750,000 shares of common stock at an offering price of $5.00 per share.

The proposed offering is being underwritten by the Suart-James Co. Inc.

Command Security is engaged in the business of providing security services in New York and Connecticut for commercial, financial, industrial and governmental clients. Proceeds from the proposed sale will go toward the reduction of indebtedness and toward working capital.

The executive office of Command Security Corp. is located at Route 55, Lexington Park, Lagrangeville, New York 12540, and its telephone number is (914) 454-3703.

#90152c0094 06/01/1990 ~Comtex
WASHINGTON (JUNE 1) COMTEX - The Securities and Exchange Commission approved a one-year pilot program yesterday designed to give greater access and enhanced competition for the buying and selling of the largest issues in the NASDAQ system.

On a 3-1 vote, SEC commissioners gave the go-ahead for the American Stock Exchange, Philadelphia, Boston and Midwest exchanges to engage in unlisted trading of NASDAQ National Market System securities. The New York Stock Exchange declined to participate in the program.

Unlisted trading allows the exchanges to buy and sell shares without requiring the issues to pay fees or sign listing agreements.

The pilot program authorizes the exchanges to each trade up to 100 NASDAQ-NMS securities.

"Allowing exchanges to trade NMS stocks should generate greater access and enhance competition for the trading of such stocks," said Christine Sakach head of the SEC's national market system branch.

Separately, the SEC voted yesterday to solicit public comment on a proposal allowing U.S. investors to participate in certain tender and exchange offers in the U.S. based on foreign regulations where the U.S. shareholdings constitute a relatively small amount of the total transaction.

The proposal was enacted due to concerns that U.S. investors may be left out of foreign tender and exchange offers because foreign issues wish to avoid the costs of complying with U.S. disclosure requirements.

BAGHDAD (JUNE 1) - A radical Palestinian group claiming responsibility

for a seaborne anti-Israeli assault said Friday that the operation was aimed at military targets and stressed that it had not attacked civilians.

The Palestine Liberation Front (PLF) of Abul Abbas, in a communique received here by Agence France-Presse, warned that "no Israeli military target in occupied Palestine is beyond the reach of Palestinian fighters and can be reached by air, sea or land, regardless of the distance."

The Israeli army on Wednesday said it had killed four Palestinian commandos and captured 12 others as they tried to land on two beaches aboard speedboats north and south of Tel Aviv in preparation for a major attack on civilian centers.

One boat managed to reach the coast but came under fire from Israeli helicopters and troops, while a second was seized further out to sea and surrendered without a fight, according to the army.

No Israeli casualties were reported.

The United States denounced the attempted raid and threatened to break off a dialogue with the Palestine Liberation Organization, of which the PLF is a member, unless PLO Chairman Yasser Arafat condemned the operation as a terrorist attack.

The PLF statement said the commandos planned to strike at "enemy military positions along the coast of Palestine" and described the operation as "consistent with the will of our people."

It said two groups of commandos landed on the coast and seized control of a road linking Tel Aviv to Ashkelon in the south and Herzilyya in the north.

The fighters engaged the army for 18 hours, during which Israeli forces "suffered heavy human and material losses," the PLF asserted, adding that its fighters "did not attack civilian targets."

It said three members of the 16-man team had Syrian nationality.

ATHENS (JUNE 1) - Two home-made bombs exploded Friday evening in a suburban area north of Athens, but no injuries were reported.

Nobody immediately claimed responsibility for the attack, in which two cars were destroyed.

Police were looking for a person seen leaving the area very fast on a motorbike a few seconds after the two explosions.

It was the third time in three weeks days that bombs have gone off in Athens or its suburbs.

#90152d0130 06/01/1990 ~French/German News Agency

VALLETTA (JUNE 1) - Ronnie Whelan could make a surprise reappearance in the Republic of Ireland's friendly against Malta on Saturday.

The match is a huge irritation to manager Jack Charlton, who insists he will risk as few as possible of the men he he has pencilled in to face England in 10 days' time.

But the Liverpoool midfielder, who is so crucial to Charlton's World Cup plans, has made a steady recovery from his ankle injury in training and is anxious to return to action for the first time in six weeks.

"I want to play tomorrow, but we'll have to see how it goes. I think I've got a chance," said Whelan.

Kevin Moran also wants a run after recovering from Achilles trouble, but Whelan's Anfield club-mate Ray Houghton, who also shows encouraging signs of shaking off his injury problems, is unlikely to be exposed in the controversial match in the Ta'Qali Stadium.

That will give Swindon's Alan McLoughlin, this week's late addition to the World Cup squad, his international debut if, as the Irish are reluctantly conceding, the game is classed as an A international.

Charlton originally wanted to hold a stop-start game behind closed doors so he could practise set piece moves.

The Maltese, however, have billed it as a full-scale open game, with tickets on sale for L4 as they cash in on their hospitality, which also brought them a game against the Scots earlier in the week.

But it threatens to be a mockery of a match, which holds nothing but danger for the Irish.

''There are no bonuses for us in this match tomorrow. We would much rather do without it,'' said Charlton, who has little idea who he will play.

''Those that are injured or have little knocks will train in the morning. The rest will turn up at the ground and we'll sort a team out from there.

''But we've told them all, 'If you have the slightest doubt then don't play' and everyone who goes on to the field will be told to come off at

the first sign of anything,'' he said.

MONROVIA (JUNE 1) - President Samuel Doe of Liberia Friday told a press conference he will not be standing in the scheduled October 1991 general elections.

He said he did not take the decision due to pressure from anyone, and had not in fact informed his ruling National Democratic Party of Liberia before doing so.

''I deserve a peace of mind after 10 years of political and social harassments'', Doe said.

He also disclosed that between 1980 and 1989 he had survived about 36 coup attempts and two invasions. His six-year term as president ends in 1991.

Doe said he intends to devote more time to his children and will continue his graduate studies and do a doctorate degree later.

He appealed to former U.S. President Jimmy Carter and the United Nations to ''actively intervene'' in the restoration of peace in Liberia.

Doe called on Liberians living in self-imposed exile to get organized for the next elections and ''stop supporting our brothers and sisters in killing each other''.

The announcement was Doe's first major concession in the wake of mounting pressure from several countries including the United States, international organizations and opposition groups in Liberia for him to step down and

give way to a new administration.

#90152d0690 06/01/1990 ~French/German News Agency
WASHINGTON (JUNE 1) - The International Monetary Fund (IMF) Friday began the formal process for increasing its capital by 50 percent, from 90 million to 135 million special drawing rights or from 120 million dollars to 180 million dollars.

The 152 member states have until December 31, 1991 to provide their individual increases in quotas which also involves Japan moving up to joint second position (with West Germany) in the table of the largest shareholders,
and the United States maintaining its position as the largest single shareholder.

Britain, currently the second largest shareholder, and France, currently fifth, will share the joint fourth position under a complex agreement agreed at the IMF's spring ministerial meeting in Washington.

Tied with the increase in the capital and the member states' individual quotas is ratification of an agreement that any member state which fails to maintain its repayment schedule for IMF loans has its voting rights suspended.

#90152d6230 06/01/1990 ~French/German News Agency
Tokyo (JUNE 1) - Japan's top heavy industry firms Friday reported saw solid profits in the 1988-1989 business year ended March 31.

Mitsubishi Heavy Industries, the biggest heavy machinery maker, posted a 61.2 percent rise in pre-tax profits to 140.4 billion yen on 22.4 percent higher sales of 2.09 trillion yen (13.96 billion dollars).

Kawasaki Heavy Industries reported that pre-tax profits rose 24.6 percent to 17.1 billion yen from the year before. Sales rose 5.9 percent to billion yen over the same period.

Ishikawajima-Harima Heavy Industries posted a pre-tax profit of 15.3 billion yen, up 18.7 percent from the year before. Sales increased 2.8 percent to 632.8 billion yen.

Hitachi reported a 2-billion-yen pre-tax profit on a 35.4 percent turnover rise to 307.7 billion yen.

Sumitomo announced its pre-tax profit soared 42.8 percent to 3.5 billion yen while sales inched up 3.6 percent to 267.6 billion yen.

Only Mitsui Engineering and Shipbuilding company said its pre-tax profit dropped 64.9 percent to 3.8 billion yen. Turnover rose 11.6 percent to 197.7 billion yen.

#90152d6490 06/01/1990 ~French/German News Agency
TOKYO (JUNE 1) - Nippon Oil Co., Ltd. Friday denied a newspaper report that the largest Japanese oil distributer plans to build an oil refinery in Saudi Arabia in a joint venture with a Saudi state-run company.

A Nippon Oil spokesman said Saudi Arabia ''has not contacted the company about such a plan nor has the Tokyo-based company sounded it out."

The influential financial newspaper Nihon Keizai Shimbun reported Friday that Nippon Oil was planning to set up a joint venture in Saudi Arabia to produce gasoline and other oil products.

In a related development, the Tokyo Stock Exchange suspended afternoon trading in Nippon Oil stock to allow investors time to assess the information.

Friday's report followed a visit to Tokyo in January by Hisham Nazer, Saudi Arabia's petroleum and mineral resources and planning minister for talks

with Japanese governent and oil industry leaders, during which he called on Japan to increase imports of crude oil from his country.

Saudi Arabia was the second largest crude oil supplier to Japan last year after the United Arab Emirates. Japan imported 1.32 billion barrels of crude oil in 1989, up 8.2 percent from a year earlier.

#90152d6550 06/01/1990 ~French/German News Agency

Tokyo (JUNE 1) - Japan's current account surplus, which covers imports and exports of all goods and services, slumped to 2 billion dollars in April from 6.5 billion dollars in the same month last year, according to Finance Ministry figures released Friday.

The 69.6 percent drop was matched by a 50.3 percent slump in the trade surplus, which declined from 8.09 billion dollars in April 1989 to 4.02 billion dollars last month.

Exports in April declined 7.1 percent over the year-ago level to 21.17 billion dollars, while imports rose 16.6 percent to 17.15 billion dollars.

#90152d6570 06/01/1990 ~French/German News Agency

LONDON (JUNE 1) - British-based Virgin Group and Japanese retailer Marui are forming a joint company to open a Megastore in Tokyo this autumn, the Financial Times reported here Friday.

Marui, one of Japan's largest retail chains, and Virgin, owned by British entrepreneur Richard Branson, were considering opening up to 18 Megastore's in Japan if the initial outlet proves a success, the article said.

The new joint venture would mark a further consolidation of Mr. Branson's interestests in Japan, where an independent survey showed last year that he was the best known foreign businessman, the FT said.

Mr. Branson was quoted in the article as saying that a "novel" feature of the new store would be a booking center for his Virgin Atlantic Airways Japanese.

In addition to Britain, Virgin owns Megastores in Dublin, Paris, Marseilles, Sydney and Melbourne and new stores are planned for 14 more European cities.

-30- 1111

#90152d6710 06/01/1990 ~French/German News Agency

CANBERRA (JUNE 1) - Primary Industries and Energy Minister John Kerin said Friday he would go to the Middle East next week to try to salvage Australia's 120 million dollar (92 million U.S.) a year live sheep trade.

Mr. Kerin told reporters here that talks to restore and stabilise Australia's live sheep trade with Saudi Arabia were faltering.

Since April, Saudia Arabia has rejected four boatloads carrying 172,000 live sheep because they claimed the cargo was either sick or too old.

Australia suspended the live sheep trade with Saudi Arabia between August and December last year after six shipments carrying 395,000 animals were barred on health grounds.

Australia disputed Saudi claims the sheep were sick.

A spokesman for Mr. Kerin said there are currently no vessels at sea or being loaded that were bound for Saudia Arabia.

#90152d6770 06/01/1990 ~French/German News Agency

PARIS (JUNE 1) - Spanish airline Iberia has signed a contract with Airbus Industries for eight A321 aircraft, it was announced here Friday.

Deliveries will being in mid 1994.

Under fleet modernisation plans Iberia has already ordered 22 Airbus A320s and eight A340s. The A321 will complete its programme.

In a statement issued here, the airline said the three types of Airbus, all with the same cockpit, CFM56-5S engines and the same electronic systems, would enable Iberia to make major cost savings on training and maintenance.

The Airbus A320 can carry 153 passengers and is scheduled to go into service next year on European routes. From 1994 the A321, a bigger version of the 320 carrying 174 passengers, will replace Iberia's Boeing 327s on busy European routes.

Deliveries of the A340s will also begin in 1994 to replace Iberia's McDonnel Douglas DC10s on long-haul routes.

Iberia already has eight A300B4 aircraft in service.

-30- 1138

#90152d6840 06/01/1990 ~French/German News Agency

LONDON (JUNE 1) - British Aerospace is to take a 12 million pounds (20 million dollar), 76 percent stake in Liverpool airport, north-west England it was announced here.

BAe, whose activities range from aircraft and automobile construction to engineering and electronics, announced it had reached the agreement Thursday with five Merseyside local authorities on setting up a new company to pursue its plans to develop the airport.

The local authorities will hold the remaining 24 percent.

The new company, British Aerospace (Liverpool Airport), will carry out a development study for the airport which could become a transatlantic gateway for air traffic from North America and Europe, handling anything up to 40 million passengers a year by 2005.

Development plans, including land near the airport, envisage expenditure of up to 1.5 billion pounds (2.5 billion dollars) into the next century creating thousands of jobs in an area of Britain which has been particularly hit by unemployment.

-30- 1196

#90152d8000 06/01/1990 ~French/German News Agency

MADRID (JUNE 1) - The British Norwich Union Insurance company has signed an option to buy 90 percent of the capital of the Spanish Plus Ultra insurance company for 200 million pounds (346 million dollars), the current owner Banco Bilbao Vizcaya (BBV) said on Friday.

The remaining 10 percent of Plus Ultra is held by the West German firm Munchener.

Plus Ultra made profits last year of 982 million pesetas (9.4 million dollars) representing an increase of 15 percent on the previous year. Sales were 23.8 billion pesetas (1.7 billion dollars), representing a fall of 22.99 percent. The company employs 550 people.

Norwich, which does not have any interests in Spain, is a leading British insurance company with activities in 25 countries. Sales last year exceeded 3.4 billion pounds (about five billion dollars).

For BBV the sale would fit with rationalisation of the group as a consequence of the merger of the banks of Bilbao and Vizcaya which created BBV.

BBV would still own two insurance companies, the Aurora Polar and Euroseguros.

-30- 1252
#90152d8080 06/01/1990 ~French/German News Agency
TOKYO (JUNE 1) - Japan's Ministry of Trade and Industry (MITI) said Friday it had given the go-ahead to 37 Japanese manufacturers for the mass production of digital audio tape players and recorders.

Production had hitherto been limited to prototypes because of a dispute between manufacturers and record companies, worried at a loss in sales because digital audio tape (DAT) reproduces sounds as well as compact discs.

The problem was resolved by an agreement signed in Athens in June 1989 by the United States, Japan and European nations providing for a so-called serial copy management system which prevents a compact disc being copied more than once onto digital tape.

Japan Victor Company (JVC), a leading producer of electronic goods for the mass market, announced Friday three models of DAT players to be on sale by mid-June at a cost of between 99,000 and 195,000 yen (644 and 1,260 dollars).

Most other manufacturers were expected to have their own products available by the end of June to mop up the mid-year bonus payments traditionally given to Japanese workers.

-30- 1283
#90152d8200 06/01/1990 ~French/German News Agency
BRUSSELS (JUNE 1) - The North Atlantic Treaty Organisation is prepared to work in partnership with the Soviet Union and limit troop levels both within and outside a unified Germany, NATO Secretary General Manfred Woerner said here Friday.

He told a group of British journalists visiting NATO headquarters here that Soviet leader Mikhail Gorbachev had no need to fear the organisation's military strength and possible membership of a united Germany.

"We do no want to switch the military power to the detriment of the Soviet Union," Mr. Woerner said.

He expressed surprise over criticism aimed at NATO by Mr. Gorbachev during the current Soviet-U.S. summit in Washington.

Mr. Gorbachev should "look at NATO acts during the last two years and he would get the message that the Alliance does not see itself as an enemy of the Soviet Union", the former West German defence minister said, adding that "we look at the Soviet Union as a possible partner".

He defended moves to make a unified Germany a member of NATO saying that neutrality would only isolate Germany and be a factor of instability within Europe

Mr. Woerner said that Mr. Gorbachev "cannot expect us to tear down the Alliance which has been so successful and which is now changing".

NATO was prepared to limit weapons to their lowest possible level and to cut troops "not only in Germany but also out of Germany", but an agreement on cutting conventional forces in Europe greatly depended on Moscow's attitude.

West German Foreign Minister Hans-Dietrich Genscher, meanwhile said in East Berlin that any reduction in troop levels in a unified Germany had to be considered within the wider context of European disarmament.

He told a press conference after his first meeting with East German counterpart Markus Meckel that "negotiations aimed at cutting conventional forces should cover reductions by the two super-powers in Europe and also cuts in troop levels by a unified Germany".

"We Germans do not want to be armed, but to add our contribution toward the process of disarmament," he added.

#90152d8440 06/01/1990 ~French/German News Agency

LUSAKA (JUNE 1) - The International Monetary Fund (IMF) and the World Bank have agreed to allow Zambia a special facility to help the country clear debt arrears of 1.5 billion dollars with the two organisations, finance ministry and diplomatic sources said on Friday.

The sources told AFP that the facility, called an "accumulative rights approach", was proposed in April during a creditors' consultative group meeting on the Zambian economy in Paris and that it had been approved by the board of directors from the two institutions.

The move means that Zambia is eligible for a Paris Club meeting of Western creditors to discuss agreements on rescheduling part of its external debt of 8.2 billion dollars.

Zambia is expected to accumulate at least half what it owes the two institutions within the next two years of its economic recovery plan.

"This facility means the two bilateral institutions will be depositing some amount into Zambia's account which is expected to accumulate to the 1.5 billion dollars which Zambia will then borrow from Western creditors to

pay the fund which will in turn re-pay the creditors," a ministry of finance source said.

#90152d8580 06/01/1990 ~French/German News Agency

BEIJING (JUNE 1) - China's foreign reserves increased in the first part of the year, the People's Bank of China, cited by the official New China News Agency (NCNA), announced Friday.

According to the central bank, the reserves at the end of March reached 21.35 billion U.S. dollars, an increase of 4.33 billion dollars compared to the end of the first quarter of 1989.

Economists cited by NCNA said the increase would help China's position overseas. It would help Beijing repay its foreign debt, amounting to 41.3 billion dollars last year, while the 21.2 percent devaluation of the yuan in December favored exports.

NCNA said exports increased 11.6 percent in the first quarter of this year compared to the same period in 1989.

China also boasted an increase in tourism of 6.8 percent compared with the figure for April last year. Tourism was seriously affected by the crackdown on pro-democracy demonstrations in the capital last June.

#90152d8660 06/01/1990 ~French/German News Agency

PARIS (JUNE 1) - Players competing at the French Open will in future have to wear "predominently white" clothing.

Philippe Chatrier, the President of the International and French Tennis Federations said here Friday that several members of the French Federation had been very "shocked" by some of the equipment being worn at this year's tournament.

He singled out Andre Agassi as a prime target for criticism.

Since Monday the third-seeded American has been coming out on court wearing pink headbands and matching pink cycling-shorts under black shorts.

"Nothing can be done about it this year," said Chatrier, "But a decision will have to be taken for the future. The Grand Slam Tournaments Committee will consider bringing in a new rule on the subject."

At the moment there are no rules governing the choice of clothing worn by players at Roland Garros but Wimbledon has always insisted players abide by a 'predominently white' rule.

#90152d8920 06/01/1990 ~French/German News Agency

BERN (JUNE 1) - The European football governing body, UEFA, has cleared Belgian international referee Marcel Van Langehove of accusations of corruption made by French champions Olympique Marseille.

UEFA added however that they were going to continue with their enquiry.

The investigation will now concentrate on whether Marseilles made up their allegations or whether or referees or clubs were involved in bribery, said a spokesman.

A UEFA statement said the details of bank accounts supplied by Marseille president Bernard Tapie were not proof against Van Langehove.

They were not shown to be the referee's accounts and payments were not shown to be linked to the European Cup semi final between Marseille and Benfica which the Belgian officiated.

The statement said that Van Langehove had agreed to give details regarding his accounts and that he had acted "perfectly correctly."

Tapie launched his allegations after Marseilles were beaten in the European Cup by a goal that Benfica player Valda was seen to handle into the net.

Van Langehove will be a referee at the World Cup finals in Italy.

#90152d8930 06/01/1990 ~French/German News Agency

KARACHI (JUNE 1) - More troops were called out as communal killings and terrorist attacks continued Friday in Karachi, leaving four more people dead, officials here said.

The army was deployed in more areas and battle-ready troops with shoot-on-sight orders set up pickets at vantage points. Soldiers could be seen positioned behind concrete bunkers.

More pickets would be set up in sensitive areas by Saturday throughout the

largest city in the southern province of Sindh and intense patrolling would continue, official sources said.

Bunkers built in troubled areas during the rule of the late General Mohammed Zia-ul-Haq had been removed after the restoration of democracy in December 1988, but they were recently set up again.

The city, two-thirds of which remained under curfew, looked deserted after the massacre overnight of 27 people in a passenger bus, witnesses said.

Gunmen also went on a shooting spree on a train, killing five passengers near Sindh's second city, Hyderabad, where troops were in control of the situation, police said.

Sindh residents said those responsible were believed to be "foreign agents" from neighboring India, with which Pakistan disputes the claim to Kashmir.

Traffic was thin in Karachi and little public transport was seen running, witnesses said.

Residents of the curfew-bound eastern district of Orangi clashed with security forces Friday, leaving three people dead, the sources said.

A police crackdown on criminals netted some 250 people in the last 24 hours. Sniper shooting elsewhere claimed another life in Karachi, raising the death toll to 164 since the violence, starting from Hyderabad 110 miles north of here on May 14, spread to this port city Sunday.

The overall toll in more than two weeks of trouble in Sindh was now estimated around 300. Official figures were much lower.

BEIJING (JUNE 1) - China's inflation rate fell to its lowest level in five years in April with a year-on-year retail price increase of 3.1 percent, the official New China News Agency (NCNA) reported Friday.

The agency used figures furnished by the state bureau of statistics. Prices increased 3.3 percent year on year in March.

In April, inflation was only one percent for the year in cities but 4.2 per- cent in rural areas, NCNA said.

Chinese authorities have taken a series of austerity measures since the end of 1988 to halt price increases, which had attained record levels by comparison with the last 40 years.

ULUNDI, SOUTH AFRICA (JUNE 1) - The leadership of Chief Mangosuthu Buthelezi's Inkatha movement was rocked Friday by the shock resignation of his right hand man Oscar Dhlomo, the South African Press Association said.

Mr. Dhlomo, Education Minister of the KwaZulu tribal homeland and General Secretary of Inkatha, announced his resignation from Inkatha, the KwaZulu cabinet and the KwaZulu legislative assembly from June 30, SAPA said.

He told SAPA he wanted to "rest and reflect on varous options pertaining to my future occupation," adding he had thanked Chief Buthelezi "for affording me the opportunity to make a modest contribution in the service of our people."

Considered a moderate, Mr. Dhlomo, 47, was Chief Buthelezi's clear heir apparent, observers said.

An academic, Mr. Dhlomo joined the KwaZulu legislative assembly in 1977, reportedly to back Chief Buthelezi in his stand against accepting "independence" from Pretoria. He became Inkatha General Secretary in June 1978.

Chief Buthelezi said Sunday Inkatha was in the process of becoming an "all South African political party."

LAGOS (JUNE 1) - The trial of a second group of people suspected of involvement in the aborted April 22 coup against President Ibrahim Babangida has begun here, a senior military source told AFP here Friday.

Most of those currently being tried by the Special Military Tribunal are junior soldiers, said the source.

A reliable source said at least 20 persons are on trial.

Ten military officers, including Major Gideon Orkar, who announced the coup over national radio on April 22, were the first to appear before the tribunal last month.

The tribunal is headed by Major General Ike Nwachukwu, a member of the Armed Forces Ruling Council, the nation's highest decision making body.

PARIS (JUNE 1) - Compagnie Generale des Papiers (CGP, Novalliance Group) announced Friday that it was selling its corrugated cardboard division to Ireland's Jefferson Smurfit Group for about 235 million francs (41 million dollars).

CGP said it expected to make a capital gain of around 100 million francs on the deal. The division accounted for 30 percent of CGP's 1989 consolidated turnover of 859 million francs.

Two mills will be taken over by a subsidiary set up specially for the purpose, of which Jefferson Smurfit will hold 100 percent: the one at Uzerche in Correze (47,000 tons of corrugated cardboard a year), and the one at Ponts et Marais in Seine Maritime (49,000).

It is Jefferson Smurfit's first acquisition in France.

The deal requires authorization from the French Treasury as a foreign investment in France, and approval by a CGP shareholders' meeting to be held on June 28.

SEATTLE, Washington (JUNE 1) - China has ordered 36 Boeing jetliners and taken options on 36 more for a package worth up to four billion dollars, Boeing Commercial Airplane Group said.

China's Civil Aviation Administration put in about two billion dollars worth of firm orders for planes with options on the same type of planes that could push the deal up to four billion dollars, Boeing officials announced Thursday.

The order comes a week after President George Bush renewed the Most Favored Nation status for China, allowing that country the lowest trade tariffs on exports to the United States.

The order includes five 747-400 jumbo jets; one 747-200F, a jumbo freighter; four wide-body 767's; 13 midsized 757's; and 13 737-300's, a smaller twin-jet. Deliveries start in 1992 and will extend into the late 1990's.

The new jetliners will be used by Air China, Guangzhou CAAC, China Southwest Airlines and others, Boeing officials said.

The Chinese orders pushed total Boeing orders this year to 187 aircraft valued at about 16.2 billion dollars. Boeing was the first U.S. company to sell to China when the two countries established relations in 1972.

Nicholas Lardy, a University of Washington professor of Chinese studies, said he doubted there was any connection between China being granted the special tax status and the jetliner deal.

But Boeing spokesman John Wheeler expressed doubt that China would have placed such a substantial order without the favorable trade status.

"It stands to reason that if the status were changed, it would obviously alter their whole approach to capital goods," Mr. Wheeler said.

#90152d9110 06/01/1990 ~French/German News Agency

KUALA LUMPUR (JUNE 1) - A summit of 15 Third World countries adopted several projects Friday in a bid to spur economic cooperation among developing nations, a conference spokesman said.

Ahmad Kamil Jaafar, secretary-general of the Malaysian Foreign Ministry, said the projects varied from proposals to boost trade to a plan to develop solar energy for refrigeration.

The inaugural summit of the Group of Fifteen for South-South Cooperation and Consultation, which opened earlier Friday, will take up the crucial issue of Third World indebtedness Saturday, he said.

Malaysian Prime Minister Mahathir Mohamad told the other 14 leaders and their representatives at an open session that the summit should not seek to confront the North on the world's economic woes.

But he urged rich creditor nations to write off some of the 1.3 trillion dollar debt they had lent developing countries, a call he first made at the 49-member Commwealth summit here in October last year.

"We cannot make debt-slaves of nations, not in this so-called enlightened age," he said.

The three-day summit is being attended by the heads of government of Argentina, India, Indonesia, Malaysia, Senegal, Venezuela, Yugoslavia and Zimbabwe.

The leaders of Algeria, Jamaica, Egypt, Brazil, Mexico, Nigeria and Peru sent representatives.

Mr. Kamil said that discussions on the debt issue Saturday would centre around the proposals of a special working group believed to include Argentina, Brazil, Venezuela, Nigeria and Jamaica.

Argentina's President Carlos Saul Menem said on his arrival here Friday that he did not favour a cartel of Third World debtor nations.

BRUSSELS (JUNE 1) - East German Prime Minister Lothar de Maiziere on Friday demanded an equal role alongside Bonn for deciding the pace and manner of East Germany's entry into the European Economic Community (EEC) under German unification.

Making the first visit to the executive European Commission by an East German leader, Mr. de Maiziere suggested "trilateral negotiations" on EEC admission that would comprise East and West Germany and the Community institutions.

"Our country has a democratically elected government, East Germany is a grown-up country, it can speak with its own voice," he told a press conference. "The three of us can easily work together."

He underscored his country's enthusiasm for joining the EEC and pledged that West German firms would not be given preferential treatment in the East German market over their EEC rivals.

He also announced the creation of an interministerial group of East German officials to ease the entry process, working in conjunction with a diplomatic team in Brussels that would be doubled from six persons to 12.

German unification raises many important questions for the Community's political institutions, its budget, farm policy and regional subsidies.

But so far, Bonn has always taken the dominant role, holding talks on unification with a usually passive East German government and then reporting back to the Commission and the member states.

Elected less than 10 weeks ago, Mr. de Maiziere opening up a direct link on Friday by meeting with President Jacques Delors and other top Commissioners, an EEC official said.

The prime minister warned that East Germany's battered economy would need time to adjust to the force of the EEC's competition rules.

Agriculture, especially, would need "a lengthy transitional period to adapt to the (Community's) Common Agricultural Policy," he said, noting that 10 per- cent of East German's 17 million inhabitants live on the land.

#90152d9300 06/01/1990 ~French/German News Agency
KUALA LUMPUR (JUNE 1) - The four OPEC member nations attending the Group of Fifteen summit will take part in consultative meetings here to discuss oil policy, Venezuela's President Carlos Andres Perez said here Friday.

Mr. Perez told a press briefing that the four OPEC nations attending the summit, which opened here Friday, were "going to take advantage of the summit to discuss what our oil ministers are doing to coordinate" efforts amid falling oil prices.

Besides Venezuela, the other members of the Organization of Petroleum Exporting Countries (OPEC) represented here are Algeria, Indonesia and Nigeria.

The other members of the G-15, inaugurated here to promote South-South cooperation, are Argentina, Brazil, Egypt, India, Jamaica, Malaysia, Mexico, Peru, Senegal, Yugoslavia and Zimbabwe.

Venezuelan Foreign Minister Reinaldo Figueredo said in an interview earlier in the day that Venezuela was proposing that the four OPEC members at the meeting form a block to help the other G-15 nations in oil matters and in other fields.

He mentioned the possibility of establishing a "financial mechanism" to promote Third World oil projects.

Another Venezuelan official said Caracas was promoting a plan by which the four OPEC members would use their "good offices" to help resolve oil problems between non-oil producing Third World nations and OPEC.

"If country X has a problem with (oil-producing) country Y, we'll use our good offices," he said.

He added that another project under consideration was formation of a South-South bank.

Indonesian sources meanwhile said Indonesian President Suharto would meet with Mr. Perez during the three-day summit here to discuss oil policy. They said Indonesia would seek Caracas' support for a meeting of some OPEC members in Jakarta.

Indonesia, with daily oil output of 1.3 million barrels, is the only OPEC member in East Asia. Venezuela is the largest Latin American OPEC member and produces some 1.9 million barrels of crude a day.

LONDON (JUNE 1) - Copper lost ground on the London Metal Exchange (LME) Friday, following release of higher-than-expected weekly stock levels, traders said.

The red metal was quoted at 1,492 pounds per ton on the kerb (three-months delivery), having closed at 1,487 pounds on the afternoon ring against 1,505 Thursday.

Statistics released Friday by the LME showed that the Exchange's stocks had fallen by only 675 tonnes over the past week, to 76,425 tons. Traders had expected a fall of several thousand tons.

Aluminium in contrast was steadier, on worries that a eight-day dockworkers strike, which has just started in Brazil, might disrupt that country's aluminium exports. A 1,775-tonne fall in LME stocks, to 151,400 tonnes, also brought some support. The metal was quoted at 1,600 dollars per tonne on the kerb against 1,598 on the ring and 1,580 dollars Thursday.

Lead also firmed up. It finished at 489 pounds per ton on the kerb against 487 on the ring and 485 pounds Thursday, ignoring news that LME stocks had risen by 375 tons to 34,200 tons.

#90152d9480 06/01/1990 ~French/German News Agency
PARIS (JUNE 1) - Britain and France are to jointly propose a legal framework to "enshrine civil liberties in Europe" at the second gathering of the Conference on Security and Cooperation in Europe (CSCE) which opens in Copenhagen on Tuesday, a French official said Friday .

The head of the French delegation, Bernard Dejean de la Batie, said that, following the upheavals of the last year in Eastern Europe which had wholly changed the situation, a closing statement on human rights would probably be adopted in the Danish capital.

This had not been the case with the last CSCE meeting on human rights, in Paris in May-June last year.

The Franco-British proposal includes elements of a text proposed by France at the Paris meeting to "enshrine civil liberties in Europe" in a "common juridical area".

The aim is in effect to define basic civil liberties and their guarantee in law.

If the 35 CSCE states agree to accept the proposal, "this will be a considerable step forward, because one would then have a text as a basis from which to try to make legal principles prevail in the whole of Europe " Mr. Dejean de la Batie said.

At the Paris conference, France and the Soviet Union presented the first joint text in the CSCE framework calling for juridical cooperation with a view to achieving a "common area".

That text remains on the table and the negotiators will seek to have it incorporated in the Franco-British one, the head of the French delegation said.

In Copenhagen, France also intends to put forward a proposal on the rights of children and a text on the struggle against racism.

After the Paris meeting, the Copenhagen "Conference on The Human Dimension" as it is being officially called, will be the second follow-up conference on human rights in the CSCE framework. The third is scheduled for Moscow next year.

All the European countries save Albania, plus Canada and the United States, are represented in the CSCE.

#90152d9690 06/01/1990 ~French/German News Agency

GLASGOW, Scotland (JUNE 1) - Mo Johnston, the most successful World Cup striker in Scotland's history, faces the heartache of missing the finals which begin in Italy next week.

The Rangers star, who scored six times in seven qualifying ties to pass Joe Jordan's record of seven World Cup goals, should know on Monday if a torn stomach muscle will rule him out of the competition.

Johnston went to hospital here on Friday accompanied by Scots team doctor Stewart Hillis for an examination on the abdominal problem which arose during the acclimatisation trip to Malta this week.

The diagnosis means that Johnston has only a handful of days to recover before the Scottish squad fly to Genoa on Wednesday morning to begin the build-up to the finals.

A thorough medical check on Monday should reveal whether the influential player can participate in the world's biggest football carnival.

Johnston insisted that he would be ready to fly to Italy, despite the problem which forced him to miss the last two days of Scotland's training sessions in the Maltese sunshine.

"This current problem has nothing to do with an earlier stomach injury I had when I was playing in France," he said. "It has been causing me a bit

of pain over the last few days, but I'm hoping it will be all right for the finals."

Despite Johnston's optimism, Scotland manager Andy Roxburgh is deeply concerned about the player who has scored 13 goals from 34 international appearances.

He said: "We don't know precisely how this injury happened. It seems he stretched in a training game and we can only hope Mo is okay to fly with us on Wednesday."

The Scottish Football Association have already submitted their official list of 22 players to tournament organisers FIFA, but even if Johnston is ruled out,
 a replacement can still be called in.

FIFA have a appeals procedure which could be brought into operation at the request of the Scots, who last week lost Motherwell winger Davie Cooper. His place went to Norwich striker Robert Fleck.

-30- 2262
#90152d9780 06/01/1990 ~French/German News Agency
PARIS (JUNE 1) - Defence minister Jean-Pierre Chevenement has ruled out any French military intervention to restore order in troubled former French colonies of West Africa, an official source said Friday.

He told a session of the parliamentary defence commission Wednesday that clauses in bilateral agreements with such states "calling for the intervention of France for reasons of internal order, will not be implemented".

Popular unrest has erupted to varying degrees in Gabon, Ivory Coast, Senegal, Cameroon and Benin in recent weeks.

But in a reference to Gabon, Mr. Chevenement said such clauses calling for French intervention at the demand of the states concerned "are not in the present case being implemented and will not be so in the future".

French troop strength in Gabon has been doubled in recent days to some 1,000 in connection with an eruption of violent opposition after the death of an opposition leader, leading to the evacuation of French nationals.

The minister said such defence clauses "have never been implemented since 1981", the year Francois Mitterrand became head of state and his Socialist Party came to power.

In Gabon, he said, the French armed forces "had clearly played a

stabilising role during the events".

The French government said Friday it was reducing its troop strength in Gabon with a return to calm there.

"Certain African countries, which are today engaged in moving toward democracy, will inevitably undergo periods of disequilibrium," Mr. Chevenmement said.

"The concern of the French government is to shoulder a role falling to it for historical reasons without interfering in the internal affairs of independent states."

#90152d9800 06/01/1990 ~French/German News Agency

ST GALL, Switzerland (JUNE 1) - The U.S. football team ends its warm up matches with a game against Switzerland here Saturday desperately searching for a goal scorer.

Bob Gansler has found quite a stable defense and a reliable midfield duo in John Harkes and Tab Ramos, but has worries in the attack department.

His best performer is Bruce Murray with seven goals from 40 games. His other main attacker, Paul Caliguri, has scored only three times in 38 matches.

In their qualifying games against Guatemala, El Salvador and Trinidad and Tobago, the U.S. side scored just six times.

Despite the problems, Gansler does not seem to worried and even thought his side had a "good chance of getting past the preliminary phase" at the World Cup finals in Italy where they are in group A with the host nation.

He said Austria and Czechoslovakia were "adversaries that we can surprise." Gansler expressed the hope that his side could reproduce one of the shock results of the century when the United States beat England 1-0 in 1950.

LINEUP:

Switzerland from: Goalkeepers: Stefan Huber, Philippe Walker, Defenders: Herbert Baumann, Urs Fischer, Marc Hottiger, Alain Geiger, Dominique Herr, Peter Schepull, Midfield: Reto Gertschen, Heinz Hermann, Philippe Hertig, Blaise Piffaretti, Patrick Silvestre, Attack: Stephane Chapuisat, Adrian Knupp, Kubilay Turkylmaz.

United States from: Goalkeepers: Kasey Keller, Tony Meola, David Vanole, Defenders: Desmond Armstrong, Jimmy Banks, John Doyle, Steve Trittschuh,

Marcelo Balboa, Mike Windischamnn, Paul Krumpe, Midfield: Neil Covone, Brian Bliss, Paul Caliguri, Chris Henderson, John Harkes, Tab Ramos, John Stollmeyer, Attackers: Bruce Murray, Eric Wynalda, Chris Sullivan, Peter Vermes, Eric Eichmann.

#90152d9860 06/01/1990 ~French/German News Agency

BRASILIA (JUNE 1) - President Fernando Collor de Mello Friday suffered his first defeat in Congress since taking office as legislators rejected an anti-inflation decree authorizing lower courts to suspend salary increases for 150 days.

The Congress rejected the decree by a vote of 149 to 133, handing Mr. Collor a set-back in his 10-week-old effort to rein in Brazil's runaway inflation and curb government spending.

"It was the worst thing to happen since he announced the (anti-inflation) plan" a day after taking office March 15, said Economy Minister Zelia Cardoso de Mello.

The minister, who is not related to the president, said salary increases could spur inflation and create a "deep recession."

As part of his draconian austerity program, Mr. Collor froze salaries, prices and some bank deposits in a bid to cut the money supply, reduce currency speculation and prevent capital flight.

Apparently fearing a negative vote Friday from the legislators, in a decree Thursday the president authorized the nation's highest labor court to suspend for six months any salary increase granted by regional labor courts.

The government attributed its defeat in Congress in part to negative votes from former allies angry over being refused jobs in the administration.

Ricardo Fiuza, leader of the rightist Liberal Front Party, which backs the president, did not even show up to vote. He was reportedly angry because the government denied an aide of his a job in his northeastern home district.

Another 14 representatives who had supported Mr. Collor in the past voted against the measure.

Mexico City (JUNE 1) EFE - At least 59 people have died in a heat wave paralyzing northern Mexico where soaring temperatures have hit 46 degrees Celsius in the shade, the Mexican Red Cross said Friday.

At least 4,000 people have been hospitalized, an estimated 30,000 are suffering from dehydration, and millions of dollars worth of staple crops have been ruined, Red Cross officials said.

What was considered at the beginning of May as a slight delay in the arrival of the rainy season, has turned into a heat wave for many of Mexico's 85 million inhabitants, especially those in the north.

The northern states of Nuevo Leon, Sonora, Zacatecas, San Luis Potosi and Chihuahua, where rain has not been seen in over a year, are baking in temperatures of between 35 and 46 degrees in the shade.

The heat has paralyzed Mexico City and its 23 million inhabitants, with night-time temperatures up to 32 degrees. An estimated 3,000 children are being treated in capital hospitals for dehydration, the Red Cross said.

The situation is critical in cities such as Guadalajara, Monterrey and Guanajuato, where this weekend running water will be rationed to 5 hours a day.

In poorer urban districts, lack of fresh water has packed the hospitals with patients suffering from gastro-intestinal complaints.

The heat wave affecting 70 percent of the country is caused by a mass of tropical sea air and is likely to last another week, the National Meteorological Center said.

The more devout Mexicans are offering up prayers to the Virgin of Guadalupe, Mexico's patron, in the hope that the appeals will bring the swift arrival of rain.

A more modern response, however, has been proposed by authorities in the northern state of Nuevo Leon where there are plans to bombard the sky with chemicals next week in the hope of provoking rain.

CARACAS (JUNE 1) EFE - Demonstrators set fire to a bus in the capital on Friday, the third day of protests against planned hikes in the cost of petrol and public transport, police said.

Police also reported panic-buying of food in shops and supermarkets in Caracas, spurred by rumors of a military coup and signs that the unrest could erupt into widespread violence similar to that 15 months ago, when hundreds of people were killed in riots over price rises.

Defense Minister Gen. Filmo Lopez dismissed the coup rumors Friday and Army chief Gen. Italo del Valle Aliegro, who was defense minister during the outburst of violence in February 1989, said a coup "would not solve any problems."

On Thursday, 12 student protestors were injured, two seriously, when police opened fire on demonstrators outside a technical college in the capital. Disturbances were also reported in six other towns and cities around the country.

The date for petrol and public transport price rises has not been announced.

NEW DELHI (JUNE 1) XINHUA -- INDIA'S MIXED ECONOMY HAS BEEN WORKING SUCCESSFULLY, DEPUTY CHAIRMAN OF THE INDIAN NATIONAL PLANNING COMMISSION RAMAKRISHNA HEGDE TOLD XINHUA IN AN INTERVIEW HERE.

HE SAID INDIA HAS BEEN FOLLOWING THE MIXED ECONOMY SYSTEM INCLUDING PUBLIC SECTOR AND PRIVATE SECTOR FROM THE VERY BEGINNING FOLLOWING ITS INDEPENDENCE. "ACCORDING TO OUR OWN FEELING, IT HAS BEEN WORKING SUCCESSFULLY."

HE SAID PUBLIC SECTOR MAINLY CENTERS ON KEY INDUSTRIES LIKE RAILWAY, COMMUNICATIONS, POWER GENERATIONS AND OTHER INFRASTRUCTURE PROJECTS. "I CAN NOT SAY THAT THE PUBLIC SECTOR UNDERTAKINGS HAVE BEEN WORKING MOST EFFICIENTLY AND MOST PROFITABLY. THERE ARE GOOD EXAMPLES AND ALSO BAD EXAMPLES. BUT ON THE WHOLE, WE ARE CONVINCED THEY ARE GOOD FOR THE COUNTRY." AT THE SAME TIME, HE POINTED OUT, THE PRIVATE SECTOR ALSO HAS ITS OWN ROLE TO PLAY.

HE EMPHASIZED THAT INDIA IS NOT COMMITTED TO FREE MARKET ECONOMY ALTHOUGH COMPETITION IS NECESSARY TO IMPROVE COMMODITY QUALITY AND LOWER PRICES.

IF SOME COMMODITY IS IN SHORT SUPPLY, THE GOVERNMENT HAS TO CONTROL THE DISTRIBUTION TO ENSURE EVERYBODY GETS HIS SHARE. IF SOME COMMODITY IS IN SURPLUS, THE GOVERNMENT NEED NOT TO IMPOSE LICENCES AND CONTROL, HE ADDED.

HE SAID THE INDIAN NATIONAL PLANNING COMMISSION IS IN CHARGE OF PREPARING FIVE-YEAR PLANS, EVALUATION OF THE IMPLEMENTATION OF THE PLANS AND MONITORING THEM. EVERY YEAR, EVERY STATE GOVERNMENT HAS TO GET THE ANNUAL PLAN APPROVED BY THE PLANNING COMMISSION, DEPENDING UPON THE AVAILABILITY OF THE RESOURCES. THE STATE GOVERNMENTS HAVE TO KEEP THE NATIONAL PRIORITIES IN VIEW WHILE THEY PREPARE THEIR OWN PLANS.

ON THE ISSUE OF THE FUTURE OF THE PUBLIC SECTOR, HE SAID THAT "PUBLIC SECTOR WILL STAY, BUT WE ARE HAVING A CRITICAL REVIEW IN THE SECTOR. THE PLANNING COMMISSION HAS ALREADY STARTED ON THAT." IF SOME PUBLIC UNDERTAKINGS ARE NOT SATISFACTORY AND IMPOSSIBLE TO IMPROVE, THEY MIGHT BE TAKEN OVER BY PRIVATE INDUSTRIALISTS OR THE WORKERS AND EMPLOYEES OF THE UNDERTAKINGS, HE ADDED.

BUT HE BELIEVED THE PUBLIC SECTOR, IN WHICH THE STATE GOVERNMENTS HAVE INVESTED ALL RESOURCES AVAILABLE, WILL CERTAINLY BEAR FRUITS FOR SOCIAL WELFARE.

#90152k0014 06/01/1990 ~Japanese News Agency

TOKYO (JUNE 1) KYODO - TAIYO FISHERY CO. SAID FRIDAY IT IS SCRAPPING A JOINT VENTURE IN WHICH IT HAS BEEN SELLING PET FOOD IN COLLABORATION WITH A U.S. COMPANY DUE TO DIFFERENCES IN MANAGEMENT POLICIES.

THE PET FOOD SALES COMPANY, PURINA TAIYO PET FOOD, IS THE THIRD-LARGEST IN JAPAN. IT WAS SET UP 20 YEARS AGO THROUGH EQUAL INVESTMENTS BY TAIYO, WHICH IS A MAJOR FISHERY COMPANY, AND ST. LOUIS, MISSOURI-BASED PET FOOD PRODUCTION COMPANY RALSTON PURINA CO.

THE JOINT COMPANY IS BEING SCRAPPED EVEN THOUGH THE AGREEMENT BETWEEN TAIYO AND RALSTON RUNS UNTIL NOVEMBER, TAIYO OFFICIALS SAID.

THE TWO FORMER PARTNERS SET UP SEPARATE PET FOOD SALES COMPANIES TO OPERATE IN JAPAN AS OF FRIDAY, THOUGH THEY WILL OFFICIALLY BEGIN OPERATIONS FROM SEPTEMBER 1, THEY ADDED.

THE NEW TAIYO COMPANY IS TAIYO PET FOOD CO., WHILE RALSTON'S IS CALLED PURINA JAPAN INC.

#90152k0068 06/01/1990 ~Japanese News Agency

MANILA (JUNE 1) KYODO - THE PHILIPPINE ECONOMY GREW BY 6.26 PERCENT IN THE FIRST QUARTER OF THIS YEAR IN SPITE OF THE EXPECTED SLOWDOWN IN ECONOMIC ACTIVITY DUE TO THE FAILED COUP ATTEMPT LAST YEAR, ECONOMIC PLANNING OFFICIALS SAID FRIDAY.

THE GROWTH IN GROSS NATIONAL PRODUCT (GNP) WAS HIGHER THAN THE 4.65 PERCENT REGISTERED DURING THE SAME PERIOD LAST YEAR, ECONOMIC PLANNING DEVELOPMENT AUTHORITY DEPUTY DIRECTOR GEN. PONCIANO INTAL SAID.

THE 6.26 PERCENT FIGURE AMOUNTS TO 27,807 MILLION PESOS, OF WHICH TOTAL GROSS DOMESTIC PRODUCT (GDP) -- THE OUTPUT OF GOODS AND SERVICES -- WAS WORTH 27,614 MILLION PESOS, WITH A NET FACTOR INCOME OF 193 MILLION PESOS FROM OVERSEAS FILIPINO WORKERS.

OFFICIALS HAVE LOWERED TO 4.5-5.5 PERCENT GROWTH TARGETS FOR THIS YEAR FROM THE ORIGINAL 6.0-6.5 PERCENT DUE TO THE IMPACT OF A POWER CRISIS THAT STALLED PRODUCTION AND A DROUGHT THAT HIT THE COUNTRY.

INTAL SAID OVERALL DOMESTIC ECONOMIC ACTIVITIES ONLY REACHED THE LEVEL OF

4.69 PERCENT OF GDP, SLIGHTLY LOWER THAN THE 5.04 PERCENT DURING THE SAME PERIOD LAST YEAR.

THE ROSY ECONOMIC PERFORMANCE DURING THIS YEAR'S FIRST QUARTER WAS FUELED BY THE RISE IN FOREIGN EXCHANGE REMITTANCES BY OVERSEAS FILIPINO WORKERS, AMOUNTING TO 193 MILLION PESOS (8.56 MILLION U.S. DOLLARS), HE SAID.

FOREIGN EXCHANGE SAVINGS FROM THE DEBT BUY-BACK SCHEME ADOPTED IN JANUARY WAS PARTLY RESPONSIBLE FOR THE IMPROVEMENT OF THE ECONOMY DURING THE PERIOD, HE SAID.

ACCORDING TO THE CENTRAL BANK, A TOTAL OF 600 MILLION U.S. DOLLARS WAS SAVED THROUGH THE BUY-BACK SCHEME OF EXTERNAL DEBTS WORTH 1,334 MILLION DOLLARS.

HOWEVER, INTAL SAID THE GOVERNMENT PREDICTS THE GROWTH RATE DURING THE NEXT SECOND QUARTER WILL NOSEDIVE, AS ECONOMIC ACTIVITIES WERE HALTED DUE TO THE POWER SHORTAGES AND AGRICULTURAL ACTIVITIES WERE SLOWER DUE TO THE DROUGHT.

TO COUNTER THIS ECONOMIC SLOWDOWN, HE SAID THE GOVERNMENT HAS PREPARED A PACKAGE OF MEASURES TO ENABLE ECONOMIC GROWTH TARGETS OF 5.5 PERCENT FOR THE FULL YEAR TO BE REALIZED, WHICH INCLUDES THE LURING OF MORE INVESTMENT INTO THE COUNTRY TO FURTHER ITS INVESTMENT-LED GROWTH.

DURING THE FIRST QUARTER OF THE YEAR, PERSONAL CONSUMPTION GREW TO 6.33 PERCENT, UP FROM THE 5.39 PERCENT DURING THE SAME PERIOD LAST YEAR.

INVESTMENTS, ON THE OTHER HAND, MEASURED IN TERMS OF CAPITAL FORMATION, GREW DURING THE PERIOD BY 17.27 PERCENT, SLIGHTLY DOWN FROM THE 17.68 PERCENT DURING THE SAME PERIOD IN 1989.

ACCORDING TO SECTOR, INDUSTRY LED THE GROWTH POSTED DURING THE PERIOD WITH A 6.19 PERCENT INCREASE, A RISE FROM THE 5.49 PERCENT OF THE FIRST QUARTER IN 1989.

AGRICULTURE, FISHERY, AND FORESTRY SECTORS POSTED A SLOWDOWN IN PRODUCTION IN THE FIRST QUARTER, WITH GROWTH DOWN TO 2.45 PERCENT FROM THE 2.19 PERCENT LAST YEAR, WHILE SERVICES ALSO SLOWED DOWN TO 5.02 PERCENT FROM THE 6.24 PERCENT IN 1989.

#90152k0073 06/01/1990 ~Japanese News Agency

TOKYO (JUNE 1) KYODO - NET PURCHASES OF JAPANESE BONDS BY FOREIGNERS JUMPED 2.79-FOLD IN APRIL TO 2,580 MILLION DOLLARS FROM THE PREVIOUS MONTH'S 924 MILLION DOLLARS.

THE INCREASE WAS SPURRED BY A WEAKER YEN AND RECEDING PROSPECTS OF A FURTHER RISE IN INTEREST RATES, THE FINANCE MINISTRY REPORTED FRIDAY.

FOREIGNERS BOUGHT 16,680 MILLION DOLLARS AND SOLD 14,099 MILLION DOLLARS WORTH OF JAPANESE BONDS IN APRIL.

FOREIGN NET SALES OF JAPANESE STOCKS FOR APRIL REACHED 418 MILLION DOLLARS DOWN SHARPLY FROM 7,271 MILLION DOLLARS IN THE PREVIOUS MONTH.

AS A RESULT, PURCHASES OF JAPANESE BONDS AND STOCKS BY FOREIGNERS CAME TO 2,162 MILLION DOLLARS IN APRIL, IN CONTRAST TO NET SALES OF 6,347 MILLION DOLLARS IN MARCH.

JAPANESE INVESTORS, HOWEVER, REENTERED THE FOREIGN BOND MARKETS TO BECOME NET PURCHASERS DURING THE MONTH, WITH PURCHASES MODERATELY EXCEEDING SALES BY 622 MILLION DOLLARS.

IN MARCH, JAPANESE WERE NET SELLERS OF FOREIGN BONDS, WITH SALES SURPASSING PURCHASES BY 1,747 MILLION DOLLARS.

THE RELATIVELY LOWER YIELDS ON U.S. TREASURY SECURITIES PROMPTED JAPANESE INVESTORS TO SELL DOLLAR-DENOMINATED BONDS LARGELY DUE TO PROFIT-TAKING, MINISTRY OFFICIALS SAID.

FINANCIAL ANALYSTS SAID THE NARROWING OF THE INTEREST-RATE DIFFERENTIAL BETWEEN JAPAN AND OVERSEAS MARKETS IS GRADUALLY AFFECTING CAPITAL FLOWS, CURBING JAPANESE DEMAND FOR OVERSEAS EQUITIES.

JAPAN'S NET SALES OF FOREIGN STOCKS IN APRIL DECREASED TO 52 MILLION DOLLARS FROM 257 MILLION DOLLARS IN THE PREVIOUS MONTH.

AS A RESULT, JAPANESE WERE NET PURCHASERS OF FOREIGN BONDS AND STOCKS BY 570 MILLION DOLLARS.

THE WEAKER YEN DISCOURAGED JAPANESE INVESTORS FROM BUYING FOREIGN STOCKS DURING APRIL, THE OFFICIALS SAID.

BUT SOME ANALYSTS POINTED OUT THERE WAS A TENDENCY FOR FOREIGN STOCKS TO STEADILY LURE JAPANESE MONEY AWAY FROM FOREIGN BONDS.

MEANWHILE, JAPAN'S DIRECT INVESTMENT ABROAD TOTALED 4,203 MILLION DOLLARS IN APRIL, DOWN SHARPLY FROM 6,897 MILLION DOLLARS THE PREVIOUS MONTH.

THIS WAS LOWER THAN THE PREVIOUS FISCAL YEAR'S MONTHLY AVERAGE OF SOME 5,600 MILLION DOLLARS, THE OFFICIALS SAID.

FOREIGN DIRECT INVESTMENT IN JAPAN CAME TO 203 MILLION DOLLARS IN THE MONTH, DOWN FROM 882 MILLION DOLLARS IN MARCH.

#90152k0074 06/01/1990 ~Japanese News Agency

TOKYO (JUNE 1) KYODO - CHINA'S CENTRAL BANK HAS ORDERED A HALT TO TRANSACTIONS WITH THE BANK OF TOKYO IN PROTEST AGAINST THE JAPANESE BANK'S PLAN TO OPEN AN OFFICE IN TAIWAN, BANKING SOURCES SAID FRIDAY.

THE INSTRUCTION BY THE PEOPLE'S BANK OF CHINA ALSO CALLED FOR SUSPENSION OF EXCHANGES OF STAFF BETWEEN THE BOT AND CHINESE BANKS AND OTHER FINANCIAL INSITUTIONS, THE SOURCES TOLD KYODO NEWS SERVICE.

THE SOURCES SAID THE CHINESE ACTION WAS IN PROTEST AGAINST THE BOT ANNOUNCEMENT LAST MONTH THAT IT WILL SET UP A REPRESENTATIVE OFFICE IN TAIPEI IN EARLY JULY.

THE BOT AND OTHER JAPANESE BANKS HAVE BEEN TRYING RECENTLY TO EXPAND INTO TAIWAN'S BANKING MARKET BY TAKING ADVANTAGE OF TAIWAN'S PLANS TO GIVE FOREIGN BANKS GREATER ACCESS TO THE LONG-PROTECTED MARKET.

BUT THE SOURCES SAID CHINA'S HARSH RESPONSE TO THE BOT PLAN IS LIKELY TO DAMPEN JAPANESE ENTHUSIASM OVER TAIWAN.

A SENIOR BANK OF TOKYO OFFICIAL SAID TRANSACTIONS BETWEEN THE BOT AND CHINESE BANKS HAVE BEEN PROCEEDING AS USUAL SO FAR, BUT SAID NEGOTIATIONS OVER ACCEPTING TRAINEES FROM CHINESE BANKS HAVE BEEN STALLED.

THE OFFICIAL, WHO ASKED NOT TO BE NAMED, ACKNOWLEDGED THAT THE BOT IS TRYING TO PERSUADE CHINA TO LIFT THE INSTRUCTION THROUGH ITS OFFICES IN BEIJING AND ELSEWHERE.

ASKED TO COMMENT ON THE BOT PLAN TO OPEN AN OFFICE IN TAIWAN, THE OFFICIAL SAID IT IS IN TANDEM WITH CHANGES TAKING PLACE OVER RELATIONS BETWEEN JAPAN AND TAIWAN, REFERRING TO EXPANDING BILATERAL TRADE.

A FOREIGN MINISTRY OFFICIAL REACTED COOLY TO THE CHINESE ACTION. "IT IS A MATTER OF CONCERN AT PRIVATE LEVELS," THE OFFICIAL SAID WITHOUT FURTHER ELABORATION.

CURRENTLY, ONLY DAI-ICHI KANGYO BANK HAS A BRANCH IN TAIWAN, SINCE THE NUMBER OF FOREIGN BANKS THERE HAS BEEN LIMITED TO ONE PER COUNTRY SINCE 1959.

THE FINANCE MINISTRY HAD NOT APPROVED PLANS BY JAPANESE BANKS TO OPEN OFFICES IN TAIWAN SINCE THEN, BUT GAVE THE GREEN LIGHT TO THE BOT PLAN IN VIEW OF INCREASING TRADE AND BUSINESS DEALS BETWEEN JAPAN AND TAIWAN.

#90152k0081 06/01/1990 ~Japanese News Agency
TOKYO (JUNE 1) KYODO - VICTOR CO. OF JAPAN (JVC) SAID FRIDAY IT WILL SET UP A JOINT VENTURE FOR PRODUCING VIDEOCASSETTE RECORDERS IN MALAYSIA WITH PHILIPS OF THE NETHERLANDS.

THE EQUALLY-OWNED FIRM, PHILIPS JVC MANUFACTURING MALAYSIA SDN BHD, WILL INVEST SOME 4.5 BILLION YEN TO CONSTRUCT A VCR FACTORY IN SHAH ALAM IN THE STATE OF SELANGOR WITH PRODUCTION STARTING NEXT FEBRUARY, JVC OFFICIALS SAID.

IT WILL EMPLOY SOME 1,000 LOCAL WORKERS AND HAVE AN ANNUAL OUTPUT OF SOME 700,000 VCRS IN THE FIRST YEAR.

JVC WILL SHIP HALF OF THEM TO THE UNITED STATES, ASIAN AND CENTRAL AND SOUTH AMERICAN MARKETS, WHILE PHILIPS WILL EXPORT THE REST TO THE U.S.

IT WILL RAISE PRODUCTION TO 2 MILLION VCRS A YEAR IN THE FUTURE, THE OFFICIALS SAID.

-30- 912
#90152k0083 06/01/1990 ~Japanese News Agency
TOKYO (JUNE 1) KYODO - CHORI CO. SAID FRIDAY THE COMPANY WILL INCREASE ITS TECHNOLOGICAL COOPERATION WITH THE SOVIET UZBEK REPUBLIC'S SILK INDUSTRY TO HELP IT PRODUCE HIGHER-QUALITY RAW SILK EXPORTABLE TO WESTERN EUROPE.

THE MEDIUM-SIZE TRADING COMPANY HAS SO FAR EXTENDED TECHNOLOGICAL COOPERATION TO MORE THAN L0 SILK PLANTS IN THE REPUBLIC, KNOWN AS A MAJOR RAW SILK PRODUCTION CENTER IN THE SOVIET UNION. THE ASSISTANCE FOLLOWS A TECHNOLOGICAL COOPERATION AGREEMENT CONCLUDED IN 1988.

HOWEVER, THE REPUBLIC'S MULBERRY CULTIVATION AND SILK-REELING AND WEAVING ARE STILL AT AN ''IMMATURE'' LEVEL.

IN RESPONSE TO A REQUEST BY THE REPUBLIC'S INDUSTRY MINISTRY, CHORI HAS AGREED TO HELP UPDATE THESE TECHNOLOGIES TO BOOST PRODUCTION OF HIGH-GRADE RAW SILK EXPORTABLE TO WESTERN COUNTRIES.

CHORI SAID IT WILL ACTIVELY WORK TO DEVELOP NEW MARKETS FOR RAW SILK, PRODUCED AT UZBEK SILK PLANTS. ITALY, SOUTH KOREA, AND HONG KONG ARE CONSIDERED PROMISING EXPORT MARKETS, THE FIRM SAID.

#90152k0087 06/01/1990 ~Japanese News Agency
TOKYO (JUNE 1) KYODO - DAIWA SECURITIES CO. SAID FRIDAY THAT IT WILL

LAUNCH A NEW INVESTMENT FUND FOCUSING ON STOCKS LINKED TO GLOBAL ENVIRONMENTAL BUSINESS, WITH A SUBSCRIPTION AMOUNT SET AT 50 TO 60 BILLION YEN.

THE NEW FINANCIAL TOOL REFLECTS ACCELERATED MOVES WORLDWIDE FOR THE PROTECTION OF THE ENVIRONMENT AND THE SEEKING OF SPECIFIC WAYS TO COMBAT GLOBAL WARMING, CONTROL POLLUTION, AND CREATE ENERGY-EFFICIENT INDUSTRIALIZED COUNTRIES, INDUSTRY SOURCES SAID.

THE PLANNED INVESTMENT FUND, NAMED ''GLOBAL ENVIRONMENT STOCK FUND,'' IS TO CONSIST OF STOCKS OF JAPANESE AND FOREIGN CONCERNS RELATED TO ENVIRONMENTAL EQUIPMENT MANUFACTURING, ENERGY-SAVING BUSINESS, GARBAGE INCINERATORS AND SO FORTH, THE SOURCES SAID.

THE SOURCES SAID THESE STOCKS TIED TO THE PROTECTION OF ENVIRONMENT HAVE BEEN SHOWING BETTER PERFORMANCES IN WORLD STOCK MARKETS AND ARE EXPECTED TO REMAIN IN THE SPOTLIGHT AS ONE OF THE LEADING MARKET THEMES IN THE IMMEDIATE FUTURE.

DAIWA, JAPAN'S SECOND-BIGGEST BROKERAGE HOUSE, PLANS TO INVITE SUBSCRIPTIONS FOR THE INVESTMENT FUND FROM NEXT MONDAY THROUGH JUNE 27, WITH MINIMUM LOT ACCEPTANCE SET AT 10,000 YEN.

#90152k0093 06/01/1990 ~Japanese News Agency

TOKYO (JUNE 1) KYODO - HITACHI LTD. ANNOUNCED FRIDAY THAT ITS 8MM VCR (VIDEOCASSETTE RECORDER)-CAMERA COMBINATION WOULD BE PUT ON THE DOMESTIC MARKET IN SEPTEMBER UNDER ITS OWN BRAND NAME -- ''VIDEO MOVIE.''

VIDEO MOVIE WILL COME OUT IN TWO TYPES -- A STANDARD TYPE AND HIGH-QUALITY PICTURE TYPE.

HITACHI HAS SO FAR PRODUCED 8MM VCR-CAMERA COMBINATIONS ALL UNDER THE BRAND NAME OF OTHER JAPANESE AND FOREIGN COMPANIES, AND NOT UNDER ITS OWN BRAND NAME.

HITACHI IS CURRENTLY MANUFACTURING 10,000 COMBIS A MONTH FOR SUPPLY TO OTHER MAKERS UNDER THEIR OWN BRAND NAMES. COMPANY OFFICIALS PREDICTED THAT THE OUTPUT OF 8 MM VCR-CAMERA COMBINATIONS WOULD REACH 45,000 UNITS A MONTH BY THIS COMING YEAREND.

OFFICIALS SAID HITACHI WOULD DEVELOP AND PRODUCE A CONSOLE-TYPE 8MM VCR AND SEPARATE CAMERA AND A COMBINED TV-8MM VCR IN THE FUTURE.

#90152k0096 06/01/1990 ~Japanese News Agency

TOKYO (JUNE 1) KYODO - ARTHUR DUNKEL, DIRECTOR GENERAL OF THE GENERAL AGREEMENT ON TARIFFS AND TRADE (GATT), SAID HERE FRIDAY HE OPPOSES JAPAN'S INSISTENCE ON PROTECTING ITS RICE MARKET.

DUNKEL TOLD A SYMPOSIUM IN TOKYO HE OBJECTS TO MAKING AN EXCEPTION OF JAPAN BY ALLOWING IT TO ASSERT THAT RICE BE REGARDED AS NECESSARY TO ITS FOOD SECURITY AT A TIME WHEN THE WORLD'S MAJOR COUNTRIES ARE TRYING TO REACH A MUTUALLY AGREED CONSENSUS ON MARKET-OPENING MEASURES FOR FARM PRODUCE.

DUNKEL'S REMARKS, AS HEAD OF THE GENEVA-BASED 96-NATION ORGANIZATION, WERE TAKEN AS AN INDICATION HE HOPES JAPAN WILL CHANGE ITS STANCE OVER THE THORNY FARM TRADE ISSUE. ANY SOFTENING OF THE JAPANESE STAND COULD HELP BRING THE ONGOING URUGUAY ROUND OF MULTILATERAL TRADE TALKS TO A SUCCESSFUL CONCLUSION BY THE END OF THIS YEAR.

DUNKEL ALSO DENOUNCED AS ''AMBIGUOUS STEPS'' THE SO-CALLED VOLUNTARY EXPORT RESTRAINT THE JAPANESE STEEL INDUSTRY HAS BEEN TAKING BY SETTING A CEILING ON ITS EXPORT VOLUME FOR A CERTAIN PERIOD.

DUNKEL SAID THE EXISTENCE OF ANY SORT OF EXCEPTIONS TO GATT FREE-TRADE PRINCIPLES REMAINS A THREAT TO COMPLETING A FRAMEWORK ACCORD FOR FREER MULTILATERAL TRADE ACTIVITY.

IN HIS TALKS WITH KABUN MUTO, JAPANESE MINISTER OF INTERNATIONAL TRADE AND INDUSTRY, DUNKEL WAS QUOTED AS CALLING FOR JAPAN'S ADDITIONAL EFFORTS IN THE FIELD, SAYING EACH COUNTRY IS STRIVING TO REDUCE FARM PROTECTION MEASURES WHILE CONQUERING DOMESTIC PROBLEMS.

MUTO, WHILE DECLINING DIRECT COMMENT ON HIS STATEMENT, REAFFIRMED JAPANESE POLICY THAT THE COUNTRY REMAINS OPPOSED TO ANY RETALIATORY ACTION TAKEN UNILATERALLY -- AN IMPLICIT REFERENCE TO THE SUPER 301 PROVISION OF THE 1988 U.S. OMNIBUS TRADE AND COMPETITIVENESS ACT, WHICH BOTH JAPAN AND THE 12-NATION EUROPEAN COMMUNITY CLAIM INFRINGES GATT FREE TRADE RULES.

#90152m0001 06/01/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JUNE 1) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

Unemployment fell to 5.3% in May, compared to 5.4% in April, the LABOR DEPARTMENT reports this morning. Non-farm payrolls increased 164,000. A consensus of economists polled by "Dow Jones Capital Markets Report" had been for a 253,000 increase in non-farm jobs. They had expected the

jobless rate to remain unchanged.

Factory orders slumped 2.3% in April, the COMMERCE DEPARTMENT reported yesterday. ... Agricultural prices in May rose 2% from the previous month as strong demand for pork and tight supplies sent hog prices soaring to their second highest level ever, the AGRICULTURE DEPARTMENT said yesterday. ... The NATIONAL ASSOCIATION OF REALTORS says its housing affordability index reached 104.6 in April, meaning a family earning the median income of $34,032 had 104.6% of the income needed to qualify for financing a median-priced house costing $95,300. ... China's Civil Aviation Administration has ordered 36 BOEING jets and taken options on another 36.

WHAT'S AHEAD:

"The Washington Post" reports that EASTERN AIRLINES faces possible indictment on charges of falsifying aircraft maintenance records.

FROM THE BULLS:

"If it looks like a duck and quacks like a duck, it's a bull market," says BILL WOLMAN, chief economist at "CNBC" and "BusinessWeek." "We've got to say that this is a bull market, that the market is going to continue to be up. The reason it's up is that all the experts have been wrong. ... That's what you need for a bull market: a lot of money on the sidelines and a lot of bearish experts. That's what adds to a bull market." More importantly, he says on a more somber note, a variety of underlying economic fundamentals are making the stock market essentially the "only game in town" for investors. (CNBC "Market Wrap-Up", 5/31)

"I think May will disprove all those bears," says a very bullish HEIKO THIEME of DEUTSCHE BANK CAPITAL in New York. Mr. Thieme accurately predicted a strong May, and he now says, "Watch out for the summer rally. This is not over yet. Any consolidation here, which might sink in, is a unique buying opportunity. [A Dow of] 3200 remains my high for the year, so there is still plenty of opportunities." He does, however, caution that one has to be selective at these levels, as some stocks have "moved a little ahead of themselves." He also predicts lower interest rates. (FNN "Marketwrap", 5/31)

STOCK MARKET:

The Dow could drop 70 to 100 points today on a stronger-than-expected jobs growth figure, says EDWARD LAUX of KIDDER PEABODY. On the other side, he sees room for only about a 30-point move up if the news is viewed as favorable. (WSJ, 6/1)

"Sometimes when it looks like a duck, it smells like a skunk and this is

one of those cases," says "CNBC" market analyst ROY BLUMBERG in response to Bill Wolman's declaration of a bull market. However, Blumberg says he is not a bear, either, and looks for the Dow to go a bit higher before settling back into a trading range. He is unwilling to proclaim a bull market because, overall, fewer than half of all stocks are up in the current rally. He notes that the 1700- stock Value Line index is 4% below January and almost exactly the same as it was in April of 1989. (CNBC "Market Wrap-Up", 5/31)

"I'm not nervous at all," says GUY COURTNEY, senior vice president of DAVID A. NOYES. "This market has got plenty of upside left in it." (WSJ, 6/1)

"I like the market, but I don't rule out a correction for a few days," says PHILLIP ROTH, chief technical analyst at DEAN WITTER REYNOLDS. He looks for stocks to move modestly higher over the summer. (WSJ, 6/1)

"I am expecting some contraction in the market near-term," says ALAN ACKERMAN, senior vice president with GRUNTAL & CO. "Many stocks that have had strong moves look vulnerable." But he sees support for the Dow at 2810 and expects the Dow to move higher later in the year, nothing that "the market has risen six out of seven times since 1985 when there has been a U.S.-Soviet summit." ("Investor's Daily", 6/1)

JOHN McGINLEY, editor of "Technical Trends" newsletter, notes that, historically, only September has been a worse month for stocks than May. This year, however, the Dow was up 8.3% in May, the best monthly gain since a 9% rise last July. "This is really a notable performance," says McGinley. "It's an exception, and a happy exception at that." ("USA Today", 6/1)

DALE TILLS of CHARLES SCHWAB & CO. attributes yesterday's decline on the Dow to profit-taking and a feeling of acquiescence. "People were protecting the gains they've gotten; but I think, too, the market just got tired at the end of the day and sold off because of a lack of interest. All in all it was just a quiet day." (UPI, 5/31)

STEVEN KROLL, president of SLH ASSET MANAGEMENT, SHEARSON LEHMAN HUTTON's money management operation, says the market will remain locked in a trading range until the Federal Reserve has eased credit. He sees the top of the range at about 2900 on the Dow. (WSJ, 6/1)

"It's a time out, but not a top out, the excuse being tomorrow's employment figures, which have become the most widely watched [economic] barometer," says ALFRED GOLDMAN of A.G. EDWARDS. (Reuters, 5/31)

"The market seems to be getting tired," says WILLIAM ROTHE, managing director of over-the-counter trading at ALEX. BROWN & SONS of Baltimore.

However, he thinks there remain a number of money managers on the sidelines with cash to invest in stocks. (WSJ, 6/1)

"It's difficult for us to say we are opening up for a new bull move, but rather we are in a range which might be defined as the low 2200s or 2300s or as high as 3000," says JOSEPH BATTIPAGLIA, associate director of research at GRUNTAL & CO. "That seems to be environment that we're in." (CNBC "Market Wrap-Up", 5/31)

DAVID BOSTIAN, chief investment strategist at JESUP & LAMONT, says stock market investors may discover that economic growth is weaker than they thought. "Investors' perceptions have become divorced from the economy." (WSJ, 6/1)

JEFF BAHRENBURG of SHEARSON LEHMAN HUTTON sees the Nikkei trading in a range of 28,000 to 33,000 for the rest of year. "We see a deterioration in liquidity. Institutions have been selling the market consistently in recent months and eventually that is likely to limit the market's rise. We don't think the yen is likely to appreciate dramatically, not enough to give much further support to the bond market." (CNN "Business Day", 6/1)

STOCK TIPS:

RAUSCHER PIERCE REFSNES INC., recommends stock in HOME NUTRITIONAL SERVICES INC., a New Jersey-based provider of home infusion therapy. The brokerage says the company should continue to outpace the $1.1 billion-a-year industry, where expected annual growth of 25% makes it one of the fastest-growing businesses in health care. It says Home Nutritional Services should average 32% annual earnings gains for the next few years. ("USA Today", 6/1)

Even though he sees the market stuck in a trading range overall, JOSEPH BATTIPAGLIA, associate director of research at GRUNTAL & CO., says, "We're not afraid to trade. He likes GLAXO HOLDINGS and SMITHKLINE BECKMAN among the multi-national pharmaceuticals and PERKIN ELMER in technology. (CNBC "Market Wrap-Up", 6/1)

"USA Today" columnist DAN DORFMAN features AT&E CORP. and its plans to market a Dick Tracy-type wristwatch pager in today's paper. "It's the next Xerox, a $70 to $100 stock in 12 months," says JOHN WESTERGAARD, head of WESTERGAARD RESEARCH & PUBLISHING CO. "Baloney," says TOM BARTON of FESHBACH BROTHERS. "AT&E is strictly hype. It'll be out of business in two years and we're shorting more. It's a four-year-old story that's three years late coming to the market. Anybody can put a beeper in a watch. What's the big deal?" ("USA Today", 6/1)

ERIC MILLER of DONALDSON, LUFKIN & JENRETTE favors stocks in the technology sector with strong earnings potential: HEWLETT PACKARD, DSC

COMMUNICATIONS, and INTERGRAPH. (CNN "Business Day", 6/1)

BUFFETS INC., is "Stock of the Week" today in "Investor's Daily." The company is featuring a new serving format with eight islands where different foods are offered, eliminating long lines. "Before, you would walk in and get a tray and put your food on it," notes analyst BRYAN ELLIOTT of ROBINSON-HUMPHREY CO. "If someone in your line was debating between broccoli and cauliflower, they'd hold up the line. Not anymore." Analyst RACHAEL SCHERER of DAIN BOSWORTH INC. says she is not convinced a 45% growth rate this year "warrants a 65% premium to the market pricewise." The stock is trading at a 35 price-earnings ratio, one of the highest in the restaurant industry, and many analysts are rating it a "hold." However, KEITH MULLINS of MORGAN STANLEY believes it is still an attractive emerging growth investment. ("Investor's Daily", 6/1)

CNN's DAN DORFMAN notes that most analysts are down on retailers, but says industry consolidation should improve profits in the future. Some retailers he sees as being on a roll: MAY DEPARTMENT STORES, K MART, U.S. SHOE, JAMESWAY and WOOLWORTH. (CNN "Moneyline", 5/31)

HELANE BECKER of SHEARSON LEHMAN HUTTON says the naming of GERALD GREENWALD as the new CEO of UNITED EMPLOYEE ACQUISITION CORP. is a wise move for the employees in their bid to buy UAL. "Greenwald is very good with numbers, which is what United employees will need. I think this is very good for United that the employees have finally been able to find someone to run the company for them." ("Nightly Business Report", 5/31)

-30- 10075

#90152m0002 06/01/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JUNE 1) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"I don't expect the Fed to do anything except stay in a neutral posture for at least the next six to eight weeks until they get a better reading on the economy," says MICHAEL CAREY of EQUITABLE FINANCIAL CO. (CNBC "World Business", 6/1)

"We believe yields on 30-year Treasury bonds will decline to an average of about 7.80% by the first quarter of 1991, down more than one percentage point from the levels that have prevailed over the past two months," says ERICH HEINEMANN, chief economist at LANDENBURG, THALMANN & CO. "That implies a surge of more than 10 points -- $100 per $1,000 -- in the price of long bonds." ("Investor's Daily", 6/1)

Corporate buy-backs of junk bonds hit a record $2.5 billion during the first quarter and are expected to set new highs for the year, reports "The Wall Street Journal." But traders say the buy-backs are often kept secret at least long enough for the companies to buy the bonds while prices are still cheap. "We have such an illiquid market that as soon as a company announces it's buying back debt, prices jump," says KINGMAN PENNIMAN, senior vice president at McCARTHY, CRISANTI & MAFFEI, a unit of XEROX. "Once you advertise that you're buying, nobody wants to sell at low prices." (WSJ, 6/1)

"Bonds are better bid than offered at the moment," says one dealer at a U.S. bank. "As usual, the marketplace is obsessed by a set of figures. But if the [employment] number is good, bonds will move higher. It could set a tone for a while." (Reuters, 6/1)

"By and large, the employment forecasts, if borne out, should be pretty favorable for the credit markets," says ROBERT CHANDROSS, chief economist at LLOYDS BANK. "The bulk of the data suggest an economy that is having very modest growth at best." (NYT, 6/1)

"The employment data really sets the tone for the bond market for the next four weeks and therefore the stock market," says RALPH BLOCK of RAYMOND JAMES & ASSOC." (Reuters, 5/31)

"If we get a non-farm payroll number that is very strong, that might increase some of the inflationary fears in the U.S.," says TOM BENFER of the BANK OF MONTREAL. "That would erode the real return in the U.S. and I think that might even put some downward pressure on the dollar. However, if it is a very low number, I think that would be 1 bullish on the bond and stock markets, and would keep the dollar well supported in these areas." (FNN "World Business Update", 6/1)

"People are very bullish on the dollar," says ROBERT VALDES of BANQUE INDOSUEZ in New York. "Traders who were short dollars have covered, and the market is looking toward the 1.70-mark resistance point." (Reuters, 5/31)

HEIKO THIEME of DEUTSCHE BANK CAPITAL hopes the current strength in the dollar continues. "I am a bull on the dollar for the year. My target for the Deutschemark is 1.80 to 1.90. For the yen, it has been at the peak 160 for the year and I'm going actually for 150." As for the mark, he explains that while German reunification will be

good in four or five years it will be costly over the next two or three years and this will weaken the mark. (FNN "Marketwrap", 5/31)

"The dollar has been stronger for the past few days because of Mr. Bush and Mr. Gorbachev's meetings over arms cuts," says MAHMOUD GHAEMMAGHAMI,

manager of research at WestLB SECURITIES PACIFIC LTD. "I think this is kind of a temporary reaction and the yen should strengthen over the next couple of weeks." (WSJ, 6/1)

"The closer we get to [German] monetary union, the greater the chances are that we'll see some negative developments for the mark," says ERNST PULLMANN, senior trader at DEUTSCHE GIROZENTRALE KOMMUNALEBANK in Frankfort. He sees the dollar firming to 1.6950 marks at the end of June, but falling to 1.6400 marks by the end of August. DALE LARSON of BANK OF AMERICA in San Francisco sees the dollar at 1.700 marks at the end of June and 1.7200 marks at the end of August. (WSJ, 6/1)

THE ECONOMY:

"The U.S. economy, which slowed to a crawl over the last six months, likely will slip into a mild recession this fall," says ERICH HEINEMANN, chief economist at LANDENBURG, THALMANN & CO. He points to several factors leading to such a conclusion, including "the Federal Reserve's relentless attack on inflation, the cumulative slump in the growth of total employment and the plunge in corporate profit margins." ("Investor's Daily", 6/1)

April's factory orders fell 2.3% which was a steeper decline than most analysts were predicting, but this apparently did not alarm most analysts. HOWARD ROTH of SECURITY PACIFIC BANK explains, "This number today hasn't changed our view of the manufacturing sector. We figure it is not going to contribute to growth in the economy, so it hasn't increased our concern about a recession." He continues, "We should see some modest improvement in inflation, and the Fed will not have to tighten policy to get this improvement." (FNN "Marketwrap", 5/31)

"Basically, it [the drop in factory orders] shows the manufacturing sector is still dead in the water," says EVELINA TAINER, senior domestic economist with FIRST NATIONAL BANK of CHICAGO. "It's just not going anywhere." MICHAEL EVANS of EVANS ECONOMICS INC., says, the report shows "businesses are starting to pull in their horns" because of high interest rates and a 16% decline in profits last year. ("Investor's Daily", 6/1)

RAY DALIO of BRIDGEWATER ASSOCIATES is worried about the future of the economy. "The downturn, whenever it comes, is going to be more severe than a typical downturn." As a major factor in this prediction, he points to the fact that currently, our "debt to GNP ratio is the highest since the Depression." (FNN "MarketWrap", 5/31)

"This is really the first month we're getting a good read on the economy," says MICHAEL CAREY of EQUITABLE FINANCIAL CO. "In earlier months -- January through February -- we had some strange seasonal effects that tended to boost employment up: warm weather and construction, for example.

And then we had a payback in the second two months of the year. So, this is really the first number that gives us a good reading on the economy and I suggest it should paint a picture of a growth rate and GNP around 2%." (CNBC "World Business", 6/1)

"I expect the employment numbers will confirm the slower pace of the economy in the second quarter," says VICTOR CHANG, president of the VC MANAGEMENT COMPANY. "But the Federal Reserve Board won't budge from their current approach to monetary policy, and I don't believe they will move until sometime in the summer, when they will ease policy marginally." (NYT, 6/1)

IN WASHINGTON:

"The Wall Street Journal" reports in its "Washington Wire" section this morning that FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN "worries that the credit crunch will spread beyond real estate to other business loans, even though it doesn't show up in overall bank lending data. 'The anecdotal evidence is so extraordinarily large,' he says. The Treasury ponders issuing a statement to show it is monitoring the situation, but it worries about causing undue alarm or a regulatory easing." (WSJ, 6/1)

LONDON (JUNE 1) PR NEWSWIRE - Reuters today announced the appointment of Rosalyn Wilton as senior vice president, Transaction Products, Reuters Europe, Middle East and Africa (REMA).

Wilton, 38, will have responsibility in Europe for dealing systems for capital markets, interest rate products and derivatives.

Wilton was previously managing director of International Financial Futures and Options (U.K. and Europe) with Drexel Burnham Lambert Group Inc. She was also managing director of International Fixed Income (Europe) for Drexel and was a director of the London International Financial Futures Exchange (LIFFE).

David Ure, managing director, REMA, said: "We are delighted that an executive of Mrs. Wilton's ability and experience has joined Reuters. She will play a significant role in developing products for the futures and other markets."

Reuters Holdings PLC (NASDAQ: RTRSY) supplies a wide range of services to both business subscribers and to the news media. It obtains its information from around 160 exchanges and over-the-counter markets, from data contributed directly by more than 3,715 subscribers in 82 countries and from a network of over 1,270 journalists, photographers and cameramen.

Reuters distributes information via around 199,700 video terminals and teleprinters. This includes information directly transmitted to clients' computers.

PHILADELPHIA (JUNE 1) PR NEWSWIRE - A new chief executive officer and senior management team were installed today at Laventhol & Horwath (L&H), the nation's seventh largest accounting and business consulting firm.

New managing partners were also named in several offices. Robert N. Levine succeeded George L. Bernstein, who had served as chief executive officer and executive partner since 1980. Levine, 49, was elected to a five-year term last November by the firm's national council.

Levine was previously managing partner of the firm's San Francisco office and area managing partner for the northwestern states. He is a member of both L&H's national council and of the executive council of Horwath International, the firm's international network. Levine has been with L&H since 1971.

Levine joined L&H as a tax supervisor at the Norfolk, Va., office in 1971. He later became a manager in that office's management consulting group, was promoted to partner in 1973 and served as managing partner there from 1976-78. He served as managing partner of L&H's Tampa, Fla., office for two years before assuming the top post in San Francisco in 1980.

Levine holds bachelor's and law degrees from the University of Virginia, Charlottesville, Va. He is a member of the American Institute of CPAs and the California Society of CPAs.

Also appointed were six new members of L&H's senior management team -- assembled, said Levine, to "strengthen the firm's commitment to professional quality and build client confidence."

The team's members will assume greater leadership roles in the firm's risk management and quality assurance programs. They will strengthen the firm's professional compliance procedures and its client acceptance standards.

In addition to Levine, the new members include: -- Jacob R. Brandzel -- As the newly appointed national partner for professional services-accounting/auditing/tax, Brandzel will supervise the national tax accounting and auditing departments. He had served as the firm's national tax partner since 1987. A CPA, he holds a law degree from John

Marshall Law School, Chicago, and a bachelor's degree from DePaul University, Chicago. Brandzel is a member of the Pennsylvania and Illinois CPA societies, the American Institute of Certified Public Accountants (AICPA), the American Bar Association and is on the editorial boards of several publications. He joined L&H in 1968.

-- James B. Leach -- Leach is L&H's new national accounting and auditing director and reports to Brandzel. Leach, with 24 years of public accounting experience, was previously partner-in-charge of accounting and auditing in the firm's San Francisco office. Leach received his bachelor's degree in accounting from Bentley College, Waltham, Mass., and is a CPA. He is a member of the AICPA and the California Society of CPAs.

-- Frank J. O'Connell -- O'Connell is the firm's new national tax partner and reports to Brandzel. He was previously director of national tax services in L&H's Washington office. O'Connell also served for six years with the Internal Revenue Service, both as a revenue agent and as a tax law specialist. He has served as a member of the executive committee of the AICPA's tax division and is immediate past chairman of its Committee on Taxation of Corporations and Shareholders. A CPA, O'Connell holds a bachelor's degree from the University of Notre Dame, South Bend, Ind., and a law degree from the Georgetown University Law Center, Washington.

-- David E. Arnold -- Arnold has assumed an expanded role as national partner for professional services-consulting, and reports to Levine. He has more than 20 years' experience in real estate development planning and has conducted and directed economic feasibility studies, marketing strategies, corporate strategic planning studies, financial analyses and general business counseling for numerous organizations and individuals. Arnold previously headed the consulting department in the firm's Philadelphia office, and also served as its regional consulting director. He received a bachelor's degree from Cornell University, Ithaca, N.Y.

-- Mark I. Murovitz -- Murovitz is L&H's new national partner for technology and innovation and will report to Levine. He has been with the firm for 20 years, serving since 1987 as managing partner of L&H's Atlanta office. Murovitz was also a member of the firm's national council for four years. A CPA, he received his master's degree from Emory University, Atlanta, and his bachelor's degree from the University of Charleston, Charleston, W.Va. Murovitz is a member of the AICPA, the Georgia Society of CPAs and the Pennsylvania Institute of CPAs.

-- Edward A. Suarez -- Suarez is the firm's new national partner for administration and executive office services. He will also continue in his role as national partner for marketing and business development, a position he has held since 1985. Suarez has been with L&H for more than 20 years, including five years as managing partner of the East Brunswick, N.J., office. Suarez has more than 25 years' experience consulting and

auditing mid-sized and family-owned businesses. A CPA, he received a master's degree in business administration from Fairleigh Dickinson University, Rutherford, N.J., and his bachelor's degree from Pace University, New York.

Laventhol & Horwath is the nation's seventh largest accounting and business consulting firm, with annual U.S. revenues of approximately $345 million. The firm has more than 51 offices in major U.S. cities and is represented in 64 countries through its affiliation with Horwath International.

HOUSTON (JUNE 1) PR NEWSWIRE - Service Corporation International ("SCI") (NYSE: SRV) announced today that it will redeem 50,000 shares of its variable term preferred stock, Series A, on June 20, 1990. On that date, these shares will be redeemed at a price of $1,000 per share and the final dividend will also be paid.

The company stated that these shares are being redeemed under the provisions set forth in SCI's Statement of Resolution that established these shares and the rights, preferences and limitations of the Series A variable term preferred stock.

SCI is the largest owner and operator of funeral homes and cemeteries in North America. The company owns 549 funeral homes and 126 cemeteries in the United States and Canada. It also owns Provident Services, Inc., which provides capital financing to independent funeral homes and cemeteries. During the year ended Dec. 31, 1989, SCI had revenues of $518.8 million.

NORFOLK, VA (JUNE 1) PR NEWSWIRE - On May 29, Norfolk Southern's (NYSE: NSC) 23-mile line between Hickory and Lenoir, North Carolina, was converted to a Thoroughbred Shortline operation. Carolina & Northwestern Railroad, the new operator, is a subsidiary of Rail Link, of Petersburg, Va., owner of a number of shortlines and industry switching services.

With this transfer, Norfolk Southern completed its 3,500-mile line

rationalization program -- four months ahead of schedule. Initiated in October 1987 as part of a strategic downsizing of personnel and trackage, the program has involved 1,400 miles of abandonments, 1,300 miles transferred to shortline operators (most under NS's Thoroughbred Shortline Program), and 800 miles sold and subleased to a regional railroad, the Wheeling and Lake Erie Railway Company.

Norfolk Southern's system now encompasses 14,600 route miles down from 18,450 at the time of consolidation in 1982.

"Restructuring is a necessary part of making Norfolk Southern more competitive in today's tougher, international markets. It is sometimes a painful process, but this action is absolutely essential in keeping Norfolk Southern competitive in today's business environment," said Arnold B. McKinnon, NS chairman, president and chief executive officer.

ST. LOUIS (JUNE 1) PR NEWSWIRE - F. Lee Fox was appointed vice president, human resources by the Kellwood Company (NYSE: KWD) board of directors, the company announced today.

Fox, a 25-year Kellwood employee, formerly was director of personnel for Kellwood, a position he has held since 1982.

Over the years, Fox has held numerous human resource related positions, beginning his career in Siler City, N.C., as personnel manager for the hosiery operation.

Fox reports to James C. Jacobsen, executive vice president, administration.

He is a member of the AAMA Human Resources Committee and the American Society for Personnel Administration. A graduate of the University of North Carolina in Chapel Hill, Fox originally was from Siler City.

Kellwood is an international manufacturer and marketer of apparel, home fashions, and camping soft goods.

ST. LOUIS (JUNE 1) PR NEWSWIRE - The May Department Stores Company (NYSE: MA) reported to shareowners at its annual meeting today that the company is off to a good start for 1990, and believes it will achieve its 16th consecutive year of record sales and earnings.

David C. Farrell, chairman and chief executive officer, said, "We are optimistic about the balance of the year, particularly the Christmas season which has one additional shopping day between Thanksgiving and Christmas, a significant plus."

Reporting on the positioning of May, Farrell said, "Over the last several years, we have made a number of important strategic moves that have strengthened May and I feel extremely positive about how we are positioned." He cited the company's strong department store franchises which are leaders in their respective markets, and the leadership in both the store companies and the corporate centers as major advantages.

Farrell also stated that May is more sharply focused with the forthcoming spin-off of Venture. "We are concentrating our energies and efforts on operating quality department store companies, a business that we know best and where our returns are among the best in the industry." Farrell said May is accelerating the expansion of Volume Shoe Corporation, "a highly profitable business that is serving May shareowners well."

Farrell also noted that a number of the company's department store divisions have been strengthened in the past year through combinations and consolidations. He said Lord & Taylor's position was enhanced with the conversion of six New Jersey locations from Hahne's, resulting in some of Lord & Taylor's most successful stores.

O'Neil's in Akron was combined with May Company in Cleveland; Goldwaters in Arizona was converted to Robinson's; Sibley's in upstate New York was combined with Kaufmann's, and Hecht's extended its market to Richmond and Tidewater by acquiring four stores, all moves which have benefited the company.

Farrell said the company is focusing on increasing store-for-store sales "by managing and merchandising each of our stores as individual units, improving customer service and developing the best talent."

Farrell also told shareowners that May has made significant progress in providing better customer service. "Taking good care of the customer is one of our highest priorities and we want to make sure that our customers have an enjoyable and pleasant shopping experience. We want to provide quality service and to do everything we can to streamline the process to make it easier and faster for the customer to shop in our stores," he said.

TALLAHASSEE, FL (June 1) PR Newswire - Florida's Public Service Commission today deferred action on Southern Bell Telephone and Telegraph Company's proposed "Caller I.D." service that had been scheduled for a vote on Tuesday.

Chairman Michael Wilson said the commission will review recent court decisions, treatment in other states and proceedings scheduled before the U.S. Senate, as well as customer concerns expressed to the commission.

The Caller I.D. service, which Southern Bell wants to offer, registers and displays the phone number of the caller on the phone being called.

Chairman Wilson said that Caller I.D. blocking will be addressed on July 17.

INDIANAPOLIS (JUNE 1) PR NEWSWIRE - The board of directors of MSA Realty Corporation (AMEX: SSS) has approved a plan to pursue a refinancing of the existing loans on the company's total portfolio of properties. They are in negotiations with a lending source at this time and, if such negotiations proceed satisfactorily, would anticipate a loan closing later this year. Given the current state of the real estate equity markets, the board of directors elected not to pursue a sale of its portfolio at this time. Management believes that this refinancing is, however, a necessary first step toward the pursuit of a future sale or other restructuring alternatives should the board so choose.

The company also announced that it incurred a net loss of $112,496, or $.01 per share, for the quarter ended Mar. 31, 1990 compared with a net loss of $832,738, or $.10 per share, in the first quarter of 1989. The first quarter 1989 per share figures included a $.12 equity in gain on sale of shopping center property. J.A. Rosenfeld, president of the company, said that earnings before non-cash charges(A) for the 1990 first quarter were $1,463,406, or $.17 per share, compared with $508,006, or $.06 per share in the comparable period last year.

The company also announced that its board of directors declared a quarterly cash distribution of $.15 per share, payable on July 6, 1990 to

shareholders of record as of June 15, 1990.

(A) -- Non-cash charges are defined as depreciation of property and amortization of original issue discount, denture issuance costs, organization costs and construction period return, as well as the excess of federal tax expense over current year federal tax liability.

#90152p4001 06/01/1990 ~PR Newswire

NEW YORK (JUNE 1) PR NEWSWIRE - Today, Delta Air Lines (NYSE: DAL) begins its Person-to-Person New York/Newark to Los Angeles service with traditional ribbon-cutting ceremonies.

Newark Mayor Sharpe James will join other civic and Delta officials in officially opening the new route.

Even though the route is a major expansion for Delta into one of the world's most competitive markets, it won't be just another inaugural flight with the usual rituals. For the first time, the "Spirit of Delta " a Boeing 767-200 jet purchased by company personnel for the airline, will be used for the inaugural flight of a new route. Ginny Whitfield Oxford, a flight attendant who helped spearhead the purchase of the $30 million plane in 1982, will be present for the ceremonies.

The ceremonies will begin at 3:45 p.m. at Newark International Airport, prior to the 5:10 p.m. departure of the inaugural flight.

"For Delta personnel everywhere, this plane represents the special bond between the company and its people that has enabled Delta to maintain a position of leadership in the industry," said Jeff Niven, Delta's district director of marketing for New York. "We're delighted that this relationship can be demonstrated by using the flagship of the Delta fleet for the first flight on this important new route."

The inaugural of transcontinental New York - Los Angeles service -- three 767-200 flights operate daily with morning and evening departures -- fills one of the few remaining gaps in Delta's international route system. Delta flies to 175 cities in 13 countries around the world. The new service links cities that have strong concentrations of Delta service. Delta is the largest carrier in Los Angeles with a total of 105 departures daily.

"Delta's popular Oasis terminal in Los Angeles, it's role as the Official

Airline of Disneyland, and the scope of Delta's operations in Los Angeles provide convenient connections throughout California and the West. These facets will be key ingredients in the success of Delta's new Person-to-Person Transcon service," Niven said.

Long one of the industry's most profitable carriers, Delta has recorded profits every year since 1947 with one exception -- 1982. The initial impact of deregulation had driven down fares to uneconomic levels and fuel prices had surged. A first quarter loss of $18 million spurred company personnel to action, and by December 15, the goal of an employee purchase of the plane became a reality.

"'The Spirit of Delta' project helped to bring the Delta family closer and demonstrated the real feelings that the people of Delta have for the company," Niven said. "This aircraft is a working symbol of the spirit of our organization."

DENVER (JUNE 1) PR NEWSWIRE - Manville Corp.'s (NYSE: MVL) directors today, at its annual meeting here, named Tom Stephens, president and CEO, to the additional responsibility of board chairman. He succeeds George C. Dillon who will remain as a director and chairman of the executive committee.

The company announced that its directors approved an agreement for its forest products subsidiary, Manville Forest Products (MFP), to acquire the stock of Fiskeby Board AB, a leading European supplier of recycled boxboard products. Fiskeby is a wholly-owned subsidiary of Kooporativa Forbundet Industrti AB (KFI), the central organization for the Swedish consumer cooperatives.

Manville also said that it has accepted offers from Morgan Crucible Co.,

PLC, United Kingdom, for the purchase of Manville's European refractory ceramic fiber assets, castables and insulating brick businesses, and its 49 percent interest in a Dutch joint venture for the production of phenolic foam. In a separate transaction, Manville accepted an offer for certain U.S. assets.

Fiskeby, which had total sales of approximately $65 million (U.S.) in 1989 has 385 employees and exports nearly 60 percent of its current production mostly to Scandinavian countries and the U.K. The mill is located in Norrkoping, a southern ocean port city in Sweden.

The terms of the acquisition of Fiskeby were not disclosed. Stephens became president and CEO in 1986. He has 27 year's experience with Manville and predecessor companies, joining Olinkraft, the forerunner of MFP, in West Monroe, La., in 1963. He held a number of positions, including president of the forest products company and chief financial officer. He serves as a director on the boards of Public Service Co. of Colorado, Colorado National Bank of Denver, and CRSS, Inc. of Houston.

Dillon, who became a non-employee chairman of Manville in 1986, is the retired former chairman, president and CEO of Butler Manufacturing Co. of Kansas City, Mo. He has served on the Manville board for 21 years. The company also announced that George B. Munroe retired as a Manville director after serving for 21 years. Munroe is the retired former president, chairman and CEO of Phelps Dodge Corp.

Manville Forest Products Corp. is a wholly-owned subsidiary of Manville Corp. and is headquartered in West Monroe, La. The company is a diversified manufacturing company with major business segments in paperboard, packaging and wood products. MFP currently operates a paper mill in West Monroe; nine domestic converting plants throughout the United States; two paper mills and three container plants in Brazil and a newly acquired carton plant in Bristol, England. Current employment is 7,100 worldwide with 1989 consolidated sales of $777 million. Operating earnings in 1989 of $180 million represented approximately 49 percent of Manville Corp.'s consolidated operating earnings.

Manville Corp. is an international manufacturing and natural resources company headquartered in Denver. In addition to paper and wood products and packaging, the company's primary businesses include building and engineered products, fiber glass and industrial insulation products, roofing systems ad filtration and minerals. Founded in 1858, Manville has more than 18,000 people at more than 50 plants and four mines worldwide. The corporation's world headquarters is in Denver. Manville and its subsidiaries have more than $2 billion in assets as of Dec. 31, 1989.

WILMINGTON, DE (JUNE 1) PR NEWSWIRE - Du Pont (NYSE: DD) today announced it is filing a registration statement with the Securities and Exchange Commission providing for the issuance of Zero Coupon Convertible Subordinated Notes due 2010.

Public offering of the notes will begin as soon as practicable after the registration statement becomes effective. The First Boston Corporation will be sole manager of the offering.

The offering is expected to result in proceeds of approximately $300 million, which will be used for general operations, including capital expenditures, working capital requirements, stock repurchases, and reduction of outstanding indebtedness.

Each note will be convertible at the option of the holder at any time on or prior to maturity into, at the company's option, Du Pont common stock or cash. The yield and conversion rate have not been determined. Holders have the right to sell notes back to Du Pont five, 10, and 15 years after issuance for cash, shares of common stock, or subordinated repayment notes, at Du Pont's option.

ROCHESTER, NY (JUNE 1) PR NEWSWIRE - Rochester Telephone Corp. (NYSE: RTC) and Northern States Power Co. (NYSE: NSP) of Minneapolis, Minn., today announced that they have signed an agreement for Rochester Tel to acquire the telephone properties of Northern States Power in North Dakota.

The joint announcement was made by David C. Mitchell, president of Rochester Tel's Telephone Group, and Craig Blair, senior vice president-electric utility of NSP.

The business is the state's largest independent telephone company, serving about 21,800 access lines. About 90 percent of its customers reside in Minot, North Dakota's fourth largest city, which is located about 100 miles north of the state capital, Bismarck.

Founded in 1901, the company was purchased by Northern States Power's predecessor company in 1911. NSP is selling the company to place its full focus on its electric and gas operation, which represents more than 99 percent of its revenues and earnings.

The business includes a telemarketing service, Northern Plains Telemarketing, operated in conjunction with Sitel Corp., a telemarketing service contractor. There is also an agreement to acquire Kotana Communications, a provider of paging and mobile telephone equipment, radio telephones and alarm systems.

Terms and conditions of the sale were not disclosed. The transaction is subject to the approval of the North Dakota Public Service Commission and other governmental agencies.

Mitchell said the property will be operated as a separate company within the Rochester Tel organization, to be named Minot Telephone Co., with no changes in operations or personnel planned.

Rochester Tel currently operates 24 telephone companies in six states, with 15 subsidiaries in the Midwest. When all pending acquisitions are completed, including Minot Telephone, Rochester Telephone and its 30 subsidiary telephone companies will serve more than 680,000 access lines in 11 states.

Minot Telephone will become Rochester's second largest telephone subsidiary. Only Highland Telephone in southeastern New York State, acquired in 1976, is larger. Minot also becomes the largest city served by any of Rochester Tel's current subsidiaries.

Rochester Tel's principal operating territory is a six-county area in Western-Central New York. It also owns three unregulated subsidiaries: RCI Long Distance, a regional long distance carrier; Rotelcom Network Systems, which provides competitive telecommunications equipment and

services; and Rochester Tel Mobile Communications, which manages the cellular operation in the Rochester area.

Northern States Power is a combination gas and electric utility with more than 1,600,000 customers in portions of Minnesota, Wisconsin, Michigan and North and South Dakota.

NEW YORK (JUNE 1) PR NEWSWIRE - Sutton Holding Corp. announced today that it has extended the expiration date of its cash tender offer for all of the outstanding shares of common stock of DeSoto, Inc. (NYSE: DSO) (including the associated preferred share purchase rights) at $50 per share, until midnight, New York City time, on Thursday, June 15, 1990. The offer was previously set to expire at midnight, New York time, on Thursday, May 31, 1990.

Sutton Holding Corp. was advised by the depositary for the tender offer that as of 7 p.m. New York City time, on Thursday, May 31, 1990, 2,577,360 shares of common stock had been validly tendered and not withdrawn which, together with the shares beneficially owned by Sutton Holding Corp. and its affiliates, collectively represent approximately 77.9 percent of all outstanding DeSoto shares. Sutton believes that these shares also represent approximately 85.6 percent of the shares of common stock not owned by either Sutton Holding Corp. and its affiliates or by the DeSoto stock ownership plan and officers and directors of DeSoto.

JACKSON, MI (JUNE 1) PR NEWSWIRE - Consumers Power Company set a new all-time electric sendout record for the month of May.

Total electric sendout in May was 2.6 million megawatt-hours, approximately 1 percent higher than the previous record for the month set in 1989. The utility purchased power from the now-operational Midland Cogeneration Venture to help meet the record demand.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6

million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

LIVERMORE, CA (JUNE 1) PR NEWSWIRE - Triad Systems Corp. (NASDAQ: TRSC) today announced a realignment of its Dental Sales and Support organization designed to concentrate its system sales activities on high-potential markets while continuing to provide existing customers with professional service and support.

Joseph F. Shea, general manager of Triad's Dental Division, said the reorganization strengthens the unit's direct sales and telemarketing operations while maintaining its dealer representation in key areas.

"An enhanced direct sales force and telemarketing operation -- along with our strong service and support organization -- ensures current and prospective customers of prompt, professional solutions to their practice management needs," Shea said.

Triad's system is the only computer recommended by the American Dental Association's computer subsidiary and the California Dental Association. Triad Systems Corp. designs, develops, manufactures and supports computer systems which serve the dental practice market, the automotive parts aftermarket and retail hardgoods dealers. It also provides lease financing to a substantial portion of its customers through its TSC Leasing subsidiary.

CARLSBAD, CA (JUNE 1) PR NEWSWIRE - Coded Communications Corp. announces it has received two additional orders for its products totaling $212,000.

Transit Control Systems (TCS) of Tustin, Calif., has ordered specialized data encoder/decoders from Coded valued at $108,000. This equipment will be installed in new General Electric mobile radio units and employed in a system TCS is supplying to Southeastern Pennsylvania Transportation Authority (SEPTA).

In a separate order, Coded will supply data encoders valued at $94,000 as a part of radio equipment Motorola, Inc. will deliver to the New York State Police. Over 1000 Coded ME14 digital encoders will be used to

provide automatic identification of police radio transmissions and emergency alarms.

The company expects to announce receipt of additional orders in the coming weeks. ''The level of our base business is growing at an encouraging rate '' said Robert L. Hillman, president and chief executive officer.

TOLEDO, OH (JUNE 1) PR NEWSWIRE - GenCorp (NYSE: GY) Polymer Products today announced the signing of a definitive agreement for the sale of GenCorp's Toledo automotive vinyls facility to a new company, Textileather Corporation, under an employee buyout plan. Employee ownership will be partly financed through an Employee Stock Ownership Plan.

The agreement requires completion of the sale in early June and provides for continued operation of the facility at 3729 Twining St. and employment of about 280 employees. Production from the plant is currently dedicated to the manufacture of vinyl products for the automotive soft interiors market.

Representatives of plant management and the Amalgamated Clothing and Textile Workers Union formed the Toledo Buyout Committee, Inc., which participated in negotiating the acquisition arrangements.

Textileather will operate with a substantial reduction in wages and benefits for both salaried and hourly personnel. The reduction was agreed to in a vote by plant employees in 1989. In addition, the current plant management has agreed to remain with the facility and make an equity

investment in the business.

James S. Marlen, president of GenCorp Polymer Products, said that selling the business to Textileather was the best alternative for the company, employees and the Toledo economy. "The sale gives employees ownership of the plant and preserves jobs. We wish them success and thank them for their service to GenCorp."

Marlen said the headquarters for GenCorp Polymer Products' Fabricated Plastics and Building Systems businesses will continue to be located in the Toledo area.

GenCorp Polymer Products manufactures residential and commercial wallcoverings, Penn Racquet Sports products, latex coatings and adhesives, and fabricated plastics for consumers and industry.

GenCorp is a technology-based company with strong positions in aerospace, automotive and related polymer products.

MONROE, Mich. (JUNE 1) PR NEWSWIRE - La-Z-Boy Chair Company's (NYSE,PSE: LZB) net sales and net income increased in the fourth quarter of fiscal 1990 and for the fiscal year.

Chairman Charles T. Knabusch said fiscal 1990 was the ninth successive year of higher sales and the fifth straight year of higher profits for the nation's leading producer of upholstered furniture.

He described the company's financial results as "very good, considering that it was a disappointing year for most of the furniture industry." He said La-Z-Boy has continued to expand its sales at more than twice the industry's average rate.

FOURTH QUARTER. Consolidated net sales in the fourth quarter ended April 28 were $169.2 million, up 6 percent from $159.2 million in the same period of 1989. Operating profit and pretax income both rose 9 percent. After-tax net income reached $11.1 million, up 6 percent from the $10.5 million earned in the 1989 fourth quarter. Income taxes rose 16 percent.

Knabusch said the figures represent new highs for La-Z-Boy. "Last year's fourth quarter was exceptionally good," he said, "so we are especially gratified that this year's final quarter was even better. We thank all our people and our dealers for making this possible."

THE YEAR. Consolidated net sales for fiscal 1990 rose 7 percent to $592.3 million, compared to 1989's previous record of $553.2 million. Net income of $28.3 million was a 3-percent increase over the 1989 record year of $27.5 million. Cash dividends to shareholders increased 17 percent to $.54 per share compared to $.46 per share in 1989. Total assets rose 4 percent to $361.9 million, and shareholders' equity increased 10 percent to $214.6 million.

A 1-million-square-foot manufacturing expansion program is under way. By the close of fiscal 1991, La-Z-Boy and its divisions will have 7 million square feet of active manufacturing area in the U.S. and Canada. Knabusch said the expansion is in line with forecasts for increases in sales. He said the expansion also involves improved electronic information systems which will help La-Z-Boy fill retail orders faster and more efficiently.

1990 sales in all La-Z-Boy major residential categories were strong, and office furniture sales improved as the year progressed, Knabusch said. The company introduced fully reclining sofas, which he said were "instant hits with dealers and consumers." Sales are being supported by higher advertising and promotion budgets.

This spring, La-Z-Boy opened the first of its "new generation" of proprietary retail stores, the La-Z-Boy Furniture Galleries. They are much larger than other La-Z-Boy specialty stores, and display furniture and accessories from several La-Z-Boy divisions. The new stores are expected to generate higher sales per square foot.

FISCAL 1991. "The last year or two have been hard on the furniture industry," Knabusch said, "and it is not yet clear whether industry forecasts for a 3- to 5-percent improvement this year are realistic."

"However, the longer range outlook is very positive," he said. "Stronger residential and contract markets will give us the better margins we need to improve our return on equity."

"No matter how the year shapes up for the furniture industry, we fully intend for La-Z-Boy to outperform the industry average," Knabusch said.

Earlier this year, La-Z-Boy joined the "Fortune 500" list of America's largest industrial corporations and the "Business Week 1000" largest U.S. corporations of all types.

MIAMI (JUNE 1) PR NEWSWIRE - Lennar Corporation (NYSE: LEN), Florida's largest homebuilder, has been honored as South Florida's Top Public Company of the Year by the South Florida Business Journal and the professional services firm of Deloitte & Touche.

The 1990 award was announced by Sherrill Hudson, group managing partner for Deloitte & Touche in Florida and Puerto Rico and John Kirsch, publisher of the Business Journal, during a reception for business and professional leaders at the Historical Museum of Southern Florida in downtowm Miami.

Stuart Miller, vice president and director of Lennar, accepted the award on behalf of Lennar, which reported record revenues and earnings last year.

The selection was based on an evaluation of the financial performance of more than 50 publicly held companies headquartered in South Florida. The civic involvement of the Top Public Company finalists also was considered.

Based on fiscal 1989 revenues of $440 million, Lennar was ranked 15th in the Business Journal's most recent listing of top public companies in South Florida. The 35-year-old company, which employs approximately 1,100 people, was selected from a narrower list of seven finalists which included: Citizens Savings Financial Corporation, Claire's Stores, Inc., Dycom Industries, Inc., Office Depot, Inc., Sensormatic Electronics Corporation and Wackenhut Corporation.

"Lennar consistently turns in solid financial performances year after year earning a record $28.1 million in its fiscal year ending Nov. 30, 1989, up from $27.6 million in fiscal 1988," Hudson said. "Despite a weaker housing market nationally, Lennar's revenues climbed to $440 million, up from $429 million in fiscal 1988. Stockholders' equity rose to nearly $260 million from $232 million.

"The company attributes much of its success to its conservative management

practices. Lennar operates a streamlined company, avoids becoming highly leveraged and maintains financial strength. The company also prides itself on its ability to prosper even during housing downturns. As Leonard Miller, Lennar's chairman and president, so aptly puts it: 'We manage the situation; situations don't manage us.' "

Headquartered in Miami, Lennar Corporation operates as a homebuilder and full-service real estate company with operations in Florida, Arizona and Texas. The company has three divisions: Homebuilding, Asset Management and Financial Services.

ACTON, MA (JUNE 1) PR NEWSIWRE - CML Group, Inc. (NYSE: CML), a direct marketer of consumer products, today reported that earnings from continuing operations for the nine months ended April 28, 1990, were $14,550,000, or $2.03 per share on a fully diluted basis.

Sales for the third quarter were $57,957,000, an increase of 10 percent over the $52,697,000 reported for the corresponding quarter a year ago. Income from continuing operations was $1,694,000 compared to $3,841,000 for third quarter 1989.

Charles M. Leighton, chairman of CML, said, "Third-quarter results are in line with our projections. The softness that we see in income for the quarter was anticipated. NordicTrack and The Nature Company performed ahead of expectations. However, the continued sluggishness of the retail apparel environment has negatively affected the performance of Britches of Georgetowne.

"We are very excited by our signed agreement with West J.R. Create, the retail subsidiary of West Japan Railway System. This agreement provides for the opening of CML's Nature Company stores and distribution of their catalogs in Japan. Plans call for the first flagship store to be opened in Osaka in May of 1991, with additional stores to follow."

The terms of the agreement stipulate that CML will be paid on a royalty basis.

"We've always felt that Japan would be a perfect market for The Nature Company," Leighton said. "The Japanese are becoming extremely interested in the environment and are superb retailers. I can't think of better partners with whom to launch our first international marketing effort."

As regards CML's year-end performance, Leighton added, "We expect to finish the year on target. We have previously stated that year-end results would be approximately $2.00 from continuing operations. We see nothing on the horizon that would cause us to alter our forecast."

CML's products are sold under the tradenames NordicTrack, The Nature Company, and Britches of Georgetowne.

ATLANTA (JUNE 1) PR NEWSWIRE - Atlanta-based Chick-fil-A Inc. today announced the introduction of its newest menu addition, freshly squeezed diet lemonade.

The new diet drink will be available in all Chick-fil-A restaurants located throughout the country beginning in June.

"The new diet lemonade is the perfect complement to the chargrilled chicken sandwiches and salads that we added to our menu last summer. Together they are a tasty, and nutritious, low-calorie meal," said S. Truett Cathy, founder and chairman of the company. "Lemonade is one of the most requested alternatives to carbonated soft drinks, and Chick-fil-A is the only mall restaurant outlet and fast food chain to offer a freshly squeezed diet version."

Like the popular, traditional Chick-fil-A lemonade, the diet version is made fresh daily with real lemons that are hand-squeezed in the

restaurant. Sweetened with NutraSweet(R), the 14-ounce Chick-fil-A diet lemonade contains only 32 calories and constituted one-third of lemonade sales in test markets. The original freshly squeezed lemonade was added to the Chick-fil-A menu in 1976.

"We tested the diet lemonade product in 40 of our restaurants for over one year and during this time, the drink was so popular that it outsold several soft drink alternatives," added Steve Robinson, vice president of marketing. "We are very excited by the positive customer response to the product. As a matter of fact, customers who taste the diet lemonade for the first time frequently comment on its smooth, clean taste."

Altanta-based Chick-fil-A is the nation's fourth largest chicken chain. With nearly 420 restaurants in 31 states, the chain reported 1989 sales of $263.8 million and was selected America's favorite chicken chain restaurant in an annual survey conducted by Restaurants & Institutions magazine.

MINNEAPOLIS (JUNE 1) PR NEWSWIRE - LecTec Corporation (NASDAQ: LECT) today announced that MEI Diversified (NYSE: MEI) has proposed to LecTec that the companies enter into discussion concerning a possible restructuring of the pending merger between the two companies. MEI has previously provided $45 million in financing to LecTec for LecTec's acquisition of New Dimensions in Medicine, a former Baxter International subsidiary, which notes were scheduled to mature on May 31, 1990. The maturity date of the notes has been extended to June 30, 1990, pending discussions between the companies.

Under the terms of the merger agreement if the merger was not effective by May 31, 1990, under certain conditions either party to the agreement could terminate the merger. Neither MEI Diversified Inc., nor LecTec, has at this time determined to extend the merger date or terminate the pending merger agreement.

FAIRFAX, VA (JUNE 1) PR NEWSWIRE - ERC Environmental and Energy Services Co., Inc. (NASDAQ-NMS: ERCE) plans to discontinue its Digital Conversion Division now operating out of its Roanoke, Va., facility.

The Digital Conversion Division converts engineering drawings into digital formats for use in computer-aided design (CAD) systems.

Due to a poorer than expected performance during the first half of this year coupled with the uncertain outlook for this activity, it has been decided that the interests of the company would best be served if this business were discontinued and the related physical assets disposed of.

As a result of this decision, the company anticipates treating this as a discontinued operation in its financial statements and will take a

one-time charge against earnings of approximately $750,000, net of tax benefits, during the second quarter of 1990. Of this amount, approximately, $400,000 represents a non-cash write-off of physical assets.

Mark Elliott, ERCE president, stated: "This discontinued operation represents less than 3 percent of ERCE's anticipated revenues in 1990. Our inability to realize consistent profitability from this operation prompted our decision to discontinue this activity and concentrate our energies and resources on more attractive opportunities."

NEW YORK (JUNE 1) PR NEWSWIRE - The Bank of Tokyo, Ltd. announced today that it has closed the purchase of BancNewEngland Leasing Group from Bank of New England Corporation (NYSE: NEB) for approximately $500 million, including the entire operational capacity at BancNewEngland Leasing Group and some $500 million of portfolio assets.

The Bank of Tokyo has created a new subsidiary, BOT Financial Corporation with headquarters in Boston, to operate the BancNewEngland Leasing business. BOT Financial will also continue to service the balance of BancNewEngland's assets of approximately $1.2 billion on a fee basis.

The transaction was approved by the Federal Reserve Board on May 21, 1990.

"This further strengthens our position as the leading foreign bank in the United States," said Kenji Yoshizawa, resident senior managing director for the Americas of The Bank of Tokyo, Ltd. "With BancNewEngland Leasing Group our assets in the U.S. rise to $44.5 billion and our employees increase to more than 8,900, all but 200 of whom are Americans."

The Bank of Tokyo, Ltd. has just reported consolidated net income from worldwide operations of $497.4 million for the fiscal year ended March 31, 1990, as compared with $384.1 million the previous fiscal year. The bank's overall assets rose 22 percent to $228 billion.

"We were receptive to the BancNewEngland Leasing proposal," Yoshizawa said "because we need to enhance our capabilities for investment banking transactions to serve large Japanese corporate clients, and also American and European multinational corporations. BancNewEngland Leasing provides us with a cadre of high-quality professionals who have an outstanding track record over the last 17 years in building more than a $2 billion portfolio across the country with an extremely low ratio of losses.

"They will enable us to enter the U.S. upper middle-market for tax related transactions, where we can utilize the favorable tax positions in our New York and California banking systems," Yoshizawa continued, "and also play a stronger role in leasing, project finance and syndication. These American professionals will also enable us to originate deals in 'big ticket' cross-border transactions like aircraft and ships. And all of this business will enhance our fee income."

E. F. McCulloch, Jr., who has been president of BancNewEngland Leasing Group, has been named president of BOT Financial Corporation. Kenji Yoshizawa is chairman.

ARMONK, NY (JUNE 1) PR NEWSWIRE - IBM (NYSE: IBM) and the U.S.S.R. State Committees for Education and Informatics announced today that IBM will supply over 13,000 personal computers for use in schools in the Soviet Union.

A cooperative program between IBM and the State Committee for Education began in 1989, with a pilot school project and with programs both for the disabled and in business education.

This announcement represents the next step in introducing IBM personal computers into Soviet schools. Training of teachers and essential support personnel is included in the program.

Michael Armstrong, chairman of IBM World Trade Corporation, said, "IBM is pleased to be associated with the Soviet Union in this program. In the United States and countries around the world, IBM is involved in education with both classroom products and support. We are delighted to be extending these offerings to the Soviet Union."

This initiative to introduce personal computers into Soviet schools came from the U.S.S.R.'s Supreme Soviet Committee for Science, Education and Culture. Its chairman, Academician Yuri Ryzhov, said, "In my view, the success of reform in the Soviet Union depends on progress in the spheres of education and culture. We value greatly IBM's decision to participate in a major project in this area."

Shipment of the machines will begin in September 1990 in time for some schools to begin using them at the start of the 1990/91 school year.

It is expected that the program may be extended over time to cover more schools and could form the basis for the build-up of assembly operations for personal computers in the U.S.S.R. Feasibility studies have been initiated to address the financial and technical aspects of such cooperation.

MT. HOLLY, NJ (JUNE 1) PR NEWSWIRE - Franklin Electronic Publishers Inc. (NASDAQ-NMS: FPUB) announced today a true milestone in electronic publishing -- the world's first hand-held electronic encyclopedia!

This stunning product makes its debut at the Summer Consumer Electronics Show in Chicago, June 2-5. The electronic edition of The Concise Columbia Encyclopedia is a technological breakthrough -- providing split-second access to masses of information!

Franklin's electronic Concise Columbia Encyclopedia provides advanced electronic searching and cross-referencing capabilities never before available. This unique new format eliminates hours normally spent searching through texts to retrieve specific information buried in scattered articles. By simply typing in key words you call up every article related to your request, categorized by subjects such as: history, politics, science, the arts, international affairs, people of interest and many more.

The Franklin electronic Concise Columbia Encyclopedia lets you discover a wealth of information at the tap of a key. In its electronic form, you are able to jump from subject to subject and quickly retrieve answers to specific questions or facts by simply typing in the name of the subject that you are interested in researching. Need to know where the longest river is? Interested in tracking Piccaso's life or studying the French Revolution? The information is accessible instantly!

The advanced phonetic spelling technology pioneered by Franklin and

available in all of the Franklin electronic reference products is contained in the electronic Concise Columbia Encyclopedia. It allows users to type in entries without knowing the correct spelling -- an invaluable feature when looking up unfamiliar or hard-to-spell subjects.

The built-in thesaurus digs out nuggets of knowledge you would never find using ordinary search techniques, by a sophisticated use of synonyms for your query.

Franklin's electronic Concise Columbia Encyclopedia is a phenomenal tool for people of all ages and serves as the all-in-one reference source for the home, school or office.

Remarkably, all of the outstanding capabilities available in the electronic Concise Columbia Encyclopedia are contained in one compact and lightweight unit. It measures just 5-1/2 inches by 5 inches by 1 inch and weighs only 12 ounces. All text is displayed on an easy-to- read, jumbo size display.

Franklin's electronic Concise Columbia Encyclopedia will be available in late 1990 and will carry a suggested retail price of $299.

Franklin Electronic Publishers Inc., formerly Franklin Computer, is the creator and leader of the Electronic Reference Product category. Franklin publishes a library of electronic dictionaries, thesauruses, phonetic spelling correctors, and spelling and language teaching products, including the Spelling Ace(R), Wordmaster(TM), and Language Master Speaking Dictionary(TM), Electronic Holy Bibles and Spanish Master/Maestro Ingles(TM) bilingual dictionary.

RICHMOND, VA (JUNE 1) PR NEWSWIRE - Tredegar Industries Inc. (NYSE: TG) has signed a definitive agreement to sell its U.S. oil and gas properties to Wainoco Oil & Gas Company, a subsidiary of Wainoco Oil Corporation (NASDAQ: WOLM), for approximately $16.5 million. Tredegar said it will incur an after-tax loss of approximately $4 million on the sale, which is expected to be completed by the end of June.

The properties being sold are located in Texas, Louisiana, Mississippi and Arkansas. Excluded from the sale are Tredegar's oil and gas reserves in western Canada.

Tredegar Industries is a Fortune 500 manufacturer of plastics and aluminum

products and has interests in coal, oil and gas.

CONTACT: Edward A. Cunningham, 804-330-1598, or Thomas E.B. Phillips, 804-330-1043, both of Tredegar Industries Inc.

CALGARY, ALBERTA (JUNE 1) PR NEWSWIRE - North Canadian Oils Ltd. (AMEX: NCD; Montreal, Toronto: NCO) is pleased to announce that it has mailed its Offer to Purchase and Offering Circular in respect of its offer for all of the outstanding common shares of Bankeno Resources Ltd. (Toronto: BKE) that NCO does not already own.

The Offer is open for acceptance until 5:00 p.m. local time, June 29, 1990 unless otherwise extended or withdrawn. Under the terms and conditions of the Offer, NCO has offered to purchase all of the common shares of Bankeno at a price of $4.25 (Canadian) per share.

NCO wishes to acquire the remaining common shares in order to eventually merge Bankeno with NCO, and thereby improve operating efficiencies. NCO presently holds approximately 74 percent of Bankeno's outstanding common shares.

Bankeno's Board of Directors, on recommendation of an independent committee who thoroughly reviewed the Offer, has recommended to its shareholders that they accept the Offer in accordance with its terms.

The Bankeno Directors' Circular containing such recommendation has been mailed to the shareholders of Bankeno with NCO's Offer to Purchase and Offering Circular.

North Canadian Oils Ltd. is a conservatively managed, financially and technically strong, Canadian oil and gas exploration, production and marketing company. NCO's common shares are traded on the Toronto and Montreal Stock Exchanges in Canada and the American Stock Exchange in the United States.

CONTACT: G. Barry Padley, Sr. VP-Finance and Administration, North Canadian Oils Ltd., (403) 261-4320.

COLUMBUS, OH (JUNE 1) PR NEWSWIRE - Robert H. Snedaker, Jr., former vice chairman of United Telecommunications (NYSE: UT), recently accepted the position of director and a member of the board for LiTel Communications, Inc. His election brings the board's membership to five.

As vice chairman of United Telecommunications, Snedaker was responsible for all of its telephone properties. He is the former president of US Sprint Communications Company, appointed in July, 1987. Prior to that, Snedaker had been chief operating officer for United Telecommunications, Inc. (Kansas City), since December, 1986, and vice chairman and member of the board of United Telecommunications, Inc. since 1985. He served as president of United Telephone System, Inc., a subsidiary of United, from 1979 to 1986.

Snedaker began his telecommunications career in 1949 at New York Telephone Company and progressed through various positions in engineering, commercial, personnel and traffic departments, including assistant vice president, personnel for the company's Long Island territory and general manager of the Nassau area. In 1962, he left New York Telephone Company to become staff director for AT&T. Two years later, he was promoted to vice president and general manager of the Southwestern area of Ohio Bell in Columbus, Ohio.

Snedaker joined the United Telephone System in 1971, when he was elected president of United Telephone Company of Ohio in Mansfield. In 1979, he was named president of United Telephone System.

Snedaker is a 1947 graduate of Dartmouth College, where he earned a bachelor's degree in electrical engineering (magna cum laude). In 1949, he was awarded a master's degree in electrical engineering from Dartmouth's Thayer School of Engineering and a master's degree in engineering and business administration from the college's Tuck School of Business Administration.

Until his appointment as president of US Sprint, Snedaker had served as chairman of the National Exchange Carriers Association since its inception and was a past chairman of the United States Telephone Association. He also served as the first chairman of the Exchange Carriers Standards Association. During his career, Snedaker served on the boards of directors for United Telephone Company of Florida, Carolina Telephone & Telegraph, United Telephone of Ohio and Merchantile Bank & Trust Company in Kansas City.

Also serving on the LiTel board of directors are: McLernon, chairman; James Bartlett, Primus Venture Partners; Stephen Fillo, E.M. Warburg, Pincus & Co., Inc.; and Adam Solomon, also of E.M. Warburg, Pincus & Co., Inc.

LiTel Communications, Inc. and its subsidiary, LiTel Telecommunications Corporation, were founded in 1983 by McLernon. LiTel also serves as parent comany for Afford-A-Call, based in Lima, Ohio and Charter Network, based in Columbus, Ohio. In 1989, LiTel revenues exceeded $250 million.

LiTel operates a regional long distance fiber optic network in the Ameritech region which includes the states of Ohio, Illinois, Indiana, Michigan and Wisconsin. The eastern terminus of the network is in Pittsburgh and the western terminus is in Chicago.

LiTel is a founding member of the National Telecommunications Network (NTN), the first coast-to-coast all-digital fiber optic network in the U.S. Through NTN, customers have access for voice, data and video transmission services and International Direct Distance Dialing.

NEW YORK (JUNE 1) PR NEWSWIRE - Pan American World Airways today announced a fare that offers a 32 percent savings to Soviet citizens who are immigrating to the United States.

The one-way fare of $999, is available to passengers immigrating to the United States, traveling on Pan Am from Moscow or Leningrad. The fare provides a reduction of 283 rubles, or $467, from the existing one-way ruble fare.

The discounted fare must be purchased outside of the Soviet Union, in the form of a prepaid ticket. Arrangements can then be made through Pan Am for the tickets to be issued in the Soviet Union for passenger pick-up.

The fare is intended to facilitate the flow of Soviet immigrants to the U.S. Access to air travel for these immigrants has traditionally been limited by the higher fare level for one-way travel, the requirement of the Soviet monetary authorities that the passengers travel on Aeroflot in order to limit the outflow of hard currency, and the lack of available seats on Aeroflot.

DALLAS (JUNE 1) PR NEWSWIRE - Super Club Retail Entertainment announced today the acquisition of Movies at Home, a 10-unit video retail chain which is headquartered in, and operates out of, the Kansas City metropolitan area. Midwest Video, a used tape brokerage company, is also included in the acquisition. The management team of Don Marchi and Peter Gencarelli, who together founded the businesses in 1984, will continue to run the day-to-day operations.

In making the announcement, Darrell Baldwin, chairman and CEO of Super Club Corporation, said, "Movies at Home is attractive to us for many reasons. Their Kansas and Missouri locations -- and plans for expansion -- are compatible with Super Club's strategy for geographic concentration. Movies at Home's stores, which average 5,300-square feet, have a high-quality, upscale image that meets the criteria for further development of the super-store format. We are pleased to welcome Gencarelli and Marchi to our Super Club family, and feel that their valuable experience will contribute greatly to our company."

The acquisition of Movies at Home brings the number of Super Club's retail outlets in the United States to over 400. Other retail subsidiaries include Alfalfa/Movietime, Record Bar/Tracks, Turtle's and Video Towne Entertainment. The parent company, Super Club, N.V., headquartered in Belgium, is the largest privately held video retailer in Europe.

NEW MILFORD, NJ (JUNE 1) PR NEWSWIRE - Polifly Financial Corporation (NASDAQ: PFLY), the holding company for Polifly Savings and Loan Association ("Association"), today announced the resignation of its chief financial officer. Effective May 25, 1990, Peter M. Levine, vice president and chief financial officer, resigned in order to pursue other opportunities. Levine, who had been with the Association since January 1988, was responsible for supervising the Association's asset and liability structure, administering its liquidity and investment portfolio and managing financial requirements. Richard Capone, treasurer, was named acting chief financial officer.

Frederick Muller, chairman of the board, stated, "We wish Peter the best in his future endeavors and thank him for his service to the Association." Muller also stated that the operations of the Association will continue without interruption.

It was also announced that Peter G. Banta resigned, effective May 23, 1990 as a member of the board of directors of both Polifly and the Association. Banta, who is a managing partner of the law firm of Winne, Banta, Rizzi, Hetherington & Basrilian, will continue to serve as legal counsel to Polifly and the Association. He had served as a director since 1982 and was a director of Hackensack Mutual Savings and Loan Association prior to its merger with the Association in 1982.

Muller stated, "Mr. Banta informed the board that the insurance carried by his law firm no longer permits him to serve on the board of directors of a

financial institution. While the board is disappointed that he will no longer be providing Polifly with his guidance as a director, we are pleased that he will be continuing to provide legal services to the Association."

HOUSTON (JUNE 1) PR NEWSWIRE - Wainoco Oil Corporation (NYSE: WOL) announced today that it has signed a definitive purchase and sale agreement to buy all of the U.S. oil and gas properties of Tredegar Industries, Inc. (NYSE: TG) for $16.5 million. The purchase, effective May 1, 1990, is expected to be completed by the end of June. The properties are located in Texas, Louisiana, Mississippi and Arkansas. Net proved reserves are estimated by Wainoco to be 1.6 million barrels of oil and 6.9 bcf of natural gas, of which 97 percent are developed. Recent daily production volumes have averaged 740 barrels of oil and 5.4 million cubic feet of gas.

The acquisition has the approximate effect of increasing Wainoco's proved U.S. oil reserves by 42 percent and its proved U.S. gas reserves by 17 percent.

As a result of the purchase, Wainoco's U.S. oil production is expected to increase by approximately 93 percent and its U.S. gas production by approximately 46 percent.

Wainoco Oil Corporation is a publicly held oil and gas exploration and production company with operations throughout North America. Wainoco's common shares are listed on the New York and Alberta Stock Exchanges.

WASHINGTON (JUNE 1) PR NEWSWIRE - Marriott Corporation (NYSE: MHS) announced today that it will open an on-site child care center at its international headquarters in Bethesda, Md.

When the center opens in fall 1990, Marriott will become the largest employer in the United States sponsoring such a facility at its headquarters. The 5,600-square-foot center will be available to Marriott employees at headquarters, satellite offices, and local properties in the Washington area. The center will accommodate 63 children, age six weeks to 36 months.

"Marriott is excited to offer our headquarters employees the convenience of an on-site child care center," said Kathleen Alexander, vice president, personnel services for Marriott Corporation. "Due to the limited availability of infant and toddler care in the local area, we believe this center will be a great benefit for our employees."

The center will be developed and operated for Marriott by Corporate Child Care, Inc. (CCC), a Nashville, Tenn.-based firm which specializes in employer-based child care services.

In April 1989, Marriott's Food and Services Management division entered into a joint venture with CCC to offer on-site child care services to Marriott business, education, and healthcare clients. Marriott is a minority shareholder in CCC, which currently operates six centers and is scheduled to open six more this year.

The headquarters child care center is among several programs sponsored and managed by Marriott's Department of Work and Family Life to assist employees in balancing the demands of job and family responsibilities.

Other programs include a Family Care Spending Account, which allows employees to pay for dependent care with pre-tax money; Child Care Choices a nationwide resource and referral service to assist employees in finding suitable child care arrangements; Child Care Discount Program, which provides employee discounts at independent day care centers; and Parenting Seminar Series, a series of lectures that address child development and parenting skills.

Marriott Corporation is a diversified hospitality company involved in lodging and contract services. It has approximately 230,000 employees and is one of the ten largest employers in the United States.

HOUSTON (JUNE 1) PR NEWSWIRE - Team, Inc. (AMEX: TMI) today announced the amendment of its $23.5 million credit facility with NCNB Texas National Bank. The agreement, as amended, provides for a $35.0 million credit facility and contains terms more favorable to the company. The facility consists of a $25.0 million revolver due Oct. 31, 1991 which is renewable annually and may be converted to a term note payable over five years; a $7.0 million term note due June 30, 1994; and a $3.0 million real estate term note maturing Dec. 31, 1997. Interest under the agreement is at the prime rate with a Libor and CD rate option applicable to the revolver. The agreement is unsecured with the exception of the real estate term note and contains less restrictive debt covenants.

Team Chairman and President H. Wesley Hall stated, "This gives the company added flexibility to fund Team's long-term growth." At Feb. 28, 1990, the close of its third quarter, the company had outstanding $9.6 million in long-term debt under its bank credit agreement.

Team, Inc. provides repair, specialty and transportation services primarily to industrial customers and privatized services to governmental entities. The company has 50 operating locations in 23 states and serves the international market through licensee agreements in 10 countries.

DETROIT (JUNE 1) PR NEWSWIRE - Marathon Petroleum Co. today presented a check for over $15,000 to Friends of the Rouge (FOTR) to support the group's efforts to clean up the Rouge River and its immediate environs.

Proceeds for the gift were generated by Marathon's offer to donate five cents ($0.05) for each gallon of Amaraclean gasolines sold at 170 Marathon service stations in southeast Michigan on March 26, 1990.

The company also announced that participating Marathon dealers will contribute two cents ($0.02) to FOTR for each gallon of Amaraclean gasolines sold on Saturday, June 2, "Rouge Rescue '90 Day," in the Greater Detroit area.

Amaraclean, new, cleaner burning gasolines, were introduced to the metropolitan Detroit area by Marathon Petroleum on March 26. The three new unleaded gasolines reduce hydrocarbon tailpipe emissions by about 20 percent and carbon monoxide emissions by about 14 percent and thus help to improve air quality in the area.

Marathon also said it is sponsoring a 30-minute television program at 7 p.m. Friday, June 1, on WKBD-TV, Channel 2 in Detroit. The program will discuss the current status of the Rouge River, projects now in progress and will feature interviews with people involved in the clean-up effort.

To further underscore support of Rouge Rescue '90, a contingent of Marathon Petroleum employees and independent Marathon dealers will participate in the clean-up. Marathon will also add a $3 coupon to the Rouge clean-up kit which is good toward the purchase of Amaraclean gasolines.

DENVER (JUNE 1) PR NEWSWIRE - J.C. Sparkman, executive vice president of TCI, and William E. Johnson, CEO of Scientific-Atlanta Inc. (NYSE: SFA), today jointly announced TCI's plans to utilize Scientific-Atlanta's addressable interdiction technology in its single dwelling unit configuration in several of TCI's cable systems.

Interdiction is a unique technology for the cable television industry which allows cable operators to addressably control the delivery of programming to the subscriber without the need for additional electronics in the subscriber's home.

According to Sparkman, TCI plans to utilize Scientific-Atlanta's single dwelling unit (SDU) version of addressable interdiction, with the two companies finalizing the details during the next several months on where the technology will be initially used.

"TCI has worked closely with Scientific-Atlanta in evolving this technology," said Sparkman. "We think this approach provides the operational efficiencies, the marketing flexibility, and the consumer friendliness that we want over the longer term.

"We believe this technology will allow us to develop more creative programming options and be more responsive to our subscribers, and do it efficiently. This technology should allow us to further develop the retailing approaches needed in our industry."

"We're very pleased to be working in partnership with TCI to achieve the promise of this technology," said Johnson. "We're excited about being able to bring a greatly expanded range of capabilities to the industry with our interdiction approach and are gratified by the positive reception."

The single dwelling unit version mounts on the outside of the subscriber's home, is home-powered and capable of passing frequencies up to 550 MHz. The unit is capable of interdicting approximately 48 channels individually, up to 450 MHz, in the initial version. This leaves the channel 2 through 13 band available for a basic tier, and interdicts all channels above that individually.

The Scientific-Atlanta addressable interdiction system is designed for maximum operator efficiency, flexibility, and subscriber friendliness. The technology allows complete addressable control of programming signals with all electronics outside the subscriber's home.

It delivers a broadband signal to the interdiction device outside the home which jams signals of unauthorized services, then passes the remaining signals so the subscriber gets all services in the clear to as many outlets in the home as desired. This provides a user-friendly and transparent subscriber interface that allows full utilization of cable-ready home electronics.

ST. PAUL, MI (JUNE 1) PR NEWSWIRE - Zeos International Ltd. (NASDAQ: ZEOS) today announced the immediate availability of its first personal computer workstations based on Intel Corp.'s new 80486 microprocessor.

The new ZEOS '486 systems feature a 25MHz processor operating speed, the EISA bus design and are available with or without a secondary 128K cache. Prices for complete systems including memory, disk drives and video, start at $4,995.

Commenting on Zeos' entry into the '486 marketplace, Zeos President Greg Herrick said, "This is a very important milestone for both Zeos and the '486 market as a whole. Our '486 EISA systems offer the customer a tremendous value. In fact, our pricing puts these very powerful '486 systems within easy reach of customers who until now were only able to consider '386-based computers.

"Combining the incredibly powerful Intel '486 microprocessor with the new EISA (Extended Industry Standard Architecture) bus structure gives ZEOS customers one of the most versatile computing platforms available today. Not only do users have access to the raw power of the '486 but most of their present hardware can be mixed with fast new 32-bit EISA-based devices.

"Zeos '486 systems are top of the line," Herrick continued. "Combined with the new Zeos '386SX portable announced last week and our other 80386 based systems, Zeos offers a complete line of cost effective computing solutions available for business and industry. For those potential customers who

prefer to buy all their equipment from one manufacturer, Zeos is now well positioned to be their vendor. By offering our traditional quality, value and 24-hour-a-day Toll Free Technical and Sales support we are making it clear that there is no longer any reason to buy elsewhere."

Zeos International Ltd. manufactures and markets, direct to end users, ISA (Industry Standard Architecture) and EISA (Extended Industry Standard Architecture) personal computer systems world wide under the Zeos name.

BOISE, ID (JUNE 1) PR NEWSWIRE - William M. Agee, chairman and chief executive officer of Morrison Knudsen Corp. (MK) (NYSE: MRN), announced today that MK and a joint-venture associate have received a contract award to build an approximately $40-million, 57-mile-long underwater natural gas pipeline in British Columbia.

The work will be performed by Northern Construction Co. (sponsor), MK's wholly-owned Vancouver, B.C.-based subsidiary, and Stena Offshore Ltd., of Aberdeen, Scotland, for the project's owner, Pacific Coast Energy Corp., which is owned by Westcoast Energy Inc. and Alberta Energy Corp.

"This is a very challenging project that, at more than 1,400 feet beneath the surface, will be the third-deepest pipeline ever constructed," said Agee. "Marine construction is a special MK skill, and we are pleased to take the lead on this international team."

Consisting of parallel 10-inch diameter lines, the new energy artery will run from the British Columbia mainland to Vancouver Island and will be constructed in three sections.

The first section will run from the mainland, across Malaspina Strait to Texada Island. Another section will run from the northern tip of Texada Island across the Georgia Strait to Vancouver Island. The third section will be constructed from the northern tip of Texada Island back across Malaspina Strait to the Powell River on the mainland. Other contractors are building 325 miles of land pipeline associated with the project.

Actual placement of the pipeline on the bottom of the straits will be carried out from an 82- foot-diameter reel located on the deck of one of the world's most advanced pipe-laying vessels, the Stena Apache. Pipe sections will be welded together by MK at a yard in Vancouver and spooled onto the Apache's reel.

All underwater pipe placement will be closely monitored by remote operated

vehicles and hard-hat divers with state-of-the-art equipment.

Work will start immediately and is scheduled for completion in December.

#90152p4170 06/01/1990 ~PR Newswire

TEL AVIV, ISRAEL (JUNE 1) PR NEWSWIRE - Aryt Optronics Industries Ltd. (NASDAQ: ARYTF) today announced results of operations for the first quarter ended March 31, 1990.

Net sales for the first quarter of 1990 amounted to $2,165,000 (NIS 4,317,000), and net income for this period amounted to $75,000 (NIS 147,000), or $0.02 (NIS 0.03) per share.

At the end of 1989, the company completed the sale of its U.S. subsidiary, DT Industries Inc. ("DTI") (formerly Diamond Electro-Optics Inc.), for approximately $2.9 million. DTI had incurred significant losses in 1989. The company also changed its fiscal year end from March 31 to Dec. 31. As a result, the company's financial results for the three months ended March 31, 1989, are not comparable to the results for the same period of 1990 and have not been included herein.

In connection with the sale of DTI, Aryt agreed not to compete with the acquiror in the sale of diamond-turned optical elements in the United States and Canada, for a period of three years commencing November 1989.

During the first quarter of 1990, Aryt completed a corporate reorganization in which it concentrated all of its optical element and coatings operations in its Jerusalem based subsidiary, Ophir-Aryt Optronics Ltd., which also manufactures and markets laser power meters. Management believes that this reorganization will promote greater operating efficiency for these operations.

At March 31, 1990, Aryt had a stockholders' equity of $10,431,000 and working capital of $7,043,000. Management believes that the sale of DTI, the recent corporate reorganization and Aryt's substantial liquid financial resources have significantly enhanced Aryt's prospects for continued improvements in profitability in 1990 and thereafter for the achievement of additional growth.

#90152p4174 06/01/1990 ~PR Newswire

TEL AVIV, ISRAEL (JUNE 1) PR NEWSWIRE - Istec-Industries & Technologies Ltd. (NASDAQ: ISTUF, ISTEF, ISTWF), today reported results of operations for the first quarter ended March 31, 1990.

Total sales for the first quarter of 1990 increased by approximately 50 percent to NIS 1,057,000 ($530,000), compared with total sales of approximately NIS 704,000 for the same period last year. These figures do not include results of Istec's 47 percent - owned subsidiary, Aryt Optronics Industries Limited. Aryt, whose financial results are not consolidated with those of Istec, had net sales of approximately $2,165,000 and net income of approximately $75,000 during this period.

Net loss for the first quarter of 1990 was approximately NIS 352,000 ($177,000), or NIS 0.07 ($0.04) per share, compared with a net loss of NIS 1,130,000 or NIS 0.23 per share for the first quarter of 1989 (excluding an extraordinary gain of approximately NIS 2,282,000 which Istec realized in connection with the initial public offering of Istec's subsidiary, Healthcare, in February 1989).

At March 31, 1990, Istec had a working capital deficit of NIS 9,146,000 ($4,587,000), which was primarily due to an increase in short- term debt as a result of Istec's acquisition of its interest in Aryt. Management is currently pursuing various debt and equity financing alternatives in order to repay or refinance Istec's short-term debt.

The reduction in Istec's net loss in the first quarter of 1990 was primarily due to the improved performance of Istec's subsidiaries.

Scan Group International Ltd. (SGI) reported sales of NIS 318,000 ($159,000) in the first quarter of 1990, an increase of about 189 percent compared with sales of about NIS 110,000 ($55,000) for the same period last year. SGI recently signed a marketing agreement with a German distributor, and is currently negotiating with additional European firms to market its new scanner, which has a resolution of 800 PPI. SGI completed development of this new product at the end of 1989.

The financial results for Healthcare Technologies Ltd., a major Istec subsidiary, continued to improve during the first quarter of 1990. Savyon Diagnostics Ltd., a healthcare subsidiary, reported a 25 percent increase in sales, from approximately NIS 592,000 ($297,000) in the first quarter of 1989 to about approximately NIS 739,000 ($371,000) in the current period. Healthcare also reported a decrease in net loss during the same period, from NIS 295,000 ($148,000) to NIS 175,000 ($88,000), respectively. During the first quarter of 1990, Savyon signed a multi-year distribution agreement with ICN Biomedical Inc., for approximately 19,000 chlamydia test kits worth $3 million.

Galisar Ltd., another Healthcare subsidiary, continued its research and development of hemoperfusion systems for cleansing blood. During the first quarter, Galisar completed clinical trials for its whole-blood protein A test. Galisar's experimental research is being carried out by a team of scientists headed by Professor A. Dvilensky of the Soroka Medical Center in Beersheva. In addition, the company reached an agreement with Dr. Y. Yakir, president of Savyon Diagnostics Ltd., pursuant to which he will supervise project development of Galisar.

In addition, at March 31, 1990, the company's (non-consolidated) 47 percent - owned subsidiary, Aryt, had a stockholders equity of $10,431,000 and working capital of $7,043,000.

During the first quarter of 1990, Aryt completed a corporate reorganization in which it concentrated all of its optical element and coatings operations in its Jerusalem based subsidiary, Ophir-Aryt Optronics Ltd., which also manufactures and markets laser power meters. Management of Aryt believes that the sale of its unprofitable U.S. operations at the end of 1989, the recent corporate reorganization and Aryt's substantial liquid financial resources have significantly enhanced

liquid financial resources have significantly enhanced Aryt's prospects for continued improvements in profitability in 1990 and thereafter for the achievement of additional growth.

Boaz Paz, president and chief executive officer of Istec, said that he expects the improved results reported for Istec this quarter to continue throughout the year.

Istec and its subsidiaries maintain their accounts and present their financial statements in NIS adjusted to reflect changes in the Israeli Consumer Price Index, and all the figures stated herein are adjusted NIS. All dollar figures are convenience translations using the exchange rate as of March 31, 1990, of NIS 1.9940 to U.S. $1.00.

NEW YORK (JUNE 1) PR NEWSWIRE - Douglas Aircraft Company is changing its organizational structure, executive line-up and management philosophy to meet the severe financial challenges facing the company, according to the upcoming issue of Aviation Week & Space Technology magazine. In an exclusive interview, John P. Capellupo, who was named Douglas deputy president in January, told Aviation Week Los Angeles bureau chief Bruce Smith that the firm is re-examining the Total Quality Management System (TQMS) introduced in February 1989 to increase production efficiency and boost profits. Douglas lost $306 million during its first five quarters under TQMS.

Aviation Week & Space Technology, published weekly by McGraw-Hill, is the leading journal for the worldwide aviation, aerospace and defense industries.

NEW YORK (JUNE 1) PR NEWSWIRE - Borden, Inc. (NYSE: BN) today announced a gradual restructuring of production and distribution of the Borden brand ice cream, cheese and margarine businesses in Japan.

The restructuring provides for Borden to operate in the future in Japan through full ownership and management of these product lines rather than through agreements with Meiji Milk Products. The shift will be phased in over a period of more than 18 months to ensure a smooth and uninterrupted flow of Borden products to Japanese distributors, supermarkets and consumers.

"The food business has changed dramatically -- within the United States, in Europe and especially in Japan -- during the 20 or so years since we first associated with Meiji Milk Products," said R.J. Ventres, Borden chairman and chief executive officer. "Today there are also global relationships among businesses that no one ever anticipated. A company needs full responsibility for its products in order to benefit fully from the synergies."

Borden, Inc. is a worldwide producer of foods, non-food consumer products,

and packaging and industrial products, with sales of $7.6 billion in 1989.
The company ranks number one in the world in pasta, wallcoverings, forest products adhesives and vinyl wrapping films; number one in U.S. dairy; number two in salty snacks in North America, and number one or two (nationally or regionally) in 26 U.S. niche grocery product categories.

OMAHA, NE (JUNE 1) PR NEWSWIRE - ConAgra Inc. (NYSE: CAG) and the USSR State Commission for Food & Food Procurement have reached an agreement for ConAgra to be involved in the management of poultry and hog operations in the Soviet Union. Terms of the agreement were not disclosed.

The agreement was made by V. V. Nikitin, chairman of the State Commission for Food & Food Procurement and Charles M. Harper, chairman and chief executive officer of ConAgra.

ConAgra will work with Soviet poultry and hog operations to increase productivity and improve feed conversion rates. As part of the project, ConAgra personnel will work in the Soviet Union, and Soviet farm managers will visit ConAgra operations in the U.S.

"We believe that the people of the Soviet Union will benefit materially through our joint effort," said Harper. "This is a major step toward the development of a long-term relationship."

INDIANAPOLIS (JUNE 1) PR NEWSWIRE - Hook-SupeRx, Inc. (HSI) today announced it will no longer operate its Hook division photoprocessing operations in Indianapolis and its SupeRx division photoprocessing operations in Cincinnati. The photoprocessing equipment in these two facilities has been sold to Colorcraft Corporation. The purchase price was not disclosed.

HSI also announced that it signed agreements with Qualex, Inc., headquartered in Durham, N.C., to provide photoprocessing services to its retail divisions. HSI said "that there will be no interruption of photoprocessing services to our customers and that our customers can continue to expect to receive quality service."

Hook's has had a photofinishing operation since it acquired the assets of the H. Lieber Co., Inc. in 1979. SupeRx has had a photoprocessing operation in Cincinnati since 1970. Hook-SupeRx, Inc. was formed in 1986 when Kroger divested itself of its drug store operations; it acquired Brooks Drug Inc., a retail chain located in the Northeast, in 1988. HSI now operates over 1,150 drug stores in 24 Midwestern, New England and Eastern states and is the fifth largest retail drug store chain in the nation in number of sales outlets and is ranked seventh in the nation in drug store sales volume.

SAN FRANCISCO (JUNE 1) PR NEWSWIRE - Today, local dignitaries joined Tommy Thompson, Delta's senior vice president - stations, and Julian Carnes, Delta's district director of marketing, as Delta launched hourly service between San Francisco and Los Angeles.

Delta will operate hourly flights between San Francisco and Los Angeles from 6 a.m. through 9 p.m. daily. The service will feature 17 round-trip flights, providing more than 3,400 additional seats in the San Francisco-Los Angeles corridor. Passengers traveling between San Francisco and Los Angeles on Delta's new hourly service will enjoy special amenities, including access to Delta's Business Flight Centers featuring FAX machines, PC modem hook-ups, and worktables with telephones. For the convenience of the passengers, this service will also feature at-the-gate ticketing. On many of the flights, gourmet coffee will be served and complimentary wine will be available. The specially-selected California cuisine will be served in a uniquely-designed "California Sky Box."

Western Airlines, which merged with Delta in 1987, made history in 1928 when it provided the first passenger air service that linked San Francisco and Los Angeles.

"Consumers have been asking for Delta's level of quality service in this market, and we are pleased to provide Delta's unique brand of person-to-person service. Delta has set industry standards in the areas of passenger satisfaction and reliability, and we are proud now to expand our operations to provide hourly service linking two important parts of this great state," noted Thompson.

#90152p4203 06/01/1990 ~PR Newswire

LIVINGSTON, NJ (JUNE 1) PR NEWSWIRE - The Howard Savings Bank (NASDAQ: HWRD) announced today that it has entered into a Memorandum of Understanding with the Federal Deposit Insurance Corporation (FDIC) and the New Jersey Department of Banking. The memorandum, which follows completion of recent examinations by the Howard's regulators, does not require the bank to take any significant loan loss reserves or charge-

offs in the current quarter.

"We have had very positive meetings with the FDIC and state banking officials. We believe the memorandum reflects the commitment of the Howard's board and management to take steps to improve the bank's bottom line results," said Leo J. Rogers, Jr., president of the Howard.

The memorandum, which is not a formal agreement, essentially reflects measures the regulators expect the bank to implement, some of which were undertaken earlier this year, to return the Howard to profitability.

At the Howard's annual shareholders meeting in April, Rogers outlined the bank's five-point plan for recovery. It provides for reduction and control of non-performing loans, expense reduction, increased revenues from service fees, concentration on quality loan production and capital preservation.

"The reduction and control of non-performing loans is a key goal, since continuing loan problems may require further additions to the bank's loan loss reserves and reduce earnings," Rogers said. "Any future additions to the reserves will be based on the bank's regular quarterly review of the loan portfolio, and will reflect the condition of the loan portfolio at that time."

The memorandum sets forth certain planning and reporting requirements relating to problem assets and non-performing loans and the allowance for loan losses. The memorandum also requires periodic reports from the bank on its capital plan, a program to improve its net interest margin, and the steps being taken to address problems in the commercial real estate portfolio.

In addition, the Howard, which suspended its regular quarterly dividend in March, has agreed not to pay future dividends without prior regulatory approval.

The memorandum also provides that the Howard will take steps so that its primary capital ratio will be at least 7.0 percent at Dec. 31, 1990 and at least 7.5 percent after Dec. 31, 1991. The Howard's primary capital ratio at March 31, 1990 was 7.03 percent. The use of a Memorandum of Understanding is not uncommon in the current bank regulatory environment, for banks which have a significant amount of non-performing loans.

NEW YORK (JUNE 1) PR NEWSWIRE - The board of directors of the Chubb Corporation (NYSE: CB) declared a regular quarterly dividend in the amount of $0.33 per share payable July 3, 1990, to shareholders of record on June 15, 1990. This represents the initial dividend declared following the 2-for-1 stock split distributed on May 30, 1990, to shareholders of record on May 7, 1990.

The board of directors also announced the election of Richard D. Wood as a director of the Chubb Corporation and its subsidiaries, Vigilant Insurance Company and Chubb Life Insurance Company of New Hampshire. Wood has served as a director of the corporation's subsidiary, Federal Insurance Company, since March 1990.

Wood is chairman and chief executive officer of Eli Lilly and Company, a research-based corporation that develops, manufactures and markets pharmaceuticals, medical instruments, diagnostic products and animal health products.

At the same meeting, Frederick W. Gaertner and Ned I. Gerstman were elected vice presidents of the corporation.

HIGHLAND PARK, MI (JUNE 1) PR NEWSWIRE - Chrysler Corporation (NYSE: C) announced a new customer cash incentive program on a wide range of new 1989 and 1990 vehicles, effective today, June l. Minivans and convertible coupes are excluded.

The incentives range from $2,500 down to $500, depending on the model, and will be in effect through July 31, 1990, except for a few popular models which will be in effect longer.

These include a $750 rebate on Chrysler LeBaron, Plymouth Acclaim and Dodge Spirit sedans and Plymouth Sundance and Dodge Shadow models in effect through Aug. 31, and $1,000 on Jeep Cherokee and Wagoneer LTD models covered through Sept. 30.

As an alternative to cash, customers may choose special low APR financing through Chrysler Credit at rates of 2.9 percent for 1-24 months, 7.9 for 25-36 months, 7.9 for 37-48 months and 10.9 for 49-60 months.

Chrysler will not extend its "Guaranteed Rebate" program of earlier this year to the new incentive program, although buyers who qualified earlier

are still eligible.

In addition to the general customer rebates, Chrysler is offering a "1990 College Graduate Cash Allowance" program, which provides $400 more on the retail purchase or lease of an eligible vehicle delivered during the program period.

The program is available to all 1989 and '90 graduates or undergrads in their final semester who obtain a two-year, four-year or post- graduate degree from an accredited college or university, or are currently enrolled in a master's or doctorate program and take delivery of an eligible vehicle by Dec. 31, 1990.

Cash incentives for the new programs beginning June 1 are: $2,500 -- Dodge Raider. $2,000 -- Chrysler Conquest and 1989 LeBaron coupe, Eagle Premier LTD, Dodge Ramcharger, '89 Dakota (except S-model) and D/W series pickups (except diesel and club cab).

$1,500 -- Eagle Premier ES and '89 Summit, Dodge Monaco ES, '89 Dodge and Plymouth Colt and Colt Vista, '89 Jeep Comanche (except 2WD short bed), 1990 Dakota (except S-model and Club Cab) and Dodge D/W series club cab.

$1,000 -- Chrysler 1990 LeBaron coupe; Imperial; New Yorker, Salon, Landau and Fifth Avenue; Dodge Dynasty, Monaco LE, Daytona ES Turbo and Shelby, D/W series diesel pickup, Dakota S-model and Club Cab, Ram van conversions '89 Ram 50 4WD; '90 Dodge and Plymouth Colt (except base 3-door and station wagon); Eagle Premier LX, '90 Summit; all '90 Jeep Comanche models and '89 Comanche 2WD short bed, Cherokee, Wagoneer and Grand Wagoneer.

$750 -- Chrysler LeBaron Sedan; Plymouth Acclaim, Sundance, Horizon and Laser; Dodge Spirit, Shadow, Omni, Daytona base and ES model; '90 Plymouth and Dodge Colt base 3-door and station wagon and '90 Colt Vista; '89 Dodge Ram 50 2WD; Eagle Talon.

$500 -- Jeep Wrangler, Dodge Ram Van and Wagon. Incentives cover 1989 and '90 models except where specifically designated.

DETROIT (JUNE 1) PR NEWSWIRE - Cadillac Motor Car announced that it has extended its retail buyer incentive program on selected 1990 Cadillacs delivered from dealer stock. Buyers of De Villes, Fleetwoods and Broughams are eligible for a $1,500 customer rebate. Buyers of Eldorado and Seville models are eligible for a $2,000 customer rebate. The program is effective through June 30.

The cash rebates are direct from the factory and apply to all Cadillac models except Allante.

Special short-term SMARTLEASE options also are available to consumers during the program on leases of 36 months or less.

"The response to Cadillac has been exceptional in this very competitive and crowded marketplace," according to John O. Grettenberger, General Motors vice president and Cadillac general manager. "Our buyer incentive program is designed to further enhance our competitive position."

COLUMBIA, MD (JUNE 1) PR NEWSWIRE - IGENE Biotechnology, Inc. announced today that, after several months of exploring financing alternatives, it was completing arrangements for a private placement of approximately 4,500,000 shares of its common stock at 10 cents per share.

The investors in the private placement, including certain directors of the company and unaffiliated third parties, are led by Joseph C. Abeles and M. Kimelman & Co.

Pursuant to an informal arrangement with the company, the unaffiliated third party investors may in the future elect one or more directors to the company's board.

The funds raised in the private placement will enable the company to meet short-term obligations and to continue operations for several months while it seeks a partner to arrange manufacturing of its fermentation products. There is no assurance that such an arrangement can be achieved.

WEST PALM BEACH, FL (JUNE 1) PR NEWSWIRE - Dycom Industries, Inc. (NASDAQ: DYCO), reported net income increases of 97 percent and 56 percent respectively, for the third quarter and first nine months of its fiscal year.

For the quarter ended April 30, 1990, the company reported net income of $2,474,399, or $.41 a share, on revenues of $41,518,407 compared with net income of $1,257,980, or $.27 a share, on gross revenues of $22,249,641

for the same period last year.

Net income for the first nine months of the current year was $6,906,927, or $1.23 a share, compared with $4,420,988, or $.95 a share, a year earlier. Gross revenues rose to $126,831,340, up 33 percent from $95,698,847 for the comparable period.

Thomas R. Pledger, president and CEO, noted that the backlog of orders in process on April 30 amounted to a record high of $187,930,000.

Dycom provides fiber optic transmission systems and Master Contract installation services to the telecommunications industry. The company operates nationwide through wholly owned subsidiaries. Last week, the company announced that the annual shareholders' meeting, which had been postponed, will be held on Monday, July 23, 1990, in Greensboro, N.C.

#90152p4224 06/01/1990 ~PR Newswire

MOJAVE, CA (JUNE 1) PR NEWSWIRE - Aerotest Inc., an Irvine, Calif.-based firm dedicated to maintaining and updating the world's commercial jet air transport fleet, today showcased its new 125,000 square-foot Mojave hangar complex during an open house at the Mojave Airport site.

Aerotest Chairman W.R. "Bob" Laidlaw said the all new multi-million dollar facility was custom-designed to perform inspections, maintenance, repairs, and modifications for any of the world's transport aircraft.

"Our Mojave facility is the only independent repair station in California that is capable of bringing under one roof multiple narrow- and wide-body aircraft (including the B747-400) at the same time," he said. The new hangar at Aerotest-Mojave serves as the centerpiece of the company's expanding business, Laidlaw noted.

The Southern California firm first announced plans to expand Mojave operations during a press conference on Capitol Hill in Washington last July. At that time, Aerotest announced its intentions to become a major air carrier service center, specializing in overhauling and modernizing large commercial transports.

"We have developed a strong reputation in commercial aircraft engineering, modification, repair and FAA certification," noted Iain Glendinning, the company's president. "Now we have invested heavily in new facilities, technical personnel, and equipment to meet the anticipated demands for supplemental maintenance capacity."

The new facility features a "pull-through" design and has over 75,000 square feet of hangar floor space, 30,000 feet of shop and office space, and another 20,000 square feet in an adjacent warehouse.

Glendinning explained that Aerotest's new facility in Mojave is only the first phase of the company's expansion master plan. The firm has plans for developing a second phase which will add two more B747-size hangars, and additional shop, office and storage space.

In charge of operations at the new facility are Richard A. Horn, vice-president, transport maintenance, a veteran of 35 years with United Air Lines maintenance; and Ronald D. Neal, vice-president, development, with over 30 years' experience in flight test, certification and development activities.

There are currently 400 employees at the Mojave complex, with 200 additional craftsmen and support personnel at the company's Jet Center in Van Nuys. The firm has a full complement of FAA qualified personnel, including airframe and powerplant mechanics (A&Ps), authorized inspectors (AIs), designated engineering representatives (DERs) and designated airworthiness representatives (DARs).

#90152p4226 06/01/1990 ~PR Newswire

LOS ANGELES (JUNE 1) PR NEWSWIRE - L.A. Gear Inc. (NYSE: LA) today estimated that net sales for the second fiscal quarter just ended May 31, 1990, were approximately $225 million, an increase of 33 percent over the year-earlier second fiscal quarter. Net sales for the six month period ended May 31, 1990, were approximately $412 million, an approximate increase of 75 percent over the $236 million recorded in last year's comparable period.

As a result of gross profit margins which are expected to be significantly lower than in the year-earlier period and during the first quarter of 1990 earnings per share during the second fiscal quarter are expected to be approximately $.50-$.60 per share, compared to $.91 per share in the second quarter of 1989.

Incoming orders during the second quarter were approximately $400 million, an increase in excess of 50 percent over the year- earlier period. "The increase in orders, together with strong retail demand for our new styles, makes us confident in our ability to post renewed increases in subsequent periods," noted Robert Greenberg, chief executive officer of L.A. Gear.

The company expects that its earnings per share for all of fiscal 1990 will be approximately equal to the low end of currently prevailing analysts' estimates.

The decline in gross margins during the quarter ended May 31, 1990, resulted primarily from the company's product mix during the period. In addition to increases in international and non-footwear sales, similar to those experienced in the first quarter (when such sales accounted for approximately 22 percent of total sales), the company's mix of product shipped reflected significant increases in sales of the company's lower priced and lower margin styles. "These styles have been well accepted and have provided our customers with an opportunity to make a full profit on relatively low priced product during an otherwise slow time at retail," noted Greenberg. "This strategy has allowed L.A. Gear to significantly expand its market share and retail shelf space during the quarter. We hope to benefit from this expanded share in the third and fourth quarters of 1990, as delivery commences of the newer, higher margin styles introduced for the back-to-school and holiday selling seasons." Shipments of these newer styles, which include the company's new Michael Jackson line and an expanded line of hikers, were negligible during the second quarter.

WILMINGTON, DE (JUNE 1) PR NEWSWIRE - Lawrence J. Macdonald has been elected president of Columbia Gas Development of Canada Ltd., effective June 18, Columbia Gas (NYSE: CG) Chairman and Chief Executive Officer John H. Croom announced today.

He replaces Spencer S. Chambers who retired earlier this year. Columbia's Canadian oil and gas unit is headquartered in Calgary, Alberta.

Previously, Macdonald was executive vice-president and a director of Voyager Energy Inc. in Calgary. In his position at Voyager, Macdonald, 43, had primary responsibility for the company's exploration efforts. Prior to joining Voyager, he was vice-president of exploration and production for Inverness Petroleum Ltd. and district manager in charge of all Canadian activities for Alamo Petroleum Ltd. in Calgary.

Croom said the election of Macdonald reinforces Columbia's commitment to explore and develop its extensive holdings in Canada. "Columbia/Canada's holdings have considerable potential and we expect to develop these resources aggressively for the long-term benefit of Columbia's shareholders."

A geologist by training, Macdonald holds a B.Sc. degree in geology from

the University of Alberta in Edmonton. He has been involved in gas and oil exploration and production in Canada since 1971.

WASHINGTON (JUNE 1) PR NEWSWIRE - The Iroquois Gas Transmission System, which would supply one-sixth of New Jersey Natural Gas Company's total firm supply when built, is one step closer to fruition with the issuance this week of a positive Final Environmental Impact Statement (FEIS) by the Federal Energy Regulatory Commission (FERC).

The FEIS supports earlier FERC findings that the 370-mile natural gas pipeline from Canada to Long Island can be constructed in an environmentally acceptable manner.

"The release of the FEIS is a major step forward for Iroquois in the FERC approval process," said Philip H. Reardon, New Jersey Natural Gas president and chief executive officer. "The FERC, the agency charged with assessing the project's need as well as its environmental acceptability, can now make a decision on the pipeline route its staff recommends."

FERC is expected to act on the Iroquois project application by this summer completing four years of review by that agency. Iroquois received the approval of the New York State Public Service Commission in December 1989. Other rulings from U.S. agencies and the state of Connecticut are expected after the FERC has issued its decision.

"Iroquois is on a tight schedule, but still on course to deliver natural gas into the northeastern United States in late 1991," Reardon said. The pipeline is a project of several North American energy companies, including New Jersey Natural Gas and affiliates.

Iroquois will transport 576 million cubic feet of natural gas per day for delivery to utilities and power generators in New York, New England and New Jersey. New Jersey Natural Gas would receive 40 million cubic feet of gas per day.

In the FEIS, the FERC staff noted that most of the adverse impacts to the environment would occur during construction, none of which will take place in New Jersey. "Beneficial impact would result to the extent that the natural gas would be used to replace or offset use of higher pollutant fuels," the FEIS stated.

JACKSONVILLE, FL (JUNE 1) PR NEWSWIRE - CSX Transportation Inc. (CSXT) today announced plans to transfer additional locomotive inspection and maintenance work to its shop facilities at Waycross, Ga., and Corbin, Ky. The work will be transferred from shop facilities at Tampa, Fla., and Hamlet, N.C., and will involve the relocation of approximately 15 employees from Tampa and 22 employees from Hamlet.

CSXT also announced a force reduction of 45 employees at its Cumberland, Md. shop facilities, and 16 employees at its Clifton Forge, Va. shop facilities.

These work transfers and furloughs are as a result of a decision to retire more than 200 older locomotives.

CSX Transportation Inc. provides rail transportation and distribution services over a 19,200 route-mile rail network in 20 states, the District of Columbia and Ontario, Canada.

VAN NUYS, CA (JUNE 1) PR NEWSWIRE - Valley Federal Savings and Loan Association (NASDAQ: VFED) has named Bill Brown as senior vice president for Major Loans and a member of its Executive Administrative Committee.

Brown, 33, was promoted from vice president for Major Loans. In this position, he was responsible for the association's sizeable commercial and multi-family real estate loan portfolio. His responsibilities also include the sale of non-single family foreclosed properties.

He joined Valley Federal in 1983 as a business development officer for residential loan production. In 1984, he was named manager of the Real Estate Owned department and promoted to vice president in 1986. He later was named vice president in charge of the Appraisal Department in 1988 and in 1989 was appointed vice president for Major Loans.

He holds a bachelor's of science degree from California Lutheran University. He is a long-time resident of Thousand Oaks, Calif.

Valley Federal, with assets of approximately $2.9 billion, is traded on the NASDAQ National Market System under the symbol VFED. Valley Federal's

deposits are insured by the FDIC and are backed by the full faith and credit of the U.S. government.

CINCINNATI (JUNE 1) PR NEWSWIRE - The Procter & Gamble Company's (NYSE: PG) 1991 University Animal Alternatives Research Program is soliciting research proposals for the second year of this important new initiative.

Started last summer, this competitive grants program encourages university researchers in the biological sciences to develop new methods of efficacy and safety testing that eliminate or reduce the use of animals, or which are less stressful to animals.

Up to three scientists a year receive grants for as much as $50,000 annually for a maximum of three years. Six more grants will be made over the next two years, with a total commitment of up to $450,000 annually when the program reaches capacity.

The company announced the first UAARP grant recipients last March. The three scientists receiving UAARP funding for their pioneering research on the use of cell cultures as alternative testing methods are:

- Dr. Thomas Baumann, Oregon Health Sciences University, who is researching the use of cell cultures of pain-transmitting neurons as an alternative to animal studies of irritants, analgesics, and anti-inflammatory drugs.

- Dr. George Leikauf, University of Cincinnati, who is investigating the use of cultured human airway cells to test selected lung toxicants and drugs.

- Dr. Martha Somerman, Maryland Dental School, who is studying the use of human periodontal cells to test the efficacy of drugs to treat periodontal diseases.

Over 100 proposals were submitted to UAARP for consideration in its first year. The Company anticipates that year two will be just as productive because much research remains to be done in alternatives development.

Proposals for 1991 funding will be accepted from any U.S. academic or medical research institution. The deadline for receipt of proposals is September 1, 1990, with awards being made on or before March 1, 1991.

Procter & Gamble is an acknowledged leader in alternatives research. The

UAARP complements Procter & Gamble's ongoing alternatives research program. In 1989 alone, the company spent nearly $4 million on alternatives research and the UAARP represents additional funding devoted to this work.

Company efforts extend well beyond research - since 1987, P&G researchers have published or presented over 70 papers on alternatives, helping to advance scientific and regulatory acceptance of alternative methods. The company already uses numerous alternative test methods in its product safety and efficacy assessment program.

ATLANTA (JUNE 1) PR NEWSWIRE - National Healthcare Inc. today announced that it terminated, at midnight on May 31, the exchange offer during which holders of its 14-1/2 percent Subordinated Debentures due Nov. 1, 1997, could exchange their Debentures for $30 in cash and the company's new 7 percent Subordinated Debentures due Dec. 1, 1999.

The company said that it received for exchange $9,795,000 face amount of 14-1/2 percent Debentures in addition to those currently owned by the company. The company also stated that holders of $10,295,000 face amount of the debentures consented to amendments to the Indenture. As a result of the amendments, the 14-1/2 percent Debentures which remain outstanding rank junior to the new 7 percent Debentures, and other provisions and covenants in the Indenture have been eliminated or modified.

The company was required under the terms of its Bank Credit Agreement to effect the exchange by May 31, of at least $16,559,000 principal amount of the 14-1/2 percent Debentures not owned by the company. The company said that it will not be in compliance with the terms of its Bank Credit Agreement if it is unable to achieve by June 30 such exchange or obtain a further modification of the Bank Credit Agreement.

The company is presently precluded under the terms of its Bank Credit Agreement from paying interest and principal on unexchanged 14-1/2 Debentures in default. The company said it intends to seek to acquire untendered debentures by open market purchases, privately negotiated transactions, tender offers, subsequent exchange offers or otherwise.

ORLANDO, FL (JUNE 1) PR NEWSWIRE - RoTech Medical Corporation (NASDAQ-NMS: ROTC) a marketer and distributor of home care products and repackaged pharmaceuticals, announced that it has signed a letter of intent to acquire the home infusion company, VitalCare of America, Inc. and other assets from American Medical Technologies, Inc. VitalCare of America is based in Houston with additional offices in Beaumont, Texas; Dallas; Philadelphia; Longwood, Fla.; and Reno, Nevada.

The purchase is subject to certain contigencies, including the completion of due diligence by Rotech Medical and shareholder and requisite regulatory approval in respect of American Medical Technologies and the execution of a mutually acceptable purchase agreement. The revenues from the acquisition are expected to double the home infusion revenues of RoTech Medical Corporation to over $10 million. Accordingly with this

acquisition, revenues from home infusion therapy would represent greater than 50 percent of the total revenues of RoTech Medical.

William P. Kennedy, chairman and president of RoTech stated, "The combination of our successful home infusion segment and the potential inclusion of VitalCare's home infusion, makes for exciting times ahead. While we plan to maintain durable medical equipment services, mainly for ease and quality of patient care, our emphasis is directly focused on home infusion therapy. This aspect of home care has unlimited potential with the introduction of new products and services and its acceptance in new service areas."

The purchase price of VitalCare consists solely of RoTech Medical Corporation stock with an attractive earn-out possibility. RoTech Medical plans to use its cash resources to favorably restructure the debt position of VitalCare.

#90152p4250 06/01/1990 ~PR Newswire

WASHINGTON (JUNE 1) PR NEWSWIRE - The Department of the Interior's Minerals Management Service (MMS) today released to the governor of North Carolina a Preliminary Final Environmental Report (PFER) on Mobil Oil's Proposal to drill an exploratory well approximately 45 miles east-northeast of Cape Hatteras, N.C.

"We are pleased to provide Gov. Martin with this report, which represents the most comprehensive body of environmental information ever assembled on a proposed exploration well in the history of the U.S. offshore drilling program," said MMS Deputy Director Ed Cassidy. "This project continues to be among our highest priorities at MMS."

The three volume Preliminary Final Environmental Report is a further refinement of a previous draft Environmental Report that MMS submitted to the state on Nov. 1, 1989. These reports fulfill a requirement of the memorandum of understanding (MOU) entered into by the state, MMS and Mobil Oil Corporation in July, 1989. The MOU carefully outlines procedures for reviewing Mobil's proposed exploration plan.

Gov. Martin has 60 days to submit comments to MMS on the completeness of the report. The state will conduct four public hearings in July in Manteo and Morehead City to gather comments on the MMS report.

The two Manteo meetings will be held on July 10 at Manteo High School from 3-5 p.m. and from 7-9 p.m. On July 11 in Morehead City, two meetings will be held at Carteret County Community College from 3-5 p.m. and from 7-9

p.m.

MMS and North Carolina officials have agreed that all public comments on the PFER will be submitted by July 11 through the North Carolina Outer Continental Shelf Office, 19 W. Hargett St., Raleigh, N.C., 27601. Questions regarding the comment period and the public meetings should be directed to Kim Crawford at 919-733-4656.

Mobil Oil plans to drill an exploratory well due east of Dare County, in 3,100 feet of water. Mobil estimates that more than five trillion cubic feet of natural gas may lie in that area offshore North Carolina.

The comments and concerns that the state submits to MMS regarding this report will be incorporated into the Final Environmental Report that MMS will present to Gov. Martin in August. Questions on the Preliminary Final Environmental Report should be directed to Angie Graziano, (703) 787-1118.

HOUSTON (JUNE 1) PR NEWSWIRE - In response to inquiries concerning its recent Austin Chalk discovery in LaSalle County, Texas announced yesterday and regarding questions concerning its leasehold interests in the Austin Chalk Trend, Wainoco Oil Corp. (NYSE: WOL) stated today that it has

approximately 64,000 gross and 31,000 net acres under lease or with agreements to lease in the Austin Chalk Trend.

Included in these leases are approximately 4,500 gross and 900 net acres in the lease block of its recent discovery. Wainoco also announced that it currently has two test wells drilling in the general vicinity of its discovery on leases that total 12,935 gross and 2,620 net acres.

In addition, Wainoco noted that its lease position in the Austin Chalk Trend includes approximately 6,740 gross/3,370 net acres either leased or with agreements to lease in Gonzales County in the vicinity of the wildcat oil discovery, Meridian Oil Inc.'s No. 1 HEE Smith well announced yesterday.

The discovery by Meridian Oil was reported to have flowed at an average rate of 12,254 barrels of oil and 4.9 million cubic feet of gas per day. Wainoco has no interest in this well. The closest of Wainoco's leases to this well is believed to be less than one mile.

Wainoco Oil Corp. is a publicly held oil and gas exploration and production company with operations throughout North America. Wainoco's common shares are listed on the New York and Alberta Stock Exchanges.

PARAMUS, NJ (JUNE 1) PR NEWSWIRE - The Medical Finance Group of Bell Atlantic TriCon Leasing Corp. and HAPSCO Group Inc., the shared services company of The Hospital Association of Pennsylvania, today announced the

signing of an exclusive agreement to jointly introduce a unique tax-exempt financing product for 501(c)3 voluntary hospitals.

With the new financing product, HAPSCO client hospitals gain the combined benefits of ownership and cost-effective tax-exempt financing, plus equipment return privileges usually associated only with a true lease. Additionally, Bell Atlantic TriCon will privately place the financing for the hospitals as needed.

The $100 million is a credit line established by Bell Atlantic for use by HAPSCO client hospitals. The new product is a derivation of Bell Atlantic TriCon's popular STAMP (Shared Total Asset Management Program) Loan-Balloon financing plan. This combined asset management and financing plan allows eligible borrowing hospitals to return equipment at maturity of the loan in lieu of paying the balloon amount. Additionally, the hospital shares in any rebate proceeds above the balloon amount.

The financing plan negotiated with HAPSCO adds the advantage of financing at tax-exempt rates rather than at taxable commercial rates. "Beyond competitive financing, all of our STAMP products are intended to assist hospitals in solving certain asset management operational or fiscal problems," Buchanan said. "The active participation of HAPSCO has resulted in a program that can benefit many of its client hospitals."

Philadelphia based Bell Atlantic (NYSE: BEL) is the parent company of New Jersey Bell, Bell of Pennsylvania, Diamond State Telephone Co. and the Chesapeake and Potomac Telephone Cos. of Maryland, Virginia, West Virginia and Washington, D.C. It also owns companies that provide cellular mobile communications throughout the mid-Atlantic region, and business systems, computer maintenance and support, and financial services in national and international markets.

#90152p4268 06/01/1990 ~PR Newswire

LA JOLLA, CA (JUNE 1) PR NEWSWIRE - Intermark, Inc. (AMEX: IMI) today reported results of operations for its fiscal year ended March 31, 1990. While revenues and operating earnings reflected substantial increases over a year ago, a net loss of $10.7 million, or $1.20 per share, resulted, largely because of increased interest costs. Intermark earned $215,000, or $.01 per share, in the prior fiscal year.

Revenues for the current year amounted to $946 million, up 39 percent from $682 million in the prior year. The increase is primarily attributable to consolidation of Triton Group Ltd. (NYSE: TGL), now a 52 percent owned affiliate, and to sales gains at Pier 1 Imports (NYSE: PIR), whose

revenues grew by 25 percent.

Operating income, before interest expense, taxes and minority interest, was $47.3 million in fiscal 1990, up 21 percent from $39.1 million in the prior year. Strongest operating performances for the year were by Sunbelt Nursery Group, which contributed $10 million compared to a loss of $22 million in the prior year, and by Pier 1 Imports, whose contribution increased by 12 percent to $48 million.

Interest expense for fiscal year 1990 amounted to $57.5 million, compared to $29.1 million in the prior year. The current fiscal year also includes a non-recurring loss of $5.9 million from discontinuing Munson Sporting Goods and income of $15.7 million relating to a change in the method of accounting for stock sales by subsidiaries. Of the $15.7 million, $6.4 million pertains to prior years and is separately presented in the income statement as the "cumulative effect of change in accounting." The balance of $9.3 million has been recorded retroactively in the first quarter of fiscal 1990. In years prior to 1990, the Company's practice was to reflect stock sales by subsidiaries as a direct credit or charge to shareholders' equity. As a consequence of this change to a preferred method of accounting, the Company will henceforth include the effect of such transactions in its income statement.

In the fourth quarter of fiscal 1990, Intermark sustained a net loss of $14 million, or $1.54 per share, compared to a loss of $7.2 million, or $.79 per share, in the fourth quarter of the prior year. Revenues increased 69 percent to $278 million from $165 million, primarily reflecting Intermark's consolidation of Triton.

Operating income for the quarter was $4.7 million compared to an operating loss of $14.6 million in the fourth quarter of the prior year, which included a $16 million provision for store closings at Sunbelt Nursery Group. Interest expense increased to $14.1 million, including $6.4 million attributable to Triton, compared to $8.2 million in the fourth quarter of the prior year. The fiscal 1990 fourth quarter also included a loss of $4.3 million attributable to Munson.

Intermark and Triton have entered into an Agreement and Plan of Merger and Reorganization calling for the combination of the two companies.

TAMPA, FL (JUNE 1) PR NEWSWIRE - Southnet Corp. announced today that it

has received approval to operate and provide its long distance services in Illinois, Ohio, Georgia, Tennesee and New York.

This brings to eight the total number of states granting operational licensees to the enhanced telecommunications firm.

"We are pleased with the timely and positive responses of the various Public Utilities Commissions to our requests for operational authority," stated Robert J. Zradicka, president and C.E.O. of Southnet. "We believe that our approach to delivering value added services as basic functional components of our state-of-the-art digital network is what the public has been asking for ever since deregulation. Our services have been well received in Florida, Pennsylvania and New Jersey, and we anxiously look forward to serving customers in these additional areas."

Southnet is currently seeking approval in an additional five states and is preparing applications for 13 more. "Our intention is to be approved in all states by this time next year," said Zradicka.

Southnet Corp. was formed in 1987 to develop and deliver integrated basic and enhanced long distance services. The company, headquartered in Tampa, Fla., provides domestic and international voice and data services, operator assistance, international inbound calling card services and store and forward and broadcast facsimile service. The company is publicly traded on the Philadelphia Stock Exchange under the symbol SN.

Zradicka, president and C.E.O. of the company is also one of Southnet's founders. Previous to Southnet, Zradicka spent 14 years with the Bell System in various capacities.

#90152p4283 06/01/1990 ~PR Newswire

WASHINGTON (JUNE 1) PR NEWSWIRE - The Office of Thrift Supervision (OTS) today placed First Annapolis Savings Bank, FSB, Annapolis, Md., in receivership and chartered a new federal mutual institution to take its place.

The new institution, First Federal Savings Bank of Annapolis, will assume certain assets and liabilities of the old thrift, and will operate in conservatorship under the oversight of the Resolution Trust Corporation.

The conservatorship did not result in any interruption of First Annapolis' day-to-day operations. The institution and its 21 branches will remain open for business as usual. Holders of insured accounts are not affected by the action, which was taken by OTS to protect insured depositors and the interests of the thrift insurance fund. Deposits remain insured to the $100,000 legal limit.

OTS initiated the action because First Annapolis was operating in an unsafe and unsound condition, and has incurred losses that have depleted all of its capital, with no prospect of replenishment without federal assistance.

First Annapolis' insolvency is due primarily to consistent operating losses, a high level of delinquent loans and other non-earning assets, service corporation losses, and a significant amount of goodwill established when the institution converted from mutual to stock form in 1988.

The institution reported a net operating loss of $11.3 million for calendar year 1989, and a net overall loss of $14.4 million for the first two months of 1990 due to the establishment of loan loss reserves.

First Annapolis was a federally chartered stock institution. Stockholders will retain no interest in the new thrift.

As of Feb. 28, 1990, First Annapolis reported assets of $732.1 million, liabilities of $739.6 million and tangible capital of negative $65.9 million, for a tangible capital-to-assets ratio of negative 8.89 percent.

CONTACT: Patricia Forsyth, 404-888-5381, or Marc Adams, 202-906-6677, both of the Office of Thrift Supervision

LOS ANGELES (JUNE 1) PR NEWSWIRE - Today, Mayor Tom Bradley and Department of Airports Executive Director Cliff Moore joined Thomas J. Roeck, Delta's senior vice president - finance & chief financial officer, and Vince Durocher, Delta's district director of marketing, as Delta launched new service from Los Angeles to Newark/New York City. Delta also introduced hourly service today between Los Angeles and San Francisco. The addition of today's new service makes Delta the number one airline in Los Angeles with more flights to more destinations than any other carrier.

This is the largest single-day expansion at Los Angeles in Delta's history -- a 19 percent increase in flights and a 16 percent increase in seats. The airline currently operates 105 flights daily at Los Angeles to 28 destinations, offering over 17,500 seats each day. On July 1, Delta will further expand its operations with daily nonstop service to Tampa. In the last five years, the airline has experienced extensive growth at Los Angeles having increased its number of flights from 16 to 105 -- representing a 556 percent increase in flights and a 353 percent increase in seats offered each day.

Delta's TranCon service with three flights daily between Los Angeles and Newark/New York City will feature spacious new Boeing 767 aircraft offering complimentary champagne in all cabins with extraordinary selections of cuisines.

Earlier today local dignitaries joined Delta officials in dedicating Delta's new Business Flight Center in Terminal 6. Passengers traveling between Los Angeles and San Francisco on Delta's new hourly service will enjoy special amenities, including access to Delta's Business Flight Centers featuring FAX machines, PC modem hook-ups, and worktables with telephones. For the convenience of the passengers, this service will also feature at-the-gate ticketing. On many of the flights, gourmet coffee will be served and complimentary wine will be available. The specially-selected California cuisine will be served in a uniquely-designed "California Sky Box." Delta will operate hourly flights between Los Angeles and San Francisco each day between 6 a.m. and 9 p.m.

Western Airlines, which merged with Delta in 1987, made history in 1928 when it provided the first passenger air service that linked Los Angeles and San Francisco.

"We are often asked why Delta is entering two of the most competitive markets in the country. The answer is simple. No other airline can match Delta's unique brand of person-to-person service. We have never shied away from competition. It is good for the consumer and it is good for the industry, and Delta is in these markets to stay," noted Roeck at today's inaugural ceremony.

Not only is Delta Air Lines number one in Los Angeles, but it is one of the world's largest airlines, operating 2,400 flight segments each day with a fleet of more than 420 aircraft. The airline's international route system spans the globe from Taipei to Munich with service to 175 cities in 13 countries. Delta is currently seeking new route authority between Los Angeles and Tokyo and between Atlanta and Moscow.

MENLO PARK, CA (JUNE 1) PR NEWSWIRE - Bruce L. Davis, chairman and CEO of Mediagenic (NASDAQ: MGNC) today announced that the company had reached an agreement with Philips Consumer Electronics Company, a division of North American Philips Corp., successors to The Magnavox Company, providing for long term payment of the patent infringement damages awarded to Magnavox earlier this year. The agreement provides for monthly payments of $150,000 from July 1990 to Dec. 1993, with a balloon payment at Dec. 31, 1993.

The agreement covers the $6.6 million in damages awarded in the previously announced decision by the United States District Court for the Northern District of California in a patent infringement suit brought by the Magnavox Company against Mediagenic (then Activision) in 1982. The patent at issue expired in 1989.

"The announcement of this agreement is great news," said Davis. "There has been some uneasiness about our ability to come up with the money to pay the Magnavox award, given the size of the judgement. We think that this plan is a sensible approach that we can accommodate without hurting our prospects for impressive growth and profits."

Donald Johnstone, president and CEO of Philips Consumer Electronics Company added, "We believe that this agreement best serves the interests of both companies by providing for payment of damages without interfering with Mediagenic's ability to adequately fund its operations. Maintaining Mediagenic's financial stability and competitiveness is important to us."

Mediagenic is a diversified international publisher of floppy-disk, cartridge and optical disc-based entertainment software, headquartered in Menlo Park. The company publishes Activision, Infocom, Gamestar, Electric Dreams and ZSoft software and serves as an exclusive distributor for Absolute Entertainment, Interplay Productions, Dynamix Inc., Sierra On-Line and System 3.

AURORA, CO (JUNE 1) PR NEWSWIRE - Pak Mail Centers of America Inc. announced Thursday that a partnership formed at the direction of Oak Brook Ill.-based D.P. Kelly & Associates, D.P. has exercised warrants to purchase 46,250,000 shares of Pak Mail common stock, with net proceeds of $2,543,750 going to Pak Mail. As a result of such exercise, the partnership now owns approximately 60 percent of the outstanding Pak Mail common stock.

The warrants had been issued in September 1989 as part of a transaction in which a partnership formed at the direction of D.P. Kelly & Associates acquired a controlling interest in Pak Mail.

Pak Mail, headquartered in Aurora, is a franchised national network of packing, shipping and mail service centers that cater to residential and small business needs. There are currently over 200 franchise locations in 37 states across the United States.

ANN ARBOR, MI (JUNE 1) PR NEWSWIRE - Gelman Sciences Inc. (AMEX: GSC) reported net sales of $19,006,000 for the third quarter ended April 30, 1990, an increase of three percent over net sales of $18,364,000 for the same period last year.

Net earnings for the third quarter ended April 30, 1990, were $114,000, or $.05 per share, compared to $679,000, or $.28 per share, for the same period of the prior year.

Net sales for the nine months ended April 30, 1990, were $54,800,000, up four percent compared to $52,587,000 for the same period last year. Net earnings for the nine months ended April 30, 1990, were $393,000, or $.16 per share, compared to $1,650,000, or $.69 per share for the nine-month period of the prior year.

Included in the net earnings for the first nine months of fiscal 1989 was $240,000, or $.10 per share, representing the cumulative effect resulting from the adoption of the accounting pronouncement "Accounting for Income Taxes."

Domestic revenues for the third quarter increased nine percent; however, revenue in Australia and Japan declined 16 percent and 45 percent, respectively. Costs associated with relocating the Sunbeam Process operation from Israel to the U.S. were higher than anticipated. Staffing reductions and other cost control measures were implemented during the quarter which will have a favorable impact in future periods.

Gelman Sciences is a leader in the research, development, and manufacture of microfiltration products used in research and clinical laboratories, health-care facilities, and industrial separation processes.

Headquartered in Ann Arbor, the company has subsidiaries in Australia, Canada, England, France, Ireland, Israel, Japan, and West Germany. Manufacturing operations are located in Pleasanton, Calif.; Pensacola, Fla.; and Ann Arbor. Gelman Sciences is a publicly held corporation listed on the American Stock Exchange (GSC).

SAGINAW, MI (JUNE 1) PR NEWSWIRE - Polar Molecular Corporation announced that its common stock, Class A Warrants and Units will continue to be included for quotation in the National Association of Securities Dealer's Automated Quotation System (NASDAQ) via an exception from NASDAQ's capital and surplus requirements.

While Polar Molecular failed to meet NASDAQ's capital and surplus requirement as of Dec. 31, 1989, the NASD has granted a temporary exception from the standard, subject to Polar Molecular meeting certain conditions. While the company believes that it can meet these conditions, there can be no assurance that it will do so. If, at some future date, the company's securities should cease to be quoted on the NASDAQ System, they should continue to be quoted in the over-the-counter market.

For the duration of the exception, the company's NASDAQ symbols will be PMCXC for its common stock, PMCWC for its Class A Warrants, and PMCUX for its Units.

#90152p4302 06/01/1990 ~PR Newswire

ATLANTA (JUNE 1) PR NEWSWIRE - Aaron Rents Inc. (NASDAQ: ARON), the nation's largest furniture rental and sales company, today reported results of operations for the fourth quarter and fiscal year ended March 31.

For the fourth quarter, revenues were $36.9 million compared to $38.4 million for the corresponding 1989 quarter. Net earnings for the quarter were $1.1 million, or $.23 per share, compared to $1.4 million, or $.30 per share for the fourth quarter last year. For the year, revenues were $143.5 million vs. $149.2 million. Net earnings for the year were $3.3 million, or $.71 per share, compared to $5.0 million, or $1.05 per share last year.

Rental revenues reached record levels of $21.1 million for the fourth quarter and $80 million for the year, R. Charles Loudermilk Sr., chairman and chief executive officer, reported. The lower overall revenues for the quarter and the year vs. the previous year were primarily the result of decreased revenues incurred by the company's Ball Stalker subsidiary, a contract office furniture supplier. Ball Stalker's revenues, which include no significant rental revenues, declined to $13.7 million in 1990 from $20.9 million in 1989.

Net earnings for the quarter and the year were adversely affected by the Ball Stalker revenue decrease. In addition, as previously reported, net income for the year was reduced by unusual charges of $1.2 million in the second quarter. These second quarter one-time charges included $613,000 of charges relating to the closing of unprofitable units, $400,000 of obsolete inventory written off at Ball Stalker, and additional charges for prior year real estate and sales tax liabilities. In addition, during fiscal year 1990, depreciation expense as a percentage of rental revenues increased 3 percent over the previous year. This percentage increase resulted in an additional $2.2 million of depreciation expense in 1990 compared to 1989. This increase is primarily due to the company upgrading and expanding its lines of rental furniture in its residential stores and depreciating certain rental contracts over shortened periods.

"The increase in rental revenues during the past year is very encouraging " said Loudermilk. "Without the Ball Stalker decline in revenues and the special charges, fiscal 1990 would have been a pretty good year for us."

Aaron Rents has undergone a major restructuring in the past year, placing top-level operational management closer to the stores, consolidating stores and modernizing its furniture lines as part of a plan to improve operating profits over the long term.

Recent Aaron Rents appointments announced by Loudermilk are: Gilbert L. Danielson, vice president and chief financial officer, formerly chief financial officer of Americom Corp.; Mark A. Higgins, director of Management Information Systems, formerly manager of Computer Systems for Gold Kist Inc.; and Robert P. Sinclair Jr., controller, formerly senior accountant at Ernst & Young. Named president of Ball Stalker was Richard T. Davenport, previously general manager of the Office Furniture Division of Suniland Furniture Co., Houston.

Aaron Rents, based in Atlanta, operates 165 stores in 51 metropolitan areas in 30 states for the sale and rental of residential and office furniture. The company manufactures furniture at five plants in Georgia and Florida.

ST. LOUIS (JUNE 1) PR NEWSWIRE - Stifel Financial Corp. (NYSE: SF) today reported results for the third quarter and first nine months of fiscal 1990.

Revenues for the quarter ended April 27, 1990, declined 18 percent to $18.4 million from $22.5 million the year before.

The company reported a net loss of $797,000, or 23 cents per share, for the quarter, versus net income of $369,000, or 10 cents per share, for the comparable year-earlier period.

This year's third quarter included a special provision of $480,000 after-tax, or 14 cents per share, for unsecured receivables from certain foreign customers.

"The company established a reserve for the full amount in question," said G.H. Walker III, chairman, president and chief executive officer. "We felt it was prudent to take a conservative approach even though we are aggressively pursuing collection."

Walker explained the operating loss in the third quarter occurred entirely in the month of February and was primarily attributable to low market volume in the retail brokerage business and lower investment banking revenues.

"We were profitable in March and April as average daily commission volume picked up noticeably," said Walker. "That strength has continued into May.

"The recent pick-up in commission volume, bolstered by our continued focus on cost-containment, makes us optimistic that we will be profitable in the fourth quarter," said Walker.

He continued, "Our ongoing cost-reduction efforts are beginning to show measurable gains. Furthermore, we are continuing to enhance our account staff. In the past five months, 16 high-producing investment executives have joined us from leading brokerage firms."

Walker stressed, "Stifel Financial remains in a sound financial position."

Revenues for the nine months ended April 27, 1990, were $58.8 million, up 2 percent from a year ago.

For the first nine months, the company reported a net loss of $271,000, or 8 cents per share. This compares with net income of $246,000, or 7 cents per share, for the same period last year.

Stifel Financial is a regional financial services firm based in St. Louis, where it was founded in 1890. Its primary subsidiary, Stifel, Nicolaus & Co. Inc., operates 52 offices in 12 states.

Stifel Financial's stock is listed on the New York Stock Exchange under the symbol SF.

FREMONT, CA (JUNE 1) PR NEWSWIRE - Everex Systems Inc. (NASDAQ: EVRX) today announced the Everex Tempo line of 286 and 386 based personal computers.

Everex's new Tempo line of personal computers offers quality systems at affordable prices. According to Mark Marlow, vice president of Marketing, "Tempo is a natural, evolutionary step for Everex. With our strong

presence in the high end, high performance segment of the marketplace, we are now ready to extend our product line. Tempo offers users an opportunity to purchase a competitively priced system from a company with a reputation for performance, quality and reliability." Everex Tempo systems are fully compatible with Everex STEP systems and may be used in conjunction with STEP file servers as network nodes.

The Everex Tempo line of personal computers will include the Tempo XT/12, Tempo 286/12, Tempo 286/16, Tempo 386sx/16, Tempo 386/20 and Tempo 386/25.

While Everex STEP systems will continue to be sold through authorized Value Added Resellers, Tempo products will be available through all dealers, including STEP Authorized Resellers. Evaluation units are currently being shipped to selected dealers. Tempo systems will begin shipping in June with volume shipments to commence in July.

"By offering both the Tempo and STEP line of personal computers, Everex is reaching a larger segment of the marketplace. Tempo and STEP complement one another and reflect Everex's commitment to providing the PC marketplace with the total PC solution," said Everex President Steve Hui.

Everex Systems Inc., headquartered in Fremont, is a leading manufacturer of personal computers and peripherals. Founded in 1983, Everex Systems designs, manufactures, distributes and supports a complete family of industry-standard personal computers and peripherals through a worldwide dealer and VAR network. Everex stock is traded on the National Market System under the symbol EVRX.

Tempo and STEP are trademarks of Everex Systems Inc. Other brand names and product names are trademarks or registered trademarks of their respective companies.

SANTA MONICA, CA (JUNE 1) PR NEWSWIRE - Wickes Companies Inc., a wholly owned subsidiary of WCI Holdings Corp., today reported operating income of $25.1 million on sales of $698.2 million for the first quarter ended April 28, 1990, compared with operating income of $26.7 million on sales of $836.1 million for the comparable period last year. Excluding Orchard Supply Hardware, which was sold during the second quarter of 1989, and 1989 restructuring charges, prior year operating income was $23.8 million on sales of $768.5 million. Earnings improved at Collins & Aikman Wallcoverings and Kayser-Roth Corp., partially offset by lower earnings at Builders Emporium and the Automotive OEM division of Wickes Manufacturing.

Collins & Aikman Textiles' performance was comparable with the prior year.

After interest expense, provision for loss on sale of assets and income taxes, the company reported a loss from continuing operations of $15.5 million compared with a loss of $25.9 million in the first quarter of the prior year. Net income for the quarter was $7.2 million compared with the prior year's first quarter net loss of $23.6 million. First quarter 1990 net income includes extraordinary gains on the repurchase of debt of $26.7 million. There were no extraordinary gains in the 1989 first quarter.

During the first quarter, Wickes continued its program of debt reduction and repurchased publicly-traded debt with a face value of approximately $80 million. Since the acquisition by WCI Holdings, jointly owned by Blackstone Capital Partners L.P. and Wasserstein Perella Partners, L.P., total debt of Wickes has been reduced by more than $900 million.

ST. LOUIS (JUNE 1) PR NEWSWIRE - Richard J. Mahoney, chairman and chief executive officer of Monsanto Company (NYSE: MTC), today announced the election of three executives as advisory directors of the Monsanto Company board of directors. They are: Michael E. Miller, corporate vice president-administration; Robert B. Shapiro, corporate executive vice president and president, Monsanto Agricultural Company, and Virginia V. Weldon, M.D., corporate vice president-public policy. The appointments are effective July 1.

Advisory directors assume all director-level responsibilities except that they are not empowered to vote. As the title implies, advisory directors bring key management expertise and knowledge to the board's deliberations.

Other executives serving in this capacity are Robert G. Potter, corporate executive vice president and president, Monsanto Chemical Company; Nicholas L. Reding, corporate executive vice president; Howard A. Schneiderman, corporate senior vice president-research and development, and Francis A. Stroble, corporate senior vice president and chief financial officer.

Consistent with his desire to take early retirement, Harold J. Corbett, senior consultant, has resigned as an advisory director.

Monsanto is a global company that makes and markets high-value chemical, agricultural and food products, pharmaceuticals, and industrial process equipment.

TORRANCE, CA (JUNE 1) PR NEWSWIRE - The U.S. Department of Defense can once again purchase aerospace fasteners from a VSI Corp. plant suspended about a year ago following allegations of products testing discrepancies, the company announced today.

The Defense Logistics Agency (DLA) today lifted the suspension of VSI's Chatsworth, Calif., plant, which supplies fasteners to the nation's largest aircraft manufacturers. The Defense Department has continued to purchase products from other VSI facilities.

"We believe DLA's action confirms that our house is in order at the

Chatsworth plant, and demonstrates the agency's confidence in our ongoing testing operations," said Ben W. Prescott, newly appointed president of the Torrance-based Fairchild Fastener Group, which includes VSI's fastener entities.

That confidence has been echoed in public statements by the Federal Aviation Administration, the National Transportation Safety Board and many VSI customers, including Boeing, GE and Northrop.

VSI recently made a settlement with the U.S. Department of Justice that resolved civil and criminal actions taken against the firm under the section of the U.S. Code known as the False Claims Act.

The actions were based on charges by three former VSI employees that certain fastener tests were not conducted in full compliance with government testing standards. VSI first learned of the charges in February 1989. The DLA imposed the Chatsworth plant suspension two months later.

At no time during the investigation of the charges did the justice Department find evidence that aircraft safety was jeopardized by testing discrepancies at the Chatsworth facility.

"We've condemned and rectified the misconduct of the past, which in no way typifies VSI's experiences over the years," Prescott noted. "The company will not let a longstanding reputation for product quality or the trust of customers be diminished in any way. We've already made management and operational changes at VSI that safeguard the integrity of the inspection process. In addition, we have established stringent standards of ethics and behavior that every person in the company must follow."

VSI Corp. is a wholly owned subsidiary of Fairchild Industries Inc. Fairchild, a majority-owned subsidiary of Banner Industries Inc. (NYSE: BNR) has interests in aerospace and specialty fasteners, tooling for plastics and communications services. Fairchild's preferred stock is listed on the New York Stock Exchange (FEN Pr).

#90152p4332 06/01/1990 ~PR Newswire

DETROIT (JUNE 1) PR NEWSWIRE - Western Development Corporation (WDC) announced today that it was beginning preliminary site work for its Auburn Mills property in Auburn Hills, Mich.

The preliminary work will include:

-- The saving of more than 200 quality specimen trees through relocation

and replanting.

-- Soil erosion control measures to limit existing erosion already on the property and protect downstream areas from erosion during construction.

-- Preliminary grading of Baldwin Road to prevent interruption of existing businesses during future construction.

-- Preparation for the anticipated creation of new wetlands and enhancement of existing wetlands.

The announcement was made by Tim Hindert, WDC vice president of planning.

"This preliminary work is the first step in protecting the site from further erosion by correcting existing conditions which damage the property. We are creating control measures for the protection and enhancement of the existing wetlands as well as preparing for the storm water management, open areas and wetlands systems that we are proposing," Hindert said.

"Two additional public benefits of this work will be improvement of existing downstream flooding conditions and also ensuring that existing businesses are not interrupted during construction of Baldwin Road improvements."

"As responsible land owners, WDC has an obligation to maintain and enhance the property. WDC is paying for all the improvements and will only do work for which we have the appropriate approvals and permits," Hindert said.

No wetlands are directly affected or involved in the property work. The work is being done with the knowledge of the Michigan Department of Natural Resources (MDNR) and the United States Environmental Protection Agency. WDC is waiting for an MDNR ruling on its wetlands permit application.

Natural areas of valuable wetlands plant material, called "seed banks" will also be identified. These areas will ultimately be preserved and relocated to existing wetlands or areas for proposed wetlands.

Auburn Mills is a new and proven 21st-century shopping concept which combines family entertainment with value-oriented shopping in a richly landscaped retail park-like setting.

Auburn Mills will create 1,400 construction jobs, 5,300 permanent jobs and generate extensive local and state taxes. Pontiac and Auburn Hills schools will gain $6.2 million in annual taxes. Auburn Hills is expected to receive $1.6 million annually. The state of Michigan will collect

nearly $22 million annually in taxes.

DALLAS (JUNE 1) PR NEWSWIRE - As provided in the Stock Purchase Agreement dated March 21, 1990, which outlines terms for the purchase of 75 percent of The Southland Corp.'s common stock for $400 million in cash by Ito-Yokado Co., Ltd., and Seven-Eleven Japan Co., Ltd., Southland will not issue the June 15 pay-in-kind stock dividend on its 15 percent Cumulative Exchangeable Preferred Stock, the company confirmed today.

In a March 22, 1990, announcement, Southland proposed an exchange offer for its outstanding preferred stock, as well as for approximately $1.8 billion of its outstanding public debt. The terms of that exchange offer are outlined in a preliminary prospectus that is awaiting final approval from the Securities and Exchange Commission.

In the meantime, Southland is currently involved in active negotiations with its bondholders regarding the debt exchange, which is, among other things, a prerequisite for the above-described common stock purchase by Ito-Yokado and Seven-Eleven Japan.

This announcement does not constitute an offer to sell or to buy any security or the solicitation of any consents, which offers and consent solicitations shall only be made by means of a prospectus/consent solicitation.

CONTACT: Cecilia S. Norwood, 214-828-7272, or Markeeta McNatt, 214-828-7587, both of Southland Corp.

ATLANTA (JUNE 1) PR NEWSWIRE - Computer Reseller News (CRN) today announced that a single advertiser, AT&T Computer Systems, is the sole sponsor of its issue published today.

AT&T purchased all available 24 pages of the 48-page publication for use by itself and its resellers. The CRN midweek issue is timed for distribution here at COMDEX, the computer industry's largest trade show serving the reseller market.

"This is an important industry event," explained Jeffrey L. Strief, publisher of CRN. "We are proud that AT&T chose CRN to communicate with

its resellers."

CRN, honored by the Computer Press Association as the "best newspaper in the industry," will distribute the issue to its 64,000 weekly subscribers, as well as the COMDEX show's 10,000 attendees.

"Our sole sponsorship in CRN is evidence of our commitment to the reseller community," said Richard Cundari, AT&T Computer Systems Reseller Sales vice president. "We see this move as a signal to those who carry our products and the rest of the field, that we're deeply committed to expanding our share of the market."

Computer Reseller News, which is published by CMP Publications Inc., is the newspaper for microcomputer and software reselling. It is read primarily by executives who are employed by value added resellers, value added dealers and distributors.

#90152p4346 06/01/1990 ~PR Newswire

PHILADELPHIA (JUNE 1) PR NEWSWIRE - Midway Airlines and Amtrak today officially inaugurated joint service that connects Midway passengers arriving at the Philadelphia International Airport with Amtrak's Boardwalk Express service to Atlantic City, the popular New Jersey destination.

This arrangement marks the first time that Amtrak has provided direct service into an airport and the first time that an airline and Amtrak have coordinated schedules, baggage handling and ticketing for travel between two cities.

Travel agents and news media were invited to sample the first day of joint service and to attend a commemorative ribbon-cutting ceremony.

Amtrak will offer three daily round-trips between Philadelphia International Airport and Atlantic City. The service schedule coordinates with Midway's banks of arriving and departing flights at the Philadelphia hub.

The joint air/rail service will be displayed in airline computerized reservations systems under a code-sharing arrangement that will show the trains as Midway Airlines connections. Passengers will be ticketed for both the air and rail segments of the trip when they make their Midway Airlines reservations. Upon arrival at Philadelphia International, passengers take a short walk from their Midway gate to the railroad platform at the airport to connect with Amtrak's service to Atlantic City.

Checked baggage will be transferred automatically, as with an airline-to-airline connection.

Midway's introductory round-trip fare between select Northeast destinations and Atlantic City is $98 with a one-day minimum stay requirement. One-way coach fare is $79. Both fares are non-refundable and travel must be completed by July 15. The one-way fare in first class is $119.

Fares between any of Midway's Southeast destinations and Atlantic City or between Chicago and Atlantic City, are competitive with fares offered in those markets.

Midway Airlines provides coast-to-coast service from its hubs at Chicago's Midway Airport and Philadelphia International Airport. Midway Airlines and its wholly owned subsidiary, the Midway Commuter, serve 59 destinations in the United States, Canada, the U.S. Virgin Islands and the Bahamas.

ARLINGTON, VA (JUNE 1) PR NEWSWIRE - Four publisher appointments were announced today in the Community Newspaper Division of Gannett Co., Inc. (NYSE: GCI).

-- W. Curtis Riddle, formerly publisher of the Lafayette (Ind.) Journal and Courier, becomes publisher of the Lansing (Mich.) State Journal.

-- Riddle is succeeded in Lafayette by Richard L. Holtz, formerly president and publisher of the Stockton (Calif.) Record.

-- Holtz is succeeded in Stockton by Orage Quarles III, formerly president and publisher of the Fort Collins Coloradoan.

-- Quarles is succeeded in Fort Collins by Gary M. Suisman, formerly circulation director at the Binghamton (N.Y.) Press & Sun-Bulletin.

"These appointments once again demonstrate the depth of talent in Gannett and our commitment to promote from within," said Gary L. Watson, president of the Community Newspaper Division. "Each of these executives has a proven record of management performance and is well suited to move into his new role."

Riddle also will continue as a regional vice president of the Gannett

Central Newspaper Group. He succeeds Malcolm W. Applegate, who resigned to become vice president/general manager of Indianapolis Newspapers, Inc.

Riddle, 39, joined Gannett in 1982 as an editor at USA Today. He later served as managing editor and assistant to the publisher of the Cincinnati Enquirer. He was named publisher in Lafayette in March 1988.

Holtz, 50 is returning to Lafayette where he previously served as publisher from 1986 to 1898 before moving to Stockton.

Holtz joined Gannett in 1970 as classified advertising manager of the Danville (Ill.) Commercial-News. He also has served as advertising director of the Huntington (W.Va.) Herald-Dispatch and the Burlington (Vt.) Free Press, and as publisher of the Marietta (Ohio) Times from 1982 to 1986.

Quarles, 39, was named Gannett's outstanding publisher for 1989. He joined the company in 1969 as an apprentice in the composing room of the San Bernardino (Calif.) Sun. He also served in a variety of assignments in the advertising department, including advertising director from 1984 to 1987. He was named publisher in Fort Collins in October 1987.

Suisman, 36, joined Gannett in 1984 as circulation director of the Ithaca (N.Y.) Journal. Two years later, he was named to a similar position with the Elmira (N.Y.) Star-Gazette. He joined Binghamton in 1987.

WASHINGTON (JUNE 1) PR NEWSWIRE - At 4 p.m. today, Robert J. Herrmann, senior deputy comptroller for bank supervision, Office of the Comptroller of the Currency (OCC), declared the Home National Bank of Milford, Milford Mass., insolvent and appointed the Federal Deposit Insurance Corporation (FDIC) as receiver.

In the mid-80s the bank expanded rapidly, nearly quadrupling its size over several years. Much of the growth was centered in real estate lending,

especially construction loans. In 1987, the OCC noted a substantial deterioration in the loan portfolio due to liberal lending practices and weak supervision by both the board of directors and management.

The OCC obtained a formal commitment of the board to address the bank's problems. The board subsequently replaced management, but a downturn in the local economy exacerbated the problems in the bank's loan portfolio. As losses mounted, the board attempted to raise capital but was unsuccessful. Losses finally exhausted the bank's capital, resulting in insolvency.

The Home National Bank of Milford was chartered in 1875. On March 31, 1990, the bank had total assets of approximately $462 million.

The FDIC is expected to release additional information later today.

STAMFORD, CT (JUNE 1) PR NEWSWIRE - Responding to inquiries from the investment community, Lone Star Industries, Inc. (NYSE: LCE), stated today that it knows of absolutely no reason to account for the unusual recent trading activity and pressure on its stock.

In making the statement, James E. Stewart, chairman and chief executive officer said, "Our previously announced restructuring program, the objective of which is to reposition the company for renewed profitability and build shareholder values, is well underway. Thus far, the program has generated nearly $150 million in cash, much of which has been used to reduce debt and we are making good progress in our planned reductions in overhead.

"We expect continued progress in the weeks ahead and, as always, will report to our shareholders on a timely basis," he said.

Lone Star Industries and its affiliates are leading producers of cement and a major source of ready-mixed concrete, sand and gravel, crushed stone and other construction materials.

#90152p4374 06/01/1990 ~PR Newswire

WASHINGTON (JUNE 1) PR NEWSWIRE - The Office of Thrift Supervision (OTS)

today placed Mutual Building and Loan Association, Weatherford, Texas, in receivership and chartered a new federal mutual institution to take its place.

The new institution, Mutual Savings and Loan Association, F.A., will assume certain assets and liabilities of the old thrift, and will operate in conservatorship under the oversight of the Resolution Trust Corporation.

The takeover did not result in any interruption of Mutual's day-to-day operations. The institution and its four branches in Fort Worth, Granbury, Mineral Wells and Springtown will remain open for business as usual. Holders of insured accounts are not affected by the action, which was taken by OTS to protect insured depositors and the interests of the thrift insurance fund. Deposits remain insured to the $100,000 legal limit.

OTS initiated the action because Mutual was operating in an unsafe and unsound condition and has suffered losses that have depleted all of its capital, with no prospect of replenishment without federal assistance. The institution is insolvent.

Mutual's condition is due primarily to consistent operating losses and the establishment of loan loss reserves to cover a high level of delinquent loans and foreclosed property. Declining asset quality has resulted from the purchase of commercial real estate loan participations in the Dallas-Fort Worth area in the early 1980s.

As of March 31, 1990, Mutual reported assets of $102.5 million, liabilities of $104.4 million and tangible capital of negative $1.85 million, for a tangible capital-to-assets ratio of negative 1.79 percent.

Mutual Building and Loan Association was a state chartered thrift, and this action was taken by OTS with the concurrence of the Texas savings and loan commissioner.

#90152p4379 06/01/1990 ~PR Newswire

LOWELL, MA (JUNE 1) PR NEWSWIRE - COMFED Bancorp, Inc. (AMEX: CFK) announced a net loss of $38.2 million or $4.57 per share for the quarter ended March 31, 1990, compared to a net loss of $3.5 million or 42 cents per share for the similar period ended March 31, 1989.

For the 12 months ended March 31, 1990, COMFED reported a net loss of $47.9 million or $5.73 per share. A loss of $3.5 million 42 cents per

share was incurred by COMFED in its prior fiscal year ended March 31, 1989.

The loss in the current three-month period reflects the continued deterioration of COMFED's residential construction, income property and residential mortgage loan portfolios and a substantial provision for estimated losses on loans. Non-performing loans and real estate acquired by foreclosure increased from $150.4 million at Dec. 31, 1989 to $175.8 million at March 31, 1990, net of $17.2 million of permanent writedowns on the $53.1 million of loans transferred in the fourth quarter to the foreclosed real estate category. Because the declining real estate market has further eroded the bank's ability to recover these impaired assets, provisions for estimated losses of $42.6 million have been added during the most recent quarter. For the full 1990 fiscal year, provisions for estimated losses totalled $54.5 million.

The exceptionally high level of non-performing assets has also adversely impacted operating results by substantially reducing the bank's interest income and increasing its expenses connected with loan workouts and foreclosures. At March 31, 1990, total reserves for loan losses were $36.9 million or approximately 32 percent of the $114.2 million of loans in non-accrual status.

The substantial loss in the most recent quarter has significantly affected the ongoing ability of the company's wholly owned subsidiary, COMFED Savings Bank, to increase its regulatory capital to minimum standards. Under these standards, the bank must maintain capital to asset ratios of 1.5 percent tangible capital (total equity minus Goodwill), 3.0 percent core capital, and 6.4 percent risk-based capital. At March 31, 1990, the bank's tangible capital ratio was a negative (1.1 percent), its core captial ratio was a 0.4 percent and its risk based capital ratio was 1.1 percent. Total stockholders' equity of the company at March 31, 1990 was $37.0 million or 2.6 percent of assets.

COMFED BANCORP, INC. is a $1.4 billion asset holding company headquartered in Lowell, Mass.

HOUSTON (JUNE 1) PR NEWSWIRE - Baker Hughes Inc. (NYSE, PSE: BHI) today announced that BJ Services Co. ("BJ Services") currently a wholly-owned subsidiary of Baker Hughes, has filed a registration statement with the Securities and Exchange Commission covering the initial public offering of 9 million primary shares of common stock. The primary shares constitute approximately 69 percent of the common stock of BJ Services. Baker

Hughes has granted an option to the underwriters to purchase a maximum of an additional 1,350,000 shares of BJ Services common stock owned by Baker Hughes to cover over-allotments. Depending upon the exercise of this option, Baker Hughes will own 20 percent to 31 percent of the common stock of BJ Services following completion of the offering.

BJ Services participates in the pressure pumping segment of the oil field service market and is primarily involved in the cementing, fracturing and acidizing of oil and gas wells. BJ Services reported revenues of $317 million in its most recently completed fiscal year and derived 55 percent of such revenues from U.S. operations and 45 percent from non-U.S. operations.

It is anticipated that the initial offering price for the common stock will be $19 to $22 per share, raising gross proceeds of $171 to $198 million, respectively. Such proceeds along with the proceeds from a $25 million bank loan to be incurred by BJ Services will be paid to Baker Hughes. All fees and expenses related to the offering will be paid by Baker Hughes.

The offering of the BJ Services common shares will commence upon receipt of Securities and Exchange Commission approval which is contemplated to be in late June. The First Boston Corp. will serve as the managing underwriter of the offering.

The registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This announcement shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

Baker Hughes is a leading provider of products and services for the oil, gas and process industries.

Not intended for distribution to beneficial owners.

CHICAGO (JUNE 1) PR NEWSWIRE - Illinois Tool Works Inc. (NYSE: ITW) announced today it has filed a registration statement with the Securities and Exchange Commission for a proposed offering of zero coupon convertible

subordinated debentures due 2005.

The debentures will be convertible into the common stock of ITW, or at the election of the company, into cash equal to the value of the common stock on conversion. The debentures will have a principal amount at maturity of $250 million. Proceeds will be used to retire existing commercial paper. The First Boston Corp. will act as sole underwriter of the offering.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective.

These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This announcement shall not constitute an offer to sell or solicitation of an offer to buy, nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to the registration or qualification under the securities laws of any state. The offering of those securities shall only be made by means of a prospectus.

ITW is a multinational manufacturer of highly engineered components and systems. Principal markets served by the company include appliance, automotive and truck, beverage and food, construction, electronics, general industrial and packaging. ITW's 1989 revenues totalled $2.2 billion.

#90152p4391 06/01/1990 ~PR Newswire

WASHINGTON (JUNE 1) PR NEWSWIRE - The Office of Thrift Supervision (OTS) today placed Great Life Savings Association, Sunrise, Fla., in receivership and chartered a new federal mutual institution to take its place.

The new institution, Great Life Federal Savings Association, will assume certain assets and liabilities of the old thrift, and will operate in conservatorship under the oversight of the Resolution Trust Corporation.

The conservatorship did not result in any interruption of Great Life's day-to-day operations. The institution will remain open for business as usual. Holders of insured accounts are not affected by the action, which was taken by OTS to protect insured depositors and the interests of the thrift insurance fund. Deposits remain insured to the $100,000 legal limit.

OTS initiated the action because Great Life Savings was operating in an

unsafe and unsound condition and has suffered losses that have depleted all of its capital, with no prospect of replenishment without federal assistance.

Great Life's insolvency is due primarily to a high level of non- earning assets, high cost of funds, service corporation losses, and poor underwriting on acquisition, development and construction ADC loans. As of Feb. 28, 1990, nearly 18 percent of the institution's assets were classified as substandard or loss.

Great Life Savings was a state-chartered stock institution. Shareholders will retain an interest in the new thrift.

As of Feb. 28, 1990, Great Life Savings reported assets of $45.8 million, liabilities of $44.7 million and tangible capital of negative $828,000, for a tangible capital-to-assets ratio of negative 1.88 percent.

#90152p4398 06/01/1990 ~PR Newswire

DALLAS (JUNE 1) PR NEWSWIRE - Recognition Equipment Inc. (NYSE: REC) announced today that its board of directors has decided to delay commencement of a proposed self-tender offer for up to 180 days from June 1, 1990 and has amended its agreement with The Prospect Group Inc. to reflect the delay.

In October, Recognition and Prospect entered into an agreement that included provisions for an additional $15 million cash investment by Prospect in Recognition and a self-tender offer by Recognition for $15 to $20 million of its common stock. The agreement originally called for consummation of the self-tender and the Prospect investment to occur substantially simultaneously. In January the agreement was amended to delay the self-tender for up to 120 days after the closing of the Prospect investment. Prospect made its investment on Feb. 16, 1990.

In making the announcement, the company said its board of directors considered a number of factors in reaching its decision to delay the tender offer, including the future capital needs associated with the company's new imaging strategy; dispositions of certain assets that are in progress but not yet completed; and the pending contract settlement discussions with the U.S. Federal Reserve Banks.

The board also considered that the delay will enable the company to know the full year's financial results and excess cash position at October 31 fiscal year end.

Recognition, headquartered in Dallas, and its wholly owned subsidiary, Plexus Software Inc. manufacture, sell and service image and data capture hardware and software systems for customers throughout the world.

NEW LONDON, CT. (JUNE 1) PR NEWSWIRE - NESB Corp. (NASDAQ: NESB) announced today that it had executed definitive documentation giving effect to the agreement in principle reported yesterday with the insurance company holders of its $50 million long term senior notes due June 1, 1995. The company had been in default, as previously announced, under certain financial ratio covenants contained in the note agreements with these lenders. This new agreement calls for a waiver of the defaults by the holders and several other amendments to the note agreements, in return for the company's prepaying its 1990 interest payments on the notes and making other commitments to the lenders.

Pursuant to the agreement, the existing financial covenant defaults in the note agreements have been cured by relaxing certain net worth and ratio covenants. Further, NESB Corp. has committed to remain in compliance with applicable federal and state regulatory minimum capital and ratio requirements, subject to a cure procedure. Under this agreement, NESB Corp., the parent holding company of New England Savings Bank, has paid approximately $5 million to the lenders a prepayments of interest scheduled to be paid on June 1 and Dec. 1, 1990. NESB Corp. has also arranged for the lenders to receive certain federal tax refunds and to establish certain cash collateral accounts granting the lenders security interests in most of its assets, although it will retain free use of the pledged assets so long as the amended note agreements are not in default.

Chairman and Chief Executive Officer, Robin Honiss, stated, "We are pleased to have concluded this agreement with the lenders, with whom we have long enjoyed a cooperative working relationship. We should now have the breathing room needed to ride out the current uncertainties and depressed conditions in the New England real estate market."

#90152p4438 06/01/1990 ~PR Newswire

RIVERTON, WY (JUNE 1) PR NEWSWIRE - U.S. Energy Corp. (NASDAQ: USEG) and its subsidiary Crested Corp. (NASDAQ: CBAG) announced today that they had signed definitive agreements with the Kennecott Corp. of Salt Lake City which completes their agreement to form a joint venture for the development and production of uranium from the Green Mountain Uranium Project located in south-central Wyoming. Kennecott paid $15 million to U.S. Energy and Crested ("USE Parties") in payments of $6 million prior to June 1, 1990 and $9 million on June 1 for a 50 percent interest in the mineral and other properties owned by U.S. Energy and a joint venture between U.S. Energy and Crested known as USE/CC. Kennecott is to fund the first $50 million of expenses on the project.

Initial development and production of uranium is currently being planned for the Round Park deposit through the proposed Jackpot underground mine. The Round Park deposit is located on the properties which were owned soley by U.S. Energy. The boards of directors of U.S. Energy and Crested adopted a method of apportioning the initial consideration of $15 million, on a ratio of 84 percent for U.S. Energy and 16 percent for Crested. Financial economic analyses were provided to the boards for their consideration to arrive at this ratio. The Round Park uranium deposit contains a drilled resource of more than 50 million pounds of uranium oxide which heavily weighed the ratio percentage in favor of U.S. Energy.

Kennecott also agreed to pay on behalf of the USE Parties $30 million of

their operating costs out of 30 percent of its incremental operating margins for production from the individual properties, attributable to price realizations of uranium oxide over $24 per pound (1990 dollars) and an additional $15 million from 30 percent of its incremental operating margins, attributable to price realizations over $27 per pound (1990 dollars). The joint venture named the Green Mountain Mining Venture (the "Venture"), was formed and is owned 50 percent by a wholly owned subsidiary of Kennecott and 50 percent by the USE Parties. The Venture is controlled by a management committee consisting of three members appointed by Kennecott and two by the USE Parties. The USE Parties were appointed as the operator on the project for the initial program. The initial program will consist of conducting further environmental studies, mine permitting and planning, acquisition of milling facilities, property maintenance, implementing a market program and other related activities. The Venture assumed an option to acquire the contiguous properties of Pathfinder Mines Corp. on Green Mountain, which contain substantial uranium resources and the Big Eagle Mine complex. The consideration to acquire this property is the assumption by the Venture of all reclamation obligations currently reported at $7.6 million.

#90152p4454 06/01/1990 ~PR Newswire

SAN ANTONIO, TX (JUNE 1) PR NEWSWIRE - NCNB Texas National Bank confirmed today that it has entered into a series of Purchase and Assumption Agreements with the Federal Deposit Insurance Corp. (FDIC) to acquire certain assets and assume certain liabilities of the nine insolvent banks of National Bancshares Corp. of Texas (NBC), headquartered here.

Under terms of the agreements, NCNB Texas will purchase assets of approximately $1 billion, including loans, investment securities and certain other assets. NCNB will assume deposits of approximately $1.5 billion and certain other liabilities. Also purchased was the banks' Trust business with $1.6 billion of assets under administration.

NCNB Texas will pay the FDIC a premium of $59.5 million for entering into the transaction. The purchase price will be paid for with existing working capital.

The assets purchased include approximately $550 million in loans, constituting the entire loan portfolio of the banks, excluding a pool of adversely classified loans. NCNB also purchased the capital stock of National Bancshares Life Insurance Co., a subsidiary of NBC Bank - San Antonio. In addition, NCNB has the option to put back to the FDIC all installment loans, any other loans and the stock of the insurance company. Any loans not retained by NCNB would be serviced by the bank until the time they are transferred back to the FDIC.

Banks involved in the transaction include the NBC banks in San Antonio, Austin, Boerne, Houston, Kerrville, Seguin and Uvalde. Also involved are NBC Bank - Rio Grande, with offices in Mission and Edinburg, and NBC Bank - South Texas, with offices in Corpus Christi and Robstown. All are nationally chartered banks.

The other three NBC banks, located in Laredo, Eagle Pass and Rockdale, were not included in the transaction. They continue to be owned and

operated by NBC.

NCNB Texas President Kenneth D. Lewis said the bank has named John F. LeFlore, the San Antonio regional executive for NCNB and a 22-year veteran of banking in the Alamo City, to head the newly acquired banks.

A total of 22 full-service branches and two military banking facilities were acquired in the transaction. Lewis said the former NBC branches will reopen as branches of NCNB Texas according to their usual schedules beginning Monday, June 4. Existing personnel will staff the offices. Depositors will continue to be insured to $100,000 by the Bank Insurance Fund.

Lewis said all current NBC services will remain available to customers, with NCNB Texas products and services added as quickly as possible. Customers of the nine NBC banks should continue to use their existing checks and deposit forms.

"One of the key elements in our interest in NBC has been the loyalty displayed by its customers," LeFlore said. "We are anxious to welcome them to NCNB and share with them our highly competitive banking products and quality service that so many other Texans already enjoy."

"This transaction represents a major step in NCNB's expansion strategy and an excellent addition to our Trust business," Lewis added. "It almost doubles the number of locations we have in San Antonio -- which we have long considered one of the most attractive markets in Texas. And it gives us a presence in seven new communities."

He also pointed out that NCNB Texas, the best-capitalized major bank in the state, made more than $2 billion in new loans during 1989. "Our goal is to exceed that amount this year. We intend to use our ability and willingness to lend to strengthen these communities and fuel the economic recovery of Texas."

NCNB Texas has more than $30 billion in assets and serves customers through a banking network of more than 250 branches in 77 Texas communities.

NOTE: A news conference will be held at 1:30 p.m. CDT tomorrow in the Board Room on the fifth floor of the NCNB Texas main office at 300 Convent St. in San Antonio.

#90152p4456 06/01/1990 ~PR Newswire

SAN ANTONIO, TX (JUNE 2) PR NEWSWIRE - National Bancshares Corp. of Texas ("NBC") today announced that the Office of the Comptroller of the Currency had declared nine of its subsidiary banks to be insolvent and had appointed the Federal Deposit Insurance Corp. ("FDIC") as receiver for the insolvent banks. NBC has been advised that NCNB Texas National Bank has assumed the deposit liabilities and certain assets of these former NBC Banks.

NBC remains the owner of three banks - NBC Bank - Rockdale, NBC Bank - Laredo, N.A. and NBC Bank - Eagle Pass, N.A., each of which is solvent, open for business and continuing to serve the needs of their customers and communities. Deposits in each bank remain insured up to the maximum amount provided by law.

NBC further announced that as a result of the seizure of the nine banks, the company would immediately file for protection under the federal bankruptcy laws. Operations in NBC's remaining banks will not be affected by the filing.

Said Richard W. Calvert, chairman of the board and chief executive officer "We are not suprised by the regulatory action in light of the termination of the proposed recapitalization led by Equimark Corporation. We consider that placing the company in Chapter 11 will allow the orderly participation of all interested parties in developing a plan of reorganization for the company. We intend to focus our energies on assisting in management of the remaining NBC Banks and on considering our alternatives in the context of the bankruptcy proceeding."

SAN JOSE, CA (JUNE 2) PR NEWSWIRE - Wyse Technology subsidiary Link Technologies today filed suit against Kimtron Corporation and Inkel (U.S.A.) aka Sherwood in the Santa Clara Superior Court. The complaint alleges that Kimtron misappropriated information confidential to Link in the design and development of new terminals that will be launched next week by Inkel's Sherwood division at Comdex/Spring, a computer industry trade show.

"We have reason to believe certain Kimtron or Sherwood employees, formerly with Link, misused a wide range of company confidential information, including engineering drawings. We intend to vigorously defend our rights " said Chuck Comiso, president of Link.

The lawsuit seeks monetary damages for the misuse of proprietary information, as well as an injunction against use of that information and sale of any product based on such information.

Link Technologies, Inc., based in Fremont, Calif., is a leading designer and supplier of high quality, multi-functional video display terminals.

Wyse Technology Inc. is a leading manufacturer of microprocessor- based products, which include terminals, IBM compatible personal computers and monitors. Wyse sells its products through customers that add value, such as distributors, VARs and original equipment manufacturers. Headquartered in San Jose, Wyse operates sales offices across the United States and in Canada, Australia, Hong Kong and Western Europe. The company employs about 2,800 people worldwide.

PHOENIX (JUNE 1) UPI - Jerome Kersey's blocked shot and go-ahead layup with 23.2 seconds left helped the Portland Trail Blazers earn their first trip to the NBA Finals in 13 years Thursday night with a 112-109 victory over the Phoenix Suns.

Portland took advantage of a hamstring injury to Phoenix guard Kevin Johnson to win the best-of-seven Western Conference finals 4 games to 2. The Trail Blazers will face Detroit or Chicago in the NBA Finals beginning Tuesday night, and they'll have the home-court advantage should the Bulls advance.

Portland had lost its previous five road playoff games by an average of 18.8 points a game, and had dropped Games 3 and 4 in Phoenix by margins of 34 and 12 points.

Yet the Trail Blazers broke through Thursday night to become the first road team in the series to win. Portland has not advanced to the NBA Finals since 1977, when the ''Walton Gang'' beat Philadelphia for the title.

The Suns, seeking their first berth in the championship series since 1976, fell in the conference finals for the second straight year. Their losses to Portland came by margins of 1, 2, 6 and 3 points.

Portland trailed 109-108 when Kersey blocked a shot by a driving Jeff Hornacek, then raced downcourt to complete a fastbreak layup for a 110-109 edge.

After two Phoenix timeouts, Tom Chambers looked to drive, but Buck Williams reached down to steal the ball off the dribble. Clyde Drexler was then fouled by Chambers with 6.8 seconds to go and Drexler sank two foul shots.

Jeff Hornacek, who had a career-high 36 points, missed an off-balance 3-pointer with about two seconds left, Williams got the rebound and Portland began to celebrate.

Terry Porter had 23 points and Drexler added 19 for Portland. Dan Majerle had 22 points and 10 rebounds off the bench for the Suns and Chambers had 17 points, though he made only 5 of 16 shots.

The Suns led 105-99 with four minutes to play but the Trail Blazers battled back. Terry Porter hit his fourth 3-pointer of the game, Kersey made a layup and Drexler sank two free throws following a steal in the backcourt to bring the Trail Blazers to within 107-106 with 1:48 to play.

After Mark West won a jump ball, Hornacek sank two foul shots for a 109-106 Phoenix lead with 69 seconds to play.

Porter countered with two free throws 14 seconds later.

Johnson had 16 points before leaving with 2:54 left in the second quarter with a strained left hamstring and did not return. But Hornacek shifted from shooting guard to the point and delivered in the clutch, making 11 of 22 shots from the floor and all 14 from the line.

Phoenix made only five field goals in the third quarter, but actually built on its halftime lead by making 16 of 18 free throws. Portland made 9 baskets in the period but took only 9 free throws, making 7.

Hornacek was 8-for-8 from the line for 10 points in the period, hitting two foul shots with 7.8 seconds left to give Phoenix an 89-84 lead entering the final quarter.

With Porter sitting out more than seven minutes of the period after picking up his fourth foul, the Trail Blazers could not fully capitalize on Johnson's absence.

Majerle canned 6 of 8 shots in the second quarter for 16 points as the Suns, who led by as many as 12 points in the period, settled for a 63-59 halftime lead. Porter had 18 points on 7 of 8 shooting for Portland.

Tim Perry's double-pump layup off Hornacek's fastbreak feed had given Phoenix a 47-35 lead, but the Trail Blazers retaliated, moving within 53-50 on Kevin Duckworth's jumper.

Johnson, resting since the end of the first quarter, then returned to the lineup at the 4:27 mark. But as he soared to the basket on a drive, he slid off Duckworth and landed awkwardly on his left leg. He made the basket and free throw, but left limping to the locker room with 2:54 to play in the half.

Drexler quickly nailed a jumper for a 57-56 Portland lead, but Majerle would not let the Suns fold. He stripped Drexler of the ball and was fouled, hitting two free throws, then made a 3-point play off a rebound to keep Phoenix ahead at the break.

Johnson went wild in the first quarter, collecting 13 points and 6 assists as the Suns took a 34-31 lead. Phoenix hit 12 of 18 shots and got 9 points from Hornacek, but made 7 turnovers.

(JUNE 1) UPI - Soviet President Gorbachev was honored Thursday night at a formal White House dinner that featured President Bush hailing his Soviet counterpart for his perestroika system of reforms. Gorbachev responded to the praise by predicting that the four-day summit might lead to ''major results'' between the two nations.

The two leaders Thursday took steps to remove from their agenda the issue that might have been the most difficult to resolve- a re-unified Germany's possible NATO membership. Western analysts believe the Soviets will have to accept such a development, but will likely extract from the West some measure to allay their security concerns.

Japaneses authorities say an earthquake measuring six on the Richter scale struck Tokyo Friday morning, but caused NO injuries or damage. Japan's Central Meteorological Agency says the epicenter of the strong quake was some 75 miles east of Tokyo, 12 to 18 miles off Japan's eastern shore.

The United States offered the sole dissenting vote Thursday on a measure before the U-N Security Council that called for a three-member team to go to the Israeli-occupied territories. Arab countries made the request in hopes such a U-N team could draw up a plan to protect Palestinians under Israeli occupation.

(JUNE 1) UPI - Wellesley College seniors who protested the choice of Barbara Bush as the speaker at their commencement have asked the first lady to be more vocal about women's issues. In a letter to be handed out at Friday's commencement activities, the graduating seniors at the all-female Massachusetts school urge Bush to be more visible on such issues as reproductive rights and day care.

Federal health officials say regulations designed to prevent children from buying cigarettes are largely ineffective. In its weekly report on health issues, the Centers for Disease Control recommends that ''children and adolescents must be prevented from initiating the use of tobacco'' to make the United States smoke-free by the year 2000.

(JUNE 1) UPI - President Bush and his Soviet counterpart are scheduled to achieve the centerpiece of their four-day summit Friday when they sign a formal pact to destroy part of their chemical weapon arsenals. The accord also calls for limits on nuclear testing and a reduction in the size of each side's strategic nuclear stockpile. It does NOt appear that the two leaders will confront the sticky issue of a united Germany's NATO membership during the summit. That issue has been tossed to Secretary of State Baker and Foreign Minister Shevardnadze for more study.

Bush told reporters Thursday that he was struck by the poise shown by Soviet President Gorbachev during the two sessions the men held at the White House. Despite the internal strife facing Gorbachev on the home front, Bush said he appeared strong, confident and- quote- ''determined to do his job.'' When asked if he planned to offer Gorbachev assistance, Bush said U-S and global security interests would be best served by working with the Soviets.

A new poll indicates most Soviet citizens think President Gorbachev's system of reform is deeply flawed. Nearly half of the 14-hundred-85 Soviets questioned think there may be a public revolt against the government. Despite the ominous tone of the poll, nearly seven out of 10 respondents think highly of Gorbachev's leadership.

Hundreds of thousands of mourners gathered Thursday in Srinigar , India,

to mark the death of the assassinated chief religious leader of Kashmiri Moslems. Troops and paramilitary forces remained out of sight during the five-hour ceremony, which was punctuated by many mourners firing automatic weapons in the air. Militants delivered fiery speeches advocating Kashmir's separation from India.

(JUNE 1) UPI - A California task force met for the first time Thursday in San Diego to discuss the impending onslaught of so-called ''killer bees.'' The bees- an aggressive Africanized cousin of the common honey bee- are expected to enter the U-S Southwest across the Mexican border within the next three years. The bees are blamed for the deaths of at least 10 people in the past two years. State officials say they want to prevent hysteria regarding the bees' arrival.

WASHINGTON (JUNE 1) UPI - The following is the schedule for the U.S.-Soviet summit Friday through Sunday:

Friday:

9:30 a.m. Gorbachev meets congressional leadership, embassy.

11:00 Third Bush-Gorbachev meeting.

1:00 p.m. Gorbachev departs for embassy private time.

1:30 U.S.-Soviet press briefing.

5:00 Bush-Gorbachev sign Soviet-U.S. documents.

5:30 Final Bush-Gorbachev meeting, Oval Office.

6:30 Gorbachev departs for embassy private time.

7:00 Secretary of State James Baker briefs.

7:20 Bushes depart for embassy.

7:30 Bushes arrive for dinner hosted by Gorbachevs.

Saturday:

10:00 a.m. Bushes and Gorbachevs board Marine One and depart White House for Camp David.

10:30 Bushes-Gorbachevs arrive Camp David for private time and
. informal talks.

5:00 p.m. Joint U.S.-Soviet press briefing.

7:30 Gorbachevs board helicopter and depart Camp David for embassy.

Sunday:

9:30 a.m. Gorbachevs arrive White House for private coffee with Bushes.

10:00 Bush-Gorbachev news conference.

11:15 Gorbachevs depart South Lawn for Reflecting Pool.
11:35 Reflecting Pool arrival, board helicopter for Andrews AFB.

Noon Gorbachevs depart Andrews for Minneapolis.

LOS ANGELES (JUNE 1) UPI - An overwhelming majority of Soviet citizens feel there are major problems with perestroika and nearly half believe there may be a public revolt against their government, according to new poll.

The Los Angeles Times Poll of 1,485 Soviet citizens found that although they think highly of Soviet President Mikhail Gorbachev - 68 percent approved of the way he is handling his job - 49 percent said they have a worse opinion of their leader than they did a year ago.

The results of the poll, to be published in the newspaper's Friday editions, also found that six out of seven Soviets, 86 percent, have a favorable impression of Americans. In a companion poll asking the same question of Americans, 74 percent had a favorable impression of Soviet citizens.

A whopping 90 percent of the Soviets surveyed said they were unhappy about consumer goods, 85 percent were dissatified with services, and 76 percent were unhappy about health care and life in general.

Nearly half, 49 percent, said they believed the odds are high for a ''public revolt against the government,'' the poll found.

Most Soviet citizens, 72 percent, described the national economy as bad, while 1 percent said it was good and the rest, 23 percent, described the economy as somewhere in between.

Asked if they were worse off than last year, 46 percent said ''yes'' and 47 percent predicted they will be worse off next year. By way of contrast, only 13 percent said their family finances were better than last year and 13 percent expect them to be better next year.

Comparing the basic economic and political changes taking place in the Soviet Union, 54 percent of Soviet citizens said they prefer democracy over government control. Forty-eight percent preferred prices that result from supply and demand rather than those fixed by the government, and 50 percent favored private business ownership over public.

Nearly all respondents, 95 percent, said they were worried about inflation and 89 percent said they felt there were major problems with Gorbachev's economic reform program of perestroika.

For the Soviet study, the Soviet Academy of Sciences in Moscow conducted 1,485 face-to-face interviews with randomly selected Soviet passport holders - all Soviets 16 years or older are required to carry passports for identification - between May 9 and May 23.

Another public opinion study was conducted concurrently in the United States using the same questions. The Times telephoned 2,144 respondents of voting age on five days ending May 14.

The Times said there was a 3 percent margin of error in each survey.

#90152u0364 06/01/1990 ~United Press International

(JUNE 1) UPI - Los Angeles Dodgers Manager Tommy Lasorda has been saying his team had to be ready when the Cincinnati Reds hit a slump. Thursday night, the Dodgers helped create Cincinnati's problems.

Kal Daniels led off the 10th inning with a home run, lifting the Dodgers to a 2-1 victory over the Reds.

Daniels, who was traded to the Dodgers last season, belted a 1-1 pitch off Norm Charlton, 3-1, into the left-field bleachers for his ninth homer of the year and 24th RBI in the month of May.

''I still have friends over there (in Cincinnati), but when you step between the lines they're all enemies,'' Daniels said.

Charlton said the home run pitch ''was a slider. It wasn't where I wanted it. It was over the plate and up. I'll throw that pitch 100 times in that situation.''

Cincinnati, which lost for only the 12th time in 42 games this season,

still remains eight games ahead of their nearest rivals in the National League West. But Lasorda knows it doesn't take long to close the gap.

''It's good to win the first one,'' Lasorda said. ''It's going to take a couple of hot teams to catch (the Reds). In 1982, we gained 10 games in 11 days.''

Daniels said: ''The thing with this series is that nobody has to talk about it. It's bigger for us than for them. Hopefully, we can win at least three (of four games) or maybe sweep it.''

Don Aase, 2-1, pitched two innings in relief of starter Mike Morgan for the win.

The Dodgers snapped Jack Armstrong's streak of 22 scoreless innings when they scored a run in the first. Lenny Harris led off with a double and took second on Stan Javier's sacrifice bunt. Daniels followed with a sacrifice fly to score Harris.

The Reds tied the score with an unearned run in the third. Mariano Duncan reached base on shortstop Alfredo Griffin's errant throw. Joe Oliver followed with a single and both runners advanced a base on Armstrong's sacrifice bunt. Duncan, who was activated just before the game, scored on Chris Sabo's groundout.

Duncan had been on the disabled list since May 14 with an abdominal muscle strain.

Elsewhere in the National League on Thursday night, San Diego nipped Atlanta 2-1 and Houston topped San Francisco 5-3.

In the American League, it was: Oakland 6, Kansas City 4; and Minnesota 3, Chicago 2.

-- AROUND THE NL --

Padres 2, Braves 1

At San Diego, pinch-hitter Fred Lynn singled home Phil Stephenson with the winning run as part of a two-run seventh, lifting San Diego to its fourth straight victory. Dennis Rasmussen, 5-2, went seven innings for the win and Greg Harris notched his third save. Pete Smith, 4-4, suffered the defeat.

Astros 5, Giants 3

At San Francisco, Craig Biggio's two-run single highlighted a four-run sixth inning, dropping the Giants to 6-16 at Candlestick Park this year,

the worst home record in baseball. Jim Deshaies, 3-2, gave up two runs and five hits for the win and Danny Darwin earned his first save. San Francisco starter Scott Garrelts, last year's National League ERA leader, dropped to 1-6.

#90152u0366 06/01/1990 ~United Press International

TOKYO (JUNE 1) UPI - Communist North Korea, which counts the Soviet Union among its few allies, Friday warned Soviet President Mikhail Gorbachev of the ''serious political consequences'' if he goes ahead and meets Monday with South Korean President Roh Tae Woo in San Francisco.

The meeting between Gorbachev and Roh, arranged by the United States to follow Gorbachev's summit talks with President Bush, was seen as a major political setback for North Korea.

A North Korean Foreign Ministry spokesman said North Korea still hopes the meeting will not occur.

''We consider that the president of the Soviet Union, an ally of ours, is quite able to analyze and judge what serious political consequences will be entailed by his meeting with Roh,'' said the spokesman, who was quoted by the official (North) Korean Central News Agency in a report monitored in Tokyo.

''We do not think (the meeting) will take place,'' said the Foreign Ministry spokesman. ''We have not yet received official information regarding this from the Soviet side.''

The spokesman said the meeting would be tantamount to the Soviet Union recognizing South Korea and could lead to a ''freezing of the division of our country.''

South Korea's influential national daily, Dong-A Ilbo, reported Friday that the Roh-Gorbachev meeting was a step toward Moscow opening full relations with South Korea, and Roh intends to invite Gorbachev to Seoul during their talks in San Francisco.

''There is a high possibility that Gorbachev will come to South Korea when he visits Japan next year,'' the paper said, quoting a high government source.

''The upcoming summit meeting (between Roh and Gorbachev) stands on the pre-condition that the two nations will enter into formal diplomatic relations. The exact timing will have to await the result of the meeting but the two leaders are expected to agree to speedily open full relations.''

South Korea has had no relations with the Soviet Union, which occupied North Korea in 1945 at the end of World War II and set up a communist government there.

The Soviet Union and South Korea have been moving closer since the Soviets attended the Seoul Summer Olympics in 1988, and last year they set up trade offices in each other's capitals.

#90152u0394 06/01/1990 ~United Press International

NEW YORK (JUNE 1) UPI - Former Philippines first lady Imelda Marcos was in stable condition at a New York hospital Friday after she collapsed during her racketeering trial and had to be carried from the courtroom on a stretcher, suffering from stomach pains and bleeding from the mouth.

Marcos, 60, wearing an oxygen mask, her face pale and eyes closed, was loaded into an ambulance Thursday morning and taken from U.S. District Court in lower Manhattan to New York Hospital-Cornell Medical Center.

Doctors diagnosed her as suffering from a severe inflammation of the stomach lining - a condition that is not life-threatening - and said that Marcos would be hospitalized for ''several days.''

She was in stable condition early Friday, a hospital spokeswoman said.

It was the third time Marcos, who suffers from high blood pressure, has collapsed in court since her lengthy trial began April 3.

''She was choking on her own blood and bleeding from the mouth,'' said Marcos's longtime attorney, John Bartko, just after she collapsed.

Marcos is being tried on charges that she and her late husband, former Philippine president Ferdinand Marcos, conspired to buy New York real estate, art and jewelry with $222 million stolen from their homeland.

When she arrived at the courthouse Thursday, Marcos told a reporter that she felt sick to her stomach.

After she was taken to the hospital, a court clerk said she had been worried about Marcos's ''particularly gray'' appearance when she arrived in court, and had advised the courthouse nurse to stay at her post and not go to noon mass at a nearby Catholic church.

Dressed in her customary black of mourning for her husband, Marcos had been sitting at the witness table listening to her trial lawyer, Gerry Spence, question an associate of her co-defendant, former Saudi arms dealer Adnan Khashoggi.

When Assistant U.S. Attorney Charles LaBella began his questioning about 11:40 a.m., Marcos suddenly slumped over, her face flat on the table, as spectators gasped.

Bartko said when Marcos collapsed, she murmured, ''No, no, no.'' Asked what she meant, he replied, ''She wanted the trial to go on - she didn't want this to happen to her.''

Two doctors among the spectators rushed up to the fallen Marcos, as well as a few of her supporters. The doctors called for a stretcher and Marcos was carried out as Judge John Keenan cleared the courtroom. Later, he recessed the trial until Tuesday.

''She made a sound. I looked over, and she put a hand to her face and she fell forward, bleeding from the mouth and vomiting,'' said Khashoggi's lawyer, James Linn.

Doctors at the hospital later Thursday issued a statement saying tests showed Marcos has ''erosive gastritis,'' an acid-related condition in which part of the stomach lining is eroded.

The condition, which is unrelated to Marcos' high blood pressure, requires intravenous medication to suppress her production of acid, the statement said.

''It is expected that she will be in the hospital for several days until her condition, which is not life-threatening, has improved,'' it read.

Marcos broke down in tears April 26 during testimony and had to be escorted from the courtroom and treated for high blood pressure.

Since then, she has worn a blood pressure monitor. On May 8, she again collapsed in tears when a witness testified about her daughter receiving secret funds.

#90152u0397 06/01/1990 ~United Press International

WASHINGTON (JUNE 1) UPI - Bilateral agreements and issues before the superpower summit:

1) Chemical weapons: the destruction of existing stockpiles to 20 percent of the current U.S. level over eight 8 years with a commitment to halt production of new weapons once the accord takes effect. The United States would cut to 5,000 tons from an estimated existing arsenal of 25,000. The Soviet Union would cut to the same level from an estimated 45,000 tons. Completed and set to be signed.

2) Nuclear testing: verification protocols to clear the way for ratification of the 1974 Threshold Test Ban Treaty and the 1976 Peaceful Nuclear Explosions Treaty, which limit the explosive force of

nuclear-weapons tests and other ''peaceful'' explosions to the equivalent of 150,000 tons of TNT. Completed and set to be signed.

3) START: a cut of 30 percent to 35 percent in strategic nuclear weapons, including first-time limits on air- and sea-launched cruise missiles and a 50 percent reduction in the heaviest Soviet land-based missiles. Bush and Gorbachev are expected to announce substantial agreement on major elements of a treaty to be concluded by the end of the year.

4) START II: a joint statement of objectives for the next phase of strategic arms reduction talks, expected to include reductions as well as qualitative limits on modernization.

5) Conventional Forces in Europe: with negotiators still at odds over deinitions and other technical matters, a joint statement seeking to propel the talks forward to an agreement this fall.

6) Proliferation: a joint statement on the need to prevent proliferation of chemical and nuclear weapons and ballistic missiles.

7) Trade: formal rules and legal safeguards to promote expanded two-way trade, including protection of copyrights, patents and trademarks and guarantees of commercial representation and access to office space and local employees. Ready to be signed, but may be withheld by Bush because of continuing tensions over Lithuania.

8) Long-term grain agreement: a five-year commitment by the Soviet Union to increase its annual minimum purchases of U.S. grain to 10 million metric tons from 9 million tons. Maximum purchases not subject to U.S. government review would increase to 14 million tons from 12 million tons. Near completion, but could be held up by the Soviets in the absence of a full trade agreement.

9) Civil aviation: agreement to treble commercial air service between the two countries with more airlines and more routes. Completed and set to be signed.

10) Maritime boundary: resolution of a dispute over the 1,600-mile-long boundary between Alaska and the Soviet Union in the Bering Sea. The United States would gain jurisdiction over fishing and mineral development in three areas within 200 miles of Soviet territory. The United States would cede to the Soviets one such area under its control. Completed and set to be signed.

11) Maritime transportation: greater access on shorter notice to U.S. and Soviet ports by commercial vessels. Completed and set to be signed.

12) Student exchanges: annual exchange of 1,000 college and high school

students from each side. Completed and set to be signed.

13) Cultural exchanges: opening of cultural and information centers in Moscow and Washington: Completed and set to be signed.

14) Parks: establishment of an international Alaska-Siberian park. Completed and set to be signed.

Also to be issued: agreements or joint statements promising broader cooperation on customs issues, oceanographic research, nuclear energy and other economic and technical matters.

GENEVA (JUNE 1) UPI - Global AIDS cases reported to the World Health Organization rose by 8,973, or 3.5 percent, in May to a total of 263,051, the U.N. agency said Friday.

The United States accounted for most of the increase with 6,309 more cases for a total 132,436, or 50.4 percent of the world figure as of May 31.

That was somewhat misleading, however, because badly stricken African nations failed to send in updated reports to WHO.

WHO experts as always warned that reported cases also represent less than half of the real global total, which is estimated at more than 600,000.

Also, at least half of the cumulative total cases since 1980 have already resulted in death.

Uganda ranked second in the world in reported cases with 12,444, a figure dating back to February.

Zaire followed with 11,732 dating back to Jan. 31. Brazil reported 10,510 cases as of March 31, and France reported 9,718, also as of March 31.

WHO latest regional totals with the most-affected countries were:

-Africa: 64,745 (Burundi 2,784, Congo 1,940, Ivory Coast 3,647, Kenya 6,004, Malawi 7,160, Rwanda 2,285, Uganda 12,444, Tanzania 6,251, Zaire 11,732, Zambia 2,709, Zimbabwe 2,357).

-Americas: 160,619 (Brazil 10,510, Canada 3,735, Dominican Republic 1,262, Haiti 2,331, Mexico 4,268, United States 132,436).

-Asia: 647 (Israel 109, Japan 189).

-Europe: 35,021 (France 9,718, West Germany 4,749, Italy 6,068, Netherlands 1,243, Spain 5,295, Switzerland 1,255, United Kingdom 3,157).

-Oceania: 2,019 (Australia 1,824, New Zealand 160).

#90152u0406 06/01/1990 ~United Press International

(JUNE 1) UPI - Strong thunderstorms raked Texas early Friday as authorities assessed the damage caused by a series of tornadoes, while rain, flooding and high winds struck other parts of the southern Plains, the South and the Pacific Coast.

The National Weather Service said eight tornadoes slashed through west Texas late Thursday, causing extensive damage in some areas. Other tornadoes were reported early Friday but there were no reports of damage or injuries.

A line of powerful thunderstorms swept east across Texas toward the Dallas-Fort Worth area early Friday, dumping torrential rain and lashing Texans with strong gusty winds.

One of the twisters late Thursday struck the town of Spearman, damaging some buildings and destroying several mobile homes. Authorities reported no injuries but were still assessing the damage.

Hansford County residents watched as a massive tornado headed toward Spearman late Thursday, but it lifted back into the clouds minutes before it would have reached the community of 3,600, authorities said.

''If that one would have hit us, it would have wiped this town completely out,'' said Sheriff R.L. McFarlin.

In rain-weary east Texas, authorities said storms dumped about 6 inches of rain in the Lufkin area, causing some street flooding Thursday.

Some areas of northeast Texas and northwestern Louisiana were inundated with up to 9 inches of rain in a 30-hour period, the NWS said.

Officials in northwest Texas reported 60-mph winds early Friday, while the weather service reported 65-mph gusts in southwestern Oklahoma.

High pressure kept much of the South relatively clear overnight but low-level southerly winds pushed moist Gulf air into Mississippi, causing showers and thundershowers that dumped up to 7 inches of rain. Flooding in Vicksburg, Miss., forced the evacuation of numerous homes.

Early morning temperatures across the South Friday ranged from 65 at

Charleston, S.C. to 90 at Miami.

In the Midwest, light rain sprinkled eastern Minnesota and western Wisconsin early Friday, the NWS said. Skies were mostly cloudy through Illinois, but clear in Missouri and Indiana.

Skies were generally clear overnight in the mid-Atlantic region, with temperatures ranging from the 30s to the 50s.

A high-pressure system hovering to the southwest of New England brought the Northeast states warm temperatures and clear skies early Friday. Temperatures were mostly in the 50s, but the mercury dipped to 41 in northern Maine and Boston had a reading of 63 early Friday.

High pressure was expected to remain south of New England for the weekend, creating summerlike conditions with sunshine and temperatures in the 80s.

In the West, thunderstorms rumbled across the northern California mountains, bringing more rain to the extreme northern portion of the state. Storms blew into Nevada, but fair and warmer weather was expected through the weekend.

About 10 inches of snow had fallen in southwest Oregon and northeast portions of the state Thursday. Although lessening in the southwest, storms continued throughout the night in the northeast mountains.

CARSON CITY, Nev. (JUNE 1) UPI - A federal appeals court temporarily halted the execution Friday of condemned killer Thomas Baal, who said he wanted to die and asked a judge to send him a prostitute as his last request.

The 9th U.S. Circuit Court of Appeals in San Francisco voted 2-1 late Thursday to grant a stay petition filed by Baal's parents, who claimed their son was not mentally competent to waive further appeals.

Baal, who has repeatedly said he wants to be executed, had been scheduled to receive a lethal injection at Nevada State Prison shortly after midnight. The appeals court issued its stay 90 minutes before the scheduled execution.

State Prison Director Ron Angelone said Baal ''was upset by the 11th-hour petition. He had prepared himself for the execution.''

He had already eaten his last meal of fried chicken and mashed potatoes and had what he thought was a final meeting with his parents, Edwin and

Doris Baal, when the court voted to stop the execution.

The stay order will remain in effect until noon Saturday, allowing time for the court to consider the case. Justices Harry Pregerson and James Browning voted for the delay; Justice Alex Kozinski dissented.

In a telephone hookup from his prison cell earlier Thursday, Baal told U.S. District Judge Howard McKibben, ''Let's get the ball rolling.'' The condemned man also asked the judge, as a last request, to ''bring me a hooker.''

McKibben refused to stay the execution, saying Baal was competent to waive his rights to further appeal, but his parents took their request for a stay to the federal appeals court in San Francisco.

Pregerson made it clear he believed McKibben should have held a full-fledged competency hearing for Baal. The justice noted that Baal suffered brain damage as a youngster and has had suicidal tendencies since then.

The condemned man would have been the fifth executed in Nevada since reinstatement of the death penalty in 1976 and the 129th nationwide.

Baal's refusal to appeal left him scheduled for execution just 27 months after he fatally stabbed and robbed a woman bus driver who gave him a $20 handout.

Assistant U.S. Public Defender Patrick Flanagan was ready to file a petition for a stay but Baal, in a meeting with his lawyer this week, declined any further legal challenge.

Baal said he was on a marijuana and crack cocaine binge at the time of the killing.

Baal spent Wednesday night listening to the radio and telephoning friends.

He was convicted of fatally stabbing Frances Maves, a Las Vegas shuttle bus driver, on Feb. 26, 1988. Maves was checking her engine when Baal approached and asked for help. She gave him $20 but he pulled a knife and forced her into her car, which was parked behind the bus. She first tried to calm him and then tried to grab the knife.

Baal, according to court documents, told her, ''You sholdn't have done that. Now you pay. I sentence you to death.'' He stabbed her twice, pushed her body otside the vehicle, turned her over and stabbed her six more times. He took her car and purse with $120.

The car was later abandoned and Baal was arrested hitchhiking outside of

Reno. He has been mental institutions several times after trying suicide, as evidenced by several scars on his arms.

At the time of the killing he was on parole from Hawaii where he had served time for burglary and auto theft. He had returned to his home in Colorado, but then left without permission and ended up in Las Vegas.

Baal told interviewers last weekend he was afraid but ''It's time to go.''

He said Maves was the first person he had ever killed but he got the nickname of ''Scrappydoo'' from gang fights he was in as a youth.

Baal said he would probably be buried in Mesa, where his parents and his sister live. He said his family tried to persuade him to go forward with his appeals but he told them, ''I've got to do what I've got to do.''

TOKYO (JUNE 1) UPI - Japan will study a U.S. request to contribute up to $2 billion to an $8 billion project to build a superconducting supercollider in Texas, a government spokesman said Friday.

A U.S. delegation headed by Deputy Secretary of Energy Henson Moore has been in Tokyo since Tuesday, conferring with Japanese officials on Japan's participation in the plan to build a 54-mile-long tunnel in Texas for high-energy physics research.

''I cannot say in a straightforward way (whether Japan will participate) '' said Shigeo Takenaka, a spokesman for the Foreign Ministry, at a regular news conference.

''This proposal was put forward only yesterday,'' he said. ''The process we are going to go through is to discuss it among the various ministries.''

The U.S. government will contribute $5 billion to the project, the state of Texas will add $1 billion and the rest is to come from foreign sources, said John Easton, U.S. assistant energy secretary for international affairs.

''We certainly expect and hope that Japan will be a major partner,'' Moore said.

The delegation will visit South Korea next week and plans to approach European countries later.

#90152u0426 06/01/1990 ~United Press International

BEIJING (JUNE 1) UPI - The Tibet government leader who presided over two years of anti-Chinese unrest in the Himalayan region has resigned and was replaced by a veteran Communist Party official, state-run media reported Friday.

Doje Cering, 51, was forced by poor health to give up his position as chairman of Tibet's ostensibly autonomous People's Government, the official Chinese news agency Xinhua said. Details of Doje Cering's illness were not disclosed.

The communist-controlled Tibetan People's Congress voted Thursday to replace Doje Cering with Gyaincain Norbu, 58, an ethnic Tibetan who joined the Chinese Communist Party in 1956, Xinhua said.

Doje Cering, who became government chairman in 1985, was its leader when anti-Chinese rioting erupted in September 1987 for the first time in nearly three decades.

The violence continued intermittently as one of the most serious periods of unrest since Chinese troops invaded Tibet in 1950 and asserted communist authority.

Beijing proclaimed martial law in March 1989 after several days of fierce rioting. China lifted martial law May 1, claiming the political situation had been stabilized, but Tibet remains tense.

A new public security law replacing martial law was enacted May 23, sharply limiting Tibetans' rights to political and religious expression.

Many Tibetans still seethe under Chinese communist control, hoping for the return of their exiled spiritual leader, the dalai lama, who fled after an abortive armed uprising in 1959. Before 1950, Tibet had been a largely autonomous feudal kingdom.

Gyaincain Norbu has worked in Tibet for 40 years, serving as a judge and prosecutor before joining the standing committee of the Chinese Communist Party Tibetan Regional Committee in 1983.

The new Tibetan leader became deputy secretary of the committee in 1985.

PARIS (JUNE 1) UPI - France said Friday it is pulling some of its troops from Gabon following an improvement in security conditions in its troubled former West African colony.

Foreign Minister Roland Dumas also told Radio France Internationale that France played a role in initiating talks between President Omar Bongo's government and opposition leaders Thursday.

''France has not abandoned Africa,'' Dumas said. The Foreign Ministry said French military Transall airplanes would ship 25 tons of food to Port Gentil, the oil city worst hit by 10 days of rioting that erupted after the death of opposition leader Joseph Redjambe.

France sent 200 Foreign Legionnaires to Gabon ''to protect French citizens'' and bolster a force of 600 French troops based in the capital, Libreville, under a mutual defense agreement.

#90152u0548 06/01/1990 ~United Press International

(JUNE 1) UPI - Around the world... around the clock... U-P-I has the latest news.

German reunification and Lithuania's drive for independence took center stage yesterday as Presidents Bush and Gorbachev held their first talks in Washington. The discussions were described as upbeat. Later today, the leaders will sign formal accords on destroying chemical weapons and limiting nuclear weapons.

President Bush praised Gorbachev at a state dinner in the Soviet leader's honor last night and toasted what he termed ''the growing friendship'' between the superpowers. In response, Gorbachev predicted the summit may produce- quoting now- ''major results... maybe even the biggest'' compared to previous summits.

The State Department is urging all Americans to leave the West African country of Liberia. Six Navy ships carrying more than 22-hundred Marines are on their way to the coast to help evacuate U-S citizens if necessary. Liberia has been torn apart by civil war during the past six months.

60-Million dollars arrived in Nicaragua yesterday as the first installment of a 300-Million-dollar aid package. Officials say the cash-strapped nation will use the money to buy desperately needed imports such as oil, raw materials, and machinery. Nicaraguan inflation rose by 130 percent during May alone.

The United States has vetoed a Palestinian request to send a three-member United Nations Security Council delegation to the Israeli-occupied territories. The other 14 members of the U-N council voted in favor of the request, but the United States has veto power as one of the council's five permanent members.

#90152u0554 06/01/1990 ~United Press International
(JUNE 1) UPI - U-S officials in Beijing say a Chinese man set himself on fire outside the U-S Consulate in Shanghai. The man, who appeared to be in his 30's, suffered severe burns and there's NO immediate word on his condition. Chinese members of the consulate staff, along with about 100 others, witnessed the incident.

Alaskan environmental officials are NOT pleased with The Alaska Railroad's clean-up efforts of a fuel spill. The 120-thousand-gallon spill has spoiled beaver-dammed ponds and threatens other wildlife in the Minto Flats Wildlife Refuge. Officials say the railroad appears more interested in getting trains moving again than cleaning up the mess.

A federal appeals judge has granted a temporary stay halting the execution of convicted killer Thomas ''Scrappydoo'' Baal in Nevada. Baal had been scheduled to die early this morning. But his parents petitioned for a stay claiming their son is mentally incompetent. The stay is in effect until Saturday.

A published study finds more and more underweight babies are being born in New York City since the crack epidemic started. The report, conducted by the National Bureau of Economic Research, says the increase began in 1984, reversing a decline begun more than 20 years ago.

The National Commission on Children will deliver a report to President Bush and Congress next year recommending expanded services for abused and neglected children. Quoting the panel's chairman, Democratic Senator John Rockefeller the Fourth of West Virginia- ''We just have to get our act together on kids.''

#90152u0602 06/01/1990 ~United Press International
TOKYO (JUNE 1) UPI - Thousands of illegal workers fearing jail terms surrendered to Japanese authorities for deportation before a tough new immigration law took effect Friday.

Japan does not permit unskilled foreigners to work in the country except in authorized study or training programs.

However, high wages and a severe domestic labor shortage have drawn many thousands of workers from neighboring countries to take jobs in Japan. Estimates of the number of illegal laborers in the country range from 100,000 to 200,000.

The revised Immigration Control and Refugee Recognition Law, which

tightens control on illegal foreign workers and establishes penalties for their employers, went into effect Friday.

The law leaves in place existing provisions for jailing illegal foreign workers for up to three years or fining them up to $2,000, but those penalties are rarely applied.

Instead, the major change in the law was creation of fines and jail terms for employers of illegal workers.

The Justice Ministry said deportation of illegal workers rather than a jail sentence would continue to be standard treatment for first offenders but rumors of a crackdown by immigration authorities panicked thousands of undocumented foreign workers.

In the weeks before the law took effect, more than 20,000 foreign workers, mainly from Southeast Asian countries, jammed immigration offices in Tokyo and other parts of the nation, said a Justice Ministry official, who declined to be named.

As many as 2,000 foreign laborers a day sought repatriation at the Tokyo office during May, the official said.

Additionally, some employers were reportedly laying off illegal foreign workers to avoid risking the new penalties.

Friday, more than 300 workers gathered at the Tokyo immigration office, some carrying signs protesting the law, which was not expected to effect illegal workers who arrived in Japan before Friday.

#90152u0611 06/01/1990 ~United Press International

MIAMI (JUNE 1) UPI - The sight of hundreds of $5, $10 and $20 bills floating down the Miami River did not tempt a 34-year-old man hurrying to jury duty to stop and fish out a fortune. He called authorities instead.

''The money was floating all over the place,'' said Carlos Rangel, who was on his way to his third day of jury duty Thursday morning when he spotted the cash flow. ''I've never seen so much money in my life.''

Miami police say it's a good thing Rangel, a chemical company technician, opted to report his find to a Dade County bailiff, because the money - all $20,000 of it - was fake.

Paul Hackenberry, a spokesman for the Secret Service, said the money probably was dumped by counterfeiters because many of the bills had similar serial numbers.

''It must not have been good if they threw it in the river,'' Hackenberry said. ''Why go to the trouble of making it and then dumping it if it's good?''

But, it looked real to Rangel as it floated by.

''You look at it and think about it,'' he said. ''It takes about half a second to realize it's not worth it.''

But in case anyone else fished up a few of the bills, federal officials say it is a felony to knowingly pass counterfeit money. A conviction for passing $100 in fake currency carries a five-year prison sentence.

''It's great we do have citizens in Dade County that are honest and are willing to become involved to pass on information to the police department '' said Metro Dade police Sgt. Rick Conover.

MIAMI (JUNE 1) UPI - Eastern Airlines trustee Martin Shugrue plans to meet with federal prosecutors to discuss allegations airline managers falsified maintenance records shortly before three unions launched a crippling strike in 1989, it was reported Friday.

Shugrue had been meeting in Washington with members of Eastern's pilots unions but flew to New York Thursday for a meeting with U.S. Attorney Andrew Maloney, The Miami Herald reported.

A Brooklyn grand jury is investigating the airline's maintenance procedures and is reportedly considering indictments against Joseph Leonard, Eastern executive vice president and chief operating officer, and Edward Upton, a former vice president for maintenance and engineering.

Shugrue hopes to head off those indictments, The Herald said.

The inquiry centers on whether carrier managers falsified maintenance records at airports in Miami, Atlanta and New York before unions representing the carrier's pilots, flight attendants and ground workers struck the airline in March 1989.

That strike forced Eastern to file for protection from its creditors five days later.

Shugrue has been trying to restore faith in the troubled airline since his appointment by a New York bankruptcy court judge in April to head the company. The selection of Shugrue as Eastern's trustee stripped parent Texas Air Corp. and its chairman, Frank Lorenzo, of control of the airline.

Shugrue's task is to persuade Maloney that indictments should not be issued, the newspaper reported.

''Shugrue said he was headed up to New York to talk to the grand jury,'' a source close to the union negotiations told the Herald.

''He was speaking about the order of magnitude of the problems and he said if you think (these negotiations) are important, I've got some people up there ready to put a bullet through this (carrier's) heart.''

Robin Matell, an Eastern spokesman in Miami, said Shugrue did leave the union negotiations in Washington to travel to New York but declined to comment on Shugrue's purpose.

Leonard and Upton, who resigned from the carrier in February, have not been notified that they are subjects of a grand jury probe, Matell said.

#90152u0661 06/01/1990 ~United Press International

(JUNE 1) UPI - First lady Barbara Bush and her Soviet counterpart Raisa Gorbachev head to Wellesley College in Massachusetts this morning to address this year's graduating class.

The welcome mat is being rolled out for the first ladies, despite earlier protests by 150 of the 600 seniors that Mrs. Bush was an ''innappropriate'' choice for a commencement speaker.

The seniors opposed to Mrs. Bush as the main speaker said the first lady primarily is known for her husband's achievements, NOT her own accomplishments.

But the students now say they'll urge the first lady to work harder for womens' rights. A group of students have written to Mrs. Bush requesting more support for issues such as day care and reproductive rights.

Mrs. Bush and Mrs. Gorbachev are scheduled to address students for about six minutes each before taking a quick tour of Boston and returning to Washington for a weekend of Soviet-American summit activities.

The State Department is urging all Americans to leave the West African nation of Liberia. All non-essential government workers and dependents of U-S government workers have been ordered to leave.

Six Navy ships carrying more than 22-hundred Marines have been dispatched to the Liberian coast to assist with evacuations. But Navy Commander Dave Thomas says the ships probably will NOT be used and are being positioned in international waters only as a precaution.

Liberia has been ravaged by civil war during the last six months. Rebel leader Charles Taylor told United Press International Wednesday his fighters are ready to capture the airport in the capital city of Monrovia.

Taylor vowed he would personally shoot President Samuel Doe if the embattled leader resists guerrilla advances. Taylor predicted he would capture Monrovia within three weeks.

-30- 1990

#90152u0668 06/01/1990 ~United Press International

(JUNE 1) UPI - The Labor Department noted that ''since reaching a post-recession peak in March 1989, 310,000 factory jobs have been lost.''

''Industries hardest hit include electrical equipment, motor vehicles, apparel, fabricated metals and textile mills,'' the department said.

In the months ahead, economists expect more of the same for the nation's factories.

''It is unlikely to see manufacturing employment gains turn dramatically positive anytime soon,'' according to analysts at Mitsubishi Bank in New York. ''Manufacturing employment will be increased only after a lengthening in the workweek and a continued stream of better orders data occurs.''

But the Labor Department said mining employment increased slightly in May and ''health services accounted for half of the employment gain in the services industry and a third of the increase in total private jobs.''

Employment at retail stores, however, remained weak last month, the department said.

By category, the jobless rate stood at:

-4.7 percent for men.

-4.6 percent for women.

-15.5 percent for teenagers.

-4.6 percent for whites.

-10.4 percent for blacks.

-7.7 percent for Hispanics.

-30- 1375

#90152u0669 06/01/1990 ~United Press International

(JUNE 1) UPI - Nicaragua has received the first 60-Million dollars of a long-awaited 300-Million-dollar U-S aid package... money that's needed desperately for a battered economy that suffered 130-percent inflation last month.

American charge d'affaires John Leonard signed the 60-Million-dollar check yesterday at a Managua news conference with Nicaraguan President Chamorro.

Leonard said the initial installment will be used primarily for badly needed imports like oil, raw materials and farm machinery. He said NO timetable has been set for the arrival of the remaining 240-Million of the aid package. Congress approved the funds last week after months of bitter debate on the bill containing the money.

A State Department plane with 100 tons of medical supplies also arrived yesterday in Managua. Leonard also announced an agreement to provide five-point-five Million dollars in wheat to Nicaragua in the next four months.

Nicaragua has a depleted treasury and a 10-BILLION-dollar foreign debt.

Alaska environmental officials say the Alaska Railroad appears to be more interested in re-opening tracks at the site of a derailment than in cleaning up a 120-thousand-gallon fuel spill.

Beaver-dammed ponds contain most of the fuel and oil sheens have flowed into the Minto Flats Wildlife Refuge, threatening a variety of fish and other wildlife.

The clean-up co-ordinator for the state's Environmental Conservation Department, Pete McGee, says the railroad interrupted clean-up efforts for hours at a time to avoid disrupting train traffic.

Rail operations were back to normal yesterday after Monday's derailment when 19 cars in a 68-car fuel train jumped the track 40 miles south of Fairbanks.

McGee says only 10-thousand gallons of the diesel and jet fuel have been recovered. He adds substantially more fuel should be cleaned up three days after the spill.

The Alaska Railroad is a semi-independent entity and is NOT required to file spill contingency plans with the state like oil tankers operators, terminals and refineries must do.

#90152u0672 06/01/1990 ~United Press International

CHARLOTTE, NC (JUNE 1) UPI - A poll of likely voters conducted within the past week shows former Mayor Harvey Gantt holding a 10 percent lead over fellow Democrat Michael Easley for the right to challenge Sen. Jesse Helms R-N.C.

Gantt and Easley face each other in Tuesday's runoff election for the Democratic Party's nomination for the general election in November. Neither man received the 40 percent plurality needed in the six-candidate May 8 primary election to avoid a runoff.

The Charlotte Observer and television station WSOC questioned 402 likely voters from May 25-30. The poll has a 4.9 percent margin of error.

Of those polled, 42 percent favored Gantt, the first black mayor of Charlotte, and 32 percent supported Easley, a district attorney from Southport. The remaining voters were undecided.

Black voters endorsed Gantt by a 9-1 ratio, and the overall poll showed Gantt has a good chance to become the first black candidate to win a major runoff election in North Carolina.

Gantt led Easley in the central Piedmont region, which has a large base of voters, by 52 percent to 27 percent. It was the only section of the state that showed a clear majority of support.

Easley held a 32 percent to 28 percent lead in eastern North Carolina, and Gantt carried the western part of the state 42 percent to 29, showing he gained the support of those who voted in the primary for former state Sen. Bo Thomas.

Gantt told the newspaper the poll results were ''interesting, but ... this late in the ball game, much of our concentration is going to be in the get-out-the-vote efforts.''

Easley said he is counting on the undecided voters.

''They're not going to make up their minds until the last minute,'' Easley said.

The poll showed Gantt winning the support of 75 percent of black voters, who make up 26 percent of the state's registered Democrats but 30 percent of those described as most likely to vote. Easley garnered 43 percent of the support of white voters.

#90152u0673 06/01/1990 ~United Press International
(JUNE 1) UPI - The unions representing striking Greyhound workers have hired a financial adviser and... according to sources... want to explore a possible employee buyout of the financially beleaguered company.

The Labor Department confirmed yesterday that Secretary of Labor Dole met with Greyhound chairman Fred Curry at Curry's request.

Dole will meet with union leaders next week.

These developments came as the National Labor Relations Board formally issued a complaint charging the national bus line with unfair labor practices. A September 17th hearing in Milwaukee has been set on the issue.

Greyhound's 93-hundred workers, including some six-thousand drivers... have been on strike since March 2nd. The bitter dispute has been marred by many incidents of violence, including the death of one picketer.

Greyhound faces the possibility of being forced into bankruptcy. It announced in early May that it had failed to make a five-Million-dollar lease payment on its properties... and that it would NOT pay a nearly 10-Million-dollar interest payment on its debt due May 15th.

#90152u0676 06/01/1990 ~United Press International
WASHINGTON (JUNE 1) UPI - America's jobless rate dipped to 5.3 percent in May with the hiring of legions of temporary workers to help collect data for the government's 1990 census, the Labor Department said Friday.

Private economists predicted a jobless rate of 5.4 percent for the month.

An estimated 164,000 jobs were added to non-farm payrolls, including 147,000 temporary posts with the Census Bureau, according to the monthly report compiled by the department's Bureau of Labor Statistics.

''Private payrolls, however, were little changed,'' the report said, as the manufacturing sector continued to eliminate jobs and the construction industry hired fewer people than usual in May.

The civilian jobless rate stood at 5.4 percent in April and 5.2 percent in March, the Labor Department said. Including military personnel, the jobless rate for May also stood at 5.3 percent, the department said.

The average workweek for May held steady at 34.6 hours.

The Labor Department also noted that ''since reaching a post-recession

peak in March 1989, 310,000 factory jobs have been lost.''

''Industries hardest hit include electrical equipment, motor vehicles, apparel, fabricated metals and textile mills,'' the department said.

In the months ahead, economists expect more of the same for the nation's factories.

''It is unlikely to see manufacturing employment gains turn dramatically positive anytime soon,'' according to analysts at Mitsubishi Bank in New York. ''Manufacturing employment will be increased only after a lengthening in the workweek and a continued stream of better orders data occurs.''

But the Labor Department said mining employment increased slightly in May and ''health services accounted for half of the employment gain in the services industry and a third of the increase in total private jobs.''

Employment at retail stores, however, remained weak last month, the department said.

By category, the jobless rate stood at 4.7 percent for men, 4.6 percent for women, 15.5 percent for teenagers, 4.6 percent for whites, 10.4 percent for blacks and 7.7 percent for Hispanics.

MOUNT CLEMENS, MI (JUNE 1) UPI - Four Lebanese immigrants were convicted of smuggling heroin to raise money for the Christian militia in their war-torn homeland.

Habib Haddad, 23, one of the four defendants, testified that the lives of members of his family were threatened to force them to sell drugs.

Haddad, his father, George Haddad, 60, Michael Laboud and Hanna Nasr were convicted of selling a kilo of heroin to undercover officers for $130,000.

Nasr, a Windsor, Ontario, resident, is a former Beirut police officer who emigrated to Canada in 1976. The others all live in Dearborn.

All four face mandatory terms of life without parole when they are sentenced July 26.

''The faction purportedly receiving the proceeds from the drug sales were the Christian fundamentalist movement in Lebanon to continue the war over there,'' said Eric Kaiser, a prosecutor working with the Southeast Michigan Conspiracy Investigative Organization. ''We know this from several independent sources that have first-hand knowledge of it,'' Kaiser said.

Kaiser said he believes the four were involved in three or four drug deals amounting to sales of a half-million dollars.

He said their lifestyles gave no hint of what they were up to.

''They lived in poor - shall I say modest - areas of Dearborn and the cars they drove didn't support the lifestyle of drug dealers,'' he said.

Habib Haddad testified he was a college student who worked 90 hours a week in a clothing store and restaurant to support his family.

A defense attorney said the Christian militia sometimes coerce their countrymen into drug dealing.

DETROIT (JUNE 1) UPI - Chrysler Corp., which has seen three top executives leave in recent weeks, will lose a fourth later this year to retirement, a newspaper reported Friday.

The Detroit Free Press, quoting unnamed sources, said Bennett Bidwell, chairman of Chrysler's carmaking unit, Chrysler Motors, has been planning to retire in December. Bidwell is 62.

The paper said its sources said Bidwell has been indicating he would retire because of his health.

Asked about his plans, Bidwell said, ''I could lie to you, but I won't comment.''

Company spokesmen would not discuss Bidwell's plans or his health. But they did confirm he recently has cut back his working hours.

A high-level realignment designed to compensate for the departure of Vice Chairman Gerald Greenwald gives Bidwell no additional responsibilities.

Greenwald, the heir to Chrysler Chairman Lee Iacocca, said he was leaving to run an employee group seeking a $4.3 billion buyout of United Air Lines.

Chrysler Treasurer Frederick Zuckerman last week announced he was leaving to pursue unspecified interests. Michael Hammes, vice president of international operations, said two weeks ago he was departing for an executive post at Black & Decker.

Bidwell joined Chrysler in 1983 as executive vice president, leaving Hertz

Corp. where he had served as president and chief operating officer. Prior to joining Hertz, Bidwell had worked, along with Iacocca, at Ford Motor Co.

A former Chrysler executive told the Free Press Bidwell will remain if asked by Iacocca.

In the Chrysler realignment, Robert S. Miller Jr., who was named vice chairman of the corporation, will assume responsibility for some of Greenwald's functions, including financial and technology subsidiaries and international operations.

Miller's previous duties as vice president and chief financial officer will be taken over by Jerome York, who was promoted from vice president and controller.

#90152u0804 06/01/1990 ~United Press International

WASHINGTON (JUNE 1) UPI - America's jobless rate dipped to 5.3 percent in May with the hiring of legions of temporary workers to canvass the country for the government's 1990 census, the Labor Department said Friday.

Many economists predicted a jobless rate of 5.4 percent for the month.

''The economy in terms of jobs has been flat for the last two months,'' said Brian Keyser, an economist at First Fidelity Bancorp in Philadelphia. ''I wouldn't get encouraged because the jobless data fell from 5.4 to 5.3.''

An estimated 164,000 jobs were added to non-farm payrolls in May, including 147,000 temporary posts with the Census Bureau, according to the monthly report compiled by the department's Bureau of Labor Statistics.

''Private payrolls, however, were little changed,'' the report said, as the manufacturing sector continued to eliminate jobs and the construction industry hired fewer people than usual in May.

The civilian jobless rate stood at 5.4 percent in April and 5.2 percent in March, the Labor Department said. Including military personnel, the jobless rate for May also stood at 5.3 percent, the department said.

The average workweek for May held steady at 34.6 hours.

''Employment growth has been very slow, and what growth there has been was concentrated in a very few industries,'' said Janet Norwood, commissioner of the Bureau of Labor Statistics. ''The job market has been bolstered only by census hiring.''

''The private sector has been stagnant for the past three months, with job losses in construction and manufacturing,'' Norwood said. ''Still, relatively slow labor force expansion has served to minimize the impact of these developments on unemployment.''

The Labor Department also noted that ''since reaching a post-recession peak in March 1989, 310,000 factory jobs have been lost.''

''Industries hardest hit include electrical equipment, motor vehicles, apparel, fabricated metals and textile mills,'' the department said.

In the months ahead, economists expect more of the same for the nation's factories.

''It is unlikely to see manufacturing employment gains turn dramatically positive anytime soon,'' according to analysts at Mitsubishi Bank in New York. ''Manufacturing employment will be increased only after a lengthening in the workweek and a continued stream of better orders data occurs.''

But the Labor Department said mining employment increased slightly in May and ''health services accounted for half of the employment gain in the services industry and a third of the increase in total private jobs.''

Employment at retail stores, however, remained weak last month, the department said.

By category, the jobless rate stood at:

-4.7 percent for men.

-4.6 percent for women.

-15.5 percent for teenagers.

-4.6 percent for whites.

-10.4 percent for blacks.

-7.7 percent for Hispanics.

(JUNE 1) UPI - U-S officials in China say a Chinese man set himself on fire today outside the U-S Consulate in Shanghai. U-S officials say the man's motive was NOT immediately apparent. He's reportedly still alive... suffering from severe burns.

The 1990 Atlantic-Caribbean hurricane season begins today. Hurricane watchers in Miami say changing rainfall patterns in western Africa could bring more devastating storms to the U-S Atlantic and Gulf coasts this decade.

The State Department wants all Americans to leave Liberia as the government comes closer to collapse in a bloody civil war. Six Navy ships with Marines were dispatched to the African coast to help evacuate Americans if needed.

Federal health officials in Atlanta report nearly 40 percent more measles cases nationwide this year than in 1989. The total of 17-thousandpercent jump over the year before.

California-based preacher Morris Cerrulo says he plans to re-establish P-T-L's Heritage U-S-A complex as religious retreat. Cerrulo made a successful 52-Million-dollar first-step bid yesterday to buy the defunct P-T-L ministry.

Romania says more than 100 aftershocks rattled buildings in three countries yesterday as the death toll climbed to 13 in the region's worst earthquake in 13 years. Bulgaria and the Soviet Union also were hit by the temblor Wednesday.

Students from elementary school to college gripe about cafeteria food... but for about 60 children in Providence, Rhode Island, the complaints are NO joke. Officials say the children were hospitalized yesterday in an apparent case of mass food poisoning from their school lunch.

-30- 1803

#90152u0919 06/01/1990 ~United Press International

WELLESLEY, MA (JUNE 1) UPI - First lady Barbara Bush defended her role as wife and mother Friday, telling graduates at prestigious Wellesley College that society's success ''depends not on what happens at the White House, but on what happens inside your house.''

Some students at the women's college had protested the choice of Bush as commencement speaker, but the welcome mat was out Friday for Bush and Soviet first lady Raisa Gorbachev.

About 150 graduating seniors had signed a petition saying Bush was an inappropriate choice to speak because she was was known primarily for her husband's accomplishments.

School officials expected about 5,000 people to attend the graduation under a white tent set up among 19th-century stone towers and brick quadrangles on Wellesley's grassy, 500-acre rolling campus west of Boston.

Bush and Gorbachev were scheduled to address students for about six minutes each before taking a quick tour of Boston and returning to Washington for a weekend of Soviet-American summit activities.

But Bush defended her decision to be a homemaker and mother.

''One of the reasons I made the most important decision of my life - to marry George Bush - is because he made me laugh,'' she said. ''It's true; sometimes we've laughed through our tears. But that shared laughter has been one of our strongest bonds.''

''Find the joy in life,'' she urged the graduates.

She noted that the roles of men and women were changing.

''Maybe we should adjust faster, maybe slower,'' she said. ''But whatever the era, whatever the times, one thing will never change: Fathers and

mothers, if you have children, they must come first.

''Your success as a family - our success as a society - depends not on what happens at the White House, but on what happens inside your house.''

She told the graduates, ''At the end of your life you will never regret not having passed one more test, not winning one more verdict, or not closing one more deal. You will regret time not spent with a husband, a friend, a child or a parent.''

Before the women spoke, students who had protested the Bush choice released a letter to the first later urging her to speak out more publicly on women's issues.

''We think she should begin to focus on women's issues more publicly,'' said senior Ruth Potee.

Potee, who signed the protest petition, described the letter as ''very upbeat. We are saying that we are excited she is here. But we are also saying that as a woman in her position, she has the opportunity that people like you and I might not have to make a strong statement about women,'' she said.

The letter said, ''We ask you, Barbara Bush, as a concerned mother and as a symbol of service to others, to take a definitive and vocal stand on the following critical issues that shape the lives of women in the United States:''

It listed issues including day care, family and medical leaves, welfare cuts, AIDS research, education, ''deterioration of women's reproductive rights,'' and the wage gap between men and women. The letter thanked the first lady for speaking at Wellesley's commencement.

Potee said the students addressed only to Bush because ''we decided that the women of the Soviet Union should make their own requests to Raisa.''

Potee said the letter was written by Susana Cardenas and Peggy Reid, two of the students who co-authored a petition against the selection of Bush as the school's guest of honor.

Bush later dismissed the protest as ''much ado about nothing'' and invited Gorbachev to join her at Wellesley and visit Boston for the first time during their husbands' summit.

Bush dropped out of Smith College in Northampton after her freshman year to marry George Bush.

Gorbachev, hailed as chic and intellectually adept, often accompanies her

husband, Soviet President Mikhail Gorbachev, to public events and on official trips.

The Soviet first lady, a grandmother like Bush, holds a doctorate in philosophy and lectured on Marxism-Leninism at Moscow University, where she met her husband.

#90152u0928 06/01/1990 ~United Press International

DALLAS (JUNE 1) UPI - Test-tube studies show vitamin C might prevent the process that many scientists believe starts cholesterol build-up in blood vessels, medical researchers reported Friday.

In studies using human cells grown in laboratory dishes, University of Texas Southwestern Medical Center researchers found that vitamin C slowed the oxgyen modification of low-density lipoprotein, the ''bad'' form of cholesterol known as LDL.

Many scientists think oxygen modification, or oxidation, plays a key role in hardening of the arteries because it changes LDL ''so that it is taken up faster by the artery wall cells,'' said Dr. Ishwarlal Jailal, the study's principal researcher.

Evidence suggests that immune cells, known as macrophages, in the lining of arteries ignore normal LDL but absorb oxidized LDL, forming the fatty streaks that are the foundation of artherosclerosis.

In addition to vitamin C, which is found in citrus fruit, researchers said they discovered that vitamin E has an anti-oxidant effect, although not as strong as vitamin C.

Scientists in recent years have speculated that finding ways to block the oxidation of ''bad'' cholesterol might prevent atherosclerosis, the leading killer of Americans.

Jailil said his study, published Friday in the journal Atherosclerosis, showed the levels of vitamin C used to block LDL oxidation in the test-tube were in the range that could be safely given to humans.

The Texas team is trying to confirm the laboratory findings in human volunteers.

''We're feeding them vitamin C and vitamin E to see if we can block the modification of the LDL with oxygen,'' Jailil said.

Jailil said not yet ready to recommend large doses of vitamin C as a way of preventing heart disease but he indicated the finding may turn out to

be particularily important for smokers.

Smoking, a major risk factor for the development of heart disease, depletes vitamin C levels. These individuals may need twice the recommended daily allowance of 60 milligrams of vitamin C, Jailil said. That would be the equivalent of two or three oranges day.

Two other major risk factors for heart disease, diabetes and stress, also deplete the body's vitamin C, lending credence to the theory that oxidation of LDL plays an important role in the development of atherosclerosis.

#90152u0945 06/01/1990 ~United Press International

(JUNE 1) UPI - The superpower summit enters its second day today with Presidents Bush and Gorbachev sitting down for another round of private talks. The question of Lithuanian independence is expected to figure prominently in the discussions. The leaders also will sign several agreements on destroying chemical weapons and limiting nuclear testing.

President Bush came away from his first day of talks with Gorbachev saying the Kremlin leader possessed ''strength and confidence.'' Bush described their discussions as ''positive'' and added Gorbachev is a man- quote- ''determined to do his job.'' Bush appeared upbeat and said he's ''convinced'' the summit will narrow remaining differences.

The Peruvian Health Minister says air force and private planes are ferrying rescue workers and emergency supplies to remote cities in the Amazon basin. The northern region was rocked by a strong earthquake and about 60 aftershocks Wednesday and yesterday. Civil defense officials say about 200 people were killed and more than 15-hundred others injured.

A powerful earthquake shook Tokyo today, but police say there were NO injuries or damage. The quake measured six on the Richter scale and was located 12 to 18 miles off Japan's eastern shore. Tokyo is heavily fortified against earthquakes, but buildings did gently sway for a few seconds.

A federal appeals court temporarily halted this morning's scheduled execution of convicted killer Thomas ''Scrappydo'' Baal at the Nevada State Prison. The condemned man said he wanted to die, but his parents petitioned for a stay claiming their son was NOT mentally competent to waive further appeals.

#90152u0952 06/01/1990 ~United Press International

TOKYO (JUNE 1) UPI - Japan's automobile sales in May increased 6.1 percent over a year ago to a record 444,040 units for the month, the Japan Automobile Dealers Assocation said Friday.

The association said sales of passenger cars with engine capacity of 2,000 cc or larger continued to be brisk, marking a 59.6 percent increase over a year ago to 31,499 units. Sales of smaller cars dropped 1 percent to 285,737 units. The figures excluded sales of minicars.

Imported car sales jumped 21.4 percent to 16,325 units.

Sales of trucks increased 15.1 percent to 125,012 units and those of buses posted a 21.0 percent increase to 1,792 units, the association said.

Industry leader Toyota sold 194,199 units in total in May, up 8.4 percent. No. 2 Nissan increased its sales 5.5 percent to 103,420 units.

Some smaller manufacturers did not fare well. Daihatsu suffered a 23.5 percent fall in sales to 3,976 units, while Fuji Heavy Industries' sales dropped 37.9 percent to 4,836 units.
